PREFACE

'Farmers Suicides' is an important subject to be studied and the data collection on this subject is somewhat a difficult task. The aim of this survey is to study the background and reality of the farmer's suicide occurred during the period 2003-2007. All the families of farmers who committed suicide were visited and details are collected in a format designed for the purpose. This report is prepared on the basis of the study conducted and it is expected to fulfill the needs of planners and researchers who interested in the subject and to expose the problems in the agricultural sector. The report depicts the social, educational and financial background of the families and the actual cause for the unfortunate action. Attempts were also made in the report to highlight the district wise comparison of the data collected.

Even though the data collection was a difficult task the investigators and supervisors (at Taluk level and District level) have success fully completed this work in time. I would like to express my gratitude to all of them who render their valuable service. This report is prepared in the Survey Design Division of Directorate of Economics and Statistics with the full co-operation of Computer Division.

Thiruvananthapuram

Highlights

- **Nine hundred and seventy nine farmers committed suicide during the period 2003-2007.**
- **Highest number of suicides occurred in Wayanad and lowest in Ernakulam.**
- **59% of the suicide farmers belong to the age group of 40-60.**
- **70% of the suicide farmers belong to Hindu religion.**
- **59 % of farmers adopted Poison/hanging to end the life.**
- **4 % of farmers never cultivated any crop before their suicide.**
- **58 % of the suicides were to indebtedness.**
- **67% of loans were availed for agriculture, 50% utilized for agriculture purpose.**
- **740 loans were taken from private moneylenders bearing high rate of interest.**
- **The government waived Eight hundred and sixty five loans.**

Chapter 1

Introduction

The Indian farmers are trapped in a vicious circle of crop-loss, low price and indebtedness, which lead to dilapidated conditions in agriculture. It is generally accepted that agricultural activity is a noble profession. However nature's fury, exploitation of the market and negligence on the part of the authorities compel the farmers and agriculturists to do away with extensive cultivation. In recent years, the noble profession of Agriculture has become non-profitable to farmers. The contribution of agricultural sector to National income estimation declined from 55% in 1950-51 to 18% in 2007-08, while people's dependancy on agriculture remains almost the same.

In our state also agricultural sector depicts the real scenario that challenges the conventional glory of our past agriculture. Today farmers find it difficult to raise sufficient resources to meet their requirements, since the return from agriculture is insufficient. The cost of cultivation incurred and income earned by farmers from agriculture confirm their miserable situations. The farmers are forced to continue the agricultural activities, since they do not have any alternative and they are in a vicious circle of indebtedness. Thus they are forced to avail loans from banks and other financial institutions, which make some cultivators bankrupt and force them to escape from the miserable situation by committing suicide. An unfortunate consequence of the constellation of hardships faced by these families is the growing number of suicides among farmers, which is not prevalent in any other sectors.

The subject 'Farmers Suicide' is widely discussed in political and economic spheres. In recent years farmer's suicides had been receiving a lot of media attention, more so by the dailies. Increasing incidence of farmer's suicide was an issue of great concern to various state governments. From many corners, there are vague reports regarding the number of farmers suicide and its genuine reasons. Addressing the issue without knowing the reasons make the situation more complicated. There are no authenticated study reports/data regarding the actual number of suicide cases and causes. In these circumstances, Government of Kerala accorded sanction to the DES under take a fact-finding study regarding farmer's suicide and its reasons.

1.1 Objectives of the Survey

- To study the magnitude of farmers committed suicide
- To study the circumstances that led them to commit suicide.
- To study the magnitude of indebtedness
- To study the present liability and socio-economic status of the dependents of deceased.
- To suggest the remedial measures to avoid such situations in future.

1.2 Methodology

A list of the farmers who committed suicide in the last five years (2003-2007) has been collected at district level by contacting the crime records bureau of Police Department, Agricultural department and lead district bank in each district. The final list for the survey was obtained from District Collectorates and through local enquiry. After preparing the list, the field investigators of the department have visited each and every household of the victims, and collected details from the close dependent of deceased in a prescribed schedule/format, which was approved by the technical committee of the department (appended).

1.3 Training

Since the subject is of sensitive nature specialized training was imparted to the field investigators and their supervisors regarding the objectives, concept, definitions and schedules before the execution of field work.

1.4 Period of survey

The field survey has been started in January 2009 and completed in February 2009.

1.5 Supervision

Taluk statistical officers and statistical inspectors were the field level supervisors of the survey. To ensure the quality of the data from the field, supervisory officers have conducted inspection of at least 20% of the households, from where data has been collected by the investigators. At district level two officers including Deputy Director supervised the whole survey work.

1.6 Processing Of Data

The schedules canvassed at field level were scrutinized at district offices and forwarded to the directorate. The schedules were then coded and computerized by the Computer Division at the Directorate. The computer division in the Directorate has prepared necessary software and validated the data. This report has been prepared in the Survey & Design Division of the Department.

Chapter 2

Basic Information of the Farmers

The main objective of the survey is to find out the actual number of farmers, who committed suicide and various reasons for the tragic end from 2003 to 2007. The frame of the survey is obtained from Crime Records Bureau of Police Department, District Collectorates, District lead banks etc and through local enquiry.

The survey collected details of 944 families, in which at least one suicide of farmer was occurred. As per the survey, the total number of suicides occurred in these families from 2003-2007 is 979 and its district wise break-up is given.

Table 2.1- District wise details of number of suicides

SI No I	District II	Number of Families III	% to Total No. of Families IV	Number of Suicides V	% to Total No. of suicides VI
1	Kasaragod	103	10.91	106	10.83
2	Kannur	111	11.75	113	11.54
3	Wayanad	306	32.41	317	32.38
4	Kozhikkode	41	4.34	46	4.69
5	Malappuram	11	1.16	12	1.23
6	Palakkad	86	9.11	90	9.19
7	Thrissur	75	7.94	78	7.97
8	Ernakulam	4	0.42	4	0.41
9	Idukki	102	10.80	106	10.83
10	Kottayam	9	0.95	9	0.92
11	Alappuzha	20	2.12	20	2.04
12	Pathanamthitta	14	1.48	15	1.53
13	Kollam	15	1.58	16	1.63
14	Thiruvananthapuram	47	4.97	47	4.81
	Total	944	100.00	979	100.00

In Wayanad district 306 families, in which at least one suicide has been occurred during 2003-2007, which was the highest when compared to other districts. 317 cases of suicides were happened in Waynad district alone. More than 100 suicides were reported from the districts Kasaragod, Kannur, Wayanad and Idukki. In Ernakulam district only 4 suicides were happened during 2003-2007. In Ernakulam, Kottayam, Alappuzha and Thiruvananthapuram districts, only one suicide was occurred in each family. In the remaining districts, in some families' more than one member have committed suicide

during the period. In 17 families multiple suicides have occurred, that is more than one member have committed suicide at the same event. The details are furnished in the following table.

Table 2.2-Number of families according to number of suicides in each family

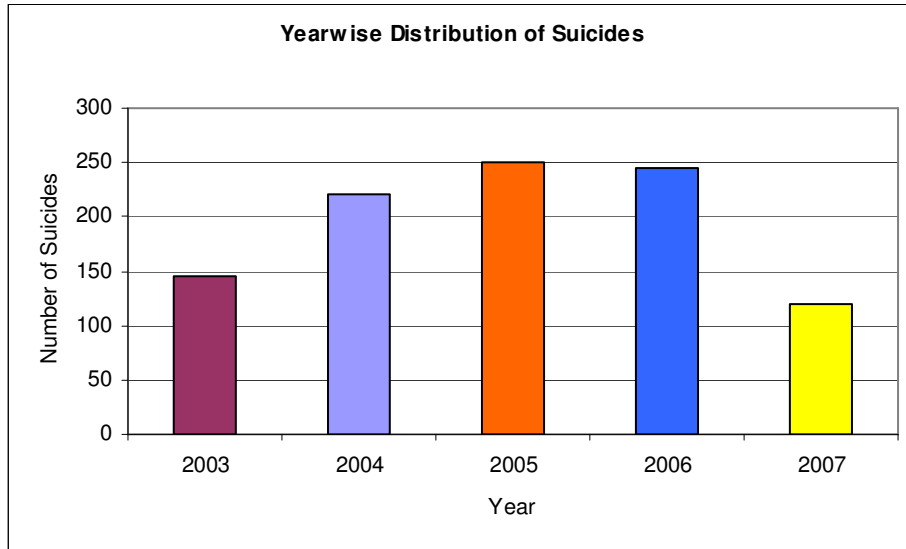

SI No I	Number Suicides II	Number of Families III	Total No. of Suicides IV
1	1	919	919
2	2	18	36
3	3	5	15
4	4	1	4
5	5	1	5
6	Above 5	0	0
Total	-	944	979

2.2 Distribution by Year

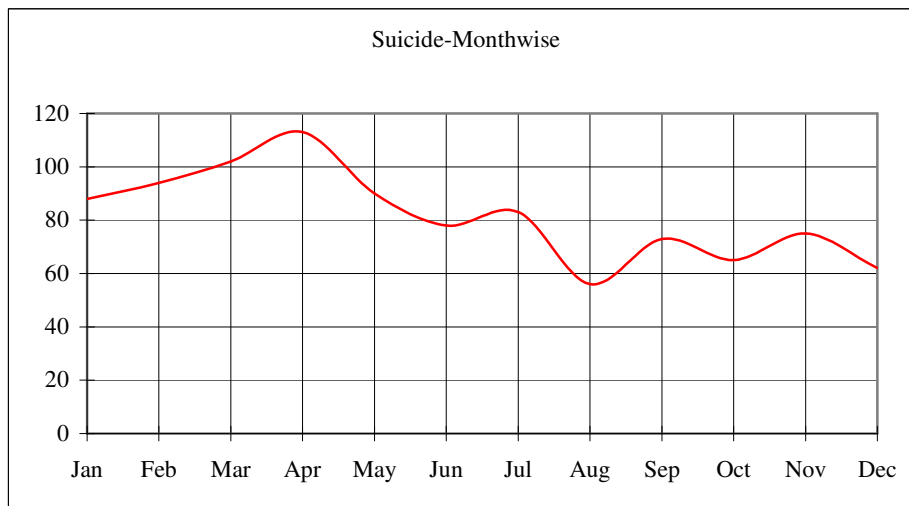

The total 979 suicides are happened in between 2003 and 2007. More than 200 suicides (approximately 73.03%) have been reported in the years 2004, 2005 and 2006.

2.4-Year wise Distribution of Suicides

SI No I	Year II	Number of Suicides III	Percentage IV
1	2003	145	14.81
2	2004	220	22.47
3	2005	250	25.54
4	2006	245	25.03
5	2007	119	12.15
Total	-	979	100.00

It is noted that the highest and lowest number of suicides occurred during the month April and August respectively. The details are graphically represented here under.

2.3 Distribution by Age

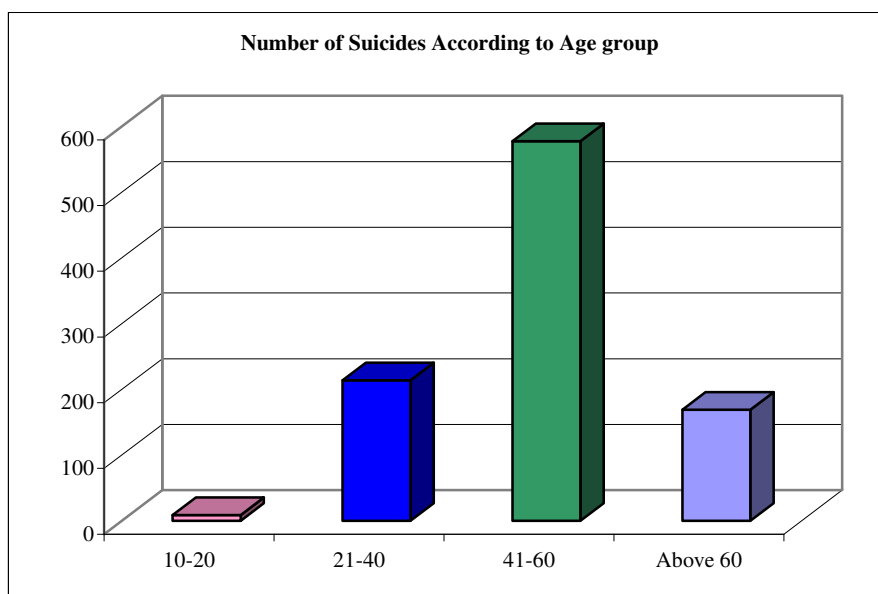

Out of 979 suicides, 59.04% of the victims belonged to the age group of 40-60 years, 21.85% belonged to the age group 21-40 years and 17.26% above 60 years. It is seen that 97 women and 8 children (less than 10 years of age) have committed suicide.

Table 2.5- Number of suicides according to age

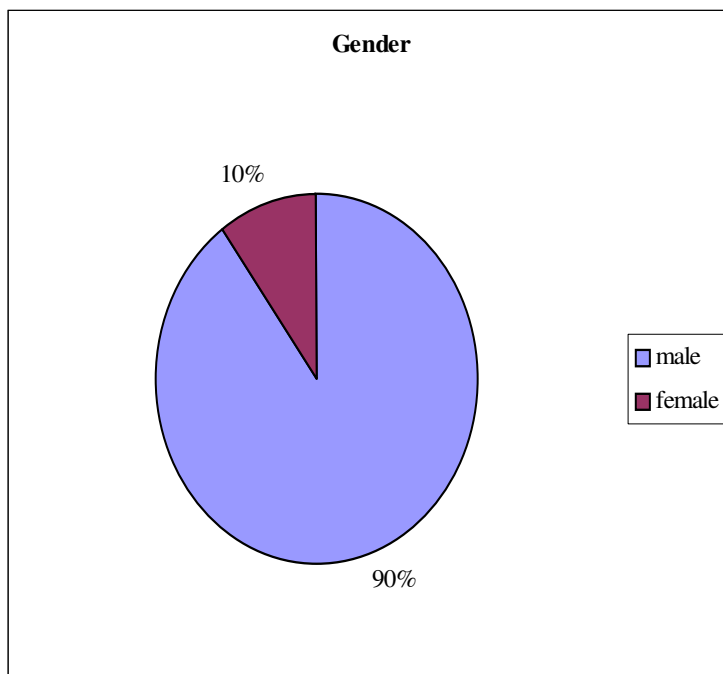

Sl. No I	Age group II	Number of Suicides III	Percentage IV
1	below 10	8	0.82
2	11-20	9	0.92
3	20-40	214	21.86
4	40-60	578	59.04
5	Above 60	169	17.26
6	Not Reported	1	0.10
Total	-	979	100

Table 2.6-Number of Suicides according to Gender

Sl No I	Age (years) II	Male III	Female IV	Total V
1	Upto 10	4	4	8
2	11-20	7	2	9
3	21-40	183	31	214
4	41-60	531	47	578
5	Above 60	156	13	169
6	Not reported	1	0	1
Total	-	882	97	979

Among the victims, 882 were male and remaining 97 were female. All women and children who committed suicide were close dependent of men who committed suicide in the family.

2.4 Religion

The religion-wise classification of the data shows that 66.90 % of the victims belonged to Hindu religion, among which 88.54% were male and 11.46% were female. 29.93% and 2.65% victims were from Christian and Islam religion respectively. Details of number of victims according to gender and religion are furnished in the following tables.

Table 2.6 -Number of families according to religion

SI No I	Religion II	Number of Families III
1	Hindu	626
2	Christian	287
3	Islam	25
4	Others	6
Total	-	944

Table 2.7-Number of victims according to religion

SI No I	Religion II	Number of victims			Percentage VI
		Male III	Female IV	Total V	
1	Hindu	580	75	655	66.90
2	Muslim	22	4	26	2.66
3	Christian	275	18	293	29.93
4	Others	5	0	5	0.51
Total		882	97	979	100

It is revealed that no suicides were reported from Islam religion in the districts of Ernakulam, Kottayam, Alapuzha, Pathanamthitta and Thiruvananthapuram. Like wise no suicides were reported from Christians in Alapuzha district. All the victims in Alapuzha district belong to Hindu religion. Religion wise number of families is available in Table 3(B) of the appendix.

2.5 Social group

Out of 944 families, 54 and 22 families belonged to SC and ST respectively. 445 suicides were from Other Backward Communities and 455 belonged Forward communities. The details are furnished below.

Table 2.8 -Social Group Classification of Families

SI No I	Social Group II	Number of Families III
1	SC	54
2	ST	22
3	OBC	419
4	Others	446
5	Mixed	1
6	Not Reported	2
Total		944

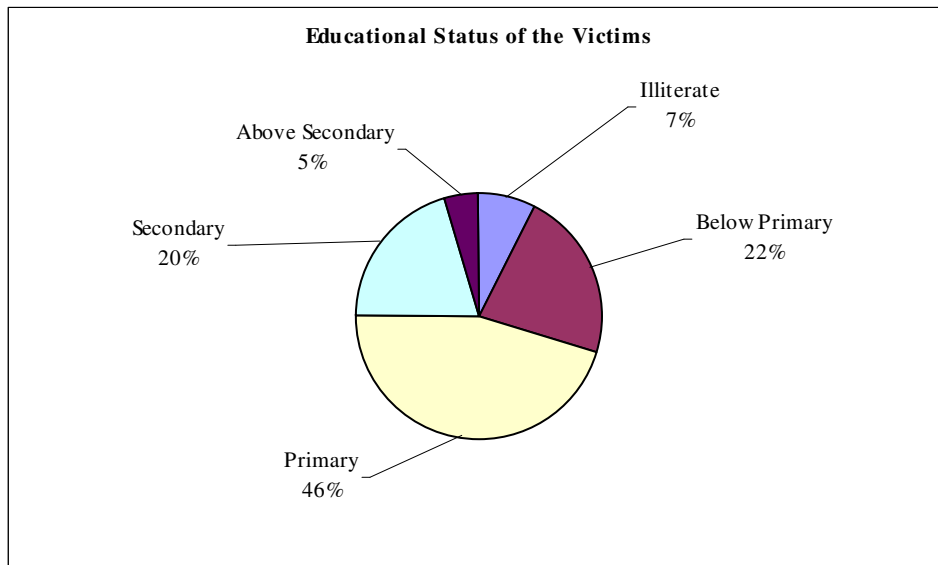

Table 2.9- Social Group Classification of Victims

SI No I	Social Group II	Number of Suicides			Percentage VI
		Male III	Female IV	Total V	
1	SC	51	4	55	5.62
2	ST	21	1	22	2.25
3	OBC	385	60	445	45.45
4	Others	423	32	455	46.48
5	Not Reported	2		2	0.20
Total		882	97	979	100

The ST farmers committed suicide only in five districts viz Kasargod, Kannur, Waynad, Kozhikode and Idukki. From Pathanamthitta and Kollam districts no deaths were occurred in SC families.

2.6 Education

Out of 979 suicide farmers, 74.77% were illiterate or had primary level education. About 20.42% of the victims were educated at secondary level. About 4.29% had higher secondary level of education or above. It is to be noted that 3 persons having postgraduate degree and 10 having graduate degree had committed suicide.

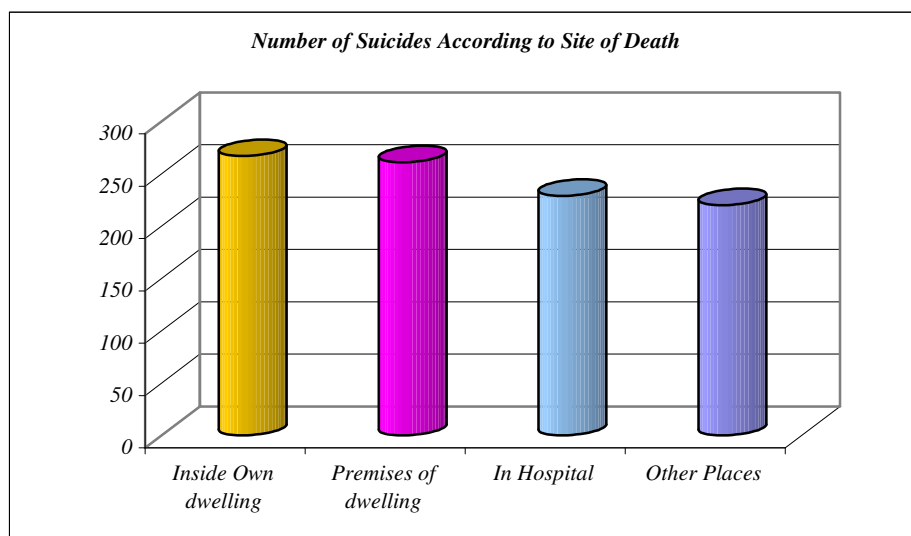

2.7 Distribution According to Major Activity

The main activities of the whole victims were not agriculture. Regular salaried employees, self-employed in non-agricultural field, pensioners, house wives, students etc were also included in the group of victims. Even though 58.63% of the victims were self employed in agriculture. 21.96% of the victims were casual labourers. The number of victims in the other categories was comparatively small. This information indicates that all the suicide persons were not fully engaged in agriculture, few suicide persons, not engaged in agriculture, were close dependents of the victims. The indebtedness, absence of continuous income, lack of saving habit and other financial problems aggravated the situation, which compelled them to commit suicide.

2.8 Site of Death.

About 53.93% victims committed suicide inside their dwelling house or premises of dwelling. About 23.39% of the deaths were occurred in hospitals, where they were admitted for the treatment. In few cases, the places where they committed suicide were not reported.

2.10- Number of Suicides According to Site of Death

SI No I	Site of death II	No of Suicides			Percentage VI
		Male III	Female IV	Total V	
1	Inside Own dwelling	223	44	267	27.27
2	Premises of dwelling	246	15	261	26.66
3	In Hospital	203	26	229	23.39
4	Other Places	208	12	220	22.47
5	Not Reported	2		2	0.21
Total		882	97	979	100.00

2.9- Means of suicide

As per details of the 979 cases, 58.73% had committed suicide by using poison. Majority of the remaining committed suicide by way of hanging. Only 7.55% of the victims have adopted other methods of suicide. The method of suicides of 6 victims could not found at the time of survey.

Table 2.10- Number of farmers according to Method of Suicide

Sl No I	Means of Suicide II	Number of Suicides III	Percentage IV
1	Taking Poison	575	58.73
2	Hanging	324	33.09
3	Other Method	74	7.56
4	Not Reported	6	0.62
Total		979	100.00

Chapter 3 Family Status of the Farmers

The Survey collected details on various aspects such as possession of land, dwelling status, and other basic facilities like electricity, telephone, vehicle etc to assess the status of the families, before and after the death of the farmers. These details are furnished in this chapter.

3.1 LAND

3.1.1 Land owned

Out of 944 families surveyed, 302 families (31.99%) possessed land in between 100 and 249 cents. About 20.97% of the families possessed land less than 100 cents. It is noticeable that 40 families had land of above 500 cents. Eighteen families had no land of their own at the time of suicide.

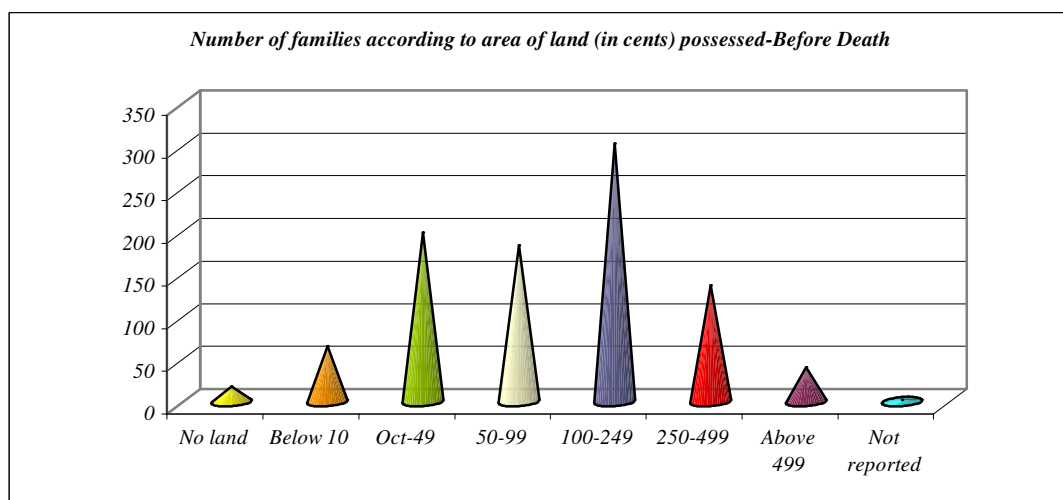

Table 3.1- Number of families according to area of land possessed

Sl No I	Area of land Possessed (Cents) II	Number of families	
		Before Death III	After Death IV
1	No land	18	31
2	Below 10	65	92
3	10-49	198	261
4	50-99	183	199
5	100-249	302	243
6	250-499	136	93
7	500 cents and above	40	21
8	Not reported	2	4
Total		944	944

The survey reveals that after suicide, the extend of land possessed has come down due to the liability and other unexpected expenses incurred in connection with the suicide. The number of families possessing less than 100 cents has been increased and the number of families possessing more than 100 cents has been decreased. A comparison is given in Table 3.2.

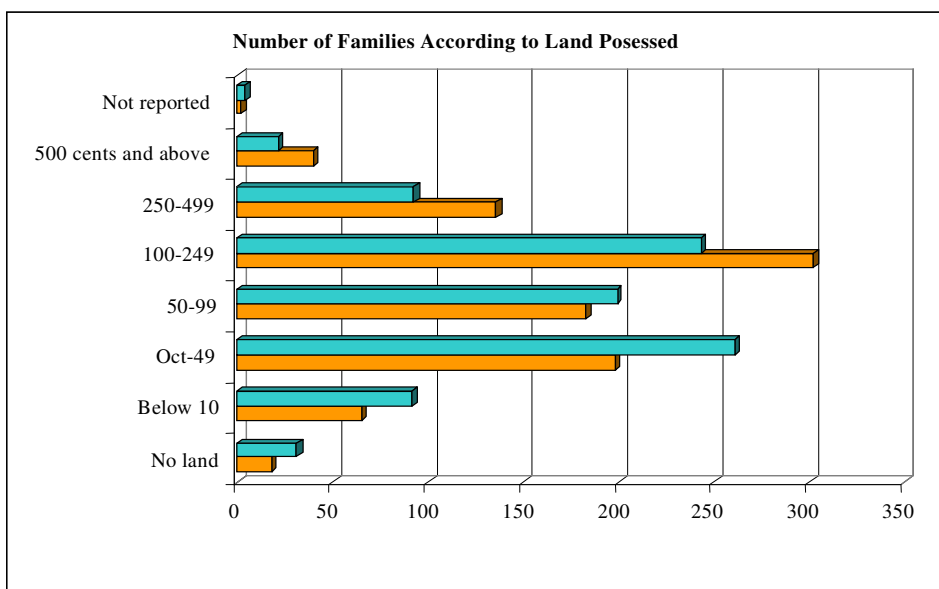

Table 3.2- Comparison of Area possessed before and after death

Area of Land Possessed I	Percentage of families	
	Before Death II	After Death III
No land or Less than 100 cents	49.15	61.76
100-499 cents	46.40	35.60
More than 500 cents	4.24	2.22
Not reported	0.21	0.42
Total	100.00	100.00

3.1.2 Number of families according to area of land leased

54.87% of the families had not leased in any land to extend their agriculture, before the suicide occurred in the families. Eighteen families had leased more than 5 acres for agriculture. After the death, the percentage of farmers that had not leased any land has been increased from 54.87% to 81.36%. The data indicates that the families are not interested in extending farming after the death of farmer.

Table 3.3-Area of Land leased before and after death

SI No I	Area of land II	Percentage of families	
		Before death III	After Death IV
1	No Land	54.87	81.36
2	Below 100 cents	13.67	4.98
3	100-499 cents	23.83	3.60
4	More than 500 cents	1.91	0.42
5	Not reported	5.72	9.64
Total		100.00	100.00

3.2 Dwelling Status

About 888 (94.07%) of the families had their own dwelling house, 15 (1.59%) families were living rented houses and 44 (4.25%) families depended other means of shelter. After the suicide, 40 families have lost their own dwelling. The number of families living in rented house and other means of shelter has been increased. A comparison of the families before and after the suicide is given in the following table.

Table 3.4- Number families according to ownership of dwelling

SI No I	Type of Dwelling II	Before Death		After Death	
		Number of Families III	Percentage IV	Number of Families V	Percentage VI
1	Owned	888	94.07	844	89.41
2	Rented	15	1.59	25	2.65
3	Others	40	4.24	66	6.99
4	Not Reported	1	0.11	9	0.95
Total		944	100.00	944	100.00

Table 3.5-Number of families according to dwelling type

SI No I	Type of Dwelling II	Before Death		After Death	
		Number of families III	Percentage IV	Number of families V	Percentage VI
1	Pucca	331	35.06	367	38.88
2	Semi pucca	453	47.99	451	47.78
3	Katcha	159	16.84	111	11.76
4	Others	1	0.11	15	1.59
	Total	944	100.00	944	100.00

3.3 Number of Families according to facilities

To analyse the living status of the families, the survey collected details of common facilities available like electricity, telephone, television etc they have in the families before and after the death of the victim. In the following table a comparison of number of families having the facilities before and after death are given. It can be observed that there is remarkable increase in the number of families having these facilities after the death. This may be due to the intervention of Government or other NGOs.

The number of families having vehicle has been increased. This is due to the increase in the number of families owned two wheeler vehicles. But the number of families having four-wheeler vehicle and other heavy vehicles has been decreased.

Table 3.6-Number of families according to Facilities

SI No I	Facilities II	Number of Families	
		Before Death III	After Death IV
1	Electricity	602	711
2	Telephone	354	638
3	Television	328	465
4	Cooking Gas	233	306

3.4- Agricultural Implants and Livestock

Table 3.7-Number of families having Livestock

SI No I	Livestock II	Number of Families	
		Before Death III	After Death IV
1	No Livestock	505	520
2	Cow/Ox/Buffalo	333	294
3	Sheep/Goat	57	68
4	Birds	1	1
5	Others	9	11

Out of 944 families, 505 have not owned any livestock. 333 had owned cow/ ox or buffalo. 57 of them had sheep /goat, 10 had birds or other type of livestock. After the suicides, the number of families having livestock has been decreased. A comparison is given in the table above.

According to the survey, majority of families had at least agricultural implements like tractor/triller, plumpst, sprayer etc. About 67.07%of the families had at least one of these implements before and after death. Only 7 families had tractor and 65 families had plumpst. The remaining families have no implements like tractor, triller and plumpst.

3.5- Details of assets sold

Some families have sold assets like land, vehicle, etc after the suicide occurred in the family to reduce the liabilities. About 131 families have sold their land, 28 have sold their vehicle and 175 have sold livestock or other assets. At the same time, 46 have purchased land, 55 have purchased vehicle and 196 have purchased livestock or other assets. Number of families who purchased land is smaller than those sold. While in the case of vehicle and other assets purchased/sold the comparison is in the reverse order.

Chapter 4

Cultivation

The survey collected details of crops and extend of area cultivated. The details given below will help to understand the crops cultivated and the utilisation of lands for cultivation. The details of major crops that the farmers had cultivated are also given below.

4.1 Extend of area cultivated

The survey-collected data on the area cultivated by each family, which is very important in analysing the reasons of farmer's suicide. It is noted that 31 families, in which at least one farmer's suicide occurred, had not cultivated any crops (either in owned or leased land) before the suicide. 71.40% of the families had cultivated area ranging 50 cents to 250 cents. 154 families had cultivated area between 2.5 acres and 5 acres. It is seen that 5.3% of the families had more than 5 acres of area under cultivation.

Table 4.1- Comparison of area cultivation before and after death

SI No I	Area of cultivation II	Number of families	
		Before death III	After death IV
1	No land	31	109
2	Below 10cents	35	71
3	10-49	153	234
4	50-99	179	193
5	100-249	342	233
6	250-499	154	85
7	Above 499	50	19

The above table reveals that number of families cultivating less than 100 cents has been increased and the number of families cultivating more than 100 cents has been decreased. Also there is a remarkable decrease in the number of families having cultivation. It is assumed that after the suicide occurred in the family, the families are discouraged in farming. The tables '18A' and '18B' in the appendix give district wise details of the increase and decrease in the number of families according to the area of cultivation.

The major crops cultivated by the victims before their death were paddy, coconut, pepper, arecanut, banana etc. More than 300 farmers cultivated mixed crops like coconut, banana, vegetables, tubers etc. 297 families cultivated pepper, out of which 40.74% were from Waynad district alone. Among the districts, Waynad is at the top in the number of farmers who cultivated paddy, pepper, arecanut, coffee, ginger, turmeric, banana and plantain. In the case of coconut cultivation Kasaragod is at the top.

After the death of victims, there is remarkable decrease in the number of families having cultivation of the crops such as paddy, pepper, cardamon, ginger/turmeric, banana/plantain and vegetables. The number of families who stopped cultivation has been increased from 36 to 136. The reduction is more for the crops of pepper, ginger turmeric, banana and plantain. While the number of cultivators of rubber and some other crops has been slightly increased.

Majority of the families were cultivating more than one crop. About 195 families were cultivating single crops before suicide. The details are available in table '18E' and '18F' in the appendix

Table 4.2-Number of families according to crops cultivated

Sl No I	Crops II	Number of families	
		Before death III	After death IV
1	Paddy	185	121
2	Coconut	360	361
3	Pepper	297	250
4	Arecanut	244	239
5	Coffee	204	201
6	Tea	5	5
7	Sugarcane	1	1
8	Rubber	145	155
9	Cardamom	42	38
10	Vanilla	2	2
11	Ginger/turmeric	157	25
12	Banana/Plantain	356	140
13	Vegetables	89	28
14	Mixed Crops	291	293
15	Others	125	100
16	No cultivation	36	136

Chapter 5 Financial Problems

The survey collected all possible details regarding the financial loss of the farmers before the suicide. There were several reasons for the financial loss of the farmers. These include the crop loss, which is due to different reasons like climatic change, plant diseases, price fall etc. The survey collected the details of the number of farmers those had financial loss according to the crops they cultivated.

5.1 Crop wise Financial Loss

The number of farmers incurred financial loss was higher in the case of the crops like coconut, pepper, banana and plantain. The details are given in the following table against some important crops and the percentage of farmers (crop wise) having financial loss.

It is concluded from the following table that more than 60% of the farmers cultivated each crop mentioned, except vanilla, had financial loss. The percentage varies from 60% to 90% for different crops. Year wise financial loss is furnished in the following table.

Table 5.1-Crop wise financial loss of farmers

SI No	Crops	Number of Families Cultivated	Number of Farmers Having Financial loss	Percentage of Farmers having Financial loss to the Total number of cultivators
I	II	III	IV	V
1	Paddy	185	144	77.84
2	Coconut	360	216	60.00
3	Pepper	297	234	78.79
4	Areca nut	244	183	75.00

5.2 Year Wise Financial Loss

Table 5.2- Year wise financial loss

SI No I	Year II	Number of farmers III	Financial Loss in crores IV	Average V
1	2003	414	1.15	27778
2	2004	395	0.86	21772
3	2005	310	0.70	22581
4	2006	217	0.44	20276
5	2007	170	0.41	24118

As per the results of the survey, the total financial loss to the families of the victims from 2003-2007 is 3.56 crores .The year wise number of farmers and their amount of loss, is given below.

It is desirable to know whether the families were having financial loss in the years coming after the death of the victim. The answer is positive. From table 19A in the appendix, 30 families had financial loss in the year 2004, but the suicides in the family have occurred in the year 2003. Some had financial loss in the year 2005, 2006, 2007, eventhough the suicides occurred in 2003. That is the financial loss in the years 2004-2007 may not be the reason for the suicides in the year 2003. From the table 19B, the financial loss in 2003 and 2004 may be considered as one of the reason for the suicide in 2004, but the financial loss in the subsequent years cannot be considered as one of the reason for the suicide. Likewise from tables 19C, 19D and 19E we will be able to analyse for the years 2005, 2006 and 2007.

5.3 Risk Factors

The survey collected details about the reasons for suicides from the family members or other dependent of the deceased persons. It is reported that, for 75 suicides the main risk factor could not have been identified. Among the remaining 904 suicides, for 58.32% (571) suicides, the main risk factor is indebtedness, which is due to crop damage and price falls or diversion of loan amount to other purposes.

Table 5.3- Number of suicides according to risk factors

Sl No I	Risk Factor II	Number of suicides III	Percentage IV
1	Indebtedness	571	58.32
2	Crop Damage	136	13.89
3	Disease	67	6.84
4	Family Problems	67	6.84
5	Others	63	6.44
6	Not Known/Not Reported	75	7.66
Total		979	100.00

13.89% of the farmers committed suicide due to crop damage, 6.84% were due to diseases and 6.84% due to family problems. About 6.44% of the suicides were due to some unspecified reasons.

5.4 Loan Details

5.4.1 Number of Loans.

The farmers from all districts availed loans from nationalised/private banks, Co-operative societies and private moneylenders for agricultural or other purposes. The victims have availed about 1908 different types of loans from various banks. The average number of loans availed per family is approximately 2. Out of the total 1908 loans, 1124 loans were availed from Co-Operative banks and 565 loans from Nationalised banks. They have also depended private scheduled banks, new generation banks etc for loans. About 7.5 crores of rupees were received by the victims as loans from different banks in Kerala. Some of the farmers have taken loans from different banks and some have taken more than one loan from same bank. Out of the 1908 loans only 1416 loan were taken before the death of the victims, that is 137 were taken after the deaths. In Waynad, Malappuram and Alappuzha districts, majority of the loans were taken from Nationalised banks. In all other districts the majority of the loans were from Co-operative banks.

Among the 944 families, 31 families have not availed any loans. 468 families have availed loans only from banks and 40 families from private institution only. 405 families have taken loans from both banks and private institutions.

5.4.2 Types of Loans

Table 5.4-Number of Loans according to types

SI No I	Type of loan II	Number of loans III	Percentage of the total IV	Amount of Loan (in crore) V	Percentage of Amount of Loan VI
1	Agriculture	1271	66.62	4.5	59.62
2	Others	606	31.76	2.9	39.29
3	Not Reported	31	1.62	0.082	1.09
	Total	1908	100.00	7.5	100.00

Among the 1908 loans, about 66.62% of loans were Agricultural loans that amounts to Rs. 4.5 crores and 31.76% were other loans that amounts to Rs. 2.9 crores. The other loans include loans for construction, marriage, education etc. For 31 loans the purpose was not available. The data indicates that the farmers have availed higher amount per loans for other than agricultural purposes.

5.4.3 Utilisation

All the loans availed by the victims were not completely utilised for the purpose for which the loan taken. We can see that out of 1908 loans, 66.62% loans were taken for agricultural purpose, but only 49.63% of the loans were utilised for agricultural purposes. That is 16.98% of the agricultural loans were utilised for other purposes. About 17.77% of loans were used for multiple purposes. The following tables give a clear picture about the loans and their utilisation. 132 loans taken for other purposes were utilised for agricultural purposes.

Table 5.5- Number and Amount of Loans according to utilization

SI No I	Purpose II	Loan		Amount	
		Numbers III	Percentage IV	In lakhs V	Percentage VI
1	Agricultural	947	49.63	290.19	38.39
2	Construction	152	7.97	81.34	10.76
3	Marriage	66	3.46	20.76	2.75
4	Education	15	0.79	16.74	2.21
5	Treatment	32	1.68	7.16	0.95
6	Purchase of Assets	29	1.52	18.37	2.43
7	Purchase of home appliance	3	0.16	1.37	0.18
8	Others	325	17.02	159.24	21.07
9	Multiple purposes	339	17.77	160.67	21.26
	Total	1908	100.00	755.85	100.00

Table 5.6- Agricultural loans according to Utilisation

SI No I	Purpose of Utilisation II	Loans		Amount	
		Number III	Percentage IV	In Lakhs V	Percentage VI
1	Agriculture	815	64.12	251.76	55.87
2	Construction	31	02.44	5.66	1.26
3	Marriage	25	1.97	6.99	1.55
4	Education	6	0.47	6.1	1.35
5	Treatment	16	1.26	2.92	0.65
6	Purchase of assets	6	0.47	3.38	0.75
7	Others	138	10.86	74.41	16.51
8	Multiple purpose	234	18.41	99.39	22.06
	Total	1271	100.00	450.61	100.00

Out of 1271 agricultural loans, only 64.12% of loans were utilised for agricultural purpose. Other loans were utilised for different purposes such as construction, marriage of the close dependent, education, treatment, purchase of assets etc. When the amount of loan is considered, only 55.87% of the amount on agricultural loans has been utilised for agricultural purposes. The details are furnished in the following table.

In Kottayam District, all agricultural loans availed were utilised for agricultural purpose and in Kollam district 5.18% of the amount on agricultural loans had been utilised for agricultural purpose and 94.82% was diverted for non-agricultural purpose.

5.4.4 Mortgage pledged

Majority of the cases, farmers' availed loans by pledging their properties as mortgage. About 57.49% of the loans were availed in this way. 6.66% loans were gold loans and remaining 35.85 % loans were availed by other means.

5.4.5 Private Loans

The victims had depended not only the banks but also private moneylenders/private financiers for loans. 740 loans, which amounts to about Rs. 2.17 crores had been availed by the farmers from these institutions. It is more than 20% of the overall loan amount availed by the farmers. This shows that in rural areas even now private moneylenders give substantial amount as loans to weaker sections including farmers on exorbitant rate of interest. It is noted that in Malappuram district farmers never availed any type of agriculture loans from private moneylenders/financiers.

Out of the 740 private loans, 36.08% of the loans (35.27% of the total amount) was utilised for agricultural purposes. The farmers utilised the remaining loan amount mainly for other purposes like construction, marriage, education, and treatment etc.

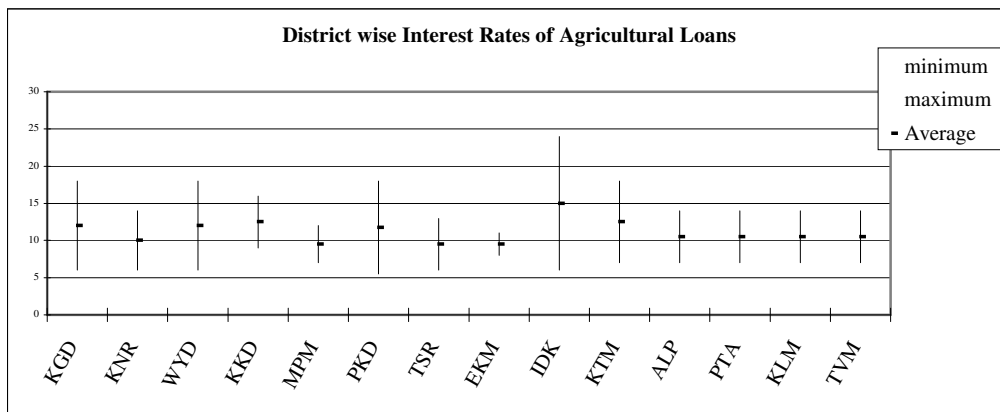

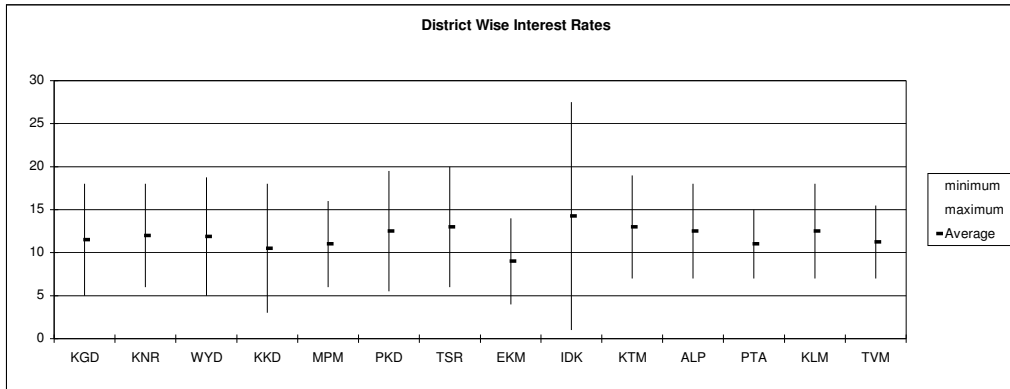

Table 5.7- Private Loans and their utilisation

Sl No I	Purpose II	Loan		Amount	
		Numbers III	Percentage IV	In lakhs V	Percentage VI
1	Agricultural	267	36.08	76.82	35.27
2	Construction	32	4.32	7.91	3.63
3	Marriage	41	5.54	15.34	7.04
4	Education	6	0.81	0.44	0.21
5	Treatment	36	4.86	7.33	3.37
6	Purchase of Assets	14	1.89	9.17	4.21
7	Purchase of home appliance	9	1.22	0.72	0.33
8	Others	207	27.97	48.70	22.36
9	Multiple purposes	128	17.30	51.35	23.58
	Total	740	100.00	217.80	100.00

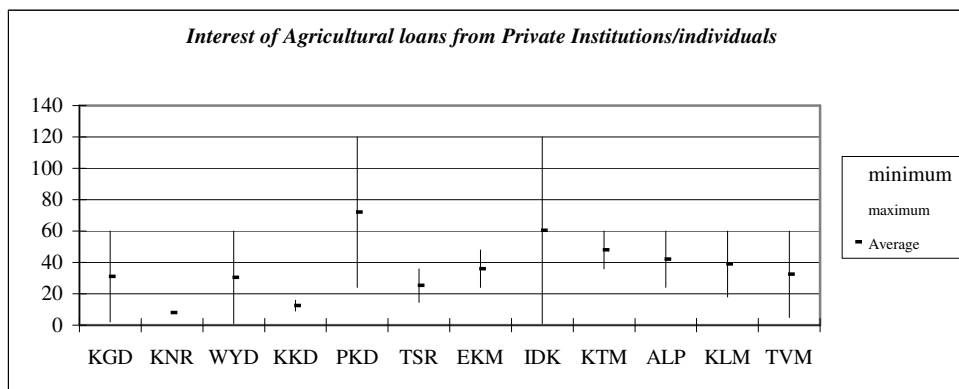

In Kozhikode district, all loans availed from moneylenders/private financiers were utilised for non-agriculture purposes. In Pathanamthitta district only one loan was availed by the farmers from moneylenders/private financiers.

5.4.6 Interest Rate

Different types of loans that have taken from banks by the victims bear interest rates ranging from 1% to 27.5%. But the interest rate on all loans was not reported. In Kannur district interest rate of only one private loan was reported. Among the interest rates reported the highest and smallest interest rates were reported from Idukki district. The interest rate of agricultural loans varies from 5.5 to 24%. In the case of agriculture loan also, the highest and smallest interest rate was reported from Idukki District. The diagrammatic representation of the interest rates gives a clear picture of interest rates of loans from banks in each district.

The loans from moneylenders, private financiers/individuals bear a high rate of interest ranging from 1% to 120%. Here also the highest and smallest interest rates were reported in Idukki district. This indicates that they were compelled to pay more than double of the principal amount they availed with in a year.

5.4.7- Outstanding Loans

At the time of death, the farmers had owed a huge amount as loans from different banks amounting to Rs.8.1 crores, of which, Rs.6.44 crore was loan amount and Rs. 1.74 crore as interest. Till the death, the farmers had repaid about 14.59% of the total loan. The families of the victims were liable to bear lion portion of the loans availed by the victims.

The details are furnished in the following table. It is seen that the farmers were unable to close any loan in their lifetime. Naturally the liabilities passed on to the family members which aggravated the indebtedness.

Table 5.8- Details of Outstanding Loans from Banks

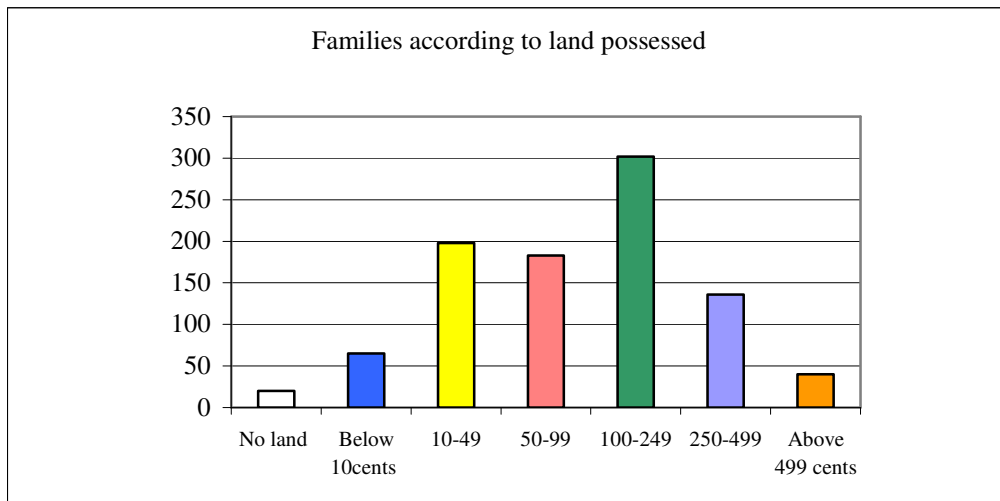

SI No	District	Number of Loans Availed	Amount of Loans availed	Outstanding				
				Number of Loans	Principal Amount	% of the total amount	Interest	Total
I	II	III	IV	V	VI	VII	VIII	IX
1	Kasragod	208	7946050	208	6800110	85.58	1707969	8508079

14	Thiruvananthapuram	81	4385300	81	3534726	80.60	1208697	4743423
Total		1908	1908	75585213	1908	64480427	85.31	17408938

It is a fact that 49 farmers who committed suicide did not have any outstanding liability at the time of suicide. 565 farmers had liabilities less than one lakh rupees. 267 families had outstanding liabilities in between one lakh and three lakh. Only 63 families had more than three lakh of liabilities.

In the following table, the details of land possessed by the victims at the time of suicide and outstanding liabilities are furnished. It is to be noted that 19 families who had outstanding liabilities were landless farmers. 251 families having outstanding liability of less than one lakh had owned more than one acre of land. It can be concluded that some families had assets to solve their indebtedness.

Table 5.9- Number of Families with amount of liabilities outstanding and land possessed at the time of Death

Sl No. I	Land Possessed II	Number of Families with outstanding liabilities at the time of death					
		Below Rs. 1 lakh III	1 – below 3 lakh IV	3 – below 5 lakh V	5 lakh and above VI	No Liabilities VII	Total VIII

7	Above 499 cents	10	19	5	5	1	40
	Total	565	267	41	22	49	944

In the case of agricultural loan also, major portion of the loan amount taken was outstanding at the time of death. About 87.42% of the principal amounts of agricultural loans were outstanding at the time of suicide. More than 85 lakh rupees were outstanding as interest.

The percentage of outstanding principal amount of agricultural loans in Pathanamthitta District is 56.66%, which is least when compared to other districts in the state. In all districts except Pathanamthitta and Kollam the percentage is more than 80.

Table 5.10- Details of Outstanding Agricultural Loans from Banks

5.4.8- Waiving

As mentioned earlier, the subject 'Farmers Suicide' had received a lot of media/press attention. The media coverage on each suicide with much importance and sometimes in an exaggerated way, resulted timely intervention by the government as well as the financial institutions, to provide concessions in the loans availed. Government declared some financial assistance and banks waived some of the loans availed by the farmers. Through the survey, details were collected about the financial concessions, number of loans and amount of loans waived by the Government through various financial institutions.

Table 5.11- Loan waiving Details

SI No	Bank Type	Number of loans waived	Number of families benefited	Amount in Lakhs
I	II	III	IV	V
1	Nationalised Bank	296	247	108.21
2	Private Scheduled bank	25	24	7.54
3	Co-operative Bank	493	389	170.82
4	New Generation Bank	1	1	0.25
5	Other Banks	50	42	16.56
	Total	865	703	303.38

It is pointed out earlier that 565 loans were availed from nationalised banks, of which 296 loans have been waived, amounting to Rs. 1.08 crore, benefited 247 families. 569 loans amounting to 1.95 crore from other financial institutions like private scheduled

banks, Co-operative banks, new generation banks, etc have also been waived benefited 456 families. The details are furnished in the following table.

About 43.57% of the total loan amount availed from nationalised banks has been waived. The percentage of loan amount waived through other financial institutions viz- Private Scheduled bank-24.55%, Co-operative bank – 41.72%, new generation bank-4.29%, other banks- 27.35%.

14 families received financial assistance directly from government and 637 families received assistance from different banks as per the direction from the Government. Details are furnished below.

Table 5.12-Number of families benefited through Different agencies

SI No I	Agency II	Number of Families III	Amount (lakhs) IV
1	Government	14	5.16
2	Government through Banks	637	229.20
3	Bank itself	121	38.15
4	Other Banks	4	4.06
5	Not reported	89	26.81
Total		865	303.38

The year wise details of loan waived are furnished in the following table. It is seen that majority of the loans waived during the year 2008, i.e. after the suicides occurred in the families. The loans waived till the year 2005 are small in number. It is noted that 72.14% of the waived amount was in or after 2006.

Table 5.13- Year wise details of waiving of loans

Sl. No I	Year II	Number Of Loans waived III	Amount of Loans waived (in lakhs) IV	Percentage Of number of loans waived V
1	Before 2003	5	1.06	0.58
2	2003	4	1.79	0.46
3	2004	12	3.95	1.39
4	2005	15	5.87	1.73
5	2006	133	51.41	15.38
6	2007	90	32.42	10.40
7	2008	401	141.00	46.36
8	Not reported	205	65.87	23.70
Total		865	303.38	100.00

5.4.9 Other Assistance

Besides loan waiving, the families received other assistances such as land, house, financial grants/subsidies etc. However the number of families who received land and house from government is comparatively less. On the other hand 735 families received financial assistance amounting to Rs 357lakhs.

5.4.10 outstanding liabilities

Even after getting assistance from government or other agencies, majority of the families still have indebtedness with various types of financial institutions. But all liabilities are not accrued before the suicide of the farmer. These liabilities include the loans taken by the family members after the suicide of the farmer and cumulative interest of the loans that existed at the time of death. The details of the liabilities as on 31.03.2008 were collected. It is seen that, 676 families have liabilities amounting Rs 637 lakhs and 268 families have cleared their liabilities.

Chapter 6

District wise details at a glance

The district/taluk wise details of farmer's suicide and the main reasons of the suicides are furnished.

6.1 Thiruvananthapuram

In Thiruvananthapuram district 47 suicide cases were surveyed. All the suicides were committed during the period from 2003 to 2007 and there is no multiple suicide. The primary details of 46 cases were collected from Principal Agricultural Office, Thiruvananthapuram and for one case details was collected through local enquiry. Among the victims 41 were male and 6 were female. Out of these 3 suicides from Thiruvananthapuram Taluk, 21 from Neyyattinkara Taluk, 14 from Nedumangadu Taluk and 9 from Chirayinkeezhu Taluk.

It is found that majority of the farmers committed suicide due to indebtedness. The total loan amount to all the cases is Rs.59.64 lakhs and the outstanding liability to all is Rs.64.54 including interest. Out of these, the government waived off Rs.14.87 directly or through banks.

Out of the 47 suicide cases, 28 cases may be considered as farmers suicide, because these 28 farmers utilized the major portion of the loan amount for agriculture and livestock activities, even though they owned very little extend of land and they have taken land under lease for cultivation.

6.2 Kollam

The number of suicide cases surveyed in Kollam district was 16 which include one multiple suicide. Among the victims 14 were male and 2 were female. Among the 16 suicides 6 suicides in Karunagapally, 2 in Kottarakkara, 4 in Kunnathur and 3 in Pathanapuram taluks respectively. Nine farmers consumed poison and 5 others hanged to end their life and the remaining cases the method of suicide is unknown. Out of 16 suicides, 12 suicides were due to indebtedness, 3 suicides were due to diseases/family problems. The reason for 1 suicide was not known. These families had outstanding liabilities of Rs.18.13 lakhs at the time of suicides.

6.3 Pathanamthitta

In Pathanamthitta district 15 suicide cases were occurred during the reference period of the study. There was one multiple suicide. Among the victims 14 were male and one was female. Among the 15 suicides, 4 in Adoor, 2 in Thiruvalla, 4 in Ranni, and 4 in Kozhencherry Taluks respectively. However no suicide was reported from Mallappally taluk. Among the 15 suicides, 9 were due to indebtedness, 4 due to crop damage, one due to family problems and the other one due to unknown problems. Eleven farmers committed suicide by consuming poison and 4 by hanging. These families had an outstanding loan liability of Rs.7.87 lakhs at the time of death.

6.4 Alapuzha

The number of suicide cases surveyed in Alapuzha district is 20. Among the 20 suicides, 5 were reported in Karthigapally Taluk, 7 in Mavelikara, 4 in Kuttanad and others in Ambalapuzha Taluk. Out of 20 suicide, 9suicides due to indebtedness, 9 due to crop damage and the rest 2 by some other problems. Among the 20 suicides, 17 farmers committed suicide by taking poison, and the remaining 3used the method of hanging. There is no multiple suicide occurred in this district. These families face an outstanding liability of Rs.3050403/.

6.5 Kottayam

The number of suicides reported in Kottayam district is 9. All these cases were happened during the period from 2003 to 2007. There are no multiple suicide occurred in this district. No female suicides were reported in the district. There are five cases reported in Kottayam Taluk, one in Kanjirapally, one in Changanacherry Taluk and two in Vaikom Taluk. Out of 9 suicides, 4 of them were due to indebtedness, one due to crop damage and one due to some family problems. The reason for other suicides was not specified. Out of the 9 suicides, 6 of them were committed suicide by taking poison and 3 of them by means of hanging. These families were facing outstanding liabilities of Rs.1041053/- at the time of death.

6.6 Idukki

106 farmers committed suicide in Idukki District. There were 3 multiple events occurred in the district. There are 102 male victims and 4 female victims in this district. 84

suicides were happened in Udumbanchola Taluk, 2 in Peermade, 5 in Devikulam Taluk and 11 in Thodupuzha. Taluk. Among 106 suicides, 77 victims committed suicide by the intake of poison, 25 by the means of hanging, and 4 of them used some other methods. 71 of the total suicides occurred in the district were due to the indebtedness, 6 of them due to some disease, 7 of them due to some family problems and 10 due to crop damage. The reason for other suicides were unspecified or not reported. These families had outstanding liabilities of Rs.15825780/-

6.7 Ernakulam

The number of suicide cases surveyed in Ernakulam district is 4. This is the lowest when compared to other district. All these cases were happened in the year 2004. Multiple suicides did not occur in this district. All the victims in the district were males. Among the 4 suicides, 2 of them occurred in Aluva Taluk 1 in North Paravoor and the rest 1 in Kanayannur Taluk. Among the 4 suicides, 3 of them committed Suicide due to the intake of poison and the one by hanging. These families faced an outstanding liability of Rs.284775/-.

6.8 Thrissur

The number of suicide cases surveyed in Thrissur district is 78, during the period from 2003 to 2007. Out of 75suicides, 70 persons were males and 8 of them were females. 33 of these events happened in Mukundapuram Taluk, 29 in Thalappally, 14 cases in Thrissur, 1 in Kodungalloor and the rest one in Chavakad Taluk. 26 of the suicides were due to indebtedness, 4 of them due to diseases, 7 of them by some family problem and 18 due to crop damage. The reasons behind 11 suicides were not known. Among the 75 suicides, 52 of the victims' committed suicide by taking poison, 15 of them by means of hanging and 11 by some other methods. These families had outstanding liabilities of Rs.10295994/-.

6.9 Palakkad

The number of suicide cases surveyed in the district of Palakkad is 90. There are two multiple events occurred in this district. 6 of the suicides happened in Alathur Taluk, 22 in Chittur Taluk, 18 of them in Manarkkad, 28 in Ottapalam and 12 cases in Palakkad Taluk. Among the 86 suicides, 46 of the victims suicide by taking poison, 36 by the

method of hanging, one of them not reported.7 by some other problem.46 of the victims die due to indebtedness, 5 of them by disease, 13 by some family problems, 6 by crop damage, 6 of them not known and the last two of the cases not reported, These families faced an outstanding liabilities of about Rs.8011069/-

6.10 Malappuram

Number of cases reported in the district is 12. One female suicide was reported in the district. Among the 11suicides, 5 of them occurred in Nilambur Taluk, 3 each in Eranad and Perinthalmanna Taluk. Out of 11, 6 of them suicide due to indebtedness, and the others were due to some other reasons such as diseases, family problems etc. Out of 11 suicides, 4 of them committed suicide due to the intake of poison and the others by hanging. These families face out standing liabilities of RS.8, 46, 654/-.

6.11Kozhikode

The number of suicide cases surveyed in Kozhikode district is 46. There are two multiple suicides occurred in this district. There are 38 males and 8 females suicided in this district. Among the 41 suicides 26 of them occurred in Kozhikod Taluk, 7in Vadakara Taluk and 8 in Koyilandy Taluk. Among the 41 suicides, 20 were due to the indebtedness, 5 of them due to different diseases, 6 of them due to the crop damage and the reasons for other cases were not known. These families had outstanding liabilities of Rs.5465395/-.

6.12 Wayanad

The number of suicide cases surveyed in the district of Wayanad is 317. There are 6 multiple suicides occurred in this district. There are 286 males and 31 female suicides occurred in this district. 167 events occurred in Sultan bathery Taluk, 86 in Manathavady Taluk and 53 in Vythiri Taluk. Among the suicides 197 persons committed suicide by taking poison 108 by hanging 10 by other method and the method of suicide of other cases were not reported. Of the 306 suicides 196 of them suicide due to the indebtedness, 27 of them due to disease, 19 by some family poroblem, 43 by crop damage. The reasons behind other suicides were not available. These families had outstanding liabilities of Rs.31351177/-.

6.13 Kannur

The number of suicide cases surveyed in Kannur district is 113. There are no multiple suicides reported in this district. There are 98 males and 15 females suicides in this district. Among the 111 cases 69 suicides are reported in Taliparamba Taluk one in Kannur and the rest 41 in Thalassery Taluk. Among 111 cases, 68 victims committed suicide due to the indebtedness of the family. 5 of them due to disease, 8 of them by some social problems 21 by crop damage, 3 by some other reasons and the next 3 cases not reported and the rest 5 of them not known the reason for their suicide. These families had outstanding liabilities of Rs.9913702/-.

6.14 Kasaragod

The number of suicide cases reported in the Kasaragod district is 106. All these cases were happened during the period from 1-01-03 to 30-11-07. There is only one multiple suicide occurred in this district. There are 98 males and 8 females committed suicide in this district. Among the 103 suicides, 74 of them occurred in Hosdurg Taluk, and the rest 29 in Kasaragod Taluk. 71 of the victims suicide due to the indebtedness 12 of them due to the diseases, 5 of them by family problems, 2 by crop damage, 3 by some other problems and reason of 11 cases were not available.

Chapter 7 Conclusion

As mentioned in the introduction chapter, the subject 'Farmers Suicide' was widely discussed, especially through media, press and all other forums. It is assumed that reportage on suicides have both negative as well as positive impact and influence on suicide contemplators. Sensational reporting with detailed information on the mode of suicide, graphic illustration of the suicide, repeated reporting with constant flashing of images related to the suicide, in both press and media have been found to lead an increase in suicides due to the imitation effect, i.e. 'a process by which exposure to the suicide or suicidal behaviour of one or more persons influences them to commit or attempt suicide.' For the survey media was an important source of information on suicides.

The survey attempted to gather all available information on the farmers' suicides from various sources. The frame of the survey was prepared after consulting with Revenue, Police departments and through local enquiry. As a part of the joint effort, 979 cases of deaths were identified as farmers suicide. This is in contrast to the rumour spread all over Kerala that there were more than 5000 of farmers' suicides. In some families parents and their children committed suicide together.

The highest number of suicides (312) was occurred in Wayanad district and more than 100 suicides were occurred in the districts of Kasaragod, Kannur and Idukki. This throws light on the fact that the problems in agriculture sector like crop failure, fall of agriculture prices, change of climate etc were much affected the farmers in these districts.

The survey collected the main risk factor that led to suicide of farmers. The main risk factors identified are indebtedness, crop failure, price fall, diseases etc. It is to be reiterated that the risk factors are not mutually exclusive. They can co-exist and even feed to each other aggregating the over all stress of an individual. It is assessed through the survey that about 60-70% of the suicides identified were due to agricultural problems.

Regarding the loan, there was a greater reliance on formal sources like banks, but this does not preclude the reliance on moneylenders. About 28 % of the loans were taken from moneylenders, and these loans bear exorbitant rates of interest. As we discussed, the

loans taken for agriculture purposes from different banks/ institutions were not all utilized for the purpose. Some of the loans have been utilized for other purposes like business, marriage, education, construction of house, repayment of existing loans etc. So it can be concluded that the indebtedness of the farmers were not completely due to agricultural problems.

At the time of death, the farmers had huge liabilities to different banks and moneylenders. At the time of death these farmers altogether had indebtedness of 8.1 crores including the interest. Due to Govt intervention, these families got different assistances/help like loan waiving, monetary assistance etc. More than 800 families have been benefitted through these assistances. After receiving these assistances, the outstanding liabilities of all the farmers has been reduced to 4.73 crores.

Even now some of the families are facing with different problems. The authorities may take different steps to avert the situations that lead to the suicide of farmers again. The reporting of suicides and other sensational news in an exaggerated manner has to be controlled to avoid the tragic repetition of the events.

Due to all round development in the state, income, expenditure, profit etc are increased in all sectors except agriculture. Businessmen, Industrialists, Doctors, Bank employees, Government servants, etc. have regular income. On the contrary, the rural people consisting of 70% most of them are farmers do not have the basic amenities as secured by the organised sectors. The cost of cultivation i.e. wages, cost of seed, manure and pesticides increased about 100 times than in 1960's while the price of the most of the agriculture products and profit from cultivation is increased by only 10 to 15 times. Due to these reasons majority of agriculturist/cultivators left the field of agriculture. Some traditional cultivators still continues in the field since they do not have any other better alternative. The high level of commercialization of agriculture, liberalisation and globalization lead to a shift in cropping pattern from food crops to commercial crops.

During nineties, the profitability in agriculture declined by 14.2%. The worsening 'cost-risk-return' structure of farming, stagnating income of farmers and the huge and widening income divide between farmers and non-farmers are the main deterrents. Economic growth, which bypasses a large population jobless and not sustainable in the long run.

To ensure that the cultivators are getting a moderate income by controlling the price of agriculture products.

- Market intervention from authority is essential to ensure the price of agriculture products.
- To ensure that the cultivators get enough compensation in case of crop loss due to disasters like flood, draught, diseases etc.
- Deliberate attempt is needed for large-scale investment in agriculture sector, which prevents cultivators to avail loans from private moneylenders.
- The cost of production is invariably higher than the minimum support price due to ever-increasing prices of diesel and other inputs. Minimum Support Price should be regarded as the bottom line for procurement both by Government and private traders. This will be reflected in the prevailing market price.
- An efficient marketing system with Farmer's Organizations could significantly add to farmer's income from his produce. They should be promoted to combine decentralized production with centralized services such as post-harvest management, value addition and marketing etc.
- Security Scheme is essential for ensuring livelihood security, which should take care of expenses up to a ceiling for hospitalization in case of illness of a family member, maternity, life insurance and old age pension.

Jawaharlal Nehru 1947,

“Everything else can wait, but not agriculture”. “Agriculture is a high-risk economic activity” “Agriculture is not just a food producing machine for the urban population”
