Government of Kerala

Report of
Survey on Handloom Sector in Kerala

Department of Economics & Statistics, Kerala
Thiruvananthapuram-2009

Website: www.ecostatkerala.org, Email: ecostatdir@gmail.com

Preface

Handloom sector, which is one of the major traditional industries of Kerala, is seen losing its relevance in the industrial scenario of Kerala due to several reasons. The industry was very much relevant in the state once with most sought out items of cloths.

The advent of power loom and the conventional method of production in the handloom sector detracted the people to a certain extend from the handloom sector and its products. This industry is still relevant in the state, especially in the rural areas. The sector, which can provide employment to many and it can contribute much to the development of the state, needs to be rejuvenated. With this intention the Government of Kerala decided to study the present status of this sector and entrusted the Economics and Statistics Department to conduct a survey to study the present position of this industry. The Department took up the task and launched the survey works in 2003 in all districts except Thiruvananthapuram, where the survey was launched only in 2004. The survey works completed and preliminary list showing the details of persons engaged in the industry was published for the notice of those who are working in the sector. Complaints of omission or inclusion of few people in the provisional list published received and those were examined by a committee consisting representatives from the Industries Department and Economics and Statistics Department constituted for redressing the complaints raised by the societies and the individuals.

A provisional report was prepared in November 2006 and publishing was delayed due to technical reasons. This final report was prepared in the survey design division of the Directorate of Economics and Statistics. Hope this report will give insight into the handloom sector and will help the planners, researchers and those interested in this area.

M R Balakrishnan
Director

Thiruvananthapuram

29/03/2009

Chapter I

Introduction

Handloom is an important cottage industry in our country, which generate productive employment in rural areas at a relatively low investment. Once our handlooms and handicrafts had captured the world markets. Our handloom items which were decorated with golden jerrics and embroidered with beautiful silk threads were the attractions of the whole world.

With the emergence of the giant cotton mills our handloom industry began to deteriorate. The poor folks engaged in handloom weaving could not compete with the productive capacity and technological eminence of these mills and they became a threat to handloom industry. Thus handloom industry started suffocating.

The govt. has taken numerous steps for the developments of this industry like supplying looms and accessories, training for skill up gradation, rebate, market development assistance etc. through different organizations. Handloom weavers were organized at local level to form primary weavers co-operative societies. The State Handloom Development Corporation has also been set up to help the weavers who work out side co-operative sector. These organizations are working with an objective for providing continuous employment to the weavers and related workers and improving their standard of living. They also act as platforms for the government to reach the weavers.

But these organizations have not been fully able to improve the socio economic conditions of the handloom weavers to the desired level. A sizeable number of weavers are still in the below poverty line category. To encourage more people to buy handloom textiles and to promote handloom industry, government introduced rebate to handloom textiles. In addition to this, government introduced many schemes to help the weavers.

Modern looms were distributed to co-operative societies to increase efficiency of production using modern technology and by improving quality. To find out new markets for handloom, to ensure the availability of new materials, to ensure the welfare of weavers etc. are the main objectives of these schemes.

Even though government has introduced many welfare measures, most of them are not reaching to the poor weavers in the expected manner. Many of them are not even aware of these facts. They are getting only very meager income from weaving and it will not be enough for their living. Hence they are forced to engage their children also in the work. Often this affects their education. The meager incomes received from this sector often force them to withdraw from weaving/weaving related activity.

Though government have adopted numerous measures for the uplifting of the weavers and for the financial support of the organizations in the sector, there is no up to date information about the number of weavers, no of units, quantity of production etc. In these circumstances a survey to collect information on the present status of the industry was suggested by the govt.

But a few Handloom societies challenged the conduct of the survey in the court. Initially the Honourable High Court issued a stay order and on 26.3.2001, The Honourable High Court disposed of the O.P by a judgment saying that the societies are not allowed to procrastinate the matter unnecessarily and ensured the conduct of the survey. The Court also ensured that the daily activities and production of the societies are not impeded through unnecessary intervention of officers. As per this judgment the Handloom Director requested the Director of Economics and Statistics to conduct the survey and Director, Economics and Statistics decided to take up the survey according to G.O (Rt) 937/2001/ID dated. 8.10.2001.

Objectives of the Survey

- 1) To study the socio-economic impact taken place among the weavers due to implementation of various developmental activities.
- 2) To study the present status of handloom sector in Kerala such as number of weavers, number of looms, ownership of looms, production details like varieties of clothes, count wise consumption of yarn, rebate sales, export, wages etc.
- 3) Financial assistance received by each co-operative society under various schemes (loan, share, grant) and present outstanding dues.
- 4) The problems faced by the primary co-operative societies in the erosion of working Capital assistance extended by NABARD/ District Co-operative Bank, due to higher rate of interest, blockage of funds with Hantex/ Hanveev and state government etc.
- 5) To know the
 - 1) Number of Handloom Societies functioning and number of society members.
 - 2) Number of weavers and other workers related to societies and their socio-economic conditions.
 - 3) Number of weavers and other workers engaged in Private firms (Factory type) or on individual basis and their socio-economic conditions.
 - 4) Details regarding the weavers like income received, main source of income etc.
 - 5) Number of looms with facilities.
 - 6) Details regarding employment generated and job related diseases.
 - 7) Quantity of clothes woven, price received, transaction etc.
 - 8) Availability of raw materials
 - 9) Loans or any financial assistance obtained.
 - 10) Number of Hanveev workers etc.

Methodology of the Survey:

The survey was conducted deploying the unemployed youths selected from employment exchanges. The Survey was conducted during the year 2003 in all districts except Thiruvananthapuram. In Thiruvananthapuram the survey was conducted in 2004 based on the list of Handloom Worker's Co-operative Societies (containing the members of the societies) supplied by the District Industries Centers of each district. Enumerators visited the members of the Handloom Workers Co-operative Societies and details were collected. The details of weavers or weaving related workers collected in the Survey. Before launching and during the survey wide publicity was given about the survey with request to the Handloom workers and others related to the sector to co-operate with the survey. The details were collected in schedules designed for the purpose.

Schedules:

Three types of schedules were used for the Survey.

- Schedule I – List of members in the Co-operative Societies.
- Schedule I A – Schedule for collecting details regarding Co-operative Societies.
- Schedule II – Schedule for collecting the details of each member in the societies or the other weavers

The Survey was completed by 2003 in all the districts except Thiruvananthapuram. Data entry was conducted in the Computer division of Directorate of Economics and Statistics.

Limitations of the Survey

1. Many of the societies included in the list supplied by the District Industries Centers are not seen functioning. Schedule 1.A relating to such societies were not received.
2. Many of the members included in the list supplied by the Societies could not be located by the enumerators by the address shown in the list supplied. Some of them have changed residence. Some are not weavers now. Few members died and many of the members shown in the list are not at all related to weaving/weaving related works.
3. Enumerators collected the details as per the weaver's version. Since many of the persons associated with this sector are a discontented lot, due to many reasons, one cannot expect full co-operation to the surveyed people. Yet the enumerators and supervisors tried to eke out as much information as possible from them.
4. There are many complaints regarding this industry. Some are from the weaver's co-operative societies and some are against these societies. It was very difficult for the enumerators to collect realistic data. Eg. The ownership of the looms cannot be proved by any one. Some of the members and the society persons claims that there is weaving and related works in their society. But many complainants say that there is no weaving and many societies are bogus.

Chapter II

Results of the Survey -Societies

Handloom survey conducted in Kerala helps to know the various aspects of Kerala handloom industry. As the survey conducted district wise, the survey is very helpful to know the conditions of the industry in each district at the time of survey. In this chapter the details regarding the handloom societies in Kerala like strength of societies, status of members in the societies etc are furnished.

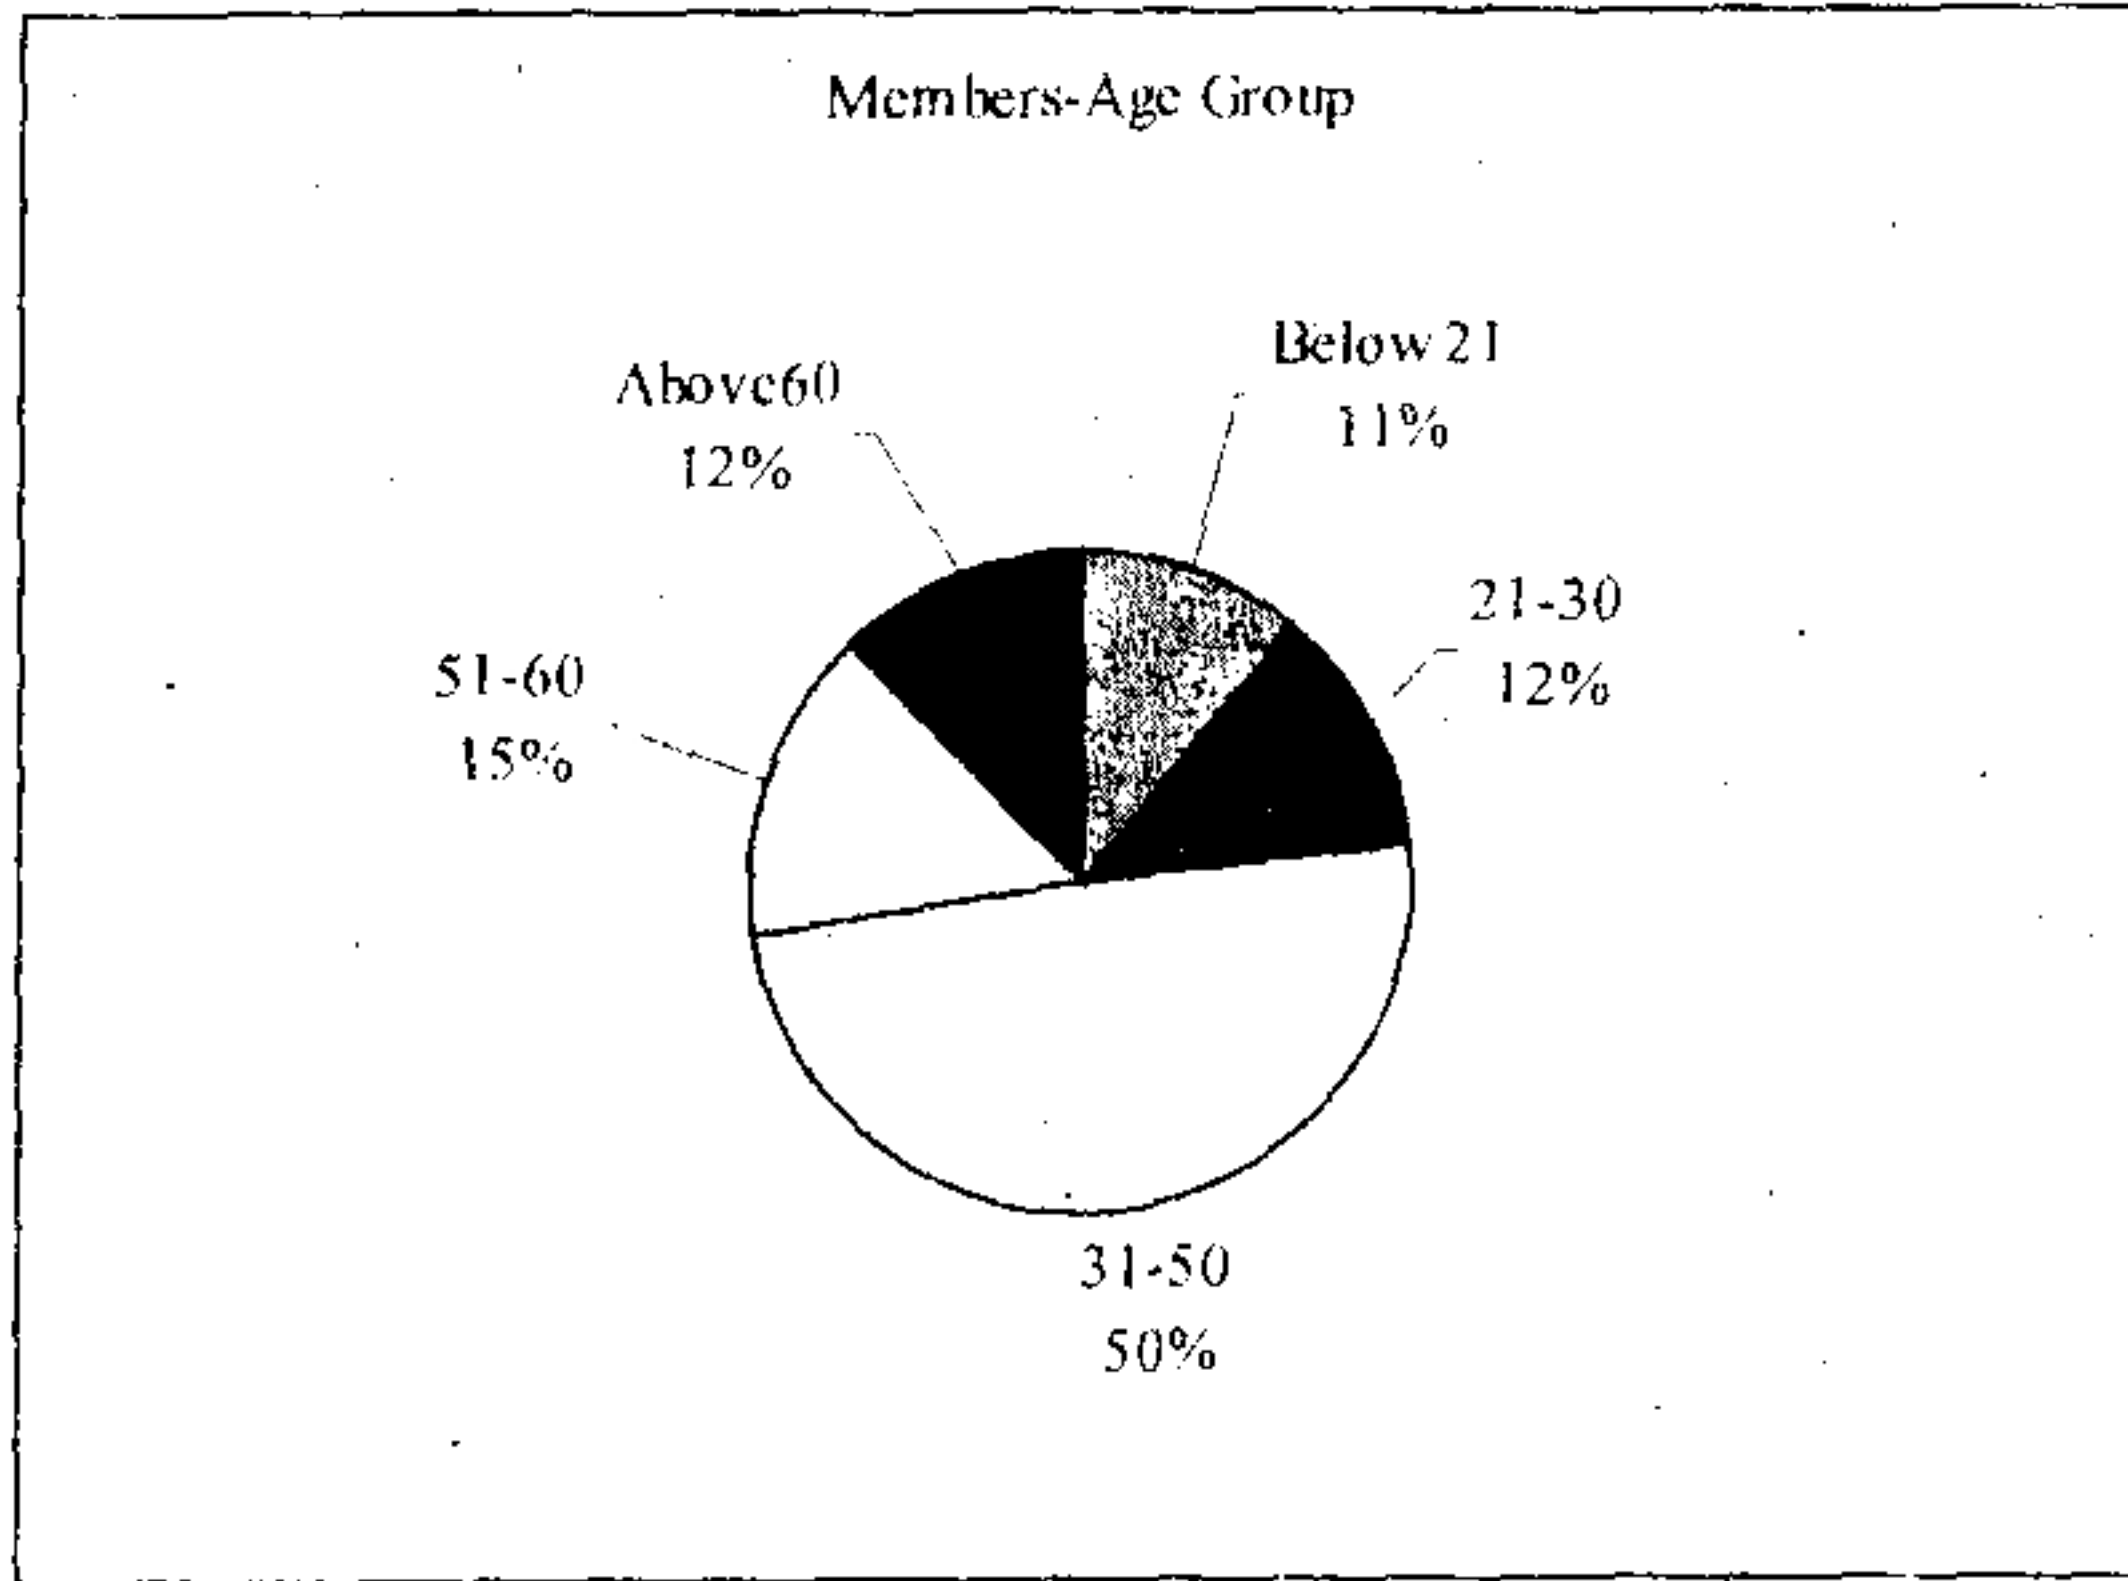

Societies And Members

The total number of societies in Kerala is 469 with a total membership of 65964. Thiruvananthapuram district leads in number of societies and memberships with 247 societies accommodating 31171 members. According to the number of societies Pathanamthitta is at the bottom with 3 societies followed by Wayanad with 4 societies. According to the total membership Wayanad is at the bottom with 117 members followed by Idukki with 388 members. About 47.25% of the total membership in Kerala is contributed by Thiruvananthapuram district.

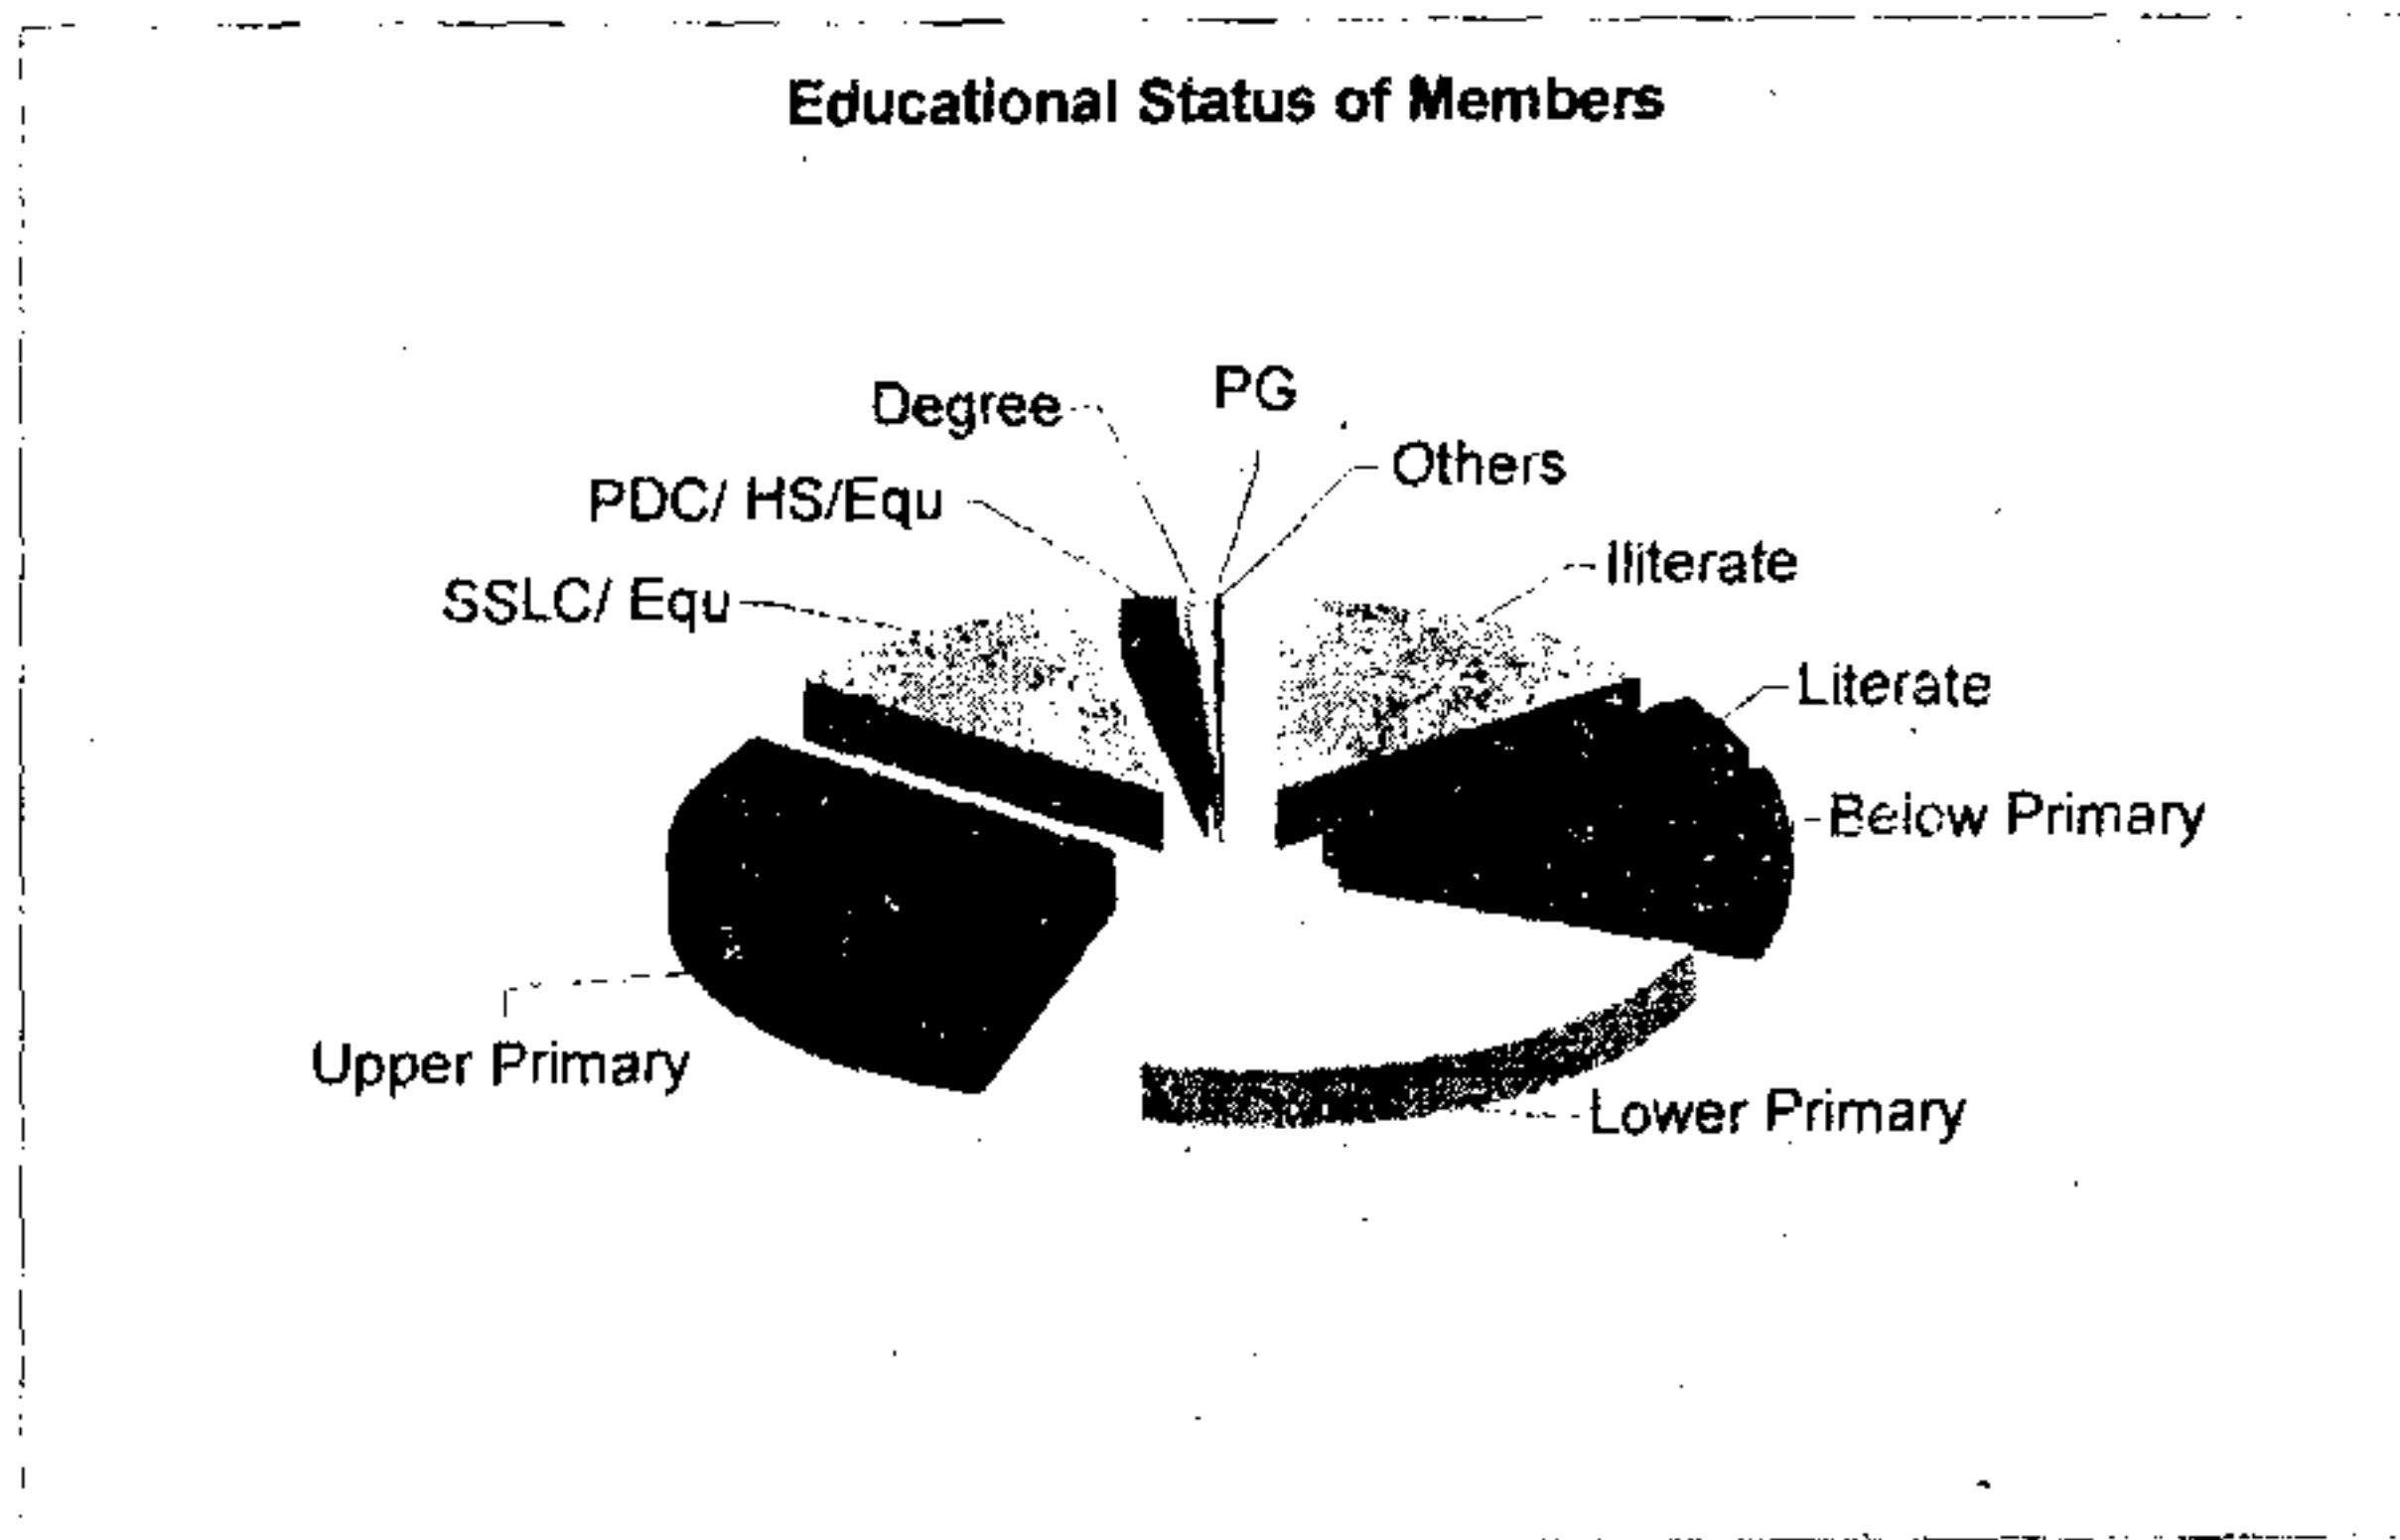

Out of the 65964 members, only 57405 (87%) members are live in the industry. Other members are expired or transferred or have unknown identity. Only live members are taken into consider in the sequel.

Age Group Of Members

Major share of members is from the age group of 31-50 years. About 48.95% of the members are coming from this age group. It is notable that in Eranakulam district majority of the members are young, that is coming from the age group of below 21. The percentage of members coming in each age group is given in the following diagram.

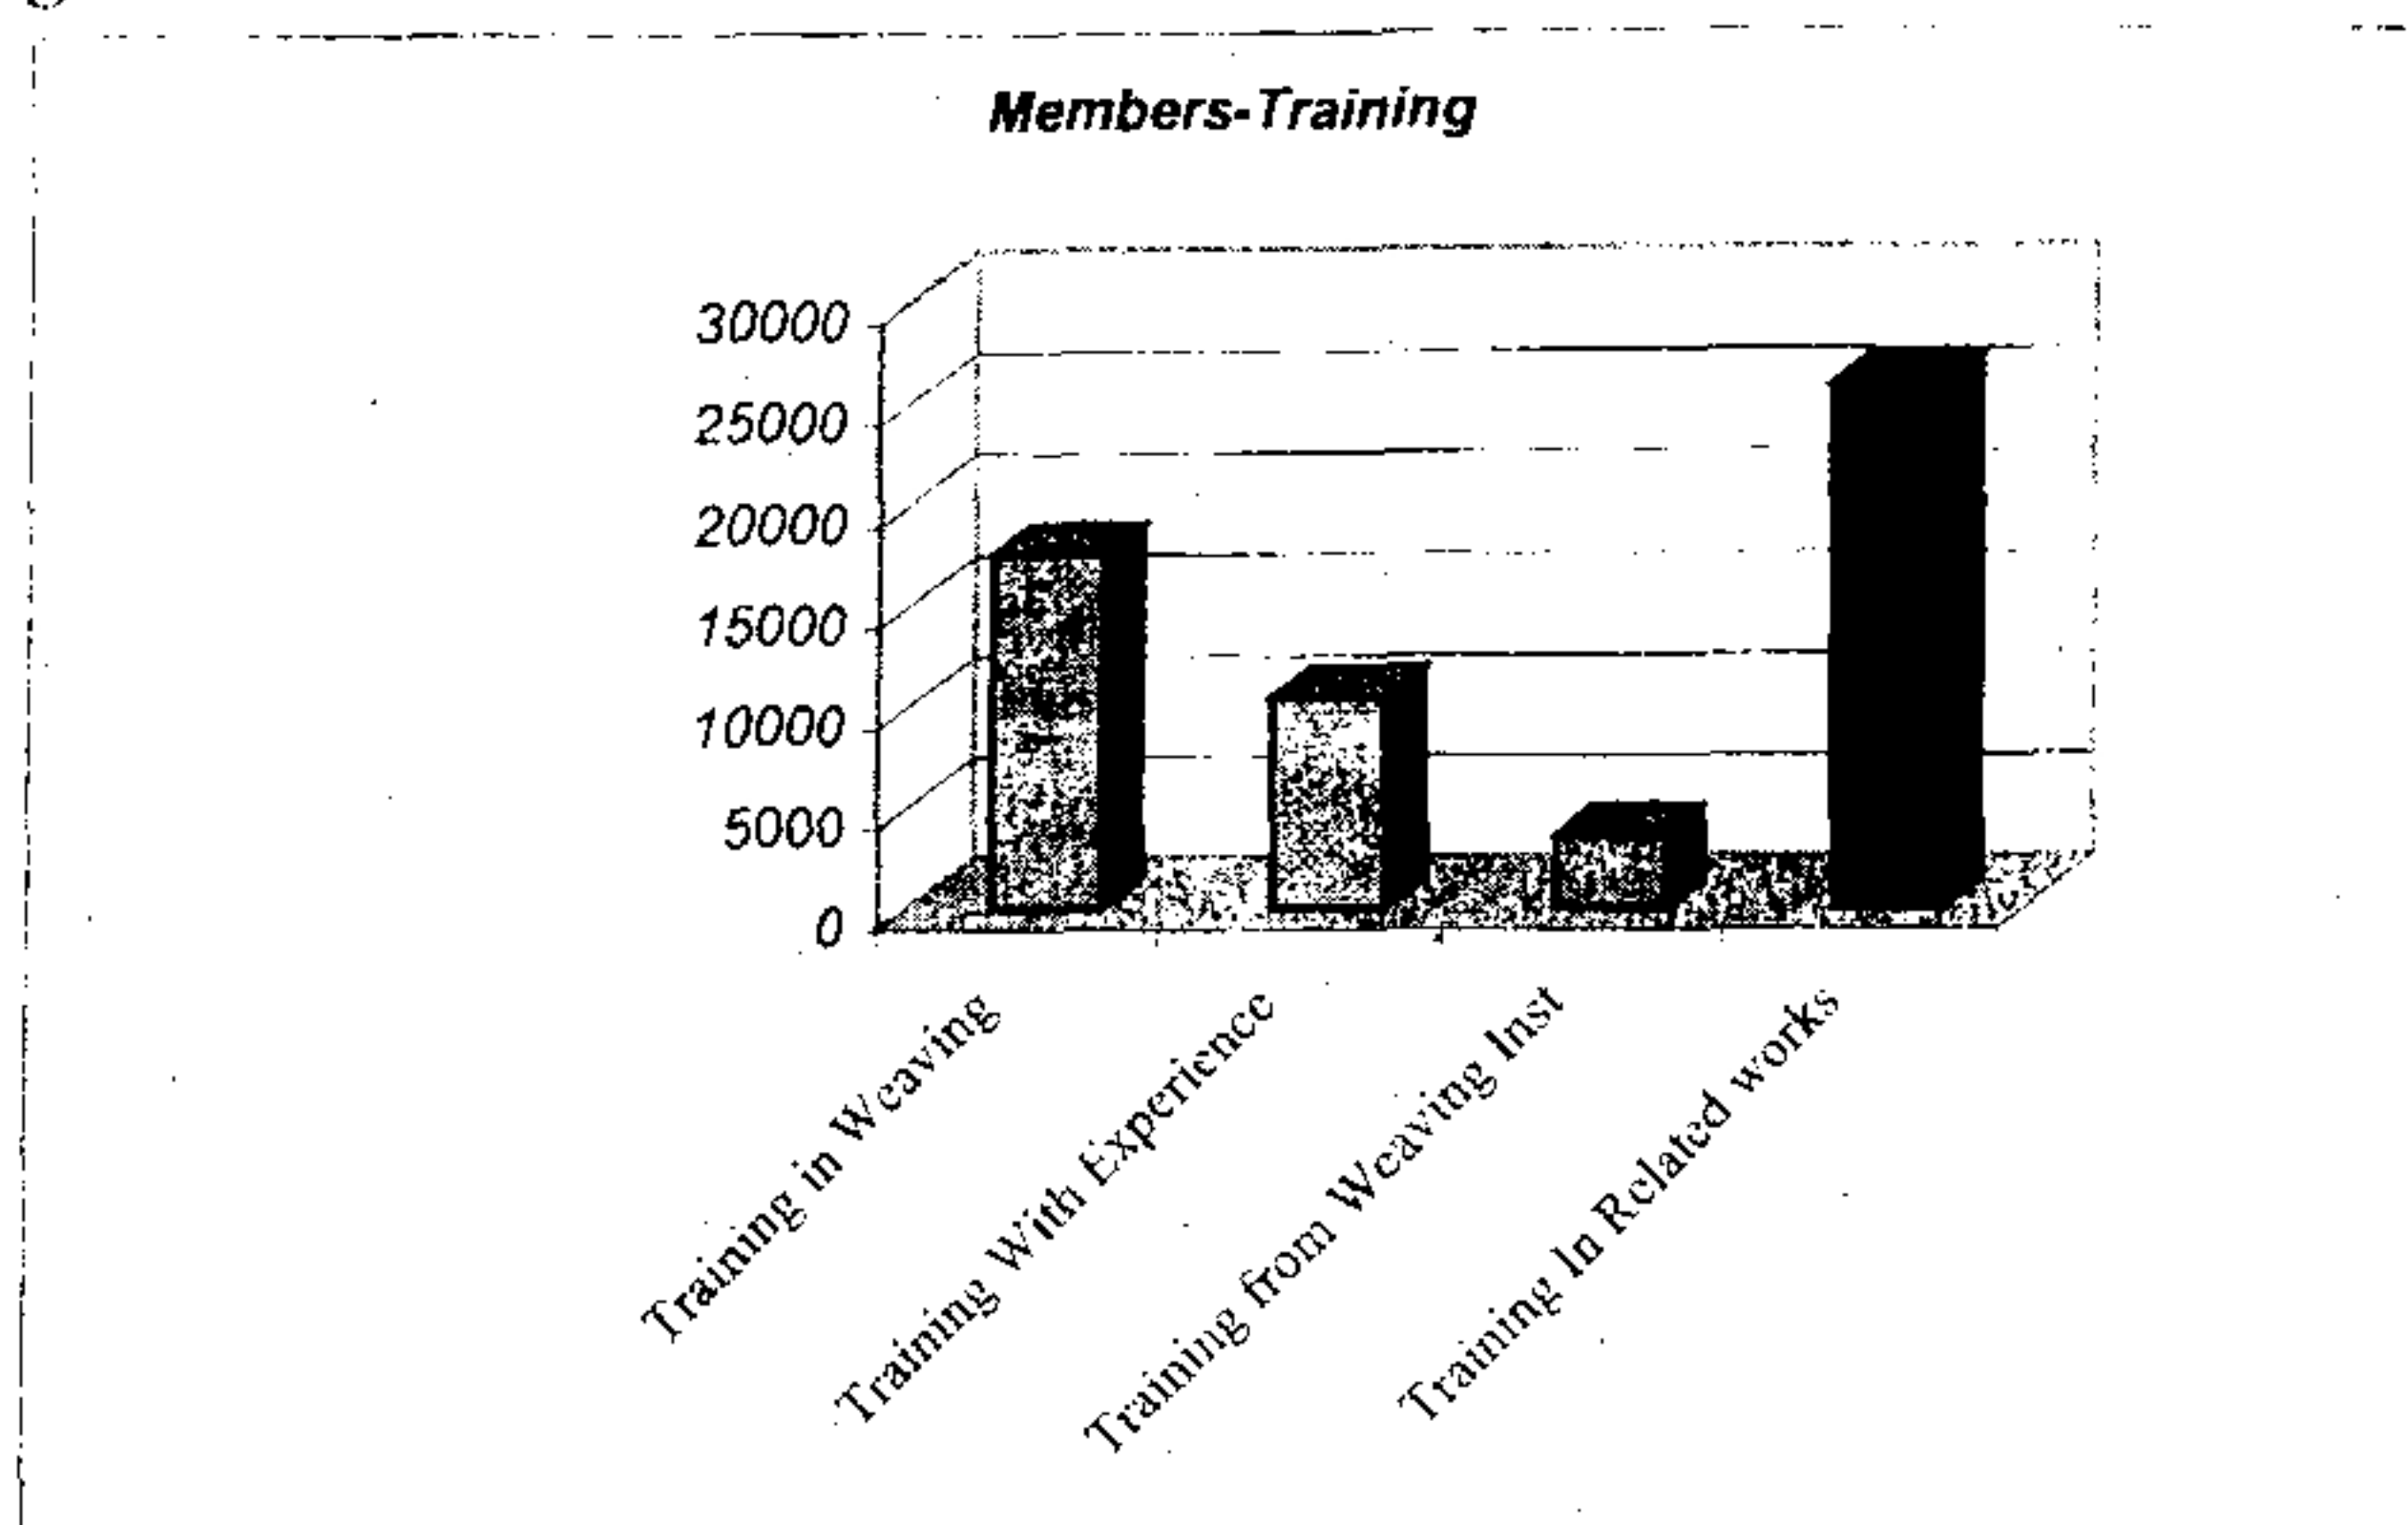

Education Status Of Members

As far as the educational status of the members is concerned, it is a conglomeration of illiterates to those possessing post graduation. Those having middle school level qualification constitutes majority in weaving sector. About 15.09% of the members are illiterate, about 15.85% of the members are literate or having below primary level education, about 54.47% of the members having lower primary or upper primary education and about 14.60% of the members having SSLC or higher education.

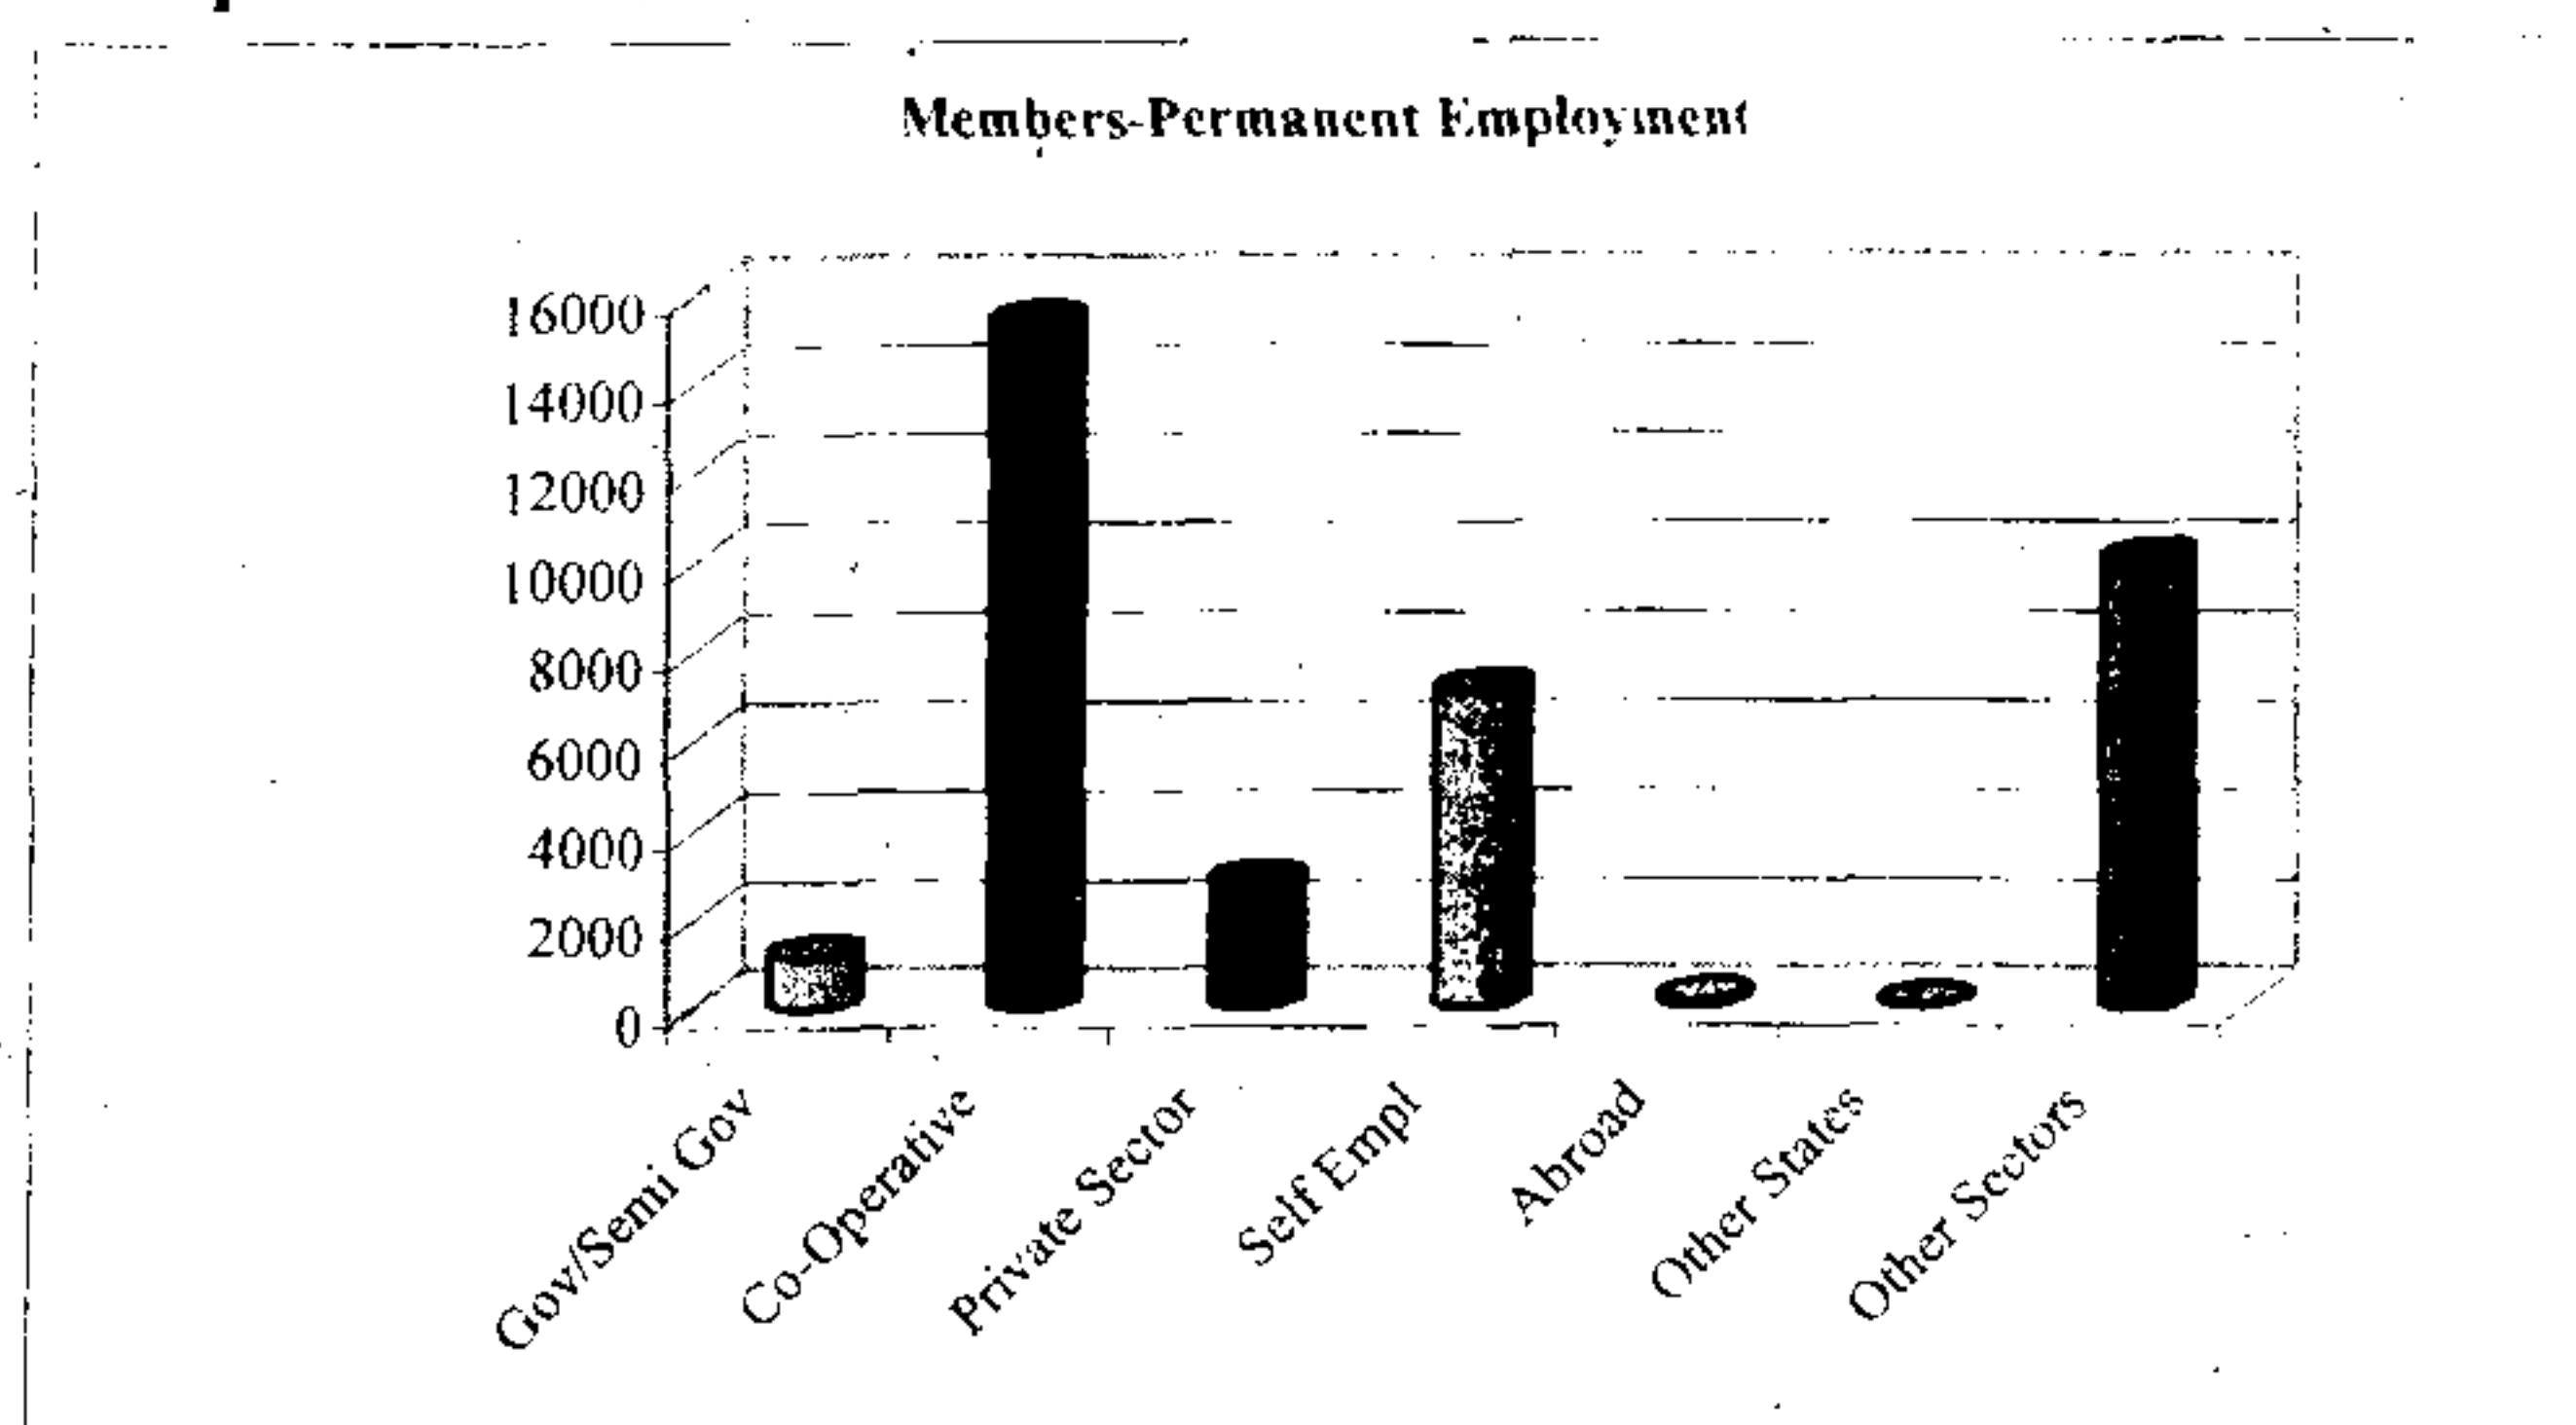

As far as the technical education is concerned 47404 out of 57405 having no technical education. Only 949 members having handloom based technical education and 896 of the members having other different types technical education such as Engineering Diploma, Computer Degree or Post Graduation etc.

Training to Members

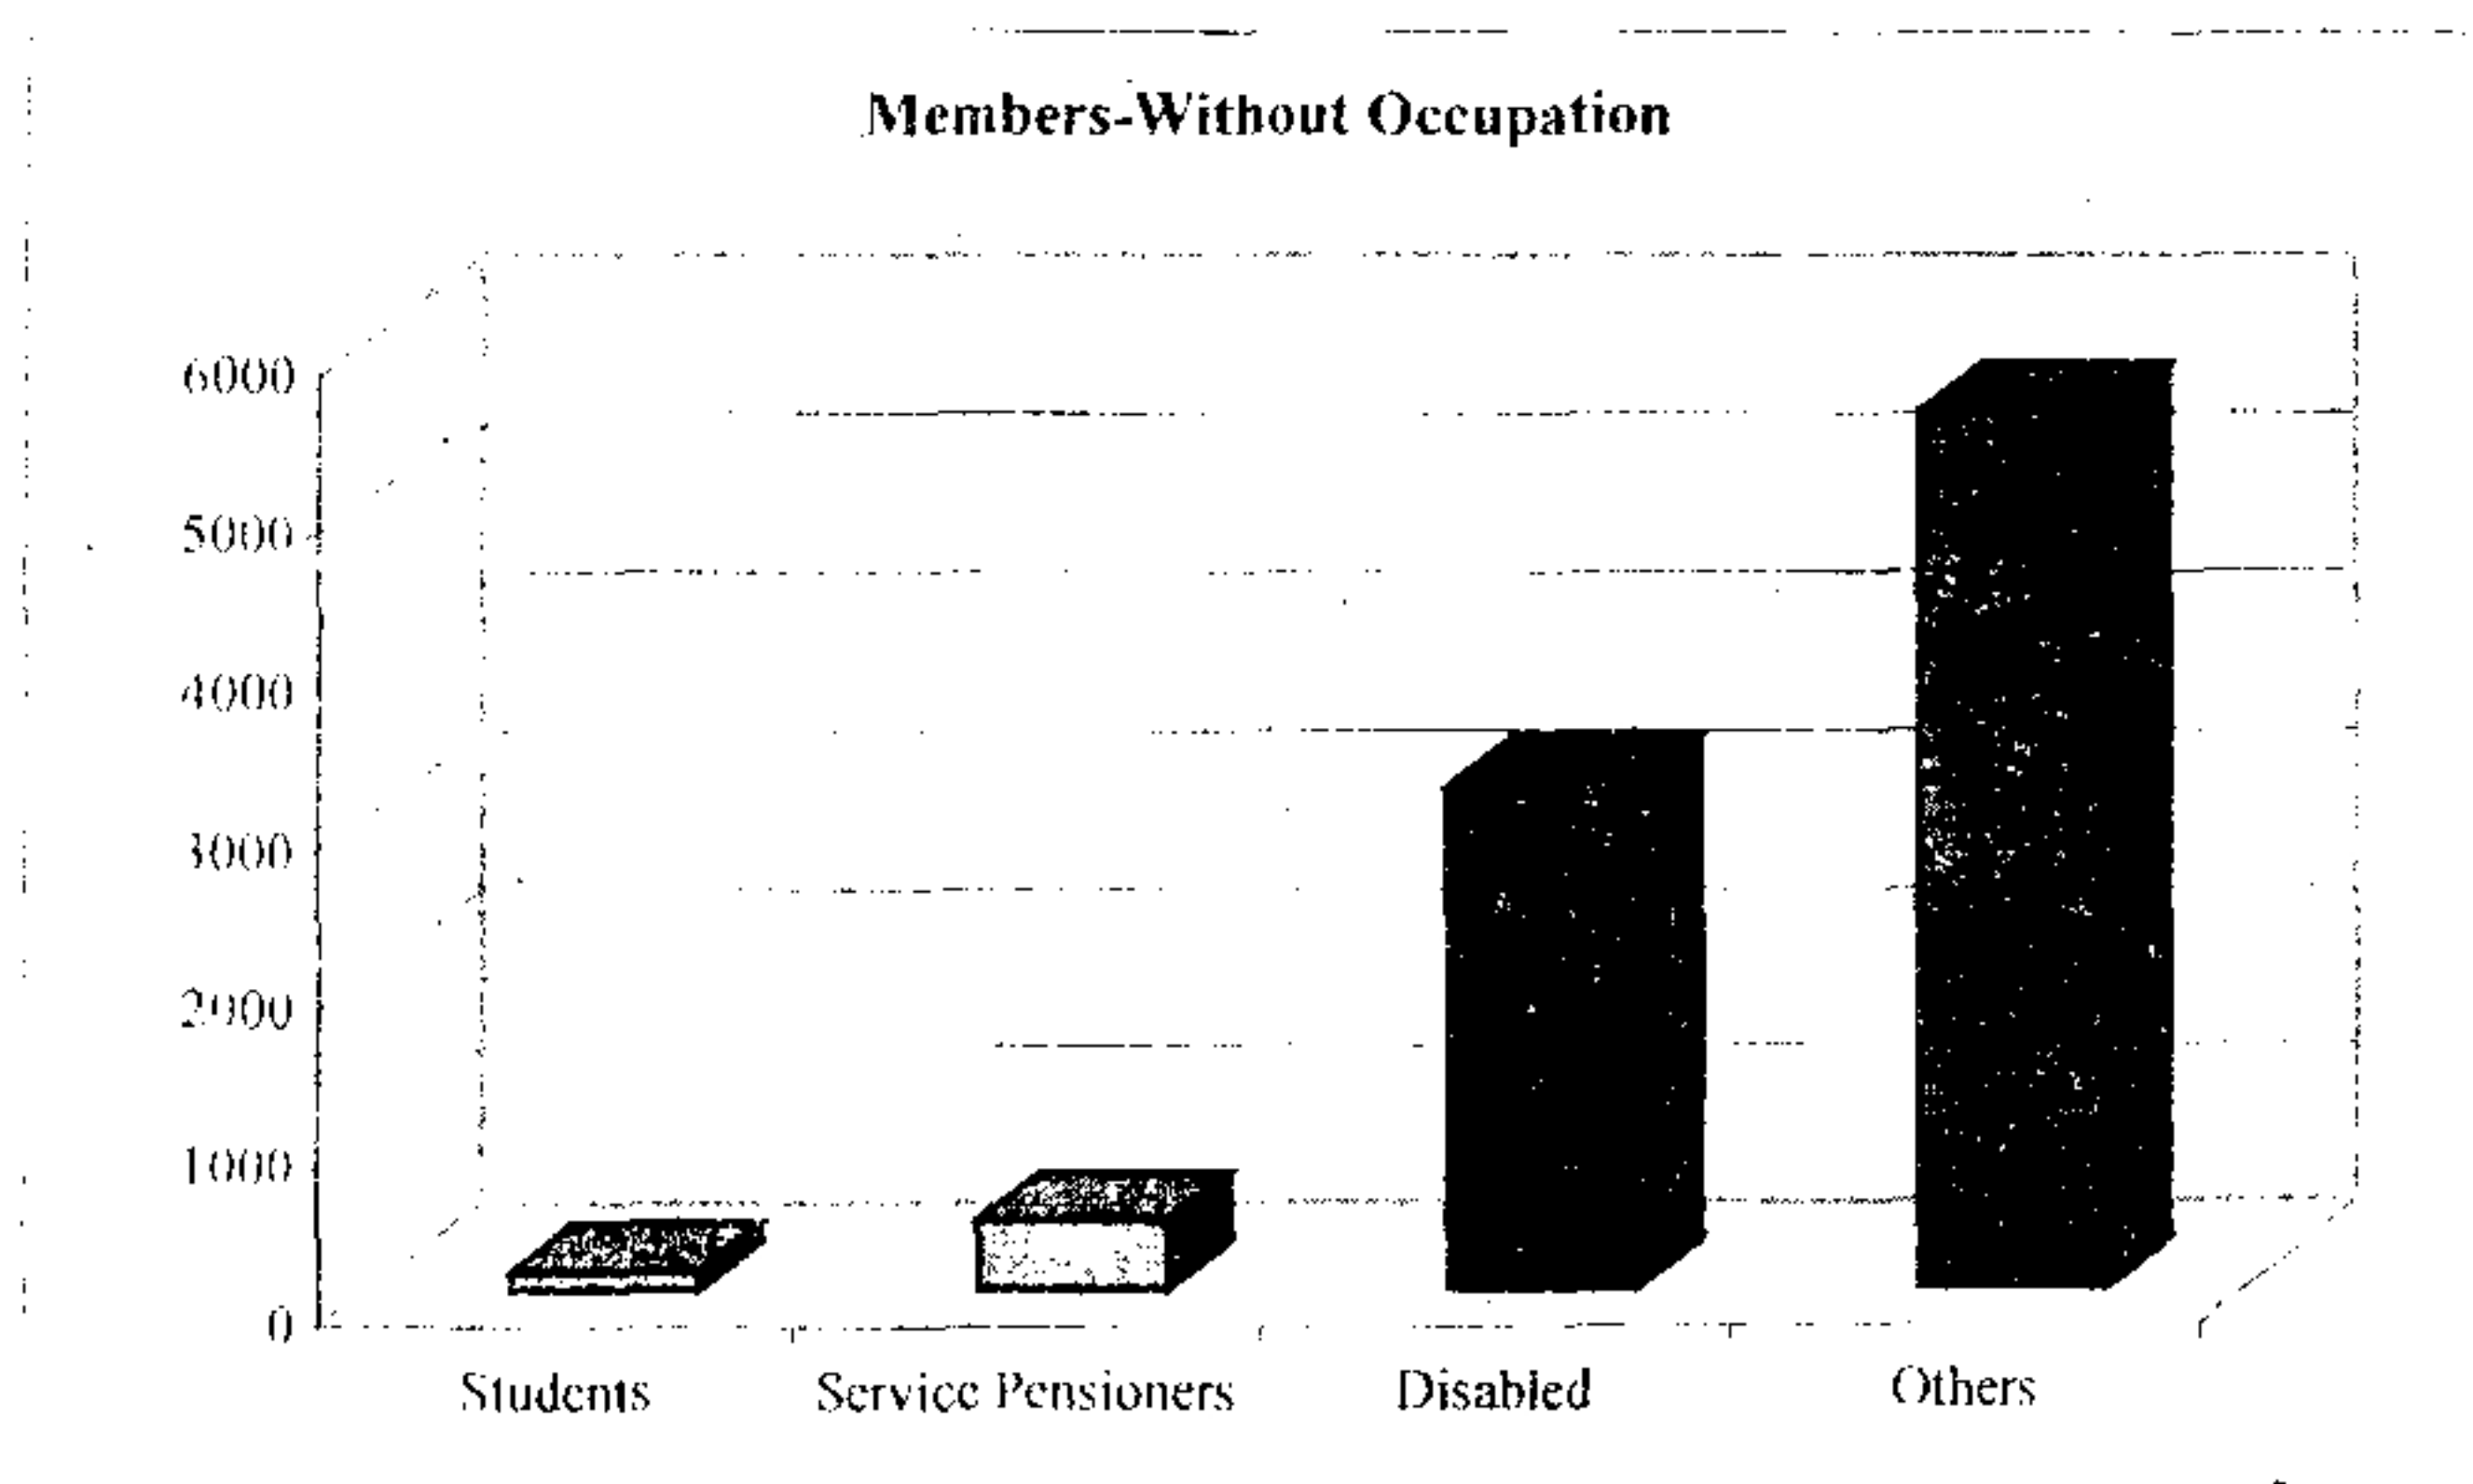

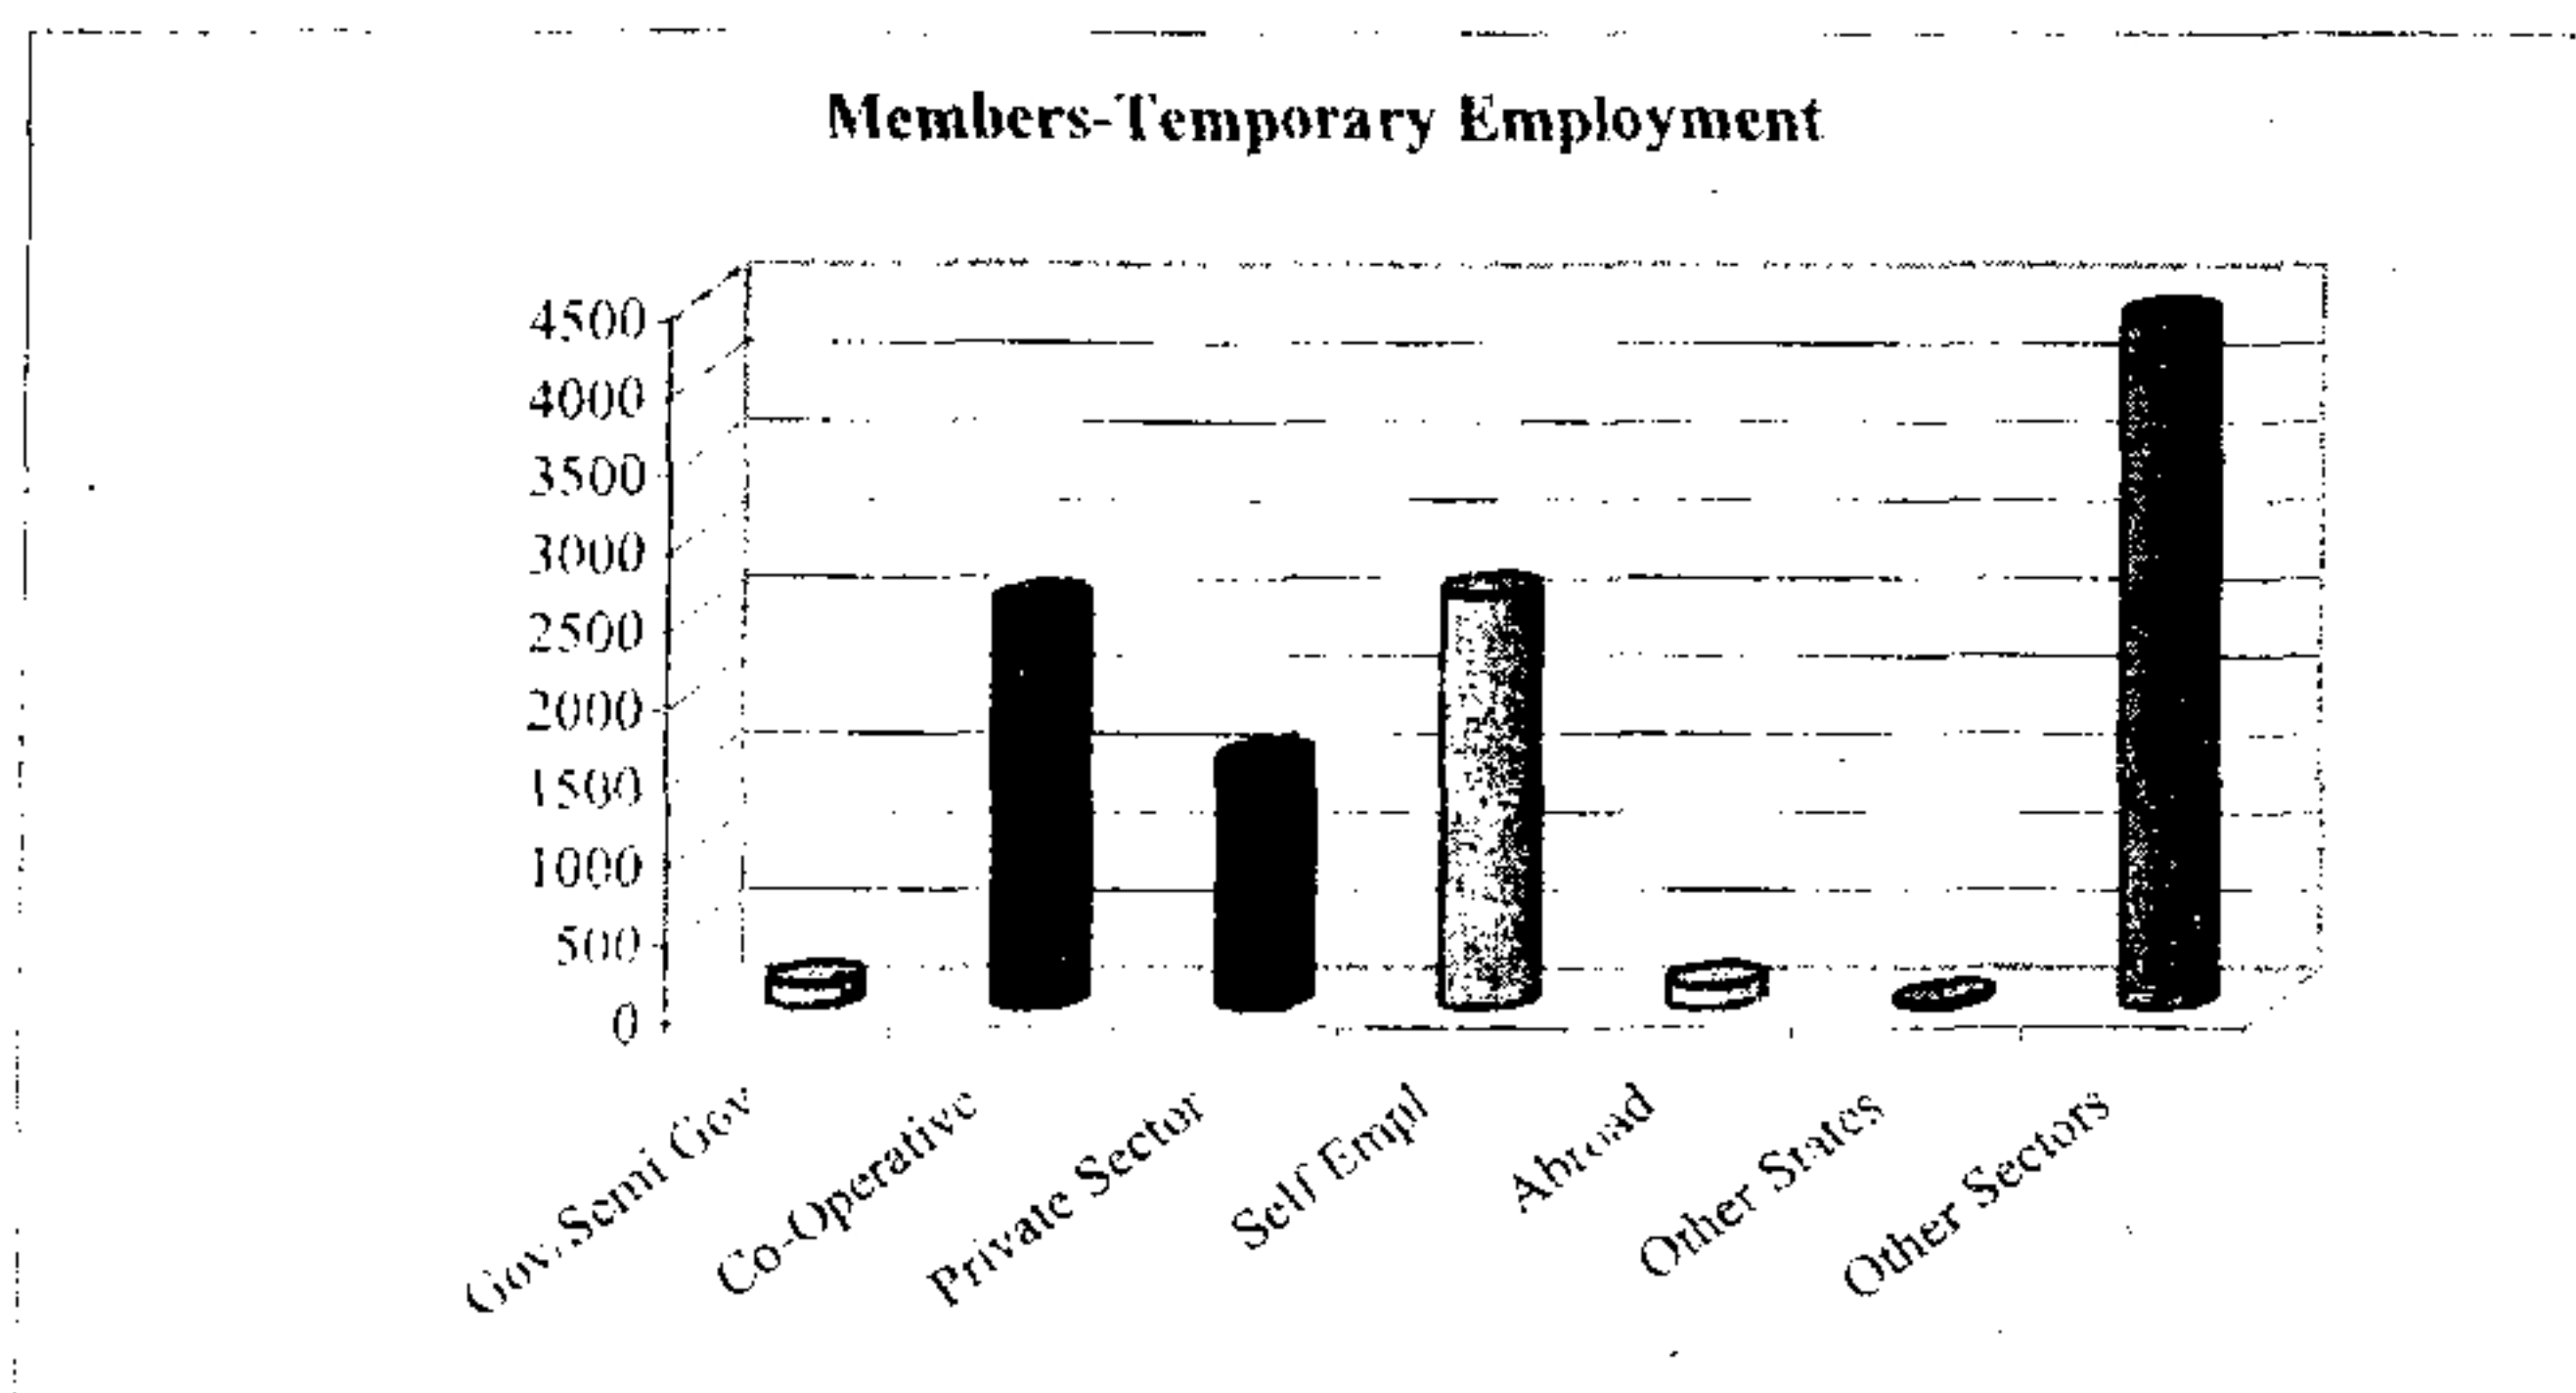

Out of 57405 members, 17588 members are trained in weaving. Only about 18.18% of the total members are trained and having experience from reputed institutions. 3580 members are trained from weaving institutions and 25800 are trained in related works. In Wayanad district about 97.44% of the members are trained with experience or trained from weaving institutions. Eranakulam district is at the bottom according to the number of trained members.

Main Occupation of Members

Attempt was made to know whether the members have any permanent or temporary jobs in handloom sector or other sectors. The survey reveals that out of 57405 members 36588 members (about 63.74%) have permanent jobs, among which 1163 members were working in government or semi government institutions. Majority

of the members having permanent jobs are working in co-operative sector. 141 have permanent jobs in abroad. The remaining members (having no permanent jobs) have temporary jobs in some other sectors or students or disabled etc.

Membership According to Type

As per the result of the survey, out of 57405 members 542 opined that they are not aware of their membership. But as per the records available from societies, they are members of the societies. 26163 members are in the weaver category and 1997 members are in weaving related works. 28703 persons are only members, and these members may not be active in the industry or they are not doing any type of work related to handloom industry.

Chapter III

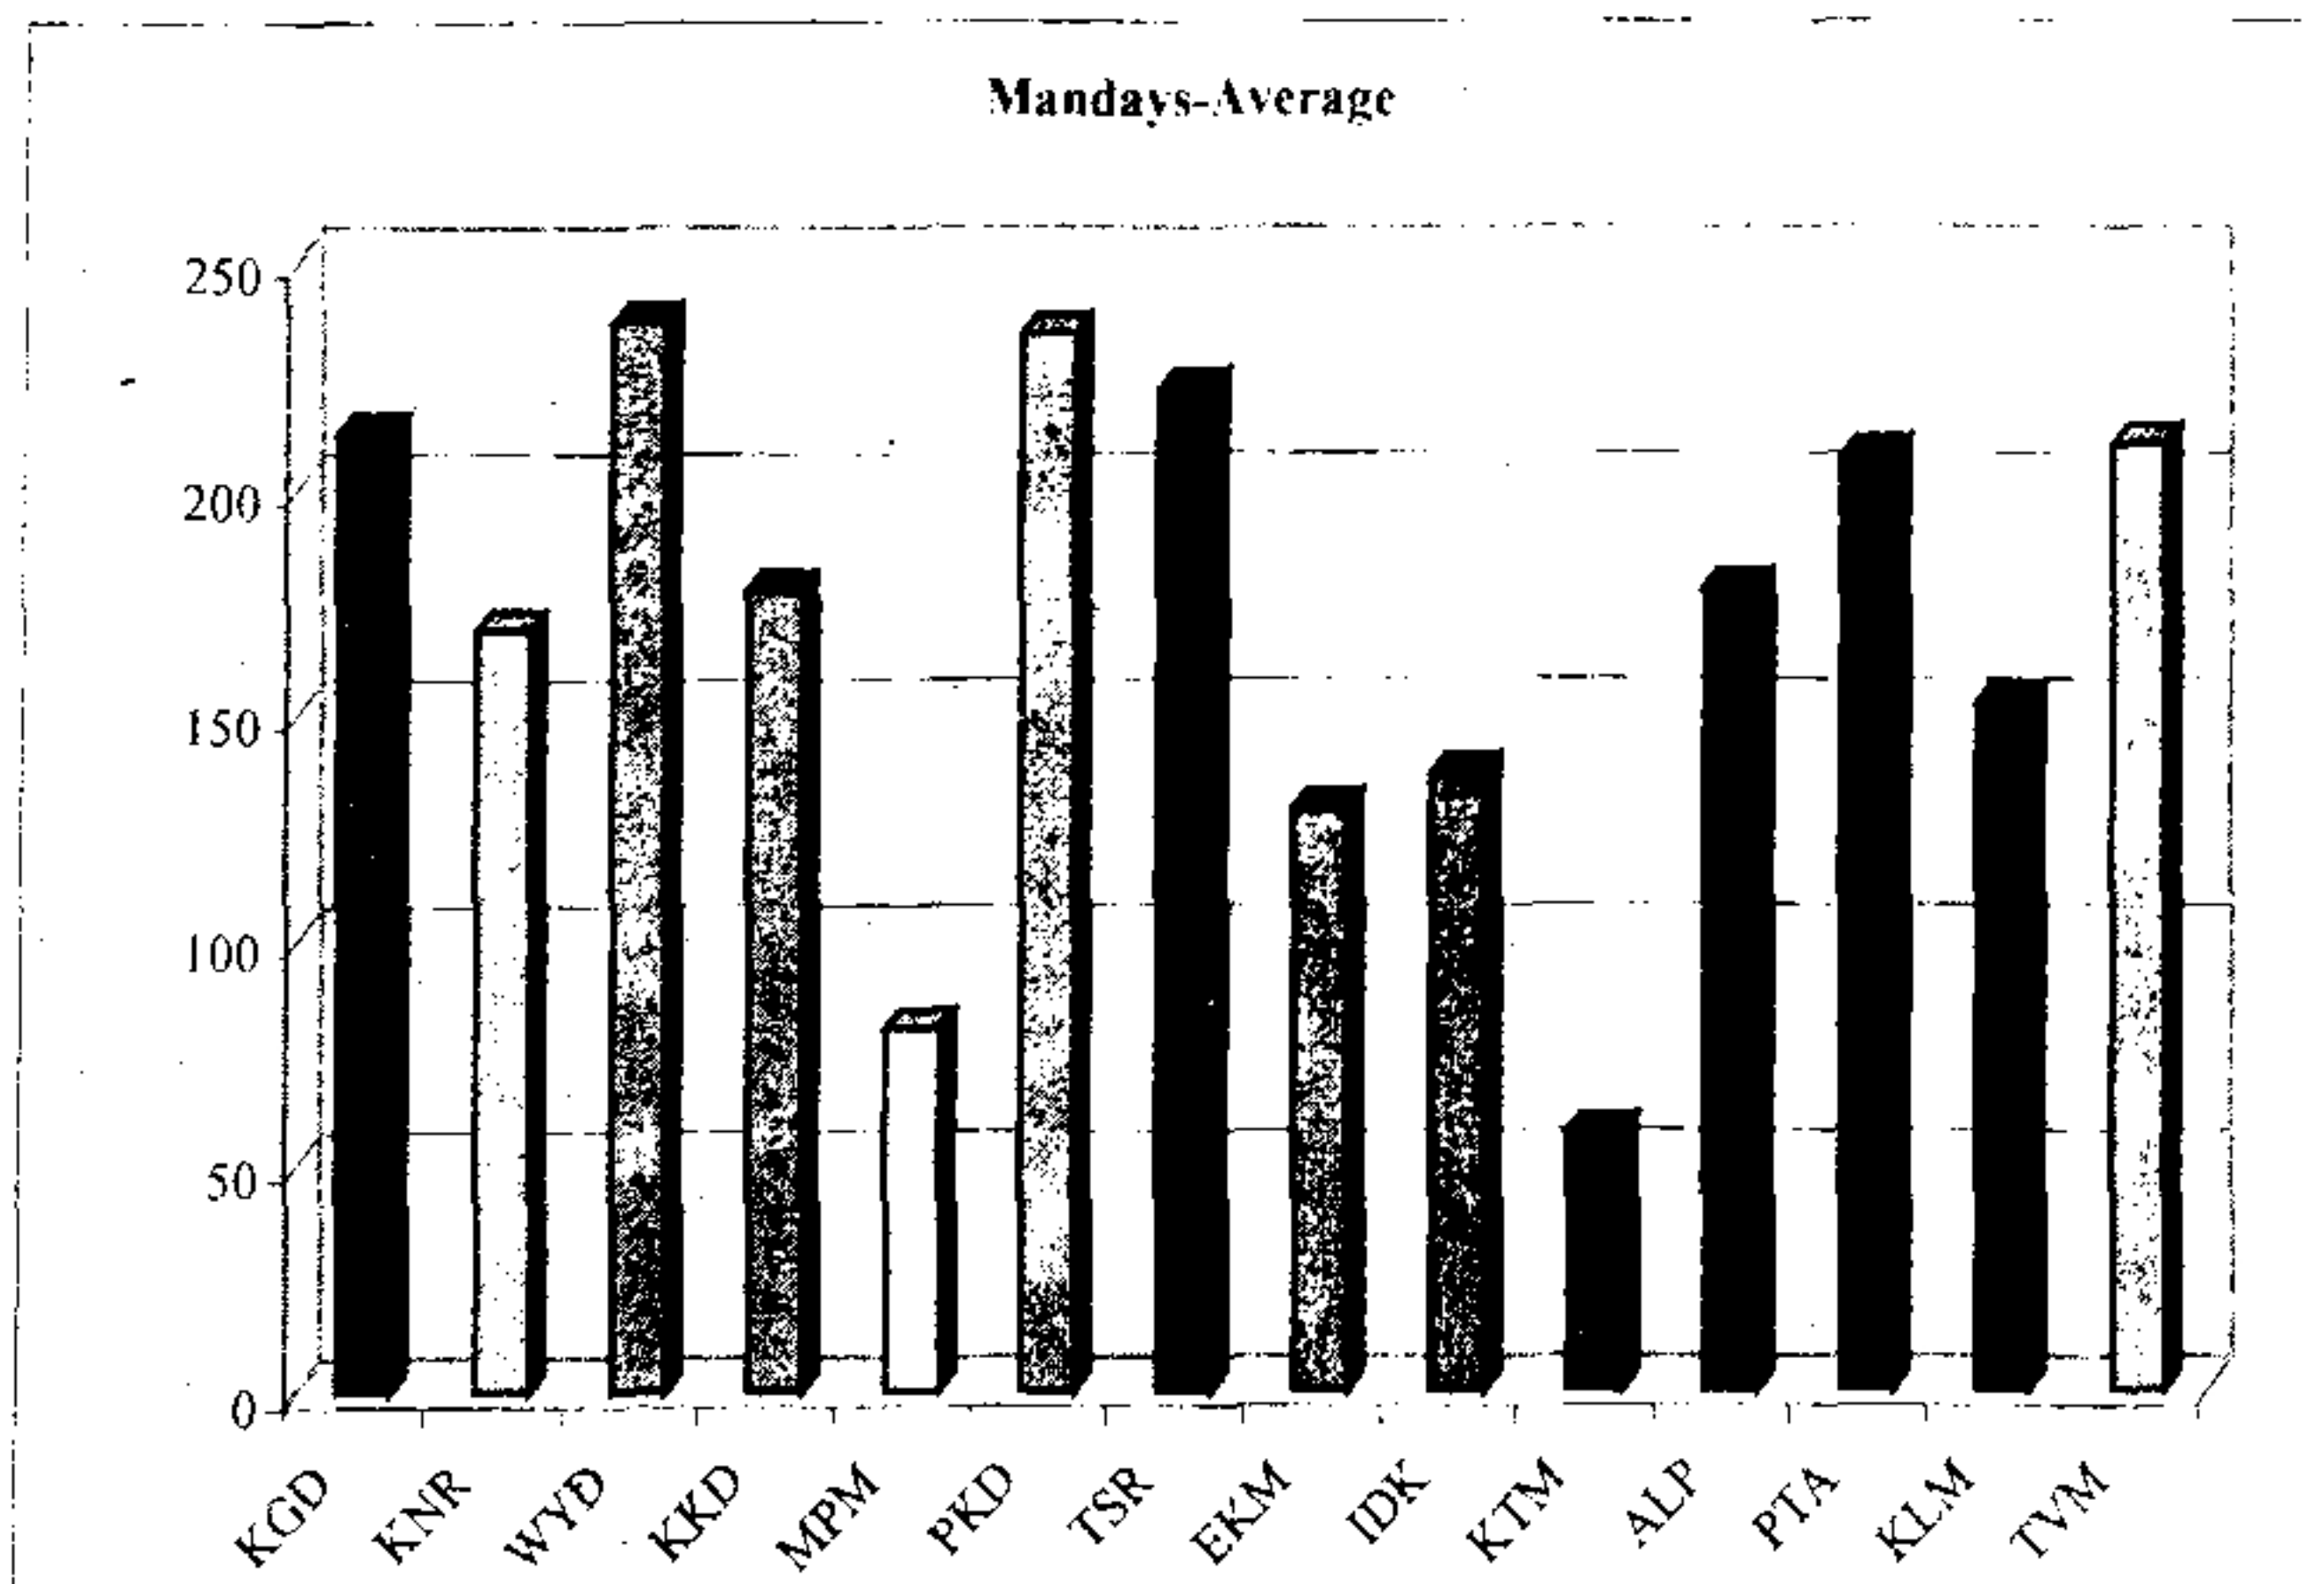

Weavers and Weaving Related Workers in Societies

Details on some aspects like income source, income, production and sales, financial assistance etc are essential to know the present conditions of the industry. These details may be helpful for the rejuvenation of the industry. In this chapter details on the above aspects are given.

Main Income Source of Members

Even though the main occupation of 35896 members is weaving or weaving related works, only 25699 members have their main income source from weaving or weaving related works. That is about 44.77% of the total members find their main income from other area such as coolie, agriculture, salary, income from abroad etc. 147 members find their main income from handloom industry by doing works other than weaving. 287 members have their main income from abroad. In Pathanamthitta district only 6% of the members have their main income from weaving or weaving related areas. In Thiruvananthapuram, Palakkad and Kannur districts above 50% of the members earn mainly from weaving or weaving related works.

Man days

Total number of members worked in weaving or weaving related area in Kerala at the time of survey was 24632 and the total number of man-days per year was 4857387 with annual average man-days was 197.20 per member. Thiruvananthapuram is at the top according to the number members worked and total man-days in the particular year. As far as the annual average man-days is concerned Wayanad is at the top with 236.36 per member followed by Palakkad 233.82, Thrissur 221.47, Kasargode 211.86 and Thiruvananthapuram 209.41 at the second, third, fourth and fifth places respectively. Only 18 members out of 680 and 19 members out of 437 worked in 2001-2002 in Alappuzha and Pathanamthitta district respectively. In 2001-2002 the lowest average man-days was in Kottayam district.

Income

The average annual wage of the members in handloom industry in Kerala in the year 2001-2002 was Rs 8252. While it was Rs 8606 in 2000-2001 and Rs 8736 in 1999-2000. The average annual wage was high in Kozhikkode with Rs 9286 followed by Kannur with Rs. 9106. The workers from Alappuzha district got smallest average wage compared to other districts. It is notable that in Malappuram district, there was about 58.28% of the decrease in the average wage in 2001-2002 as compared to 1999-2000.

Types Of Looms

Out of 57405 members only 29386 members are doing weaving or weaving related works. Different types of weaving such as Throw weaving, Blow weaving, Chitharanjan etc have been using by the weavers. Among these weavers majority of the weavers (16779) are using Blow type of weaving. 8524 weavers are using Frame type weaving. 1782 are using throw weaving and 2077 are using other type of weaving. Only 114 weavers are using Chitharanjan type weaving and 105 are using Pedal type weaving. 1134 weavers use Jackard in Looms and 1113 use Dobby in Looms.

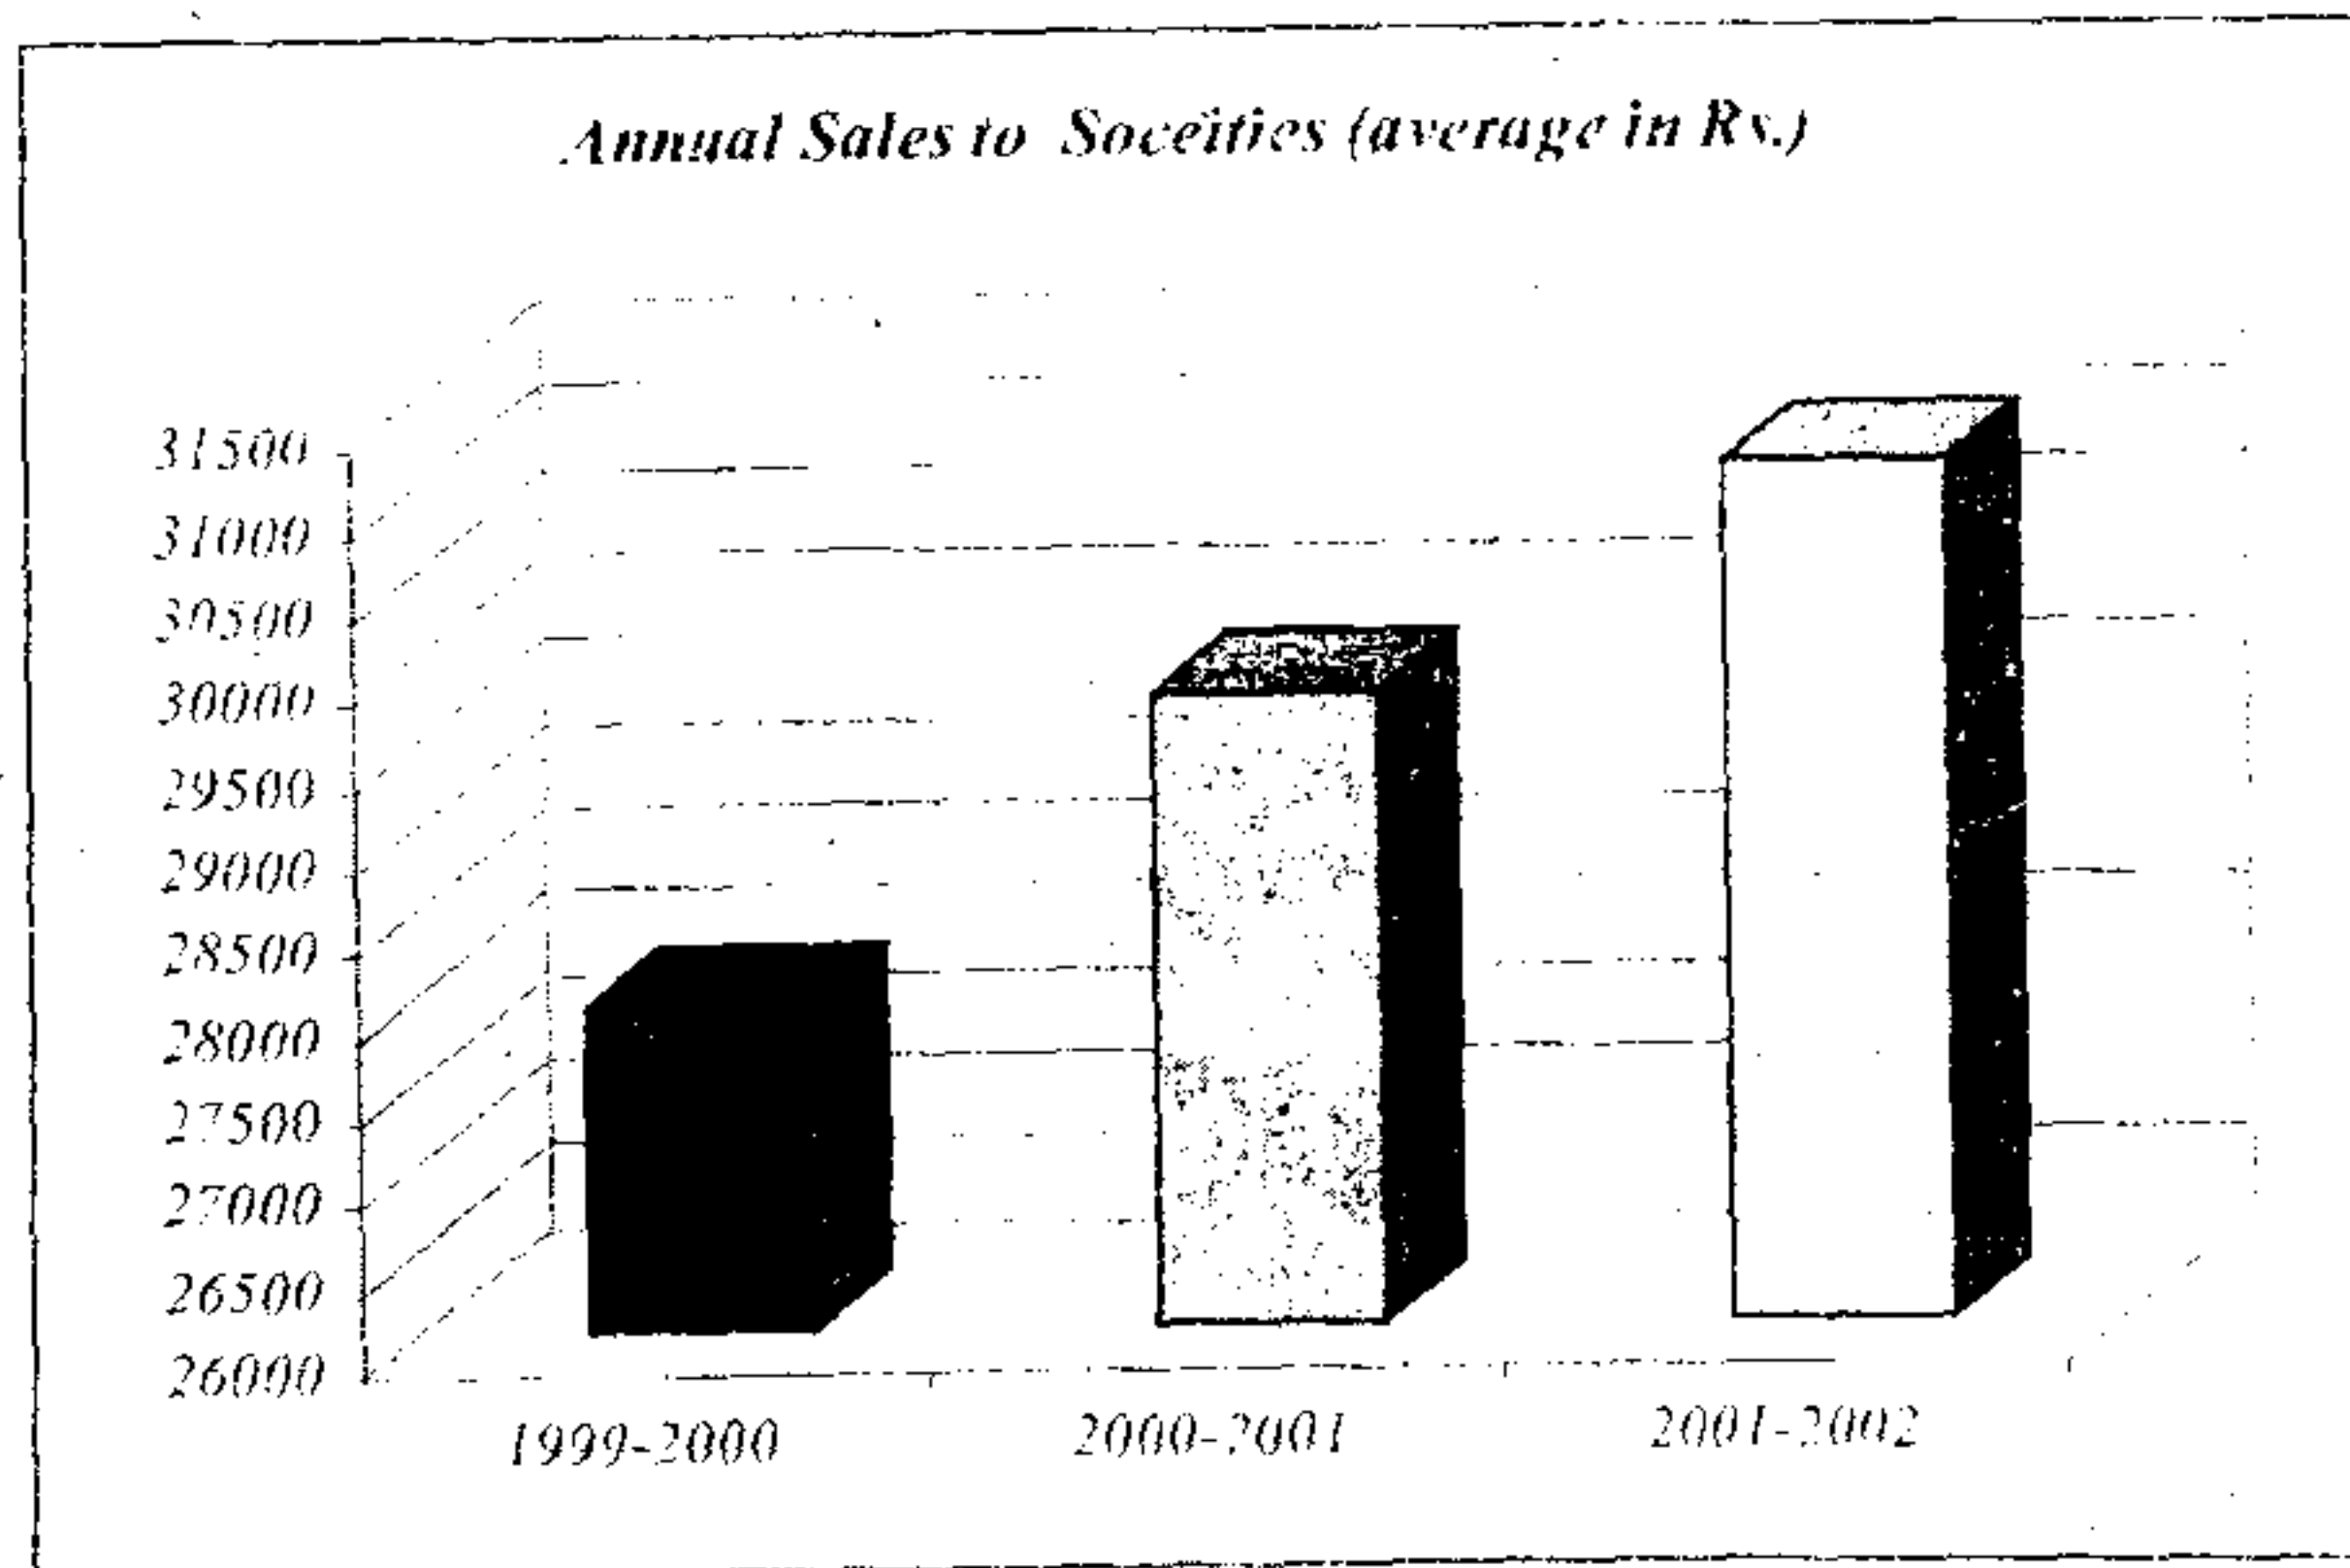

Training

As far as the training of weavers is concerned, out of 29386 weavers 14013 members were got training in weaving, 340 were got training in coloring, 303 were got training in Pavuchuttu, 691 were got training in Tharuchuttu and 2467 were got training in common categories. 11572 weavers have not been got any training.

Diseases

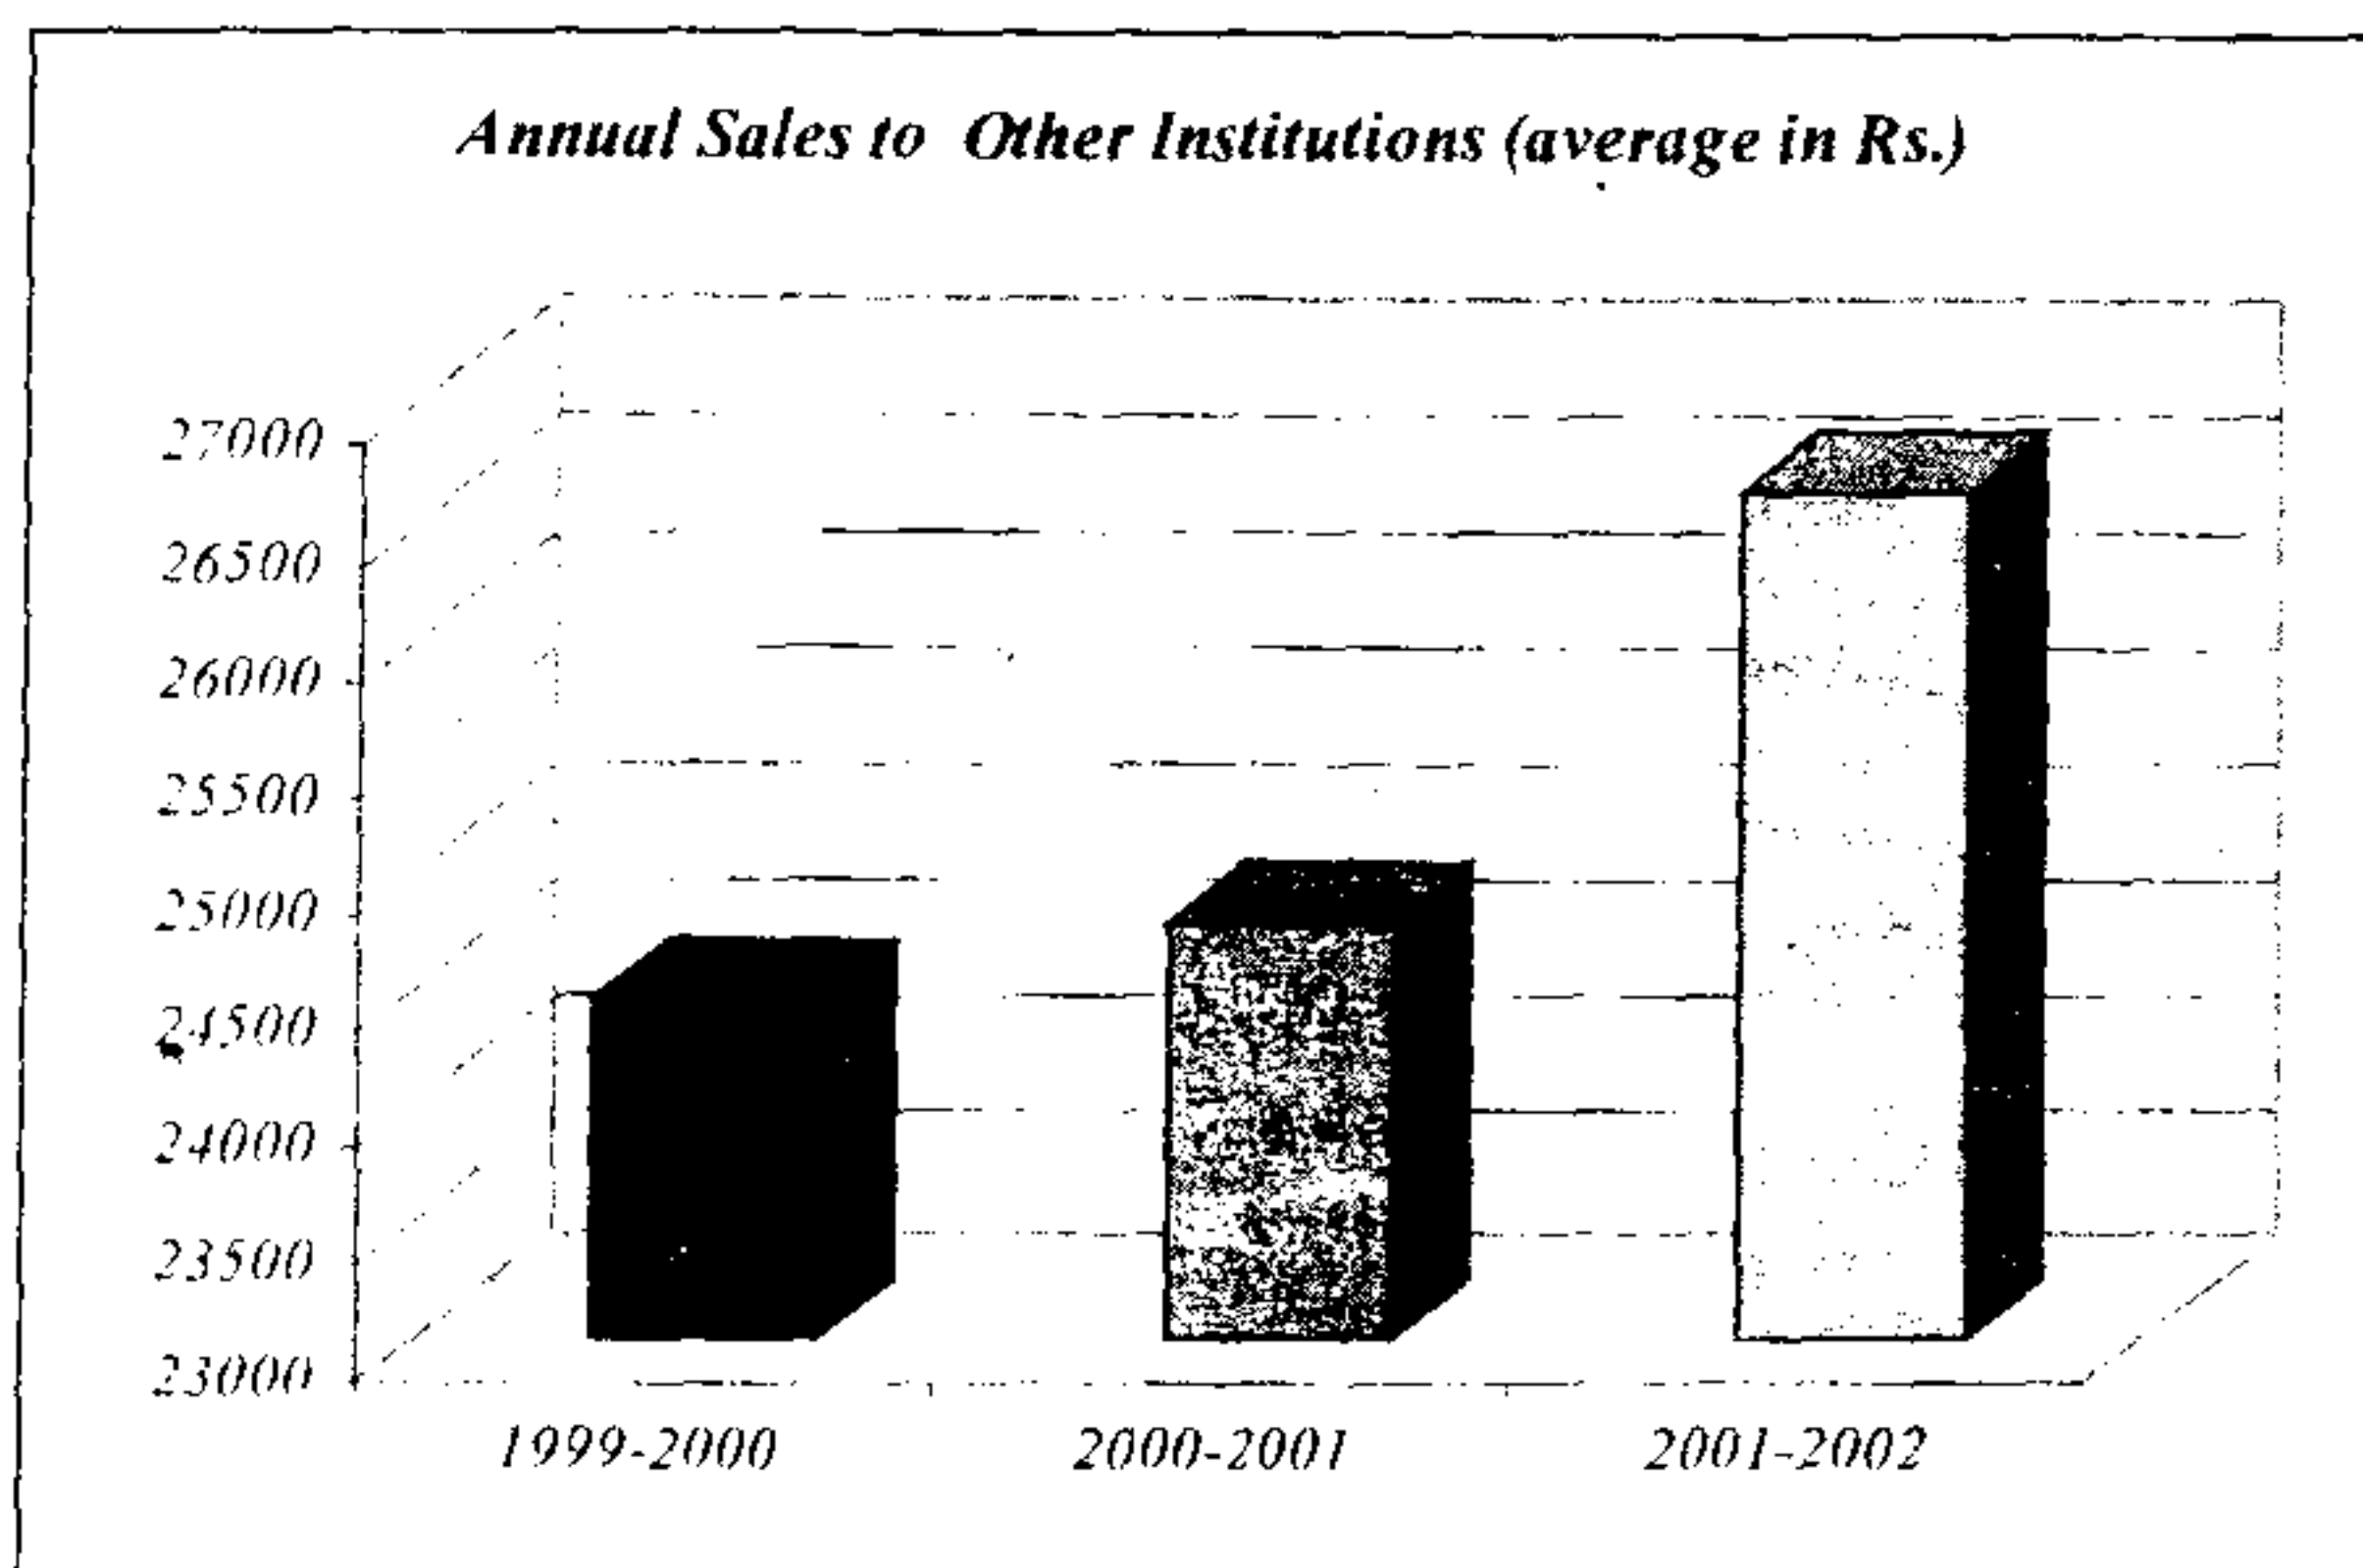

The members those are active in handloom sector have some common diseases which may have some relation to their nature of work. A detailed medical analysis is needed for an apt conclusion. 0.9% of the weavers are suffering with Tuberculosis, 8.1% with suffocation and 3.41% with nose block. About 7.2% have one or more mentioned diseases. Even though majority of the workers have no diseases.

Production And Sales

The weavers sell the produced items to societies or other institutions. Majority of the items produced by the weavers are sold to societies. By considering the sales in three consecutive years 1999-2000, 2000-2001 and 2001-2002 it is clear that there was

an increase in production. In 2001-2002 products worth Rs 26.40 crores were sold to societies. Products of Rs 22.61 crores and of Rs 24.13 crores were sold to societies in 1999-2000 and 2000-2001 respectively. Amount of sales of items to other institutions in 1999-2000, 2000-2001 and 2001-2002 were Rs. 8.48 crores, 8.35 crores and 9.19 crores respectively.

As far as the annual sale is concerned Thiruvananthapuram was at the top. More than 90% of the total sales in Kerala is from Thiruvananthapuram district. About 92.2% of the total products sold to societies in 2001-2002 were from Thiruvananthapuram district. There were no sales of products to societies from Idukki and Pathanamthitta districts in the above mentioned three consecutive years. The weavers from Alapuzha and Idukki districts had not been sold any products to other institutions in these years.

Raw Materials

The raw materials have been using in handloom industry are Yarn, Kasavu, Color, Gum, Shuttle oil etc. Among which Yarn is the main raw material. Majority of the weavers purchases Yarn from societies. In 2001-2002 Yarn worth about Rs 8.34 crores had been purchased from societies and Yarn worth about 3.23 crores had been purchased from other sources. But majority of the weavers purchased other raw materials from other sources. Survey reveals that the weavers from Idukki district had

not been purchased any raw materials from societies or from other sources; the production was zero in Idukki district in 1999-2000, 2000-2001 and 2001-2002.

Financial Assistance

Financial assistance such as loans, grants etc from Government or other reputed institutions is essential for the survival of all industries. In handloom industry the members are getting financial assistance from societies and from other banking or non-banking institutions.

An amount of Rs 8485912 had been availed by the members as loans from societies; Rs 1514427 for weaving purposes and 6971485 for other purposes. It is notable that members from Wayanad and Pathanamthitta had not been availed any loans from societies.

An amount of Rs 14658312 for weaving purposes and Rs 122146937 for other purposes had been availed by the members as loans from banking or non-banking institutions. The study throws light into the fact that the loans availed from banking and non-banking sectors comprise an exorbitant portion where as from societies are comparatively less. The financial assistance availed from banks and other institution exceed about 12 crores than from societies.

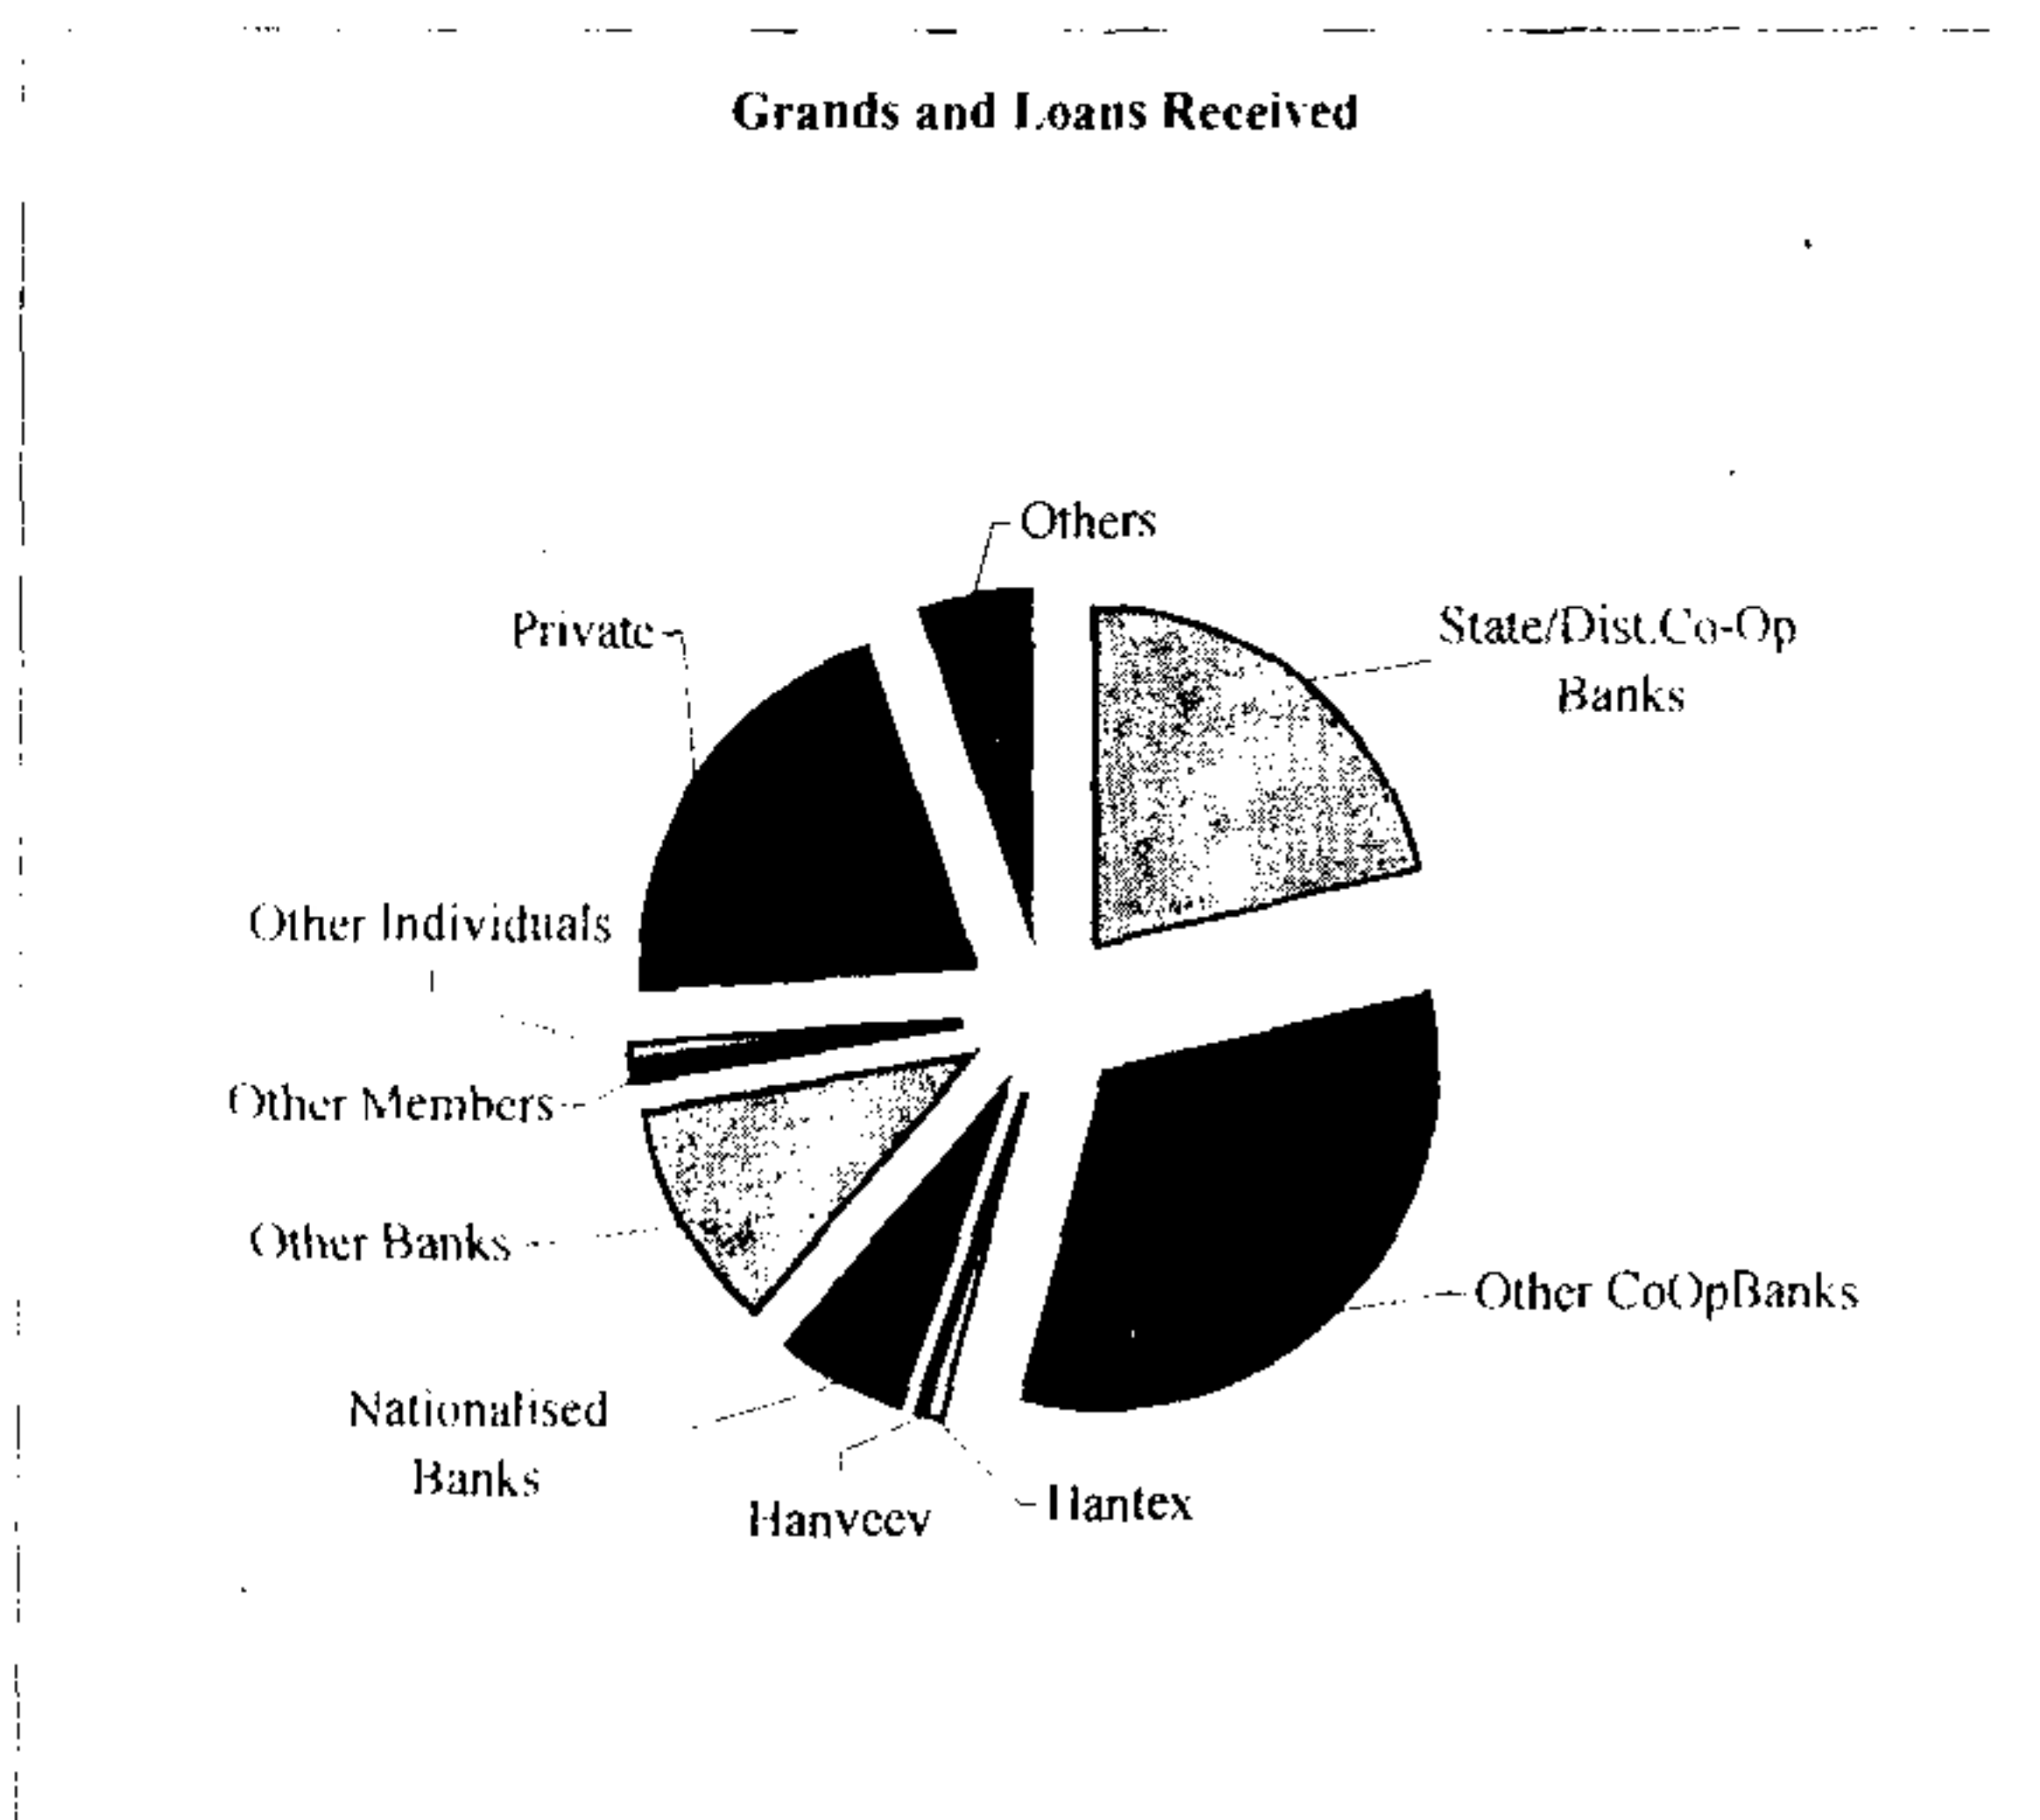

The societies and other institutions owe a huge amount to the weavers for the quantity of clothes purchased and also other purchases. An amount of Rs 76.51 lakhs is outstanding to the weavers from the societies and an amount of Rs 13.57 lakhs is outstanding from other institutions also. Out of the total pending amount to the members about 84.93% of the amount is outstanding from societies. Districts like Wayanad, Eranakulam and Kottayam, the outstanding amount from other institutions is zero.

The handloom weavers have been receiving grant in aids and loans from co-operative societies, co-operative banks, Hantex, Hanveev, nationalized and private banks and various other financial institutions. A study of grant in aids/loans and their

allocation for various purposes in the past three years of the survey period have been done in the survey.

The study reveals that this sector relies more on the grant in aids/loans from the co-operative banks other than State and District Co-operative banks (32.35%) followed by funds from State and District Co-operative banks (21.44%) and funds from other individuals (21%). The high dependency of handloom sector on the funds from Co-operative sector and private individuals may form pernicious to the sector in the long run due to the high rates of interest charged.

It is also notable that Hantex and Hanveev contribute only 0.81% and 0.41% financial assistance respectively to the members of the Weavers' Co-operative societies, which is comparatively low.

The survey reveals the fact that the grant in aids/loans availed from different institutions are not using completely in weaving or weaving related purposes. About 84.9% of the amount availed as grant in aids/loan is spending for other purposes. It can be seen that about 4.21% of these funds has been utilized for starting new weaving

institutions, about 3.21% for the purchase of machinery, 1.64% for the setting up of infra structure, 3.34% is invested as working capital and 2.71% for other weaving related works.

The weavers got financial assistance from different institutions by the implementation of different projects in each sector. These funds are supplied through different banks or institutions. The details in this regard have been collected through the survey. About 3.26 crores had been received by the weavers from different institutions.

**Financial assistance from different institutions for
the implementation of projects**

Institution	Amount (In Rupees)	Percentage
Co-operative Bank	6522034	19.38
Co-operative bank Others	1008165	3.09
Hantex	337901	1.03
Hanveev	888381	2.72
Nationalized banks	368950	1.13
Bank Others	68630	0.21
Private Firm	123150	0.37
Society Member	86830	0.27
Others	2323840	71.19
Total	32642281	100.00

Ownership of Looms

As per the details available from the survey, there are 17479 looms in this industry. Out of these 5652 were supplied by the societies, 281 from other agencies and 11546 were set up with weaver's own funds. Thiruvananthapuram district tops the list with 9815 looms followed by Palakkad with 1577 looms. The least number of looms are in Pathanamthitta, this is only 4 according to the survey.

Status Of Family

In the above discussion we have analyzed different aspects of the Industry by considering the details of each member. The survey have collected details of the families of each member and different aspects of the families like livelihood, diseases, land area, income and number members in each family have also considered.

45040 families are engaged in this industry. Livelihood of majority of families surveyed is not weaving or weaving related works, these families find their livelihood from other sectors such as coolie, agriculture, salary, pension, and interest on investment etc. Only 16179 families find their livelihood from weaving or weaving related works or handloom sector other than weaving.

Family members of some families in the industry are suffering with different diseases. There were 4501 such families at the time of survey. The main diseases affected by the families are Tuberculosis, Suffocation, Nose block etc. Some families have one or more above diseases.

The families surveyed in the survey possess an average land area of 16.35 cents. The average land area possessed by the families is highest in Wayanad (92.14 cents) followed by Idukki (88.96 cents). Families in Eranakulam district have least average land area possession with 8.67 cents per family.

According to the survey the average income of the families was Rs 1883.57. The average income was highest in Kannur and Idukki district with 4029.98 and 3004.58. The families from Kottayam district have the least average income; it was about 944.39 Rupees.

Chapter IV

Opinion Of The Members

The survey collected opinions of the members regarding their satisfaction in jobs and wages. 48710 members expressed their opinions in this regard. Majority of the members opined that their jobs and wages are not satisfactory. The opinions are collected in two categories, named satisfactory sales and not satisfactory sales. The combined information is furnished in the following table. Separate details are available with tables 30 and 31.

Opinion	Job Satisfactory	Job Not Satisfactory	Total
Wage Satisfactory	3679 (7.6%)	2213(4.5%)	5892(12.1%)
Wage Not satisfactory	13040(26.8%)	29778(61.1%)	42818(87.9%)
Total	16719(34.4%)	31991(65.6%)	48710(100.0%)

The handloom sector needs rejuvenation. This can be attained only through a combined effort of government as well as the societies and workers. The majority of the workers are of the opinion that the assistances from the government in this sector needs to be enhanced in the form of capital investment and raw material aid. They are of the opinion that the finished products should be purchased by the government and steps should be taken for encouraging exports. They also demanded for conducting sales exhibitions at least two times in a year other than during festival season. About 17729 workers expected government assistance in the form of raw materials and 6889 workers demanded that government should purchase their finished goods. 3045 weavers demanded that exports are to be encouraged by government and 2061 workers expected assistance in the form working capital. 1467 workers are of the opinion that sales exhibitions have to be organized frequently.

Chapter V

Workers in Hanveev

In the previous chapters, details of the members coming under handloom societies are discussed. But there are some other workers those have not been members of handloom societies, working independently or under other institutions are also live in the industry. In the present chapter the details of workers coming under Hanveev are discussed.

According to the survey, 1769 members are working under the institutions of Hanveev. Among these workers 170 are expired or transferred or having unknown identity. Remaining 1599 members are live in the industry and working under Hanveev. Thrissur district is at the top according to the number of live workers (341 members) coming under Hanveev. In the following discussion live members are taken into consider.

As in the case of society members here also most of the workers are coming from the age group of 31-50. About 49.9% of the workers are coming from this age group.

As far as the educational status of this group of workers is concerned, majority of the workers have school level education. 1182 workers have below primary level or lower primary level or upper primary level education, 154 workers have SSLC or equivalent and 38 have PDC/equivalent or higher education.

1473 out of 1599 workers have not been got any technical education. Only 5 workers have handloom certificate/ diploma/ equivalent education. 185 workers got training in weaving or training in weaving with experience. 90 workers got training from weaving institutions. 1324 got training in related works.

As far as the occupation related to handloom is concerned, 1318 workers are doing weaving related works and 281 doing other works.

Like the society members the workers working under Hanveev have also permanent or temporary occupation in other sectors. 103 workers have permanent jobs in Govt. or Semi Govt. institutions, 253 working in co-operative sector, 494 workers self employed permanently and 122 workers had temporary jobs in Govt. or semi Govt. institutions, 198 are self-employed temporarily. Some members included in the list actually working in abroad and in other categories such as students, service pensioners, disabled etc.

1156 workers out of 1599 obtain their main income from weaving. 18 find their main income from weaving related works. Other workers find their main income from coolie, agriculture salary, pension, income from rent etc.

The workers who had been working under Hanveev at the time of survey had annual average man-days 223.79. Palakkad was at the top in this regard and Kollam was at the bottom with 150 maydays as annual average.

The average wage of workers coming under Hanveev got an average annual wage of Rs. 7014.43 in the year 2001-2002. It was 7883.34 in 1999-2000 and 7727.30 in the year 2000-2001. Kollam and Palakkad district tops in the case of annual average income. Alappuzha district was at the bottom as far as average wage is concerned.

Out of 1599 workers 311 workers got training in weaving, 6 got training in coloring, 2 got training in tharuchuttu and 21 got training in common works. But majority of the workers did not having trained.

Majority of the workers working in this category did not have any diseases. Some of the workers were suffering with Tuberculosis or suffocation or nose block or one or more diseases. We cannot say that these diseases are closely related to their jobs.

The workers coming under Hanveev sell majority of their produced items to Hanveev. In 2001-2002 only 276 had worked and they sold produced goods of Rs 4658925 with an average 16880 per member to Hanveev. Thiruvananthapuram district is at the top as far as the sales of goods is concerned. The survey gives details of sales of goods to other institutions also. In 2001-2002 the workers sold produced goods of Rs. 668684 with an average of Rs.33715. But in other districts the sales to other districts were zero.

The workers purchased the raw materials from Hanveev. The workers have purchased the main raw material Yarn of Rs 2669288. The workers purchased raw materials worth Rs 3033138 from Hanveev while they purchased raw materials of Rs 3685995 from other institutions.

The workers get financial assistance from Hanveev and also from other institutions. An amount of Rs 8485912 has been availed from Hanveev by the workers as loans, out of which Rs 1514427 was taken for weaving purposes and Rs 6971485 was taken for other purposes. While the workers had taken an amount of Rs 136805249 as loans from other institutions. It is clear that the workers depend other institutions than for financial support. The above institutions owe an amount to the workers for the quantity of clothes purchased and also other purposes. An amount of 646650 is outstanding to the workers from and an amount of Rs 6220144 is outstanding to workers from other institutions.

The following table gives the details of grants received to workers from different institutions.

Sl No	Institution	Amount (Rs)
1.	State/dist. Co-operative Bank	147000
2.	Other Co-operative bank	952600
3.	Hantex	199500
4.	Hanveev	381950
5.	Nationalised Banks	139000
6.	Other Banks	146500
7.	Other Individuals	328000
8.	Others	139000
	Total	2433550

The following table gives the details of objectives and utilization of grants received by the workers

Sl. No	Objectives	Amount received	Amount utilized
1.	Establish weaving institution	362500	352500
2.	Machinery	180750	140750
3.	Infrastructure	122000	96000
4.	Working capital	16500	6500
5.	Other weaving purposes	202700	226700
6.	Others	1549100	1611100
	Total	2433550	2433550

The workers got financial assistance through different institutions by the implementation of various projects. An amount of Rs 2008303 had been received by the workers in this category.

Chapter VI

Private Individuals in Handloom Sector

The survey details of workers in the handloom industry, those are members of either societies or Hantex or Hanveev have furnished in the previous chapters. Some workers those are not a member of any handloom societies or other institutions have surveyed through the survey. Such workers are labeled as 'Private Workers' in the sequel. Such workers had been found in five districts namely Kannur, Kozhikkode, Palakkad, Ernakulam and Thiruvananthapuram. A brief report on these workers is given below.

In Kerala there are a total of 1304 Private Workers at the time of survey, coming from the above mentioned five districts. Out of which 828 workers are the contribution of Thiruvananthapuram district. Majority of the Private workers are belong to the age group of 31-50.

The group of Private Workers contains illiterate people to those have higher education such as Degree, Diploma, Post Graduation etc. Even though majority of the workers have primary school level education. Majority of the workers (1255) do not have any technical education. 133 workers have got training in weaving, 61 are trained with experience in weaving, 152 got training from weaving institutions and 958 got training is related works.

The workers are also permanent or temporary occupations in other sectors. 499 workers have permanent jobs and 805 workers have temporary jobs in different sectors. 649 workers find their main income from weaving, 80 find from weaving related works. The main source of income of 368 workers is coolie.

The average annual man days per worker at the time of survey was 184.37, it was highest in Thiruvananthapuram district and lowest in Ernakulam district. The average annual wage of private workers in the year 2001-2002 was 9622.39 while it was Rs 10986 in 1999-2000 and 9708.4 in 2000-2001. The highest average wage was in Kannur district and lowest was at Ernakulam district.

Majority of Private workers are suffering with any type of diseases such as Tuberculosis, suffocation, Nose block etc. Only 327 workers opined that they have no diseases.

The private workers have been purchasing majority of the raw materials from other institutions instead of societies. At the time of survey they had purchased raw materials worth 3339312 from other institutions while they purchased raw materials from societies only for Rs 8655.

Majority of the produced goods are selling to other institutions. In 2001-2002 produced goods worth 3086060 had been sold to other institutions while produced goods worth Rs 77256 had been sold to societies. The case was same in the years 1999-2000 and 2000-2001.

The Private Workers from Kannur, Kozhikkode and Thiruvananthapuram had availed loans of Rs 24000 from societies. At the same time the workers got financial assistance as loans from other institutions for weaving and other purposes. Also grants of Rs. 8308548 had been received by the workers through the institutions like State/dist co-operative banks, other co-operative banks, Iantex, Hanveev, Nationalized banks etc.

The details of grant received in objective wise and their utilization are furnished in the following table.

Sl No.	Objective	Amount Received	Amount Utilised
1.	Establishing weaving institution	1311000	1413048
2.	Machinery	167000	182000
3.	Infrastructure	0	0
4.	Working capital	32000	32000
5.	Others	6599048	6450000
	Total	8308548	8308548

The financial assistance received by the implementation of various projects was low compared to society members and Hantex/Hanvecv members. Only an amount of Rs 25000 had been got the workers by the implementation of these projects.

Chapter VII

Conclusion

As mentioned earlier, this report has been prepared on the basis of the information collected from complete enumeration (Census Survey) of all the Handloom Weaver's Cooperative Society members (as per the society members list supplied by the Industries Department) in the State along with those not associated with the Handloom Weaver's Cooperative Societies. In all districts except Thiruvananthapuram, the survey was conducted in 2003. In Thiruvananthapuram the survey could be launched only in 2004 due to a few reasons. The information thus relates to a specific period. Hence there may be chances of people who did not engage in the sector during the survey period or two or three years back to the survey are at present engaged in weaving or related works. Few such cases have been noticed while examining the complaints received from individuals and societies.

This report also includes the details of weavers/ weaving related workers who are associated with Handloom and those weavers or related workers who are engaged in handloom related works on their own, i.e. without any connection with the Handloom Weaver's Co-operative Societies.
