THIRUVANANTHAPURAM  
1989

## P R E F A C E

This report on gross fixed capital formation in Kerala (at current prices) is the second of its kind brought out by the Department of Economics and Statistics. The first report on fixed capital formation in Kerala for the period 1980-81 to 1985-86 was published in 1990. This brochure is an attempt to make a detailed analysis of the gross fixed capital formation in Kerala from 1985-86 to 1988-89.

Gross fixed capital formation is that part of states total expenditure which is not consumed but added to its fixed tangible assets and stock. It consists of the acquisition of fixed assets like buildings, civil works, machinery, vehicles etc. and changes in stock of raw material, finished goods and semi finished goods.

The object of the study is to bringout a clear picture of the growth of capital formation in both private and public sectors. In the State Government sector fixed capital formation by 'type of assets' and 'industry of use' in respect of Administrative departments and departmental enterprises are also dealt with separately. In private sector the nature of capital formation by type of use, and category of industry relating to non departmental commercial units are also examined.

This report is brought out by the joint efforts of Smt.Nagamma, Assistant Director, Smt.Ushakumari, Research Officer, Sri.G.Devadas, Research Assistant and Sri.Gopakumar, Compiler under the supervision and guidance of Shri.U.Thomas Sleeba, Additional Director. Valuable information provided by the various public bodies for the preparation of this report is greatfully acknowledged.

Suggestions for improvement of the report are most welcome.

Trivandrum,  
28-4-1994.

Dr.M.Kuttappan  
Director

## ANNEXURE

### Statements

- I. Gross Fixed Capital Formation by 'Industry of Use' and Type of Institutions.
- II A. Gross Capital Formation of State Government Administrative Departments in Kerala by 'Type of Assets' at current prices.
- II B. Gross Capital Formation of State Governments in Kerala by 'Industry of use' at current prices.
- III A. Gross Capital Formation of State Government Departmental Enterprises in Kerala by 'Type of Assets' at current prices.
- III B. Gross Capital Formation of State Government Departmental Enterprises in Kerala by 'Industry of Use' at current prices.
- IV A to D Category-wise Gross Fixed Capital Formation in Non-Departmental Commercial undertakings.
- V. Gross Fixed Capital Formation in the Agriculture household sector at current prices.
- VI. Gross Fixed Capital Formation in livestock sub-sector at current prices.
- VII. Gross Fixed Capital Formation at current prices in the fisheries sector (1985-86 to 1988-89)
- VIII. Gross Fixed Capital Formation in Registered Manufacturing sector.
- IX. Statement of Capital Expenditure of Kerala State Electricity Board.
- X. Additions to Fixed Assets of Cochin Refineries.
- XI. Gross Fixed Capital Formation in Residential Buildings.
- XII. Fixed Capital Formation from Supra Regional Sectors and Central Government Administration.
- XIII. Industry - Gross Fixed Capital Formation - Private Sector 1985-86 to 1988-89.

\* .....

# GROSS FIXED CAPITAL FORMATION AT STATE LEVEL

## Chapter I - Methodology

### 1.1 Introduction:

Development of an economy depends up on the factors like capital accumulation, investment criteria capital absorption capacity, stability and values and institutions. Out of these capital formation is the first around which the economic development revolves. It provides the lease through capacity creation by promising the activities of savings, credit mechanism and investment. In shsort the main indicator of economic development is the percentage of national income that is reinvented in capital goods through the process of savings.

### 1.2 The concept, scope and coverage:

Domestic capital formation is defined as that part of the country's current output and imports which is not consumed or exported during the accounting year lent is set aside as addition to its stock of capital goods. Net capital formation is measure after allowances are made for consumption of fixed capital. Gross capital formation includes fixed capital formation and change is stock of raw materials and semi finished and furnished goods.

Gross fixed capital formation consists of outlays of industries and producers of Government services private non profit services to households in addition to their fixed assets mines their net sales. These included (1) durable goods (life time of which is one year a more) acquired by produce (2) Improvement and alteration of durable good which significantly extend the expected life time or productivity of the asset, (3) new construction and major improvements which extend its life period (4) reclamation and extension of timber, tracts, mines, orchards, plantations and similar other agricultural holdings (5) breeding stocks, drought, animals, dairy cattle and the like.

Non reproducible tangible assets like land, mineral deposits, timber tracts etc. are not included in capital formation but dealers margins. Service charges and other transfer costs in regard to transactions in such assets form part of capital formation. The construction works and durable goods which are meant primarily for military purposes are excluded. Outlays on newly constructed dwellings by household industries and expenditure on major improvement and alterations of residential buildings form part of fixed capital formation while the purchase of durable goods by households is not treated as capital formation. Expenditure on intangible assets such as patents, goodwill and on health research, education etc. for improvement of technology and productivity of working force are excluded from the scope of capital formation.

Gross fixed capital formation include expenditure on land clearance, irrigation works, plantation and cultivation of new timber tracts, new fruit and sap bearing trees, vines etc. which yield products after a number of years. After such plantations and cultivation become productive, further outlays in respect of the cultivation is considered as intermediate consumption. The clearance and afforestation of timber tracts and forests are considered land improvement activity and are included in gross fixed capital formation.

## GROSS FIXED CAPITAL FORMATION AT STATE LEVEL

The capital expenditure on soil conservation activity by the public sector for conservation of forests is included under capital formation. Similar soil conservation activity in the private sector is considered as own account construction which is clarified under the construction industry.

**Expenditure on current repairs and maintenance** incurred for keeping the fixed assets in proper working order does not form part of capital formation. Expenditure on alterations and additions or replacements of the parts of fixed assets which have an expected lifetime of one year or more and involve substantial outlays and also extend the life of fixed assets or increase their productivity is considered as capital expenditure.

### 1.3 The significance of capital formation:

The capital formation of a country is considered as a major determinant of its economic growth. The growth of capital formation is thus an index of economic development. It is the capital formation that leads to the fuller utilisation of available resources which leads to increase in the size of national output, income and employment and thereby increase the standard of living of the people. It is capital formation that leads to proper exploitation of the natural resources and establishment of different types of industries resulting in increased levels of the income and employment. This enables increase in the economic welfare of the society. Thus capital formation can rightly be considered as the index of economic development in an underdeveloped or developing country.

### 1.4 Estimation: the approach

The commodities which constitute fixed capital formation is valued at purchasers price which covers all costs connected with the acquisition and installation of the items of assets. Indirect outlays for acquisition of the assets in the form of advertising etc. are excluded. In the case of fixed assets produced on, own account, these are valued at production cost including imputed values in respect of own account labour employed. Estimates of gross fixed capital formation can be prepared (1) by type of assets, (2) by industry of use.

#### i. Type of assets:

Type of assets consists of (a) Construction (b) Machinery and equipment and change in stock. The commodity flow approach is followed for construction works under taken with the use of specified construction materials and also for machinery and equipment.

#### (a) Construction

The value at site in the accounting years of five basic construction input materials, viz. cement, iron and steel products, timber and round wood, bricks and tiles and permanent fixtures and fittings are considered under 'construction'. After such installation and completion become productive years. After such installation and completion as intermediate consumption outlays in respect of the construction is included as capital formation. The construction and installation of timber trees are considered long improvement activity and are included in gross fixed capital formation.

(b) Machinery and equipment

The various items of machinery and equipment are classified into

- (i) Capital goods
- (ii) Parts of capital goods
- (iii) Partly capital goods
- (iv) Parts of partly capital goods

The total of (i) and specified percentage of (ii) to (iv) on the basis of ASI data, are taken as capital formation.

The estimates of gross domestic fixed capital formation in construction and machinery and equipment are aggregated to arrive at the estimates of gross domestic fixed capital formation by type of assets.

However, due to paucity of data, estimation of gross fixed capital formation by type of assets is attempted only in the public (State Government) sector in this report.

**1.5 Industry of use:**

The expenditure approach is primarily followed for estimation of gross fixed capital formation (GFCF) by industry of use. The whole economy is classified by user industries broadly in terms of the industrial classification used for measurement of net domestic product. Each industrial activity is further divided into public and private sectors whenever relevant. The private sector under each activity has been further divided into organised and unorganised sectors whenever data are available. The public sector is divided into administrative departments of Central and State Government and enterprises, both departmental and non-departmental.

**1.6 Agriculture includidng livestock:**

(a) Agriculture proper

The expenditure on GFCF in State Government Departmental enterprises have been culled out from the state government budget document and of the non-departmental enterprises from the balance sheet or annual reports of the enterprises.

The source of information of GFCF in the household sector of Agriculture is based on the expenditure on farm business available in AIDIS. The base year estimates of gross fixed capital formation of the reporting households in respect of rural and urban sectors are obtained separately from this report.

The latest two census provide the number of rural and urban households separately usisng the geometric growth rate, the number of households during the year 1985-86 to 1988-89 have been estimated.

The per household gross fixed capital formation for the base year has been arrived at by using the total gross fixed capital formation and the number of households, as estimated from the survey results separately for rural and urban sectors.

By making use of the per household gross fixed capital formation, thus obtained and the projected number of households from the census results, gross fixed capital formation in Farm Business has been estimated both for rural and urban sectors for the years from 1985-86 to 1988-89 at constant prices.

The GFCF at current price has been obtained by using the index of average daily wages of unskilled labours in construction sector.

The GFCF at current price, thus obtained for rural and urban sectors have been finally aggregated to obtain the GFCF from farm business.

#### (b) Livestock

For the estimates of Agriculture, proper the value of breeding stock, draught animals, dairy cattle etc. which farm part of capital formation has been added. As the annual data on livestock population are not available, the different categories of livestock as given in the quinquennial livestock census have been considered and the number of each category estimated using geometric growth rates.

The data regarding bullocks and bulls over three years not in use, cows over 3 years not in use, female goats of one year and above not in milk etc. are excluded from the purview of capital formation. The cattle, male over three years, cows in milk, buffalows, male over three years, she buffalows in milk, goats - female of one year and over in milk, males one year and over (breeding) as provided in the census have been considered to farm part of capital formation of livestock component. The increment of each category every year is estimated and then evaluated using the average price of the category each year. Only 4% of the male goats have been considered to be the capital formation component of this category.

#### **1.7 Forestry and Logging:**

The Government of Kerala have taken over the private forests of the state by an Act. Therefore, the capital expenditure on forest preservation, extension etc. of the state is the contribution of the public sector only. The capital formation component of this sub-sector is obtained from the analysis of the State Government Budgets.

#### **1.8 Fishing:**

The livestock census of 1982 and 1987 provide information on the number of different categories of mechanised and non-mechanised boats and other major fishing equipments like fishing gears and catamarans engaged in fishing activity. The number of fishing boats and equipments during the years 1985-86 to 1988-89 has been estimated using the geometric growth rate of the inter census years and then the increment during each year, is worked out. The average price of the different categories of boats and equipments each year collected from the state department of fisheries have been used to evaluate the increment of boats each year. The gross fixed capital formation in Fisheries sector is thus obtained at current prices.

### **1.9 Mining and Quarrying:**

There is no departmental enterprises comming under this sub-sector in Kerala.

In the case of non-departmental commercial undertakings, the Kerala Metals and Minerals is considered in public sector. The unorganised sector is estimated on the basis of NSS 34th round.

### **1.10 Manufacturing (Registered):**

Annual survey of industries provide data on value of stock and addition to the fixed capital during the accounting years. The details of capital stock separately for (i) Land (ii) Improvement to land and other construction (iii) building (iv) Plant and machinery (v) Transport equipment (vi) Tools and other fixed assets and (vii) Assets under construction/installation are available. Expenditure on land does not form part of capital formation and hence excluded from the estimates.

### **1.11 Manufacturing (un-registered):**

Those manufacturing enterprises which do not come under the purview of the Indian Factories Act - 1948, are considered under this subsector. The 34th round of NSS provides data on fixed assets of manufacture and repair services in the un-registered sector. The whole of the un-registered sector of the manufacturing industry has been brought under the coverage of the survey. The data contained in the report on NSS 34th round has been used to estimate the contribution to gross fixed capital formation from this sub-sector. The addition to fixed assets per enterprise and the estimated number of enterprises, both rural and urban have been considered and the combined estimate of GFCF arrived at for the base year.

The base year estimates are moved to later years using appropriate indices.

### **1.12 Electricity, Gas and water supply:**

Electricity generation and distribution in Kerala is mainly the activity of Kerala State Electricity Board categorised under N.D.C.U.S. The annual accounts of the K.S.E.B. have been analysed and the GFCF estimated. Since the private sectors are covered under ASI, separate estimates have not been prepared under this head.

The Cochin Oil Refineries is engaged in the manufacture L.P.G. This has been considered to assess the capital formation of this sub-sector - Gas.

The estimates of GFCF from water supply relating to public sector is prepared on the basis of State Government Budget upto 1987-88. From 1988-89 onwards the scheme under this head are implemented by the 'Water Authority' of Kerala and hence no details are available in the Budget Documents. No data have been received from water authority also and hence not incorporated in this issue.

### 1.13 Construction:

The fixed capital formation in the construction sector comprises of net addition to machinery and equipments, tools and implements of construction enterprises. The annual balance sheets/accounts have been analysed and estimates of GF'CF obtained. The construction expenditure culled out from the State Government Budget has also been taken into account.

The estimate from private sector is limited to unorganised sector based on NSS 34th round results due to non-availability of data from other sources.

### 1.14 Transport Storage & Communication:

#### (a) Railways

This being a supra-regional sector, the Central Statistical Organisation is to prepare the State-wise estimates of capital formation and supply the same to the states for incorporation in the state level estimates as recommended by the Regional Accounts Committee (RAC). The data have been supplied by Central Statistical Organisation.

#### (b) Transport by other means & storage

The State Government Budget provides information capital expenditure on mechanised Transport - road and water.

In respect of non-departmental enterprises, the Annual Accounts of K.S.R.T.C., the Kerala Inland Navigation Corporation and the Cochin Port Trust have been analysed.

The enterprise survey 1983-84 conducted by Central Statistical Organisation provides information on mechanised and non-mechanised transport in private sector. The base year estimates of GF'CF is moved for the latest years using the growth rate observed in the Gross Domestic Product of the respective sector.

In the Public Sector, there is no departmental enterprises in storage. The Ware Housing Corporation and Food Corporation of India are the non-departmental enterprises in this sector. The Annual accounts of these enterprises have been analysed to obtain the capital formation component of storage.

#### (c) Communication

The Government of India, demands for grants for the Indian Posts and Telegraph department and Ministry of Communication is the main source of information. The activities covered under this sector are Posts & Telegraphs, Telecommunications and Overseas Communication service. The details of capital expenditure at the national level for posts and telegraph and Telecommunications are presented in the budget relating to Posts & Telegraph Department. As per the recommendation of the Regional Accounts Committee, the Central Statistical Organisation is to prepare the state-wise estimates of fixed capital formation. The Central Statistical Organisation has supplied the estimates.

### **1.15 Trade, Hotels and Restaurants:**

The annual accounts of the non-Departmental Commercial undertakings engaged in trading activities were analysed to obtain the GFCF of these enterprises.

The private sector estimates for the base year are prepared on the basis of data available in NSS 34th Round, Directory Establishment Survey 1985-86 for Trade and Enterprise Survey on Hotels and Restaurants 1983-84. The base year estimates are moved to later years with the help of gross value added in the sector.

### **1.16 Bankind & Insurance:**

The state-wise estimates of capital formation in respect of Nationalised banks, Life Insurance Corporation of India, Reserve Bank of India etc. is to be provided by Central Statistical Organisation as recommended by the Regional Accounts Committee. The details have been obtained from the Central Statistical Organisation and incorporated.

### **1.17 Real Estate, Ownership of Dwellings:**

GFCF under residential buildings based on AIDIS' 1981-82 has been used for preparing the base year estimates under this head. The base year estimates are moved to later years using the building cost index numbers.

### **1.18 Public Administration:**

This sector consists of the capital expenditure of Central Government administration in respect of the state, State Government administration and local bodies-corporations, municipalities and Panchayats.

The estimates of capital expenditure in respect of Central Government administration at the state level is provided by Central Statistical Organisation.

The State Government budgets have been analysed to obtain the capital expenditure of State Government Administration.

The capital outlay of Corporation and Municipalities have not been covered in this report as its complete analysis is pending. The construction expenditure and expenditure on machinery are the components of GFCF considered under this sector.

### **1.19 Other Services:**

The expenditure of State Government under this sector is taken from the State Government budget. The non-departmental commercial undertakings coming under this sector is also considered.

The GFCF in private sector is computed for the base year as per the enterprise survey, 1983-84 on service sector. The base year estimates are moved forward using the indices of GDP in the respective sector.

## Chapter II - Analytical Interpretation

The estimates of gross fixed capital formation for the years from 1985-86 to 88-89 are analysed industry-wise below. Table I presents the GFCF by industry of use.

The total capital formation estimates show an upward trend during the entire period starting from 1985-86 to 1988-89. Real estate and ownership of dwellings form major portion of the total GFCF during the entire period under report ranging from 29.47% to 40.93%. The main reason for this higher percentage is due to the inclusion of the estimates of fixed capital formation of residential buildings under the 'Real Estate and Ownership of Dwellings'. The contribution of Electricity, Gas and Water supply stand next to 'Real Estate and ownership of dwellings'. It ranges from 14.42% to 23.92%. The gross fixed capital formation of Electricity, gas and water supply show downward trend from 23.92% in 85-86 to 14.42% in 88-89. The contribution of Manufacturing Industries range from 6.82% to 31.28% while that of Agriculture sector from 7.15% to 10.16% the total GFCF.

Table II shows the percentage distribution of GFCF.

Table III presents the gross fixed capital formation both in public and private sectors. During the period under report the contribution of private sector forms 59.12% to 72.45% of the total GFCF. The share of public sector is more in Mining & quarrying, Electricity Gas, Water supply, Banking, Insurance, Transport, Storage and Communication. The contribution of public sector is nil in fishing sector.

### Gross Fixed Capital Formation in State Government Sector.

The State Government Sector consists of Admdinistrative Departments and Departmental enterprises.

#### Administrative Departments

The GFCF of Admdinistrative Departments are obtained from the State Government Budgets. The 'Expenditure approach' is followed for the estimation of capital formáton from Government budgets. For the estimation of gross capital formation the items such as construction, machinery and equipments, net purchase of second hand assets and change in stock etc. were considered.

#### Departmental Enterprises

Gross capital formation under this sector is estimated by analysing the annual accounts of the Departmental Enterprises including State Government budgets.

#### Gross Capital Formation by type of assets

The GCF of Administrative Departments and Departmental enterprises by type of assets is detailed in Table IV.

The Table IV reveals that the estimate of GCF for the year 85-86 was 22.7 crores. A slight increase can be seen in the estimates of GCF for 86-87. During the year 87-88 the gross capital formation has decreased to 195 crores. Again in 88-89 a slight increase is noticed in the GCF of Administrative Departments. The main component under this sector is construction which relates to buildings, roads and bridges and other constructions. The share of construction sector to gross capital formation is declined from 98% in 1985 to 81% in 1988-89.

#### Gross Capital Formation - by Industry of use

The GCF of Admdinistrative Departments and Departmental enterprise is analysed by 'Industry of Use' in Table V.

The expenditure under various heads of the State Government administrative Departments and Departmental enterprises are classified under Agriculture, Forestry, Fishing, Manufacturing, Construction, Water supply, other transpsort other services and public administration.

Table V reveals that the contribution of public administration ranks first place with 58% in 85-86 and 52% in 88-89. The share of Agriculture sector varies from 38% to 27%.

#### Gross Capital formation by type of Institution

Administrative Departments and Departmental enterprises constitute the State Government sector. The contribution of these sectors is analysed by type of institution in Table VI.

The Table VI indicates that the major portion of GFCCF is contributed by the Administrative Departments during the years of study. It varies from 67% to 71%. It reveals that the year 86-87 accounts the highest share of GFCCF for Administrative Departments.

#### **Conclusion:**

The estimation of GFCCF in the State covered mainly Private & Public Sector. Eventhough the coverage is greater in public sector, private sector occupies the major share of the total GCF.

In State Government sector there is a gradual increase of GCF except in the year 87-88.

Detailed statements of gross fixed capital formation relating to all important activitities are presented in annexure to this report.
