P R E F A C E

This brochure presents the new series on State Domestic Product in Kerala with base year 1980-'81. This is the second publication in the new series. The first brochure in the new series was published in 1990 which has replaced the old series with base year 1970-'71. The reasons for the difference in the two series of estimates have been explained in the first brochure and have not repeated in this brochure.

The new series of Gross Domestic Product/Net Domestic Product were prepared on the basis of the guidelines issued by the Central Statistical Organisation.

This issue presents the estimates for the years from 1980-'81 to 1988-'89, both at current and constant (1980-'81) prices. The estimates are prepared separately for all the 13 sectors and presented in the tables given in this issue.

This report was prepared by the State Income Division of this Directorate.

It is hoped that this publication will be of great use to the planners, research workers and those who are interested in the study of Kerala economy.

Thiruvananthapuram,
20.12.1993.

Dr. M. Kuttappan,
DIRECTOR.

P R E F A C E

This brochure presents the new series on
of the District Product in Kwana with base year
1960. This is the second publication in the new
series. The first brochure in the new series was
published in 1961 which has replaced the old series
with base year 1950-51. The reasons for the
change in the two series of estimates have been
explained in the first brochure and have not
repeated in this brochure.

The new series of Gross Domestic Product
and District Product were prepared on the basis of the
guidelines issued by the Central Statistical
Organization.

This issue contains the estimates of the
year 1960-61 to 1964-65, both at current
and constant (1960-61) prices. The estimates were
prepared separately for all 13 sectors and
presented in the top to bottom in the main
text.

The report was prepared by the Joint
Director of this Directorate.

It is hoped that the publication will be of
great use to the Government, research workers,
and who are interested in the study of Kwana
economy.

Dr. M. K. K. K.

Joint Director

16. District-wise distribution of Net State Domestic Product & Per Capita Income of Kerala at factor cost by industry of origin - at current prices (New Series - 1980-'81 to 1988-'89). 33-41

Statement

- i. Net State Domestic Product at factor cost of various States and Union Territories at current prices 1980-'81 to 1988-'89. 42
- ii. Net State Domestic Product at factor cost of various States and Union Territories at constant (1980-'81) prices - 1980-'81 to 1988-'89. 43
- iii. Gross State Domestic Product at factor cost of various States and Union Territories at constant (1980-'81) prices - 1980-'81 to 1988-'89. 44
- iv. Gross State Domestic Product at factor cost of various States and Union Territories at constant (1980-'81) prices - 1980-'81 to 1988-'89. 45
- v. Per Capita Net State Domestic Product at current prices of various States and Union Territories - 1980-'81 to 1988-'89. 46
- vi. Per Capita Net State Domestic Product of constant (1980-'81) prices of various States and Union Territories - 1980-'81 to 1988-'89. 47
- vii. Annual growth rate of Net State Domestic Product at Constant (1980-'81) prices (Percentage) - 1981-'82 to 1988-'89. 48
- viii. Annual Growth Rate of Per Capita Net State Domestic Product at constant (1980-'81) prices (percentage) - 1981-'82 to 1988-'89. 49

.....

Introduction

State Income is one of the important yard sticks for measuring economic development. It represents the Net Domestic Product at factor cost originating within the geographical boundary of the State within a period of time. Estimates have been prepared according to the methodology and sources of data suggested by the Central Statistical Organisation. This has been computed in 1980-'81 constant prices and current prices.

By economic activity Net Domestic Product constitutes the sum total of the income contributed by the three different sectors viz. Primary, Secondary and Tertiary Sectors.

I. Primary Sector

1. Agriculture, (2) Forestry and Logging, (3) Fishing and (4) Mining and Quarrying.

II. Secondary Sector

1. Manufacturing, (2) Electricity, Gas and Water Supply and (3) Construction.

III. Tertiary Sector

1. Transport, storage and Communication, (2) Trade, Hotels & Restaurants, (3) Banking and Insurance, Real Estate and Ownership of Dwellings, (4) Public Administration and (5) Other services.

This report attempts to give a picture of the trend in the growth of State Domestic Product and Per Capita Income of Kerala for the years from 1980-'81 to 1988-'89 at the base year 1980-'81 prices. Sector-wise and District-wise distribution of the State Domestic Product and per capita income are also furnished.

Notes on Methodology

I. Agriculture and allied activities.

The Net Domestic Product from Agriculture (proper), livestock and allied activities except government irrigation system is estimated by using the production approach, which involves estimation of gross value of products and byproducts and deduction of the value of inputs and consumption of fixed capital. For irrigation, income approach is used and the total factor incomes generated as a result of providing the irrigation service is measured. Separate estimates of gross value of output for agricultural crops and live stock products are prepared, while gross domestic product and net domestic product are worked out for the activity as a whole.

(a) Agriculture (proper)

Estimates of area and production of all the major and minor crops are based on crop estimation surveys under Timely Reporting Scheme. These figures are used for the estimation of gross value of output. For miscellaneous and unspecified crops, since the area

figures are only available, estimates are prepared by applying an appropriate average value of yield per hectare to the total area under that group. For plantation crops the production estimates published by the respective Commodity Boards are used. The output of byproducts are estimated by applying the yield rates supplied by Central Statistical Organisation and/or obtained from the cost of cultivation surveys. All the byproducts are evaluated at the primary whole sale current year prices. For the byproducts for which current prices are not available, base year prices are moved to later years by using suitable indices.

(b) Live stock and live stock products

For estimating the gross value of output from live stock products, they are divided into - (i) Milk, (ii) Meat and Meat products, (iii) Hides and skins (iv) Eggs and poultry meat, (v) dung, (vi) increment in stock and (vii) Other products. The production estimates of milk, meat and eggs are based on the report integrated sample survey for estimation of milk, egg and meat. The live stock numbers are obtained

(c) Input

To arrive at the Gross Domestic Product from agriculture and live stock, necessary deductions are made for the cost of inputs. The inputs are (i) seed, (ii) Manure (Chemical and Organic) (iii) Current repairs and maintenance charges (iv) Live stock feed (v) Irrigation charges, (vi) Electricity charges, (vii) Cost of pesticides and insecticides (viii) market charges and (ix) cost of diesel oil. Cost of seed was estimated by using the seed rates supplied by Central Statistical Organisation the cost of cultivation survey.

The cost of chemical fertilizer used was taken from the fertilizer statistics. The cost of repairs and maintenance irrigation charges, pesticide and insecticides and diesel oil have been supplied by Central Statistical Organisation.

Organic manure is the gross value of the dung in the live stock sub sector.

The live stock feed has been estimated using the Integrated Sample Survey Results.

The electricity charges have been worked out from the annual accounts of the Electricity Board.

Market charges are estimated at the rates supplied by Central Statistical Organisation.

(d) Gross Domestic Product/Net Domestic Product

The gross domestic product is obtained by deducting the total cost of inputs from the gross value. Gross domestic product from

operation of govt. irrigation system is also added to obtain the total gross domestic product to obtain the net domestic product from Agriculture Sector.

(e). Estimate at constant (1980-'81) prices

For estimation of GDP at constant prices the output of agriculture crops, byproducts, livestock products and inputs are evaluated at 1980-'81 prices. From the gross value, the cost of inputs, and the consumption of fixed capital are deducted to obtain the Net Domestic Product at constant prices.

2. Forestry and Logging

Forestry sector includes (1) Forestry and (2) Logging. The forest products are classified into two groups viz. (1) Major products comprising industrial wood and fuel wood (2) Minor products comprising a number of heterogeneous items such as bamboo, eucalyptus, sandal wood, ivory etc.

The domestic product is estimated following the production, approach.

For estimating the value of major forest products, the recorded production is evaluated at producers' price. The producers' price is obtained by adjusting the wholesale prices for trade and transport margins. An allowance of 10% of the value of the recorded production is made to cover all such unrecorded production. The royalty value of minor products is adjusted to arrive at the economic value.

From the Gross Value, cost of repairs and maintenance and consumption of Fixed Capital are deducted to arrive at the Net Domestic Product, at constant prices.

3. Fishing

The activities included in the sector are (1) Marine fish landings, (2) inland fish landings, (3) subsistence fishing, (4) gathering of lime shell, sea shell, sea weeds and other products and (5) fish curing viz. Salting and sundrying of fish.

The production approach is followed to estimate the Gross Domestic Product/Net Domestic Product.

The estimates of Gross Value of marine fish landings, inland fish landings and subsistence fishing by non-professional fishermen are prepared separately from the data supplied by the Fisheries Department. From the gross value, cost of repairs and maintenance and other operational costs are deducted to obtain the gross value added. From the gross value added, consumption of fixed capital is deducted to arrive at the net value added. Net value added from fish curing and other products are also worked out separately and added to obtain the total Net Value added from fishing sector.

Estimates at constant prices

For estimates of the value of output at constant prices, the current catch of marine fish, inland fish and fish for subsistence are valued at 1980-'81 prices. From the Gross Value cost of repairs and maintenance and consumption of fixed capital are deducted as above, to obtain the net domestic product. The other products are also evaluated at 1980-'81 prices. The value added by fish curing in the base year is projected to later years in proportion to the changes in the quantity of fish cured in the current year relative to the base year. Net Value added from fish curing and other products are also added to arrive at the Net Domestic Product from fishing at constant prices.

4. Mining and Quarrying

The estimate of income originating from this sector has been prepared by the production approach. Data on production and prices of minerals obtained from the Indian Bureau of Mines have been used for the estimation. The net product is obtained by deducting mining expenses and depreciation charges for Kerala published by the Indian Bureau of Mines and Central Statistical Organisation. The value added at 1980-'81 prices are obtained by using the price of minerals for 1980-'81.

The constant (at 1980-'81 Prices) price estimates are computed on the basis of actual value of major minerals at 1980-'81 prices and this ratio has been applied in the case of minor minerals.

5. Manufacturing

I. Registered

The estimation of gross and net products originating in this industry is prepared by various industry groups on the basis of Annual Survey of Industries division of this Department.

The estimates of gross/net value added obtained from Annual Survey of Industries have been further adjusted for imputed bank charges (All India Percentage as per National Accounts Statistics). Central Statistical Organisation's figure of consumption of fixed capital was added to the State Domestic Product to arrive at the Gross Domestic Product.

The constant (at 1980-'81 prices) price figures are obtained by applying whole sale price index of manufactured articles in the registered sector.

II. Unregistered

Income method has been followed to estimate income from this sector. For the purpose of estimation of net value added in this sector the survey results of National Sample Survey on Non-Directory

manufacturing establishments and own account enterprises of Kerala, sample survey on directory manufacturing establishments of Kerala are used. The net value added from the above survey results for 19 industry groups for the year 1977-'78 has been moved to later years using the following indices.

Groups	Indices
20 - 21 Food products	Value of output of oil seeds, pulses, rice and sugarcane.
22. Beverage and Tobacco and tobacco products.	Value of output of raw tobacco and fruits.
23 - 26 Textile products	Value of output of Khadi, coir and coir products.
27 Wood, furniture, etc.	Value of output of forest products.
28 Paper and paper products	Value of output of hand made paper.
29 Leather & leather products	Value of output of hides and skins.
30 Rubber & rubber products	Value of output of raw rubber.
31 - 39 Remaining items	Value added from registered manufacturing sectors relating to the industry group in Annual Survey of Industries.

The net value added thus obtained is further adjusted for imputed bank charges. Central Statistical Organisation's figure of consumption of Fixed Capital was added to the State Domestic Product to arrive at the Gross Domestic Product.

The constant (1980-'81 prices) price estimates are obtained based on the wholesale price index of manufactured articles in the unregistered sector.

6. Construction

The State Domestic Product of construction activities is based on expenditure method.

The estimates of expenditure for construction are prepared under the following heads.

(a) State Government Administrative Departments & Local Bodies.

Construction expenditure is prepared based on the analysis of State Government Budget and from the analysis of the accounts of Local Bodies.

(b) Departmental enterprises

Construction expenditure obtained from the analysis of the accounts of Departmental enterprises

(c) Non-Departmental enterprises

Construction expenditure is obtained by analysis of the accounts of the non-departmental enterprises.

(d) Post and telegraph

Construction expenditure is collected from the post and telegraph department.

(e) Railways

Construction expenditure is collected from the railway authorities.

As regards urban residential buildings, rural residential buildings, urban and rural non-residential buildings, other construction works including repair and maintenance etc. the detailed survey results of AIDIS, 1981-'82 published by the Reserve Bank of India is depended. As regards residual category (private corporate sector) the C.S.O's figures are adopted in the absence of required data at State level.

To the Net Value added, the consumption of Fixed Capital figure supplied by the Central Statistical Organisation is added to arrive at the Gross Value added.

The constant (at 1980-'81 prices) price estimates are obtained by moving the base year estimates using the index based on wages of skilled workers (rural and urban)

7. Electricity, gas and water supply(a) Electricity

The activities considered for the estimation of State Domestic Product in this industry group includes generation, transmission and distribution of electric energy. The estimates of income from this sector are derived by adopting the income approach. The Kerala State Electricity Board covers the major portion of activity in this industry in the State. There are also licences and sanction holders engaged in the distribution of electricity in the State.

The contribution to State Income from the Kerala State Electricity Board has been estimated by analysing the Annual Accounts of the Board. Gross income has been estimated as an aggregate factor payments such as compensation paid to employees

including salaries, wages, other welfare expenses, managing agents remuneration, interest, rent, operating surplus including transfer to reserve and depreciation. The net income is derived by subtracting depreciation from gross income. In respect of licences and sanction holders the value added data furnished in the Annual Survey of Industries reports for the State of Kerala has been directly used.

The estimate at 1980-'81 prices are obtained by multiplying the Gross Value added for 1980-'81 with the index number showing the changes in revenue from sale of energy.

(b) Gas

The estimate of Gobar gas has been prepared based on the data obtained from the Kerala Khadi and Village Industries Commission. The production and value of LPG have been supplied by the Central Statistical Organisation. As separate consumption of Fixed Capital for gas sector is not available Gross Domestic Product is treated as State Domestic Product for this sector. The Constant (at 1980-'81 prices) price estimate is arrived by using the ratio of value of LPG at 1980-'81 prices to current prices)

(c) Water supply

The estimates are prepared by income approach. The working force in water supply industry are estimated separately for rural and urban areas on the basis of growth rates observed for 1971 and 1981 Census. The per head earnings is computed based on the data on employment and compensation paid to employees collected from Municipalities, Corporations and Town ships for urban areas. In respect of rural areas work force available from population census (1981) has been treated as private rural working force and this has been moved to subsequent years by taking the annual growth rate of 1971-'81 Census results. Per worker compensation of employees in urban area is taken as average of all the categories in urban areas and of the lowest category for rural areas.

The estimates at constant prices are obtained by using the average income per persons of 1980-'81.

8. Transport, storage and communications

(1) Railways

In the case of Railways, the estimates are supplied by Central Statistical Organisation.

(2) Transport by other means and Storage

(a) Mechanised Road Transport

Public Sector:- The Net Value added in Mechanised Road Transport in Public Sector has been worked out annually using the results of analysis of Profit and loss statement of Kerala State Road Transport Corporation.

The constant price estimates are obtained by moving the value added for 1980-'81 with the index of number of workers (KSRTC).

Private Sector:-

For the private sector the value added per-person engaged in passenger transport (Bus) has been worked out each year, using the results of the analysis of profit and loss statement of a sample number of private undertakings from each district. The number of workers for 1980-'81 is based on 1981 population census and these have been carried forward to other years on the basis of annual growth rate observed in the number of vehicles registered with the State Transport authorities. Assuming the average earnings from goods traffic to be the same as for private bus service, the net value added is estimated using the estimated number of workers.

The value added at constant price is obtained using the index of number of registered vehicles.

(b) Non-Mechanised Transport

It covers non-mechanised road transport supporting services to land transport, unrecognised water transport and services incidental to transport. The gross value added and net value added for transport by other means for the base year 1980-'81 is prepared using 1981 Census working force and Gross value added and Net Value added per worker. Gross Value added and Net Value added per worker as obtained from 1983-'84 enterprise survey were brought back to 1980-'81 using the consumer price index of urban non-manual employees and index of rural skilled workers for urban and rural areas respectively. The estimates of gross value and Net value added for subsequent years are worked out by carrying forward the base year estimates with the help of relevant index of gross value of output of commodity producing sectors at current prices.

The value added at constant price is obtained by moving the value added for 1980-'81 with the index of gross value of commodity producing sectors at constant price.

(c) Storage and Ware housing

For storage and Ware housing, public sector estimate is worked out by analysing the annual accounts of Kerala State Ware Housing Corporation. For private sector, the value added obtained from NSS 29th round is used. The base year estimate is brought forward using the index of gross value of commodity producing sectors valued at current prices.

For the estimates at constant price, the data on storage capacity is made use of.

(d) Water transport

Estimates of income from Kerala Water Transport Corporation and Water Transport Department, Alappuzha are obtained by analysing the annual accounts of the respective water transport undertakings. Similarly income from Cochin Port Trust and other ports are worked out annually by analysing the relevant accounts and Budget.

Value added at constant price is obtained by using the index of employment.

(3) Communication

The estimates at current and constant price are supplied by Central Statistical Organisation.

9. Trade, Hotels and Restaurants

The value added for the year 1978-'79 is obtained from the NSS 34th Round. For other years, it is carried forward with the help of index on gross value of commodity producing sectors valued at current prices. The NSS data does not cover public sector enterprises. Hence adjustment for the same and for imputed bank charges are also made in this estimate.

The estimate at 1980-'81 prices is worked out using the index of value of commodity producing sectors valued at constant price.

10. Banking and Insurance

Estimates at current and constant price are supplied by the Central Statistical Organisation.

11. Real Estate and Ownership of Dwellings

(a) Real Estate

The net product in respect of Real Estate is worked out by analysing the balance sheet of the Joint Stock Companies.

(b) Ownership of Dwellings

The State Domestic Product from the ownership of dwellings is estimated by collecting the required details from all the Municipalities, Corporations and Sample number of Panchayats in the State.

In the case of Panchayats, estimated rental/dwelling was worked out from the sample panchayats. Gross rental value is then calculated as a product of rental/dwelling and the estimated number of rural dwellings.

Net domestic product is estimated by deducting from the expenditure on gross rentals the expenditure on current repairs and maintenance and depreciation. For consumption of fixed capital, the respective percentages used at All India Level (separately for Rural and Urban) is adopted for the State.

Value added at constant price is obtained using the index of number of urban dwellings.

Business service

The estimates are prepared following the same approach and same source of data as for 'other services' (other than Medical and Health Services).

The Value added at 1980-'81 price is obtained using the Index of employment (1981 Census)

12. Public administration

The estimates are prepared separately for the State Government, Central Government and Local Bodies consisting of Municipalities, Corporations and Panchayats.

With regard to the income of persons in the State Government service, the estimates are prepared in terms of compensation of employees obtained from the budget documents of the State. For the central part the estimates are supplied by the Central Statistical Organisation. For the Local Bodies, data on expenditure on wages and salaries have been collected from all the Municipalities, Corporations and Panchayats of the State.

Constant price is worked using current and constant ratio of Central Statistical Organisations estimate.

13. Other Service

Estimates of Net Domestic Product for the sector have been prepared separately for Education, Medical and Health Service, Sanitary Service and other service.

Education

For educational service, the details of expenditure incurred on wages and salaries of teachers and other staff in the respective educational institutions both public and private are estimated from the relevant budgets.

Value added at constant price in the education sector is obtained using the average of teacher student ratio.

Medical & Health Service

In the case of Medical and Health services, the expenditure on wages and salaries in the public sector have been obtained from

the budget of the State.

For the estimate of value added from non-government sector the value added/worker for the rural and urban areas are worked out on the basis of the results of NSS 34th round and the results of enterprise survey 1983-'84. These are then brought forward and backward using the indices of Wages of rural skilled workers and consumer price index number of urban non-manual employees. The total working force for the private sector is obtained by subtracting employment in the public sector from the total working force from the Census 1981.

Sanitary Service

The compensation of employees has been estimated on the basis of Municipal data.

Other Service

For rest of the other services namely legal services, religious and other community service, personal service and service not elsewhere classified the value added per worker is obtained similarly for medical and health service (private). Value added at constant price for medical and health service, sanitary service and other service is obtained by using the index on number of workers.

II. A brief Analysis

The present issue incorporation estimate of Net Domestic Product for the period from 1980-'81 to 1988-'89 with the base year 1980-'81.

Net Domestic Product at current prices is estimated at Rs.923474 lakhs in 1988-'89 against Rs.828053 lakhs in 1987-'88 that is 11.52% higher compared to the previous year. The per capita income increased from Rs.2896 in 1987-'88 to Rs.3180 in 1988-'89 registering an increase of 9.81%. Between 1980-'81 and 1988-'89 the State per capita income increased from Rs.1513 to Rs.3180 registering an increase of 110.18%.

In real terms at constant price (1980-'81 prices) the State Domestic Product works out to Rs.452234 lakhs in 1988-'89 as against Rs.415075 lakhs in 1987-'88 showing an increase of 8.95%. The per capita income in real terms on the other hand showed 7.23% increase, i.e. from Rs.1452 in 1987-'88 to Rs.1557 in 1988-'89. Between 1980-'81 and 1988-'89 the per capita income increased from Rs.1513 to Rs.1557, showing an increase of only 2.91%.

At the current prices the national income works out Rs.312634 crores in 1988-'89 as compared with Rs.260580 crores in 1987-'88 showing an increase of 19.98% whereas in Kerala Rs.9235 crores in 1988-'89 as compared with Rs.8281 crores in 1987-'88 showing an increase of only 11.52%. At constant price (1980-'81) the total national income in 1988-'89 is estimated at Rs.168382 crores as against Rs.151746 crores in 1987-'88 thus recording an increase of

with Rs.4151 crores in 1987-'88 thus recording an increase of 8.94%.

Where the per capita income at current prices records growth rates of 17.75% and 9.81% respectively the same at constant price records 8.90% and 7.23% respectively for All India and Kerala, during 1987-'88 to 1988-'89.
