## *Preface*

This Publication " Economic and Purpose classification of Kerala Government Budget 1993-94 to 1998-99 is an attempt to explain the state Government Budget Accounts for the years 1993-94 to 1998-99 into meaningful economic categories. The Analysis of state budgetary transactions indicating the economic significance and its functional purpose is expected to provide an outline to understand the Kerala Government Budget better in its role to bring out alround development in different aspects of the economy. The Economic classification presents the expenditure and receipts of the Government by economic categories. This gives a clear idea about the general impact of the Government transaction of the economy. The purpose classification presents the government expenditure by functional categories. These two are clubbed together to form Economic-cum-purpose classification.

This publication is prepared as a part of the system of Regional Accounts and conforms to the guidelines recommended by the Regional Accounts Committee set up by Government of India for the purpose.

This publication is an outcome of the sincere efforts of the budget section of the State Income unit of this department. The contents of the report may be useful to planners, Administrators and others interested on this subject.

Constructive Comments and Suggestions for further improvement of the contents of this publication are cordially invited.

A. Meera Sahib  
DIRECTOR

Thiruvananthapuram,

10 - 08 - 2001.

## I. Introduction

Budget is the most important financial document of the government. In these days it has become a major instrument of policy, as the change in the level and composition of both revenue and expenditure significantly affect the level of state income. However the budget presented in the legislative assembly as such reveals financial transactions and not the economic and social significance of various items of revenue and expenditure. For example from the study of budget documents, as they are, it is not possible to get a clear idea of capital formation out of budgetary resources, savings of state government, contributions of the government to the total income generation etc. Moreover though budget is divided into revenue and capital accounts, many items of consumption expenditure are included in the capital account and viceversa. Again the budget document contains various internal transfers also. For example revenue accounts shows certain transfers to and from the capital accounts, which are mere accounting transactions or transfers. These have to be eliminated since they do not have any impact on the economy. Budget, which is primarily designed for facilitating the authorisation of expenditure and revenue, has therefore to be sorted out, reclassified and interpreted into meaningful economic and functional categories. Such an attempt of the Kerala Government Budget for the years 1993-94 to 1998-99 is presented in this publication.

The economic classification system presented here is based on the system of national accounts recommended by the United Nations or its specialised agencies. The system of national account presents an interlocking system of accounts for the transactions of the whole economy and government accounts appears as one elements of this whole system.

The usefulness of economic and functional classification of government budgetary transactions in the formulation of fiscal and economic policies has received increasing recognition. The components of economic and purpose classification of budgetary transactions of Government of Kerala for the year 1993-94 to 1998-99 are presented in the following paragraphs with analytical table appended. The ultimate aim of applying these methods of classification is to relate information obtained on the government sector to similar information made available on other major sectors of the economy. It is also designed to get this kind of information on government transactions which are required for determining aggregates of national income and expenditure and for tracing their inter relationship with other major sectors of the economy. In a country like India the government sector is so important that a proper analysis of its transactions is highly valuable. In such countries the importance of economic and functional classification cannot be over emphasised. Economic

and purpose classification provides macro economic data and is useful mostly at the policy formulation level and enables the decision makers to review the broad terms, the pattern of resources allocated and its impact on the rest of the economy.

## **2. Economic Classification Of State Government Budgetary Transactions**

The Economic classification presented here is based on the delineation of government transaction in a set of three accounts as recommended by the committee on Regional Accounts.

### **Account I – Income and out lay account of administrative departments**

This account deals with current revenue and expenditure of government administrative departments. All departments other than those listed under Account II in this section are considered as administrative for the purpose of economic classification. The current expenditure of administrative departments consists of final outlays of the government of current account, which represents government current consumption. The final outlays are made up of purchase of goods and services and payment of wages and salaries and capital formation. Besides final outlays government makes transfer payments i.e., interest, grants, subsidies, scholarships etc to the rest of the economy which are added indirectly to the disposable income of the community. To meet this current expenditure, the government appropriates a part of the income of the community through a variety of taxes, fees, miscellaneous receipts etc. occurring in the course of administration. In addition, government has an investment income from property and entrepreneurship and also receive revenue grants, contribution and recoveries from the union government and rest of the economy. The excess of current receipts over current expenditure denotes the savings of the government administration available for domestic capital formation. Some of the items included in this account are explained as under.

#### **A REVENUE**

##### **1. Income from property and entrepreneurship**

This flow records the income receivable by the state government from departmental commercial undertakings as well as rent and dividends accruing to it from the ownership of buildings or financial assets.

## **2. Interests**

Interest received may be from households, local bodies and from departmental commercial undertakings. The interest received from departmental commercial undertakings appears as a payment item in Account II - Production Account of departmental commercial undertakings. This item is therefore deducted from both interest received and interest paid so that there is no double counting.

## **3. Direct Taxes**

Direct taxes include two components, viz. direct taxes on income and other direct taxes. The following are the items included under direct taxes.

1. Taxes on income other than Corporation Tax.
2. Other taxes on income and expenditure.
3. Land Revenue.
4. Estate duty.
5. Taxes on immovable property other than agricultural land.

## **4. Indirect Taxes**

Indirect taxes are defined as taxes assessed on produces that are chargeable to the cost of goods and services produced or sold. They include: -

6. Stamps and Registration fees.
7. Union and State Excise.
8. Sales Tax
9. Taxes on vehicles.
10. Taxes and duties on electricity.
11. Entertainment Tax.
12. Taxes on goods and passengers.
13. Fees realised under factories Act, fees for stamping weights and measures etc.

## **5. Miscellaneous receipts.**

These receipts are in the nature of fees, fines and forfeiture etc.

## **6. Revenue grants, Contributions etc**

Grants from government of India have been divided into parts, Revenue grants and Capital grants. Revenue grants have been included under this account.

## **B. Expenditure**

### **1. Compensation of employees**

This item comprises of remuneration to general government employees such as Pay of officers, Pay of establishment and allowances and honorarium other than travelling and daily allowances. Wages paid to casual labourers have also been taken as wages and salaries. Also included are pension payments to government employees of administrative departments.

### **2. Commodities and Services**

This item includes all expenditure under contingency such as office supplies, rent rates and taxes, fuel and light, printing and stationary, travelling expenses, telephone and telegraphic charges and other items for current operations, less sales by general government goods and services to enterprises and households. All expenditure on current repairs and maintenance are included here.

### **3. Interest**

Interest comprises interest on public debt and other obligations other than that on commercial debt which should be included in Account II – Production Account of commercial undertakings.

### **4. Subsidies**

Subsidies include all grants on current account which private industries receive from the government. These may take the form of direct payments to producers or differentials between the buying and selling prices of government trading organisations. Thus subsidies are transfers which in the light of the basis of making the grants, which are additions to the income of the producers from current production. The grants may for example be based on the amount of value of commodities produced, exported or consumed, the labour or land employed in production or the manner in which production is organised and carried on. The value of coupons made available by government agencies to specify groups of the population to enable them to obtain goods at prices lower than the current market prices are classified as current transfer to households. Under certain circumstances subsidies include the grants made by government to public corporations as compensations for losses i.e. negative operating surplus and in connection with the losses of Departmental Commercial Undertakings. This will be in the case when the loss is clearly the consequence of the policy of the government to maintain prices at a level at which the proceeds of the public industry will not cover the current costs of production. Rebate on sale of handloom cloth, loss on the sale of fertilizers,

improved seeds, pesticides and agricultural implements, loss suffered by the co-operative societies etc are to be treated as subsidies. In the case of irrigation, the loss by the departmental undertakings is treated as subsidy.

## 5. Current Transfer

Current transfers include grants to local bodies to the rest of the world or to the other sectors, like grants to aided school, scholarships and stipends and welfare of the weaker sections of the society.

## 6. Savings on current account

The balancing item on the current account of government administration represents the saving of this sector, i.e. surplus of current receipts over current expenditure.

## Account II – Production Account of Departmental Commercial Undertakings

The departmental commercial undertakings (government trading enterprises in the U.N reports) may briefly be defined as agencies producing goods and services that are not provided free of charge. The essential characteristics distinguishing these departments from government administrative departments are that they charge what they provide according to use and are thus able to meet most of their costs from their sale proceeds. Other related characteristics are as follows.

- i) Departmental Commercial Undertakings are subject to market forces i.e. demand and supply.
- ii) The activities of such undertakings are subordinate to legislative control and are owned, run and managed by the government.
- iii) The intention to make profit is not the essential characteristics and the activities of an undertaking may be carried on deliberately at a loss.
- iv) Commercial accounting methods have to be used to determine the profit and loss.
- v) The operation of commercial undertakings usually involves the use of expensive capital equipment and the holding of stocks, which may be subject to large fluctuations and the provision for depreciation may therefore be a significant element in the total cost of the operations.
- vi) To maintain their operations, commercial undertakings must both give and receive commercial credit.

It is sometimes difficult to decide whether a certain government department should be treated as an enterprise or as a part of a government administration. This is because some charges made by government departments resemble sales by departmental commercial

undertakings. In the state government there are some departments, which may be treated as ancillary agencies. They may have been defined as bodies which are separately organised to supply goods and services for the use of other departments of the government but which do not directly provide service to the public. They be subdivided into agencies such as Public works departments, which are not run on commercial basis, Purchasing agencies organised for the purchase and distribution of office supplies and the departments providing professional services. They exist primarily to supply goods and services to government agencies. They may also have some sales to outside agencies which are typically incidental to its functions of serving to government bodies. For the purpose of accounting all such departments they have to be taken under government administration because goods and services of such departments are not sold on commercial basis. Like-wise some governments may also engage in lending. For example Agriculture Departments may make or give loans to farmers, which is also incidental to its main function of serving the government and thus cannot be grouped with financial enterprises.

Independent statutory corporations and boards set up by the state government are excluded from the purview of those commercial undertakings included in this account. In the case of Kerala, the following head of accounts are to be classified as departmental commercial undertakings.

1. Irrigation
2. Road and water transport schemes.
3. Forests.
4. Milk supply schemes.
5. Printing press.
6. Ports and Pilotage.

The expenditure side of commercial undertakings spells out the current expenditure in the wages and salaries, goods and services interest, consumption of fixed capital and profits. The loss in irrigation is treated as subsidy and is shown on negative expenditure on expenditure side of the account. On the revenue side, the sale proceeds are given.

### **Account III – Capital Finance Account of State Government**

This account is concerned with the total capital formation by government administration and departmental commercial undertakings together with capital transfer payments which are mostly for assisting capital formation in the rest of the economy. The capital expenditure of government administration and departmental commercial undertakings have been given

separately while the sources of finance are common to both. The different items included in the account are discussed here under.

### **1. Gross Fixed Capital Formation**

Gross capital Formation represents to gross value of goods, which are added to domestic capital stocks of the nation. It comprises both expenditure on the acquisition of fixed assets and the value of physical change in stocks. The gross fixed capital formation has been classified into buildings and other construction and machinery and equipment.

#### **(a) Buildings and other Construction**

Capital formation under buildings includes all expenditure in new construction and major alterations to residential and non-residential buildings including the value of the change in work in progress. Other construction includes mostly expenditure on construction of roads, bridges and works on power and irrigation projects, flood control, forest clearance, land reclamation water supply and sanitation.

#### **(b) Machinery and Equipment**

This item include expenditure incurred on purchase of various equipments such as buses, jeeps, trucks, tractors for road haulage, power generating machinery, agricultural machinery and implements, office furniture, machinery and equipments and instruments used by professional men. Under this head the expenditure shown against renewals and replacements refers mainly to departmental commercial undertakings.

### **2. Change in Stocks**

Change in stocks represents the value of physical change in raw materials, work in progress (other than the work in progress in building which are included in fixed capital formation) and finished products, which are held by commercial enterprises and in government stock files.

### **3. Capital Transfers**

Capital transfers cover grants to finance the construction of buildings, purchase of machinery and equipment for public water supply and sewage disposal schemes etc. Capital transfers were intended to assist capital formation in other sectors of economy.

#### **4. Receipts on Capital Accounts**

This part deals with the financing of capital formation and the sources of the same are discussed as under.

#### **5. Saving**

The saving on current account is directly taken from Account I

#### **6. Net Borrowings**

Items like internal debt, small savings, provident fund etc. are indicated here.

### **OTHER LIABILITIES**

All investments in the share capitals of statutory corporation and co-operative societies are classified as financial assets and are shown against other liabilities as a negative figure. Also included are the extra budgetary receipts like loans from government of India, inter state debt settlement, contingency fund, deposits and advances, suspense remittances and cash balances. Besides these, there are some funds maintained by the government like famine relief fund, road fund etc. which are also covered here.

### **3. PURPOSE CLASSIFICATION OF STATE GOVERNMENT BUDGETARY TRANSACTIONS**

The government expenditure can be classified in accordance with the purpose it is likely to serve such as health, education, defense, etc.

The Purpose of government expenditure might be of two types. (1) Long term (2) Short term. Long term expenditure might be aimed at tackling the problem of unemployment, economic development of the country and to bring about certain fundamental changes in the structure of the economy. The short term expenditure relate to immediate objectives of expenditure incurred in regard to health, defense, education, social welfare, economic services etc. The aim of the purpose classification attempted here is to classify expenditure in accordance with the immediate or short term social needs of the government.

The purpose classification attempted here relates only to government expenditure of various administrative departments excluding departmental commercial undertakings.

Financial investments of the government in commercial activities in terms of purchase of shares and debentures etc. have been included. Similarly grants and loans given to commercial organisation, non-government institutions or the individuals are also included. It may however be pointed out that the repayment of loans are excluded.

Inter government transfer by nature of transactions, are excluded, similarly the receipts of the government do not come into the picture. However some of the receipts like sales of goods and services produced in the government sector are taken into account in working out the expenditure on net purchase of goods and services by government.

The purpose classification attempted for the present study is the conformity with the U.N recommendation. UN has recommended classification in 9 major categories.

- i) General Government Services.
- ii) Defence
- iii) Education
- iv) Health
- v) Social and Welfare Services
- vi) Housing and Community Amenities
- vii) Cultural Recreation and Religious Services
- viii) Economic Services
- ix) Other Services

These major heads have been split up into minor groups. In the present study some adjustments have been made into the minor categories. As against 30 minor heads suggested by the U. N, all major heads mentioned above have been divided into 19 minor heads only in this

report. Atomic energy is a new minor head, which we have introduced here. It is not given in the U.N classification.

All the items of expenditure are grouped under the appropriate categories in respect or their manner of presentation in the budget. Items, which relate to more than one purpose class are first dis-integrated in accordance with the details that are given in the budget, and then classified into appropriate purpose categories.

In the absence of any details, either the major function of the expenditure is considered as the purpose or it is disintegrated into related purpose categories applying some suitable norms.

In the case of grants, loans and advances to private institutions or to individuals if the purpose of utilization is not specifically mentioned, classification is done on the basis of the main function of the institutions which are receiving the grants, loans and advances are known nor the purpose of utilization is given. In such cases the classification has been done on the basis of account heads under which these expenditure have been shown.

Facilities provided to employees like residential housing facility, free or subsidised medical aid etc. are classified by the nature of facility and not by the functional character of the office providing facilities. Accordingly, loans and advances to employees for construction of houses, purchase of motor cars etc. are classified according to type of services likely to be obtained by the utilization of the loans.

Pension and other retirement benefits (including employees family pension schemes) have been distributed to all the purpose categories in proportion to the amount of wages and salaries attributable to different categories. The welfare pension like old age pensions, pensions to political sufferers or to freedom fighters etc. are however classified under welfare services.

#### **IV. ECONOMIC – CUM – PURPOSE CLASSIFICATION**

In this section, Economic and Purpose classification have been combined into a single two-way cross-classification by significant economic and functional categories. This classification shows how expenditure for a particular purpose is divided between economic categories such as current expenditure on goods and services, capital formation and various types of transfer and loans. It also shows how expenditure in a particular economic category is divided according to different purpose or types of services provided by government. Economic and functional classification of transactions provides macro economic data and is useful mostly at the policy formulation level and enables the decision makers to review in broad terms the pattern of resource allocation and its impact on the rest of the economy.

The economic and functional classification of Kerala Government Budgetary expenditure for the years 1993-94, 1994-95, 1995-96, 1996-97, 1997-98 and 1998-99 are furnished in tables 3.1, 3.2, 3.3, 3.4, 35, and 3.6. It classifies horizontally expenditure for each service for the years under review into significant economic categories and vertically into different functional categories.

Tables derived from the above accounts, for the purpose of state income computation are given in appendix.

## **MAJOR FINDINGS**

The system of accounts presented in this study analyses the various aspects of government budgetary operations and their impact on the rest of the economy. Some of the major findings emerging out this is presented below.

### **TOTAL EXPENDITURE OF THE STATE GOVERNMENT**

The total expenditure of the state government by major categories exclusive of operating expenses of departmental commercial undertakings i.e. given in detail in table-4. This represents the flow back of funds to rest of the economy. The expenditure of Kerala state government is increased to Rs 3867 crores in 1994-95 from Rs 3578 crores in 1993-94, Rs 4196 crores in 1995-96, Rs 5211 crores in 1996-97, Rs 6923 crores in 1997-98 and Rs 7609 crores in 1998-99 showing an increase of about 8% in 1994-95, 9 % in 1995-96, 24 % in 1996-97, 33 % in 1997-98 and 10 % in 1998-99.

### **FINAL OUTLAY**

Final outlay is the major component of the state government. In 1993-94 it is accounted for Rs 2258 crores or 63 % of the total expenditure. In 1994-95 it has increased to 2446 and the share same. In 1995-96 it has increased to 2815 crores and share to 67 %. In 1996-97 it is increased to Rs 3294 crores and the share decreased to 63 %. In 1997-98 it is increased to 3572 crores and share decreased to 52 % of the total expenditure. In 1998-99 it is increased to 4024 crores and share increased to 53 %. Final outlay is the direct expenditure of the state government for goods and services as well as capital formation.

### **CONSUMPTION EXPENDITURE**

This expenditure includes expenditure on wages and salaries and goods and services. It accounted for 91.24 % of the final out lay in 1993-94, 88.68 % in 1994-95, 89.09 % in 1995-96, 84.88 % in 1996-97, 87.77 % in 1997-98 and 91 % in 1998-99.

### **TRANSFER PAYMENTS**

Transfer payments consists of capital and current transfers. Its share is Rs 1241 crores in 1993-94 has increased to Rs 1306 crores in 1994-95 has decreased to Rs 1255 crores in 1995-96 increased to Rs.1802 crores in 1996-97 increases to Rs 3151 crores in 1997-98 and increased to 3411 crores in 1998-99.

### **FINANCIAL INVESTMENT AND LOANS**

This item of expenditure amounting Rs 79 crores in 1993-94 has increased to Rs 115 crores in 1994-95 has increased to Rs.126 crores in 1995-96 decreased to Rs.115 crores in 1996-97, increased to 200 crores in 1997-98. And decreased to 173 crores in 1998-99.

All the components of expenditure show a slight variation, increase or decrease during the periods.

Table 4

**Total Expenditure (excluding expenditure of departmental commercial undertakings)**

## TOTAL CURRENT RECEIPTS

In Table 8, the current receipts of the state government are furnished under significant economic heads.

The total current receipts of the state government has increased from Rs 3031 crores in 1993-94 to Rs.4456 crores in 1994-95 to Rs 5174 crores in 1995-96 to Rs 5872 crores in 1996-97, Rs 6797 crores in 1997-98 and Rs 6875 crores in 1998-99. The tax receipt alone contributed 77.72 % in 1993-94 of the total receipt, 77.32 % in 1994-95, 79.99 % in 1995-96,

85.43 % in 1996-97, 81.67 % in 1997-98 and 85.36 % in 1998-99. During the six years tax receipts remained the highest contributor.

### **CURRENT OUTGOING**

The current outgoing of the state government is shown in Table 9.

### **NET SURPLUS OF DEPARTMENTAL COMMERCIAL UNDERTAKINGS**

Net surplus of departmental commercial undertakings includes the performance of three concerns. It is measured as the excess revenue over the expenditure. The derivation of surplus is shown in Table 11.

The net surplus was Rs 43 crores in 1993-94, Rs 58 crores in 1994-95, Rs 73 crores in 1995-96, Rs 67 crores in 1996-97, Rs 38 crores in 1997-98 and to 22 crores in 1998-99.
