GOVERNMENT OF KERALA

**COMPARATIVE STUDY OF GROSS DOMESTIC
PRODUCT OF KERALA AND INDIA**

From 1999-2000 To 2008-09

(BASE YEAR 1999-2000)

**Department of Economics & Statistics
Thiruvananthapuram**

**COMPARATIVE STUDY OF GROSS DOMESTIC
PRODUCT OF KERALA AND INDIA
FROM 1999-2000 TO 2008-09(QUICK)**

(BASE YEAR 1999-2000)

P R E F A C E

The State Domestic Product is estimated annually by the Department of Economics and Statistics based on the guidelines, methodology and definitions prescribed by the Central Statistical Organisation in conformity with the U. N. System of National Accounts (1993). The State Domestic Product thus prepared by the Department is invariably reconciled with the Central Statistical Organisation before finalisation.

This publication presents the estimates of Gross Domestic Product (GDP), Net Domestic Product (NDP) and Percapita Income of Kerala and India from 1999-00 to 2006-07,2007-08(Provisional) and 2008-09(Quick), both at Current and Constant (1999-00) prices. The detailed estimates of sub sectors and methodology of estimation are also included in this issue.

District-wise breakup of GSDP & NSDP and Percapita Income of Kerala at Current and Constant (1999-00) prices from 1999-00 to 2006-07, 2007-08(Provisional) and 2008-09(Quick) are also presented in this publication.

This publication also contains GSDP and Percapita income at current and constant prices of all states of India and the ranks of states based on these estimates.

The series of State Domestic Products and Percapita Income of Kerala and District Domestic Products from 1999-00 have been modified according to the revised rates provided by Central Statistical Organisation, Government of India, Government of Kerala and Population figures provided by Registrar General of India through CSO.

The dedicated efforts made by all Officers and Staffs of State Income Division of DES to bring out this publication are very much appreciated. I hope that this publication is useful to administrators, planners, researchers and others engaged in development activities.

INTRODUCTION

The concept of National Income forms the basis of Growth Economics. Growth Economics deals with various aspects connected with the economic growth of Nations. Economic growth is a process by which the real national income and per capita real income of a country increase over a period of time. Changes in national income in real terms, that is, in terms of goods and services produced over a period of time represent the rate of economic growth. A high rate of economic growth raises the standard of living of the people, while a low rate of growth lowers it.

Today almost all nations of the world are engaged in a 'marathon race' of economic growth. This is more true of the backward and underdeveloped countries. The major problem in these countries is how to remove poverty and unemployment. Raising the standard of living of the people is yet another problem in these countries. These problems can be solved only by means of accelerating economic growth. Therefore, we must have some standard or measure to evaluate the performance of an economy in terms of growth. This standard or measure is provided by national income accounting. The national income figures of a country over a number of years enable us to find out the actual performance of the economy in terms of the targets set for its growth. In the context of economic planning national income accounting has special significance. It helps the planners to know whether there is any improvement in the standard of living of the people or to what extent poverty in the country has been eliminated. Thus, national income is the measure or indicator of the economic growth of a country.

In India, after independence, due attention was given to the development of official estimates of national income and related aggregates to meet the requirements for planning and policy purposes. Recognising the need for providing estimates of national income on a regular basis, Government of India set up a High Powered Expert Committee in 1949 known as 'National Income Committee' under the Chairmanship of Prof. P.C. Mahalanobis with Prof. D. R. Gadgil and Prof. V.K.R.V. RAO as members. This Committee provided the estimates of national income for the entire Indian Union for the first time. The estimates of national income and details of methodology adopted by the Committee were published in the First and Final reports of the National Income Committee brought out in April 1951 and February 1954 respectively. In accordance with the methodology and the pattern of presentation recommended by the National Income Committee, the first official estimates of national income were prepared by the Central Statistical Organisation (CSO)

with base year 1948-49. These estimates at constant (1948-49) prices along with the corresponding estimates at current prices and the accounts of the Public Authorities were published in the publication, 'Estimates of National Income in 1956'.

The Directorate of Economics and Statistics (DES) is the nodal agency for the coordination of Statistical activities in the State. DES annually estimates the State Domestic Product and District Domestic Product using the concepts and methodology approved by the System of National Accounts (SNA) of the international agencies and finalise after the reconciliation with CSO.

State income is a measurement in monetary terms of all the goods and services that an economy with in the geographical boundaries of the State without duplication, within a given period of time, generally a year. The goods cover all possible items like agricultural crops, livestock products, fisheries, forest products, manufacture of materials in the registered and unregistered sectors and construction of buildings, roads etc. Services cover medical and educational services, domestic services, hotels, restaurants, trade, transport and public services etc.

The products in different units and different measures of services produced in the economy are not directly additive in nature. To overcome this difficulty the value of all goods and services produced is measured in monetary terms. When we add together the money value of all the final goods and services produced in the State during an accounting year, it represents the State income. It should be ensured that the measurement of total value of products is counted without duplication while measuring the total.

The income of a state can be measured in three alternative ways, viz., production, income generation and final utilisation. The state income accounting starts at the production stage, where the productive units engage capital and labour and turn out goods and services, the total measure of which gives the state product. This production process generates a given amount of money income, which is distributed by the productive units to the two factors of production, viz., labour and capital. The measures of state income in this phase indicate the share of state product distributed to the two factor shares. The income thus received by the factors of production is spent for acquisition of goods and services for consumption, or by the producers in acquiring more capital goods and increasing the physical assets of their productive units. The state income by definition is the same whether measured at the point of production or at the point of income generation or at the point of final utilisation. The state income can thus be measured in

any one of these alternative approaches but if a complete analysis of the economy is the object, then it should be measured by all the three different approaches simultaneously.

For measurement of state income at the point of production, it is important to remember that the value added by production is to be counted without duplication, i.e. not the total value of commodities and services produced over a given period of time, but only the value of final products, excluding the value of inputs of all raw materials and services used in the process of production. The method followed for this purpose is to divide the economy into a given set of industrial sectors and estimate the total value of outputs within each sector as well as the total value of inputs of raw materials and services used for production and then estimate the value added by the sectors as the total value of output minus the value of inputs used as intermediate consumption.

CONCEPTS AND DEFINITIONS

THE BASIC ECONOMIC ACTIVITIES

The basic economic activities of an economy are Production, Consumption and Capital formation. These activities are also called vital processes of an economy.

(i) Production

In the ordinary sense production means manufacturing of some tangible or material goods like agricultural crops, livestock products, fish, forest products, machines etc. But when used in Economics it has a wider meaning. The act of making and providing goods and services is called production in economics. Production thus represents not only tangible goods but also non-tangible goods or services like those of doctors, teachers, etc.

(ii) Consumption

Consumption is the second vital process of an economy. It is the act of using goods and services to satisfy human wants. The standard of living of the people is determined by their consumption level. People purchase goods and services to satisfy their wants. So far as the consumption of goods is concerned, there is time gap between their production and consumption. They are produced first and consumed only after some time. But in the case of services there is no time gap between their production and consumption. Their consumption takes place along with their production.

(iii) Capital Formation

Capital formation is the process of adding capital to the existing capital stock. It is the third important flow, and it leads to investment. In any growing economy, production in an accounting year would be normally higher than consumption. This surplus of production over consumption takes the form of goods that are used for further production. This is capital formation and it results in investment. The level of investment determines the rate of growth of an economy. For a higher rate of growth a higher level of investment is needed. Underdeveloped countries are poor because the rate of capital formation in these countries is very low. Capital formation consists of the construction of new assets like buildings, roads, bridges, dams and transport equipments, production of machinery and equipments increase in stock of materials, semi-finished goods and finished goods during an accounting year.

STATE INCOME

State income or State Domestic Product (SDP) is a measurement in monetary terms of all the goods and services that an economy with in the geographical boundaries of the State without duplication within a given period of time, generally a year.

For the purpose of estimations of SDP the state economy is broadly classified as Primary, Secondary and Tertiary sectors. Estimates of these sectors are prepared individually by adopting one or more of the following approaches.

- (i) Production Approach
- (ii) Income approach
- (iii) Expenditure approach

(i) PRODUCTION APPROACH

In this method, the sum of economic value of all goods and services produced is considered after deducting the inputs consumed in the process of production. This approach is followed in Agriculture, Livestock, Fishing, Mining & Quarrying and Manufacturing (registered) sector.

(ii) INCOME APPROACH

In this method the income accrued to the factors of production namely land, labour, capital and entrepreneurship in the form of rent, salaries and wages, interest and profit are taken into account in estimation of value added. This approach is being followed in manufacturing (Un regd.), Electricity, Gas and Water supply, Trade, Hotels & Restaurants, Transport Storage and Communication, Banking and Insurance, Real Estate, Business services, Public Administration and Other Services.

(iii) EXPENDITURE APPROACH

This method is based on the measurement of income at the stage of disposal. In any production process all the items produced are either ultimately consumed or a part of it is saved for further consumption or future production of goods and services. i.e., the total money value of consumption expenditure and the saving gives the income. This approach is used in estimating income from construction sector.

Value of Output

In an economy various production units produce different types of goods and services. The money value of goods and services produced are called Value of Output.

Value Added

Value Added is a concept that measures the value of production carried by an enterprise. In order to produce goods and services the enterprise uses many intermediate goods. These goods are purchased by the enterprise from other enterprises or taken from the same enterprise. So an enterprise alone is not responsible for the full value of its

output. It only adds value to the intermediate products purchased from other enterprises and used in the process of production. Therefore to find out the exact contribution of an enterprise to the total output, the value of its intermediate consumption is deducted from the value of its total output. This exact contribution given to the product represents the value added by the enterprise in the process of production.

Financial Intermediation Services Indirectly Measured (FISIM)

The banking enterprises render services to their customers in the form of maintaining their accounts and providing them banking services. In return for these services, customers are charged nominal amount, which is substantially smaller than the expenses of the banking enterprises. On the other hand, the banks provide loans and advances and the return on such transactions are much higher than the payment made to depositors. This net return accruing to banks is large enough to meet their expenses and to earn a profit. If the financial enterprises are treated like any other productive enterprise, their income in the production account would only be limited to the charges made on customers which would mean that the banks would have a negative operating surplus and most likely negative value added. To circumvent this difficulty, an imputed income equivalent to interest and dividend receipts of banking and financial enterprises, net of interest paid to depositors is defined as Financial Intermediation Services Indirectly Measured (FISIM) (income earned in return for services rendered), is entered as a receipt item in the output of the financial enterprise. The output of the financial enterprise thus includes interest received, which has paid by the producing industries. As the interest paid by the industries already accounted for in the GDP of the respective industries, its inclusion in the GDP of banking industry accounts to duplication. To avoid this duplication FISIM is allocated to the user industries as intermediate input. The FISIM which form component of financial sector output is partly treated as intermediate consumption of industries and partly as the final consumption of Government and the households. For determining these proportions the basic data on loans and deposits relating to enterprises and consumers are used. These are taken from the same source material from which value added is estimated.

The proportion of imputed service charges so worked out for different economic activities are treated as a separate input item in the respective sectors. In case of household and Government such charges are considered as an item of private and government final consumption expenditure. FISIM has been allocated to all user industries. The industries to which FISIM has been allocated are agriculture, livestock,

forestry, fishing, mining and quarrying, manufacturing (registered and unregistered), electricity and gas, transport, construction, storage, trade hotels and restaurants, business services and other services.

Consumption of Fixed Capital (CFC)

The consumption of fixed capital (CFC) is the replacement value of reduction in the assets used up in the process of production during the accounting period resulting from deterioration, normal obsolescence or normal accidental damage. The CFC is calculated for all fixed assets, i.e. tangible (buildings, other construction, roads and bridges, transport equipments and other machinery and equipments) and intangible fixed assets (software and mineral exploration) owned by producers. Fixed assets must have been produced as outputs from the process of production. Exceptions to the above cases are the following.

- (i) CFC is not calculated for valuables that are acquired precisely because their value, in real terms, is not expected to decline over time.
- (ii) Livestock
- (iii) Non-produced assets such as land, mineral or deposits
- (iv) Work in progress and
- (v) Value of fixed assets destroyed by acts of war or major natural disasters.

Gross & Net Products

There is some wear and tear to the capital goods used in the production process resulting in a reduction in their economic life. This measurement of wear and tear is known as consumption of fixed capital (CFC). The estimate of value added without any adjustment of consumption of fixed capital is termed as gross value added. When an adjustment is made for this wear and tear, the resultant aggregate is known as net value.

Factor Cost and Market Prices

Production and the income approach measures domestic product at the cost paid to the factors of production and known as domestic product at factor cost. But at the expenditure, value of the product is at market prices, i.e. at the actual prices which, either the consumers or the producers, pay for purchase of goods and services, whether for consumption or for capital formation. This measurement of domestic product through the expenditure side is known as domestic expenditure at market prices. This market value of the final expenditure would exceed the total obtained at factor cost by the amount of indirect taxes levied by the government less the value of subsidies given by the government to producers. The domestic product can, therefore, be measured either at

factor cost or at market prices, one differing from the other by the amount of net indirect taxes (i.e. indirect taxes less subsidies). It will be seen that indirect taxes add to the prices paid by the consumers/producers while the subsidies have the opposite effect. It is for this reason that the measurement at market price is obtained after adjustment for net indirect taxes.

Base Year

To capture the Structural Changes in the Economy, to incorporate results of long term Surveys (as they are not included in between), to incorporate latest International standards, to make methodological improvements, to realistically measure the real Growth in the Economy, we change the Base Year time to time.

Current & Constant Prices

The GDP estimates at current prices are obtained by evaluating the good and services at prices prevailing during the year. The estimates of GDP at current prices, over the time do not reveal actual economic growth because these contains the combined effect of (i) The changes in the volume of goods and services (ii) the changes in the prices of goods and services. This estimates compared over period would not give a proper measure of the overall real increase in production of the State or the economic welfare of the people or growth of the economy. In order to eliminate effect of price changes or inflation, the estimates of GDP are estimated by evaluating the goods and services at the prices prevailing in the base year known as estimates at constant prices

Classification of Economy

The UN/CSO classified the entire economic activities into the following sectors and sub sectors and items,

Primary Sector- Agriculture (Agriculture proper & Livestock), Forestry & Fishing, Mining & Quarrying

Secondary Sector- Manufacturing (Registered & Unregistered), Electricity, Gas & Water supply, Construction

Tertiary sector- Transport, Storage & communication, Trade, Hotels & Restaurants, Banking & Insurance, Real Estate, Ownership of Dwelling & Business, Public Administration & Defence, Other Services

GSDP /NATIONAL DOMESTIC PRODUCT

GSDP of Kerala for the year 2008-09 (Quick) has been estimated as Rs18984082Lakhs at current prices and Rs13520249Lakhs at constant prices and in this year All India GDP were estimated as Rs493318200Lakhs at current prices and Rs333937500Lakhs at constant prices. In this year the GSDP of Kerala shows an increase of 14.55% at current prices and an increase of 6.98% at constant prices compared with the previous years and the All India GDP shows an increase of 14.17% at current prices and an increase of 6.70% at constant prices compared with the previous years. The GSDP of Kerala shows a compound annual growth rate of 11.87% at current prices and 7.73% at constant prices between 1999-2000 and 2008-09 and in this period the All India GDP shows a compound annual growth rate of 11.95% at current prices and 7.20% at constant prices.

Per Capita GSDP of Kerala for the year 2008-09 (Quick) has been estimated as Rs55905 at current prices and Rs39815 at constant prices and in this year All India Per Capita GDP were estimated as Rs42749 at current prices and Rs28937 at constant prices.

GSDP of Kerala for the year 2007-08 (Provisional) has been estimated as Rs16572174Lakhs at current prices and Rs12637775Lakhs at constant prices and in this year All India GDP were estimated as Rs432089200Lakhs at current prices and Rs312971700Lakhs at constant prices. In this year the GSDP of Kerala shows an increase of 14.28% at current prices and an increase of 9.79% at constant prices compared with the previous years and the All India GDP shows an increase of 14.33% at current prices and an increase of 9.01% at constant prices compared with the previous years. The GSDP of Kerala shows a compound annual growth rate of 11.54% at current prices and 7.83% at constant prices between 1999-2000 and 2007-08 and in this period the All India GDP shows a compound annual growth rate of 11.67% at current prices and 7.26% at constant prices.

Per Capita GSDP of Kerala for the year 2007-08 (Provisional) has been estimated as Rs49184 at current prices and Rs37507 at constant prices and in this year All India Per Capita GDP were estimated as Rs37969 at current prices and Rs27502 at constant prices.

PRIMARY SECTOR

Primary sector includes the income originating from Agriculture and allied activities, Forestry and Logging, Fishing and Mining and Quarrying.

GDP of Kerala from Primary sector for the year 2008-09 (Quick) has been estimated as Rs2747161Lakhs at current prices and Rs1678807Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs98716700Lakhs at current prices and Rs 63028900Lakhs at constant prices. In Kerala this sector gave a contribution of 14.47% at current prices and 12.42% at constant prices to the GSDP estimates and shows an increase of 7.10% at current prices and an increase of 0.81% at constant prices compared with the previous years. In this year Primary sector of India gave a contribution of 22.85% at current prices and 20.14% at constant prices to the All India GDP and shows an increase of 9.68% at current prices and an increase of 1.80% at constant prices compared with the previous years. The estimates of Primary sector of Kerala shows a compound annual growth rate of 6.32% at current prices and 0.66% at constant prices between 1999-2000 and 2008-09 and in this period the All India estimates shows a compound annual growth rate of 8.14% at current prices and 2.88% at constant prices.

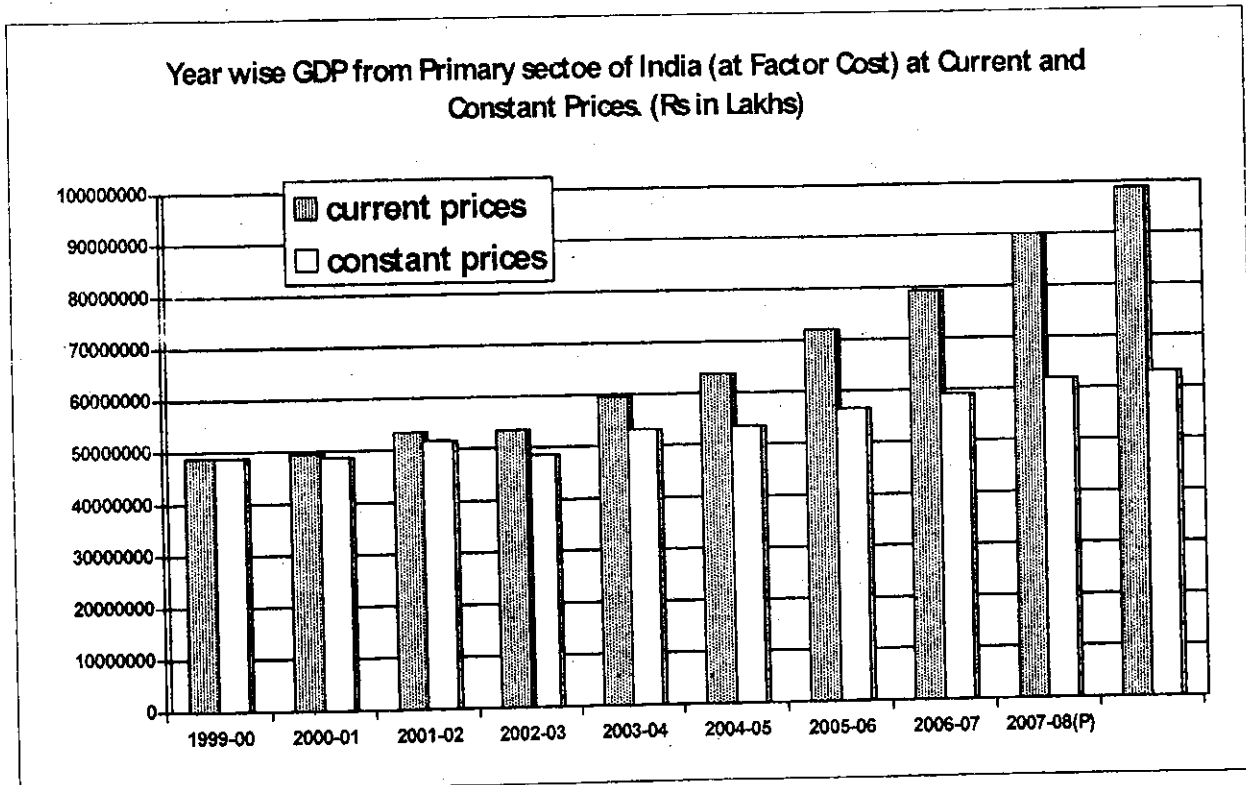

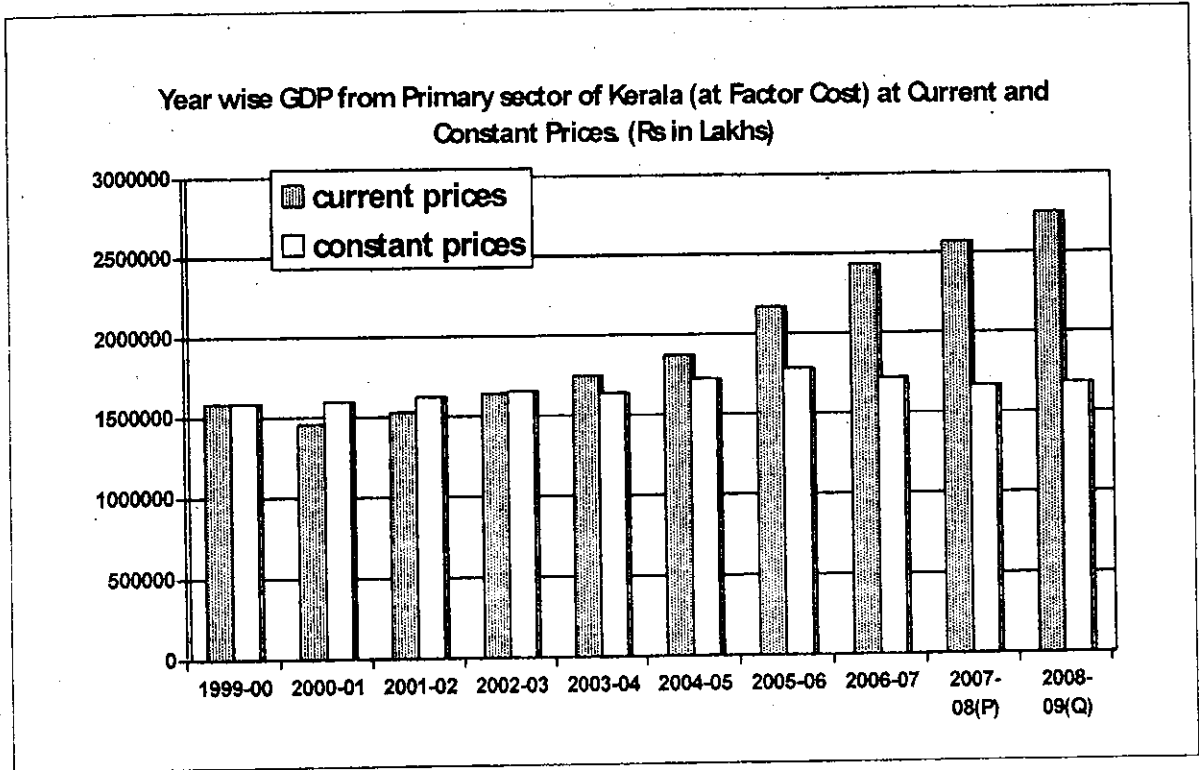

GDP of Kerala from Primary sector for the year 2007-08(Provisional) has been estimated as Rs2565065Lakhs at current prices and Rs1665355Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs90002800Lakhs at current prices and Rs 619112100Lakhs at constant prices. In Kerala this sector gave a contribution of 15.48% at current prices and 13.18% at constant prices to the GSDP estimates and shows an increase of 5.43% at current prices and a decrease of 3.20% at constant prices compared with the previous years. In this year Primary sector of India gave a contribution of 20.83% at current prices and 19.78% at constant prices to the All India GDP and shows an increase of 13.63% at current prices and an increase of 4.70% at constant prices compared with the previous years. The estimates of Primary sector of Kerala shows a compound annual growth rate of 6.22% at current prices and 0.64% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 7.95% at current prices and 3.02% at constant prices.

SECONDARY SECTOR

Secondary sector includes the income originating from Manufacturing both Registered and Un-registered, Electricity, Gas, Water supply and Construction.

GDP of Kerala from Secondary sector for the year 2008-09 (Quick) has been estimated as Rs4668365Lakhs at current prices and Rs3382980Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs129690000Lakhs at current prices and Rs79621500Lakhs at constant prices. In Kerala this sector gave a contribution of 24.59% at current prices and 25.02% at constant prices to the GSDP estimates and shows an increase of 15.18% at current prices and an increase of 10.24% at constant prices compared with the previous years. In this year Secondary sector of India gave a contribution of 30.01% at current prices and 25.44% at constant prices to the All India GDP and shows an increase of 12.05% at current prices and an increase of 3.90% at constant prices compared with the previous years. The estimates of Secondary sector of Kerala shows a compound annual growth rate of 14.02% at current prices and 10.01% at constant prices between 1999-2000 and 2008-09 and in this period the All India estimates shows a compound annual growth rate of 13.63% at current prices and 7.63% at constant prices.

GDP of Kerala from Secondary sector for the year 2007-08(Provisional) has been estimated as Rs4053114Lakhs at current prices and Rs3068866Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs115746200Lakhs at current prices and Rs76635800Lakhs at constant prices. In Kerala this sector gave a contribution of 24.26% at current prices and 24.28% at constant prices to the GSDP estimates and shows an increase of 16.87% at current prices and an increase of 10.66% at constant prices compared with the previous years. In this year Secondary sector of India gave a contribution of 26.79% at current prices and 24.49% at constant prices to the All India GDP and shows an increase of 14.91% at current prices and an increase of 8.51% at constant prices compared with the previous years. The estimates of Secondary sector of Kerala shows a compound annual growth rate of 13.88% at current prices and 9.99% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 13.83% at current prices and 8.11% at constant prices.

TERTIARY SECTOR

Tertiary sector includes the income originating from Transport, Communication, Storage, Trade, Hotel and Restaurants, Banking and Insurance, Real estate, Ownership of dwelling, Business and legal services and Other services.

GDP of Kerala from Tertiary sector for the year 2008-09 (Quick) has been estimated as Rs11568556Lakhs at current prices and Rs8458462Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs264911500Lakhs at current prices and Rs 191287100Lakhs at constant prices. In Kerala this sector gave a contribution of 60.94% at current prices and 62.56% at constant prices to the GSDP estimates and shows an increase of 16.22% at current prices and an increase of 7.02% at constant prices compared with the previous years. In this year Tertiary sector of India gave a contribution of 61.31% at current prices and 61.12% at constant prices to the All India GDP and shows an increase of 17.04% at current prices and an increase of 9.67% at constant prices compared with the previous years. The estimates of Tertiary sector of Kerala shows a compound annual growth rate of 12.84% at current prices and 8.98% at constant prices between 1999-2000 and 2008-09 and in this period the All India estimates shows a compound annual growth rate of 12.92% at current prices and 8.90% at constant prices.

GDP of Kerala Tertiary sector for the year 2007-08(Provisional) has been estimated as Rs9953995Lakhs at current prices and Rs7903554Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs226340200Lakhs at current prices and Rs174423800Lakhs at constant prices. In Kerala this sector gave a contribution of 60.06% at current prices and 62.54% at constant prices to the GSDP estimates and shows an increase of 15.75% at current prices and an increase of 12.64% at constant prices compared with the previous years. In this year Tertiary sector of India gave a contribution of 52.38% at current prices and 55.73% at constant prices to the All India GDP and shows an increase of 14.31% at current prices and an increase of 10.85% at constant prices compared with the previous years. The estimates of Tertiary sector of Kerala shows a compound annual growth rate of 12.42% at current prices and 9.23% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 12.41% at current prices and 8.81% at constant prices.

AGRICULTURE AND ALLIED ACTIVITIES

The contribution of this sector to the Gross State Domestic Product (GSDP) is estimated in terms of Gross Value Added (GVA) using the production approach. The estimation of GVA involves valuation of the products and by-products and ancillary activities at the prices received by the producers and deducting there from the value of inputs of raw materials and services consumed in the process of production at purchasers' prices. In respect of operation of irrigation system by Government sources, income approach is used.

The agriculture sector includes agriculture proper, livestock and operation of irrigation system. The agriculture proper includes various crops including plantation crops, agricultural and horticultural services and ancillary activities etc. The livestock sector covers breeding and rearing of animals and poultry, production of milk, slaughtering, preparation of meat, production of raw hides and skins, eggs, dung, honey and increment in livestock.

In respect of the sub-sector agriculture proper, the estimates of value of output are prepared separately for all the crops under consideration. These crops are divided into four categories, namely, principal crops, minor crops, miscellaneous, and unspecified crops and other products and by-products. The estimates of value of output for the principal crops are prepared using the production and price data made available by the Directorate of Economics and Statistics; the prices relating to the peak marketing period prevailing in the primary market centers compiled by the Directorate of Economics and Statistics. The source for production figures of other minor crops, coffee, rubber and opium are the Coffee Board, Rubber Board and Central Bureau of Narcotics, respectively. Utilising the information on processed tea received from the Tea Board arrives at the estimated production of tea. The miscellaneous and unspecified crops cover other cereals, other oil seeds, other sugars, other fibers, other dyes and tanning material, other drugs and narcotics, other condiments and spices, other fruits and vegetables, fodder, miscellaneous food crops, grass and miscellaneous non-food crops. The products and by-products include stalks and straw, arhar, sesamum, jute and cotton sticks, bagasse and cane trash.

The estimates of value of output for the livestock sector are prepared separately for the items, milk, meat group, eggs, wool and hair, dung, honey and increment in livestock. In the case of meat group, which comprises meat (including edible oils & glands and poultry meat), meat products (fats, legs, head, etc.) and by-products (hides, skins, guts, blood, bones, horns, hoofs, etc), the production is estimated with the help of yield rates and

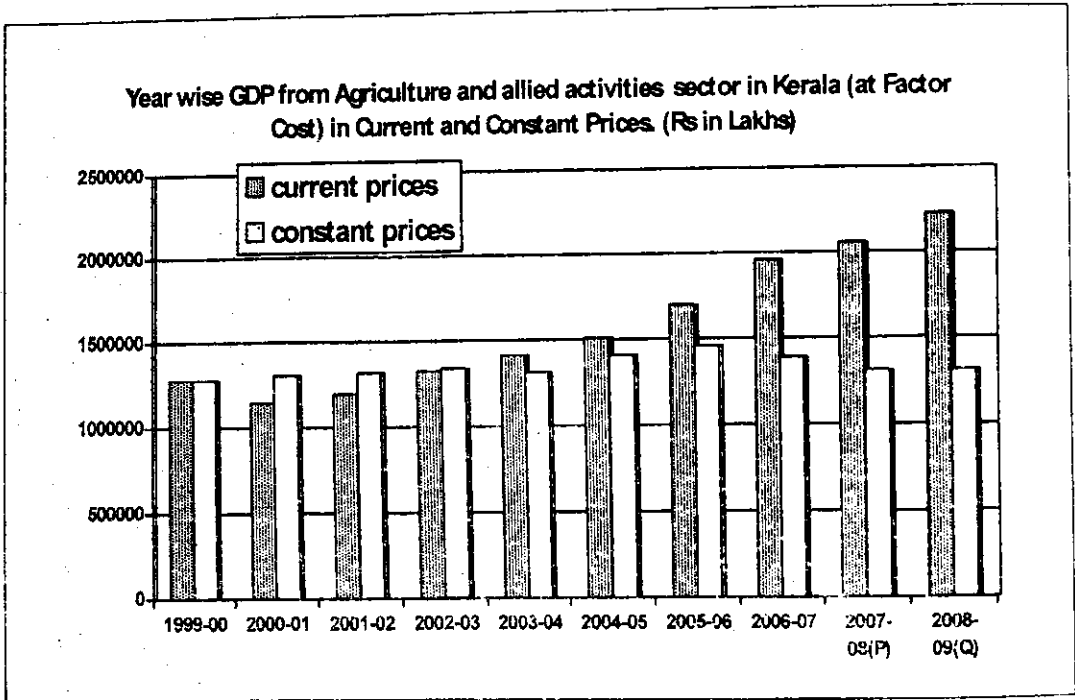

number of slaughtered animals, furnished by the State Animal Husbandry Departments (AHD). The estimates of other meat products and by-products are based on the number of slaughtered animals and fallen animals, wherever applicable, and the corresponding yield rates. The estimates of poultry meat are prepared in terms of number of adult fowls and chickens slaughtered using the information on utilisation of eggs and chickens survived. The estimates of dung are prepared using the results of Integrated Sample Survey (ISS) conducted by State Animal Husbandry Department. The utilisation rates of dung used as manure and used as fuel are also supplied by the Department of AHD. The estimates of increment in livestock population are estimated by extrapolating the population figures available from the successive Indian Livestock Censuses.

In order to avoid double counting of value of product, the value of inputs, which are also outputs of some items, are deducted, to arrive at the gross value added (GVA). The inputs, generally being common to both livestock and agriculture sub-sectors, are estimated for the sector as a whole. Thus, GDP estimates are not separately available for the agriculture and livestock sub-sectors. The inputs of agriculture sector are divided into ten items, namely, seed, organic manure, chemical fertilisers, current repairs, maintenance of fixed assets and other operational costs, feed of livestock, irrigation charges, market charges, electricity, pesticides and insecticides and diesel oil. Adjustment is made towards the consumption of these items by the animals, which are not directly connected, to agriculture sector. The estimates of irrigation charges are based on the information available from the state irrigation departments.

GDP of Kerala originating from agricultural sector for the year 2008-09(Quick) has been estimated as Rs2224498Lakhs at current prices and Rs1311622Lakhs at constant prices. This sector gave a contribution of 11.72% at current prices and 9.70% at constant prices to the GSDP estimates and shows an increase of 8.16% at current prices and a decrease of 0.04% at constant prices compared with the previous years. The estimates of agricultural sector of Kerala shows a compound annual growth rate of 6.35% at current prices and 0.28% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from agricultural sector has been estimated as Rs2056686Lakhs at current prices and Rs1312200Lakhs at constant prices and All India GDP from this sector were estimated as Rs71827800Lakhs at current prices and Rs 51127400Lakhs at constant prices. In Kerala this sector gave a contribution of 12.41% at current prices and 10.38% at constant prices to the GSDP estimates and shows an increase of 5.14% at current prices and a decrease of 5.70% at constant prices compared with the previous years. In this year agricultural sector of India gave a

contribution of 16.62% at current prices and 16.34% at constant prices to the All India GDP and shows an increase of 14.89% at current prices and an increase of 4.98% at constant prices compared with the previous years. The estimates of agricultural sector of Kerala shows a compound annual growth rate of 6.12% at current prices and 0.33% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 7.27% at current prices and 2.81% at constant prices.

FORESTRY AND LOGGING

The GDP from this sector can be estimated in terms of gross value added (GVA) by following the production approach. The production approach involves the estimation of the total value of output at factor cost and deducting there from the various inputs at purchase prices, which are used in the process of production. Since the forests are generally under the administration of government, data on production and prices are not difficult to obtain. For the private forests, if any, detailed data could be obtained from the concerned enterprises. For estimating the production of forest produce, which is lifted by the people living in surrounding areas either with permission or through unauthorized means (like minor forest products and firewood), household consumer expenditure surveys and type studies in the habitations around the forests could give the necessary data. The inputs in the form of expenditure on transportation, water, electricity, fuel, normal repairs and maintenance of the fixed assets and purchase of services could be estimated from the detailed data collected from the concerned enterprises or adopting a fixed input-output ratio, which could be estimated through a benchmark type study or analysis of government budget documents.

GDP of Kerala originating from Forestry and Logging sector for the year 2008-09(Quick) has been estimated as Rs175507Lakhs at current prices and Rs141397Lakhs at constant prices. This sector gave a contribution of 0.92% at current prices and 1.05% at constant prices to the GSDP estimates and shows an increase of 6.62% at current prices and an increase of 4.19% at constant prices compared with the previous years. In the estimates of Forestry and Logging sector of Kerala shows a compound annual growth rate of 4.08% at current prices and 1.61% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Forestry and Logging sector has been estimated as Rs164603Lakhs at current prices and Rs135714Lakhs at constant prices and All India GDP from this sector were estimated as Rs2906900Lakhs at current prices and Rs 2043200Lakhs at constant prices. In Kerala this sector gave a contribution of 0.99% at current prices and 1.07% at constant prices to the GSDP estimates and shows an increase of 8.71% at current prices and an increase of 2.93% at constant prices compared with the previous years. In this year Forestry and Logging sector of India gave a contribution of 0.67% at current prices and 0.65% at constant prices to the All India

GDP and shows an increase of 4.18% at current prices and an increase of 2.13% at constant prices compared with the previous years. The estimates of Forestry and Logging sector of Kerala shows a compound annual growth rate of 3.77% at current prices and 1.3% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 6.24% at current prices and 1.66% at constant prices.

Fishing

In the State income accounts, the GVA from the fishing sector is estimated by the production approach. It involves the estimation of total value of output at factor cost and deducting there from the value of various inputs at purchases prices which are used in the process of production.

The activities covered in this sector are (i) fishing in ocean, coastal, offshore and inland waters for commercial purposes, (ii) subsistence fishing in inland waters (iii) gathering of sea weeds, sea shells and other ocean and coastal water products and (iv) fish curing. Data on production, prices, and value of fish catch are supplied by the Fisheries Department.

GDP of Kerala originating Fishing sector for the year 2008-09(Quick) has been estimated as Rs264196Lakhs at current prices and Rs155264Lakhs at constant prices. This sector gave a contribution of 1.39% at current prices and 1.15% at constant prices to the GSDP estimates and shows an increase of 0.29% at current prices and an increase of 0.45% at constant prices compared with the previous years. The estimates of Fishing sector of Kerala shows a compound annual growth rate of 6.28% at current prices and 0.19% at constant prices between 1999-2000 and 2008-09.

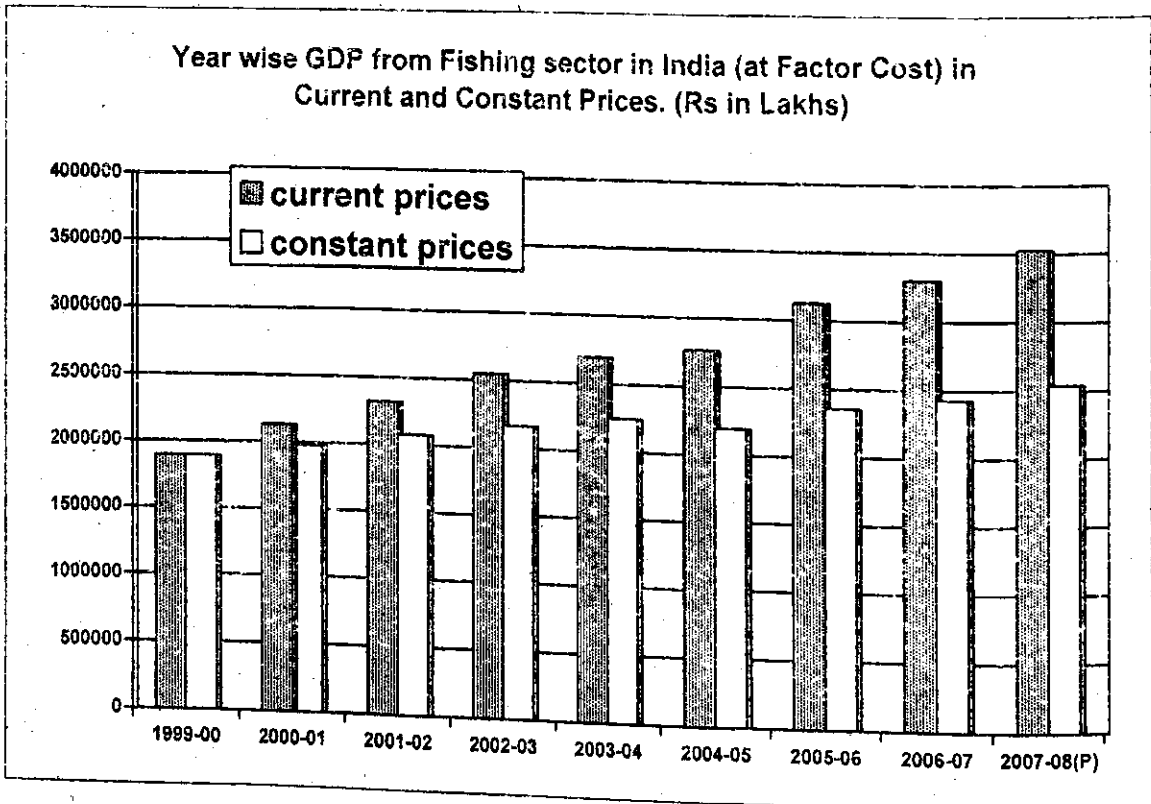

For the year 2007-08(P) GDP of Kerala originating from Fishing sector has been estimated as Rs263431Lakhs at current prices and Rs154570Lakhs at constant prices and All India GDP from this sector were estimated as Rs3525000Lakhs at current prices and Rs 2541600Lakhs at constant prices. In Kerala this sector gave a contribution of 1.59% at current prices and 1.22% at constant prices to the GSDP estimates and shows a decrease of 0.37% at current prices and a decrease of 0.23% at constant prices compared with the previous years. In this year Fishing sector of India gave a contribution of 7.47% at current prices and 6.08% at constant prices to the All India GDP and shows an increase of 6.88% at current prices and an increase of 4.59% at constant prices compared with the previous years. The estimates of Fishing sector of Kerala shows a compound annual growth rate of 7.06% at current prices and 0.16% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 8.08% at current prices and 3.75% at constant prices.

Mining and Quarrying

The estimates of GVA in this sector are prepared following the production approach. The value of output of each mineral, is calculated at state level, and by deducting the value of corresponding inputs, GVA is estimated.

This sector comprises extraction of minerals, which occur in nature as solids, liquids or gases with all supplementary operations for dressing and beneficiating ores, and other crude minerals such as crushing, screening, washing, cleaning, grading, milling, floatation, melting, pelletising, topping and other preparations needed to render the material marketable. All these activities are covered to the extent they are carried on at the mine site. Production of rock salt is included but production of salt obtained by evaporation of water from sea, lake etc., is excluded from the preview of this sector and included under manufacturing. The expenditure on preparing mining sites, prospecting and boring activities are not included here as they are included under the construction sector. The major source of data for fuel minerals is the Indian Bureau of Mines (IBM).

For calculating the value of output, the mining and quarrying sector is divided into two broad groups viz., major minerals and minor minerals. The major minerals cover fuel minerals consisting of coal, lignite, petroleum and natural gas and other major minerals i.e. metallic minerals including atomic minerals and non-metallic minerals.

GDP of Kerala originating from Mining and Quarrying sector for the year 2008-09(Quick) has been estimated as Rs82960Lakhs at current prices and Rs70524Lakhs at constant prices. This sector gave a contribution of 0.44% at current prices and 0.52% at constant prices to the GSDP estimates and shows an increase of 3.25% at current prices and an increase of 12.17% at constant prices compared with the previous years. The estimates of Mining and Quarrying sector of Kerala shows a compound annual growth rate of 12.46% at current prices and 10.45% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Mining and Quarrying sector has been estimated as Rs80345Lakhs at current prices and Rs62871Lakhs at constant prices and All India GDP from this sector were estimated as Rs11743100Lakhs at current prices and Rs6199900Lakhs at constant prices. In Kerala this sector gave a contribution of 0.48% at current prices and 0.50% at constant prices to the GSDP estimates and shows an increase of 31.81% at current prices and an increase of 49.15% at constant prices compared with the previous years. In this year Mining and Quarrying sector of India gave a contribution of 2.72% at current prices and 1.98% at constant prices

to the All India GDP and shows an increase of 10.76% at current prices and an increase of 3.27% at constant prices compared with the previous years. The estimates of Mining and Quarrying sector of Kerala shows a compound annual growth rate of 13.67% at current prices and 10.24% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 13.85% at current prices and 5.12% at constant prices.

Manufacturing (Registered)

The registered manufacturing sector includes all factories covered under sections 2m(i) and 2m (ii) of the Indian Factories Act (IFA), 1948 Which respectively refers to the factories employing 10 or more workers and using power or those employing 20 or more workers but not using power on any day of the preceding 12 months and Bidi and cigar establishment registered under Bidi and cigar Workers (condition of Employment) Act, 1966 and employing 10 or more workers using power or 20 or more workers and not using power. A 'factory' or an 'establishment' in the context of registered manufacturing sector is defined as any premises including the precincts thereof (i) whereon 10 or more workers are working or were working on any day of the preceding 12 months, and in any part of which a manufacturing process is being carried on without the aid of power or is ordinarily so carried on – but does not include a mine subject to the operation of the Mines and Minerals (Regulation and Development) Act, 1957 or a railway running shed. The 'manufacturing process' is defined as any process for (i) making, altering repairing, finishing, packing, oiling washing cleaning, breaking up demolishing or otherwise treating or adapting any article or substance with a view to its use, sale, transport, delivery or disposal (ii) pumping oil, water, sewage or any substance (iii) generating transforming or transmitting power (iv) composing types for printing, printing by letter press, lithography, photogravure or other similar process or book binding (v) constructing, reconstructing, repairing, refitting, finishing or breaking up of ships or vessels (vi) preserving or storing any article in cold storage.

The estimates of GVA are prepared by following the production approach. This approach requires estimates of value of output at ex-factory prices and the corresponding value of inputs at purchases prices. The output mainly comprises: i) ex-factory value of all products and by products including semi finished goods manufactures: (ii) receipts for industrial and non-industrial services rendered to others: (iii) value of fixed assets produced by the factory for its use: and (iv) net balance of goods sold in the same condition as purchased. Likewise inputs mainly comprise; purchase value of all items of (i) raw materials, components, chemicals, packing materials and stores actually used for the production process: (ii) fuels, lubricants, electricity, water etc. Consumed (iii) costs of non-industrial services received from other concerns; (iv) cost of material consumed for repairs and maintenance of fixed assets including cost of work

done by others to the fixed assets; (v) cost of contract and commission work done by others on materials supplied by the factories; and (vi) cost of office supplies etc. Data on output and inputs in respect of this sector are collected under the Annual Survey of Industries (ASI).

GDP of Kerala originating from Manufacturing (Registered) sector for the year 2008-09(Quick) has been estimated as Rs696420Lakhs at current prices and Rs482680Lakhs at constant prices. This sector gave a contribution of 3.67% at current prices and 3.57% at constant prices to the GSDP estimates and shows an increase of 9.25% at current prices and an increase of 4.37% at constant prices compared with the previous years. The estimates of Manufacturing (Registered) sector of Kerala shows a compound annual growth rate of 6.44% at current prices and 2.19% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Manufacturing (Registered) sector has been estimated as Rs637468Lakhs at current prices and Rs462461Lakhs at constant prices and All India GDP from this sector were estimated as Rs48857800Lakhs at current prices and Rs 32198500Lakhs at constant prices. In Kerala this sector gave a contribution of 3.85% at current prices and 3.66% at constant prices to the GSDP estimates and shows an increase of 12.76% at current prices and an increase of 7.24% at constant prices compared with the previous years. In this year Manufacturing (Registered) sector of India gave a contribution of 11.31% at current prices and 10.29% at constant prices to the All India GDP and shows an increase of 14.01% at current prices and an increase of 7.57% at constant prices compared with the previous years. The estimates of Manufacturing (Registered) sector of Kerala shows a compound annual growth rate of 6.09% at current prices and 1.92% at constant prices between 1999-2000 and 2007-08 and in period the All India estimates shows a compound annual growth rate of 13.86% at current prices and 8.07% at constant prices

Yearwise Percentage contribution of Manufacturing (Registered) sector to SDP of Kerala and GDP of India (at Constant Prices)

DDP Originating from Manufacturing (Registered) sector (at factor cost) for 2006-07 - at current & constant prices (Rs in Lakhs) Base Year 1999-2000

DDP Originating from Manufacturing (Registered) sector (at factor cost) for 2007-08(P) - at current & constant prices (Rs in Lakhs) Base Year 1999-2000

Manufacturing (Un-Registered)

The unregistered manufacturing sector-being complementary to registered manufacture sector- thus by implication covers all those units which are not covered under the registered manufacturing sector. In other words, the unregistered manufacturing sector covers all the manufacturing, processing, repair & maintenance services units employing less than 10 workers and using power or less than 20 workers and not using power. It also covers own account Enterprises (OAE) engaged in the manufacturing activity. However, conversion of sugarcane into indigenous gur, slaughtering of animals and dressing of meat carried out by farmers and individuals are excluded from this sector as they are included under agriculture and allied activities.

The estimates of Gross Value Added (GVA) for this sector for the base year are obtained as a product of estimated working force and the GVA per worker available from the results of follow up surveys of Economic Census and Census of Small Scale Industries (SSI). For years other than survey year, the estimates are moved for current and constant price estimates with help of suitable price and the growth rates observed in the Index of Industrial Production (IIP) for each industry group.

GDP of Kerala originating from Manufacturing (Un-Registered) sector for the year 2008-09(Quick) has been estimated as Rs785141Lakhs at current prices and Rs544171Lakhs at constant prices. This sector gave a contribution of 4.14% at current prices and 4.02% at constant prices to the GSDP estimates and shows an increase of 15.79% at current prices and an increase of 11.37% at constant prices compared with the previous years. The estimates of Manufacturing (Un-Registered) sector of Kerala shows a compound annual growth rate of 12.60% at current prices and 8.11% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Manufacturing (Un-Registered) sector has been estimated as Rs678082Lakhs at current prices and Rs488595Lakhs at constant prices and All India GDP from this sector were estimated as Rs21655200Lakhs at current prices and Rs 15431800Lakhs at constant prices. In Kerala this sector gave a contribution of 4.09% at current prices and 3.87% at constant prices to the GSDP estimates and shows an increase of 16.05% at current prices and an increase of 10.98% at constant prices compared with the previous years. In this year Manufacturing (Un-Registered) sector of India gave a contribution of 5.01% at current prices and 4.93% at constant prices to the All India GDP and shows an increase of 14.51% at current prices and an increase of 9.55% at constant prices compared with the previous years. The estimate of

Manufacturing (Un-Registered) sector of Kerala shows a compound annual growth rate of 12.21% at current prices and 7.71% at constant prices between 1999-2000 and 2007-08. During this period the All India estimates shows a compound annual growth rate of 11.43% at current prices and 6.81% at constant prices.

Electricity, Gas & Water supply

GVA is estimated as the sum of gross factor incomes in the case of electricity and water supply sub-sectors and as gross output less input in the case of gas sub-sector.

Electricity: The estimates of factor incomes are obtained from the analysis of data contained in annual reports of the Kerala State Electricity Board and other part from CSO. Estimates of GDP at constant prices are obtained by moving forward the base year estimates with the index of total power generation.

Gas: Data sources utilised for the estimation of gas sector GVA are the accounts of the Gas Authority of India Ltd. Estimates in respect of gobar (organic) gas were prepared from the data supplied by Khadi and Village Industries Commission.

Water Supply: In the case of government (Kerala Water Authority) and municipal water supply undertakings net value added (NVA) is to be taken as compensation of employees. To get the GVA from KWA, the annual Financial Statements of KWA are used. Estimates of CFC worked out are added to obtain the estimates of GVA.

GDP of Kerala originating from Electricity, Gas & Water supply sector for the year 2008-09 (Quick) has been estimated as Rs302851Lakhs at current prices and Rs210352Lakhs at constant prices. This sector gave a contribution of 1.60% at current prices and 1.56% at constant prices to the GSDP estimates and shows an increase of 7.67% at current prices and an increase of 2.81% at constant prices compared with the previous years. The estimates of Electricity, Gas & Water supply sector of Kerala shows a compound annual growth rate of 11.54% at current prices and 7.11% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08 (P) GDP of Kerala originating from Electricity, Gas & Water supply sector has been estimated as Rs281290Lakhs at current prices and Rs204598Lakhs at constant prices and All India GDP from this sector were estimated as Rs7606600Lakhs at current prices and Rs 6373000Lakhs at constant prices. In Kerala this sector gave a contribution of 1.70% at current prices and 1.62% at constant prices to the GSDP estimates and shows an increase of 6.29% at current prices and an increase of 1.30% at constant prices compared with the previous years. In this year Electricity, Gas & Water supply sector of India gave a contribution of 1.76% at current prices and 2.04% at constant prices to the All India GDP and shows an increase of 7.96% at current prices and an increase of 5.26% at constant prices compared with the previous years. The estimates of

Electricity, Gas & Water supply sector of Kerala shows a compound annual growth rate of 12.03% at current prices and 7.66% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 6.92% at current prices and 4.58% at constant prices between 1999-2000 and 2007-08.

Construction

The 'construction' broadly comprises to components namely (i) accounted construction (pucca construction) and (ii)un accounted construction (katcha construction). In each category, both the new construction and repair and maintenance are covered. The output of construction of the total economy is compiled by a composite methodology including both commodity flow approach and expenditure approach and taken as the total production costs of accounted and unaccounted construction. The value of accounted construction undertaking with the use of construction materials such as cement, steel, bricks, timber, fixtures etc. is determined by commodity flow method. The value of output in, kutchra construction in public sector and private corporate sector is estimated from the data available in annual budget documents of the government and the annual reports of related firms. In the case of household sector the component of kutchra construction works is estimated from the All India Debt and Investment Survey (AIDIS) results. For pucca construction, based on information available from Central Public Works Department, National Building Organisation and survey results, a fixed percentage of material inputs is taken as factor inputs i.e., GVA in the base year. For other years the value of material input is duly adjusted for wage and price indices. Deflating the current price GVA estimates by suitable price indices arrives at estimates at constant prices.

GDP of Kerala originating from Construction sector for the year 2008-09 (Quick) has been estimated as Rs2883953Lakhs at current prices and Rs2145777Lakhs at constant prices. This sector gave a contribution of 15.19% at current prices and 15.87% at constant prices to the GSDP estimates and shows an increase of 17.41% at current prices and an increase of 12.16% at constant prices compared with the previous years. The estimates of Construction sector of Kerala shows a compound annual growth rate of 17.95% at current prices and 14.13% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Construction sector has been estimated as Rs2456274Lakhs at current prices and Rs1913212Lakhs at constant prices and All India GDP from this sector were estimated as Rs37626600Lakhs at current prices and Rs22632500Lakhs at constant prices. In Kerala this sector gave a contribution of 14.82% at current prices and 15.14% at constant prices to the GSDP estimates and shows an increase of 19.59% at current prices and an increase of 12.55% at constant prices compared with the previous years. In this year Construction sector of India gave a contribution of 8.71% at current prices and 7.23% at constant prices to the All India GDP and shows an increase of 17.89% at current prices and an increase of 10.11% at constant

prices compared with the previous years. The estimates of Construction sector of Kerala shows a compound annual growth rate of 18.01% at current prices and 14.38% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 17.72% at current prices and 10.47% at constant prices.

Railways

Estimates of GSDP for railways are considered as part of supra-regional sectors and the national level estimates are allocated to States by the CSO. Railway budget is analyzed and three sets of accounts, namely, the production account, the income and outlay account and the capital finance account are prepared for the complete activity of government railways. The GVA at current prices is obtained from the production account as the sum of compensation to employees and gross operating surplus. The GVA thus obtained relates to the entire activity of the government railways. Since it includes GVA pertaining to the manufacturing, construction and the other services activities also within government railways, these are subtracted from the total GVA to arrive at the current price estimates of GVA on government railways transport services. To this is added the GVA for non-government railways, the share of which is, however, quite small.

Estimates at constant prices are prepared by carrying forward the base year estimates with the combined indicator of passenger kilometers and net tonne kilometers. The two physical indicators are combined using passenger earnings and goods earnings for the base year as weights.

GDP of Kerala originating from Railways sector for the year 2008-09(Quick) has been estimated as Rs67852Lakhs at current prices and Rs64179Lakhs at constant prices. This sector gave a contribution of 0.36% at current prices and 0.47% at constant prices to the GSDP estimates and shows an increase of 5.13% at current prices and an increase of 5.88% at constant prices compared with the previous years. The estimates of Railways sector of Kerala shows a compound annual growth rate of 6.15% at current prices and 5.50% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Railways sector has been estimated as Rs64542Lakhs at current prices and Rs60615Lakhs at constant prices and All India GDP from of this sector were estimated as Rs4375400Lakhs at current prices and Rs3694100Lakhs at constant prices. In Kerala this sector gave a contribution of 0.39% at current prices and 0.48% at constant prices to the GSDP estimates and shows an increase of 5.13% at current prices and an increase of 9.29% at constant prices compared with the previous years. In this year Railways sector of India gave a contribution of 1.01% at current prices and 1.18% at constant prices to the All India GDP and shows an increase of 16.94% at current prices and an increase of 9.29% at constant prices compared with the previous years. The estimates of Railways sector of Kerala shows a compound annual

growth rate of 6.28% at current prices and 5.45% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 9.53% at current prices and 7.24% at constant prices.

Transport other than Railways

The economic activities covered in the sector are

(i) Road transport

- Mechanized road transport (NIC-98 codes- 6021+60221+60231);
- Non-mechanised road transport (NIC-98 codes – 60222+60232);

(ii) Water transport (NIC-98 code- 61);

(iii) Air transport (NIC-98 code- 62); and

(iv) Supporting and auxiliary transport activities (NIC-98 code – 63 – 6302).

The GVA estimate is prepared by multiplying the labour input (duly adjusted for public sector) with estimated value added per worker (VAPW) available from the results of Enterprise Survey, for the respective NIC codes, separately for organized (corporate sector) and unorganized segments.

Mechanized road transport:- The main economic activities covered under the mechanized road transport are Transport by buses, Transport by other vehicles; and Transport by trucks. The GVA estimates of mechanized road transport are prepared in two parts i.e., organized (public) and unorganized. The current price GVA estimate of organized part is prepared by analyzing the annual accounts of Kerala State Road Transport Corporations. The constant price GVA is estimated by moving the base year GVA with quantum index of passenger kilometers. The GVA of unorganized part for the year 1999-2000 has been prepared as a product of GVAPW of ES 2001-02 and labour input estimates based on Employment Unemployment Survey, 1999-00 of 55 round & Population Census 2001 of the respective NIC codes (duly adjusted for public sector). The constant price GVA for subsequent years is compiled as a product of base year labour input moved with index of registered vehicles and base year GVA per worker. The constant price GVA is inflated by CPI Industrial Worker to get current price GVA.

Non-mechanized road transport:- The entire sub-sector is unorganized. Base year GVA estimate of this part has been prepared as a product of adjusted GVAPW of ES 2001-02 and labour input estimates based on Employment-Unemployment Survey, 1999-2000 of 55th round & Population Census 2001 of the respective NIC codes. The constant price estimates for subsequent years are prepared by moving the base year GVA with inter survey workforce growth rate between 1993-94 and 1999-2000 Employment & Unemployment surveys of NSS. The current price GVA is estimated by inflating the constant price GVA with CPI for Industrial workers.

Yearwise Percentage contribution of Railways sector to GDP of Kerala and GDP of India (at Current Prices)

Yearwise Percentage contribution of Railways sector to GDP of Kerala and GDP of India (at Constant Prices)

(ii) Water transport:

The GVA estimates of water transport are prepared separately for organized (public and private) and unorganized segments.

Water transport (Organized public): The base year GVA estimate of organized (public) part has been prepared at current prices by analyzing the water transport part of budget documents and annual accounts of Public Shipping Companies and Inland Water Shipping Companies. The constant price GVA is estimated by moving the base year GVA with Index of Cargo handled at major ports.

Water transport (Organized Private): Current price GVA estimate of organized (private) part is prepared by analyzing the annual accounts of Private Shipping Companies. The constant price GVA with Index of Cargo handled at major ports.

Water transport (Un-organized): The base year GVA estimate of unorganized part has been prepared as a product of adjusted GVAPW of ES 2001-02 and labour input estimates based on Employment-Unemployment Survey, 1999-00 of 55th round & Population Census 2001 of respective NIC codes (duly adjusted for public and private organized parts). For subsequent years the constant price estimates are prepared by moving the base year GVA with inter survey average compound growth rate observed between 1993-94 and 1999-2000 Employment & Unemployment surveys of NSS. The current price GVA is estimated by inflating the constant price GVA with CPI Industrial worker.

(iii) Air transport:

The GVA estimates of air transport at current prices are prepared in two parts i.e. organized (public) and organized (private). Current price GVA estimates are prepared by analyzing the Air transport part of budget documents and annual accounts of Airlines (both public and private), flying and gliding clubs. The constant price GVA of public and private parts are estimated by moving the base year GVA with air transport volume index and combined index of Passenger and Cargo traffic handled in the airports respectively.

(iv) Supporting and auxiliary transport activities:

The GVA estimates of 'supporting and auxiliary transport activities' are prepared separately for organized (public) and unorganized parts.

Supporting and auxiliary transport activities (organized public): The GVA estimate of organized part is prepared by analyzing the light houses and light ships part of the

budget documents and annual accounts of companies engaged in services incidental to water and air transport like Port Trusts, Inland Water Authority, Dredging Corporation and Airport Authority of India. The GVA at constant prices is obtained by deflating the current price GVA with Consumer Price Index (CPI) of Industrial worker.

Supporting and auxiliary transport activities (un-organized): The base year GVA estimate of un-organized part has been prepared as a product of adjusted GVAPW of ES 2001-02 and labour input estimates based on Employment -Unemployment Survey, 1999-00 of 55th round & Population Census 2001 of the respective NIC codes. For subsequent years the constant price estimates are prepared by moving the base year GVA with inter survey average compound growth rate observed between 1993-94 and 1999-2000 Employment & Unemployment surveys of NSS. The current price GVA is estimated by inflating the Constant price GVA with CPI Industrial worker.

GDP of Kerala originating from Transport other than Railways sector for the year 2008-09(Quick) has been estimated as Rs1285175Lakhs at current prices and Rs865400Lakhs at constant prices. This sector gave a contribution of 6.77% at current prices and 6.40% at constant prices to the GSDP estimates and shows an increase of 18.31% at current prices and an increase of 6.47% at constant prices compared with the previous years. The estimates of Transport other than Railways sector of Kerala shows a compound annual growth rate of 12.82% at current prices and 7.97% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Transport other than Railways sector has been estimated as Rs1086317Lakhs at current prices and Rs812802Lakhs at constant prices and All India GDP from this sector were estimated as 23201200Lakhs at current prices and Rs 16213200Lakhs at constant prices. In Kerala this sector gave a contribution of 6.56% at current prices and 6.43% at constant prices to the GSDP estimates and shows an increase of 12.23% at current prices and an increase of 7.35% at constant prices compared with the previous years. In this year Transport other than Railways sector of India gave a contribution of 5.37% at current prices and 5.18% at constant prices to the All India GDP and shows an increase of 13.41% at current prices and an increase of 7.71% at constant prices compared with the previous years. The estimates of Transport other than Railways sector of Kerala shows a compound annual growth rate of 12.16% at current prices and 8.16% at constant prices between 1999-2000 and 2007-08. During this period the All India estimates shows a compound annual growth rate of 13.82% at current prices and 8.83% at constant prices.

Communication

Estimates of GSDP for public part of Communication are considered as part of supra-regional sectors and the national level estimates are allocated to States by the CSO. The annual reports and accounts of the Indian Posts and Telecommunication Departments are analyzed and three sets of accounts, namely, the production account, the income and outlay account and the capital finance account are prepared. The GVA at current prices is obtained from the production account as the sum of compensation to employees and gross operating surplus. The estimates at constant prices are prepared by carrying forward the base year estimates with the help of combined weighted index of number of money orders, number of telephones and number of postal articles handled, weights being the corresponding gross earnings in the base year. The economic activities covered under (i) Courier activities (NIC-98, code-64120), (ii) Activities of the cable operators (NIC-98, code-64204) and (iii) Other communication (NIC-98, code-642-64204). The data sources are (i) Employment and Unemployment survey data from NSS 55th round and population census, 2001 estimates of work force (ii) Value added per worker from Enterprise Survey (iii) CPI(AL) and CPI(IW) and (iv) No of Cellular subscribers.

GDP of Kerala originating from Communication sector for the year 2008-09(Quick) has been estimated as Rs436690Lakhs at current prices and Rs855799Lakhs at constant prices. This sector gave a contribution of 2.30% at current prices and 6.33% at constant prices to the GSDP estimates and shows an increase of 14.25% at current prices and an increase of 22.49% at constant prices compared with the previous years. The estimates of Communication sector of Kerala shows a compound annual growth rate of 15.57% at current prices and 24.54% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Communication sector has been estimated as Rs382220Lakhs at current prices and Rs698661Lakhs at constant prices and All India GDP from this sector were estimated as Rs9306600Lakhs at current prices and Rs 17689400Lakhs at constant prices. In Kerala this sector gave a contribution of 2.31% at current prices and 5.53% at constant prices to the GSDP estimates and shows an increase of 11.34% at current prices and an increase of 28.36% at constant prices compared with the previous years. In this year Communication sector of India gave a contribution of 2.15% at current prices and 5.65% at constant prices to the All India GDP and shows an increase of 21.93% at current prices and an increase of 25.55% at constant prices compared with the previous years. The estimates of Communication sector of Kerala shows a compound

annual growth rate of 15.73% at current prices and 24.80% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 15.97% at current prices and 25.66% at constant prices.

Storage

The economic activities covered in this sector are:

- Warehousing Corporations;
- Cold Storage; and
- Storage (not elsewhere classified)

The major data sources for preparing estimates for storage and warehousing sector are:

- The budget documents of Central and State Governments relating to storage and warehousing activities;
- Annual reports of Central and State Government enterprises relating to storage and warehousing corporations;
- Enterprise surveys results of NSS 57th round (2001-02);
- Labour Input estimates; and
- Annual survey of Industries (ASI results relating to cold storage).

Warehousing Corporations: The GVA estimate of warehousing corporations is based on the analysis of annual accounts of state and central warehousing corporations. The constant price estimates are prepared by deflating the current price estimates with storage index.

Cold Storage: The current price GVA estimate for the cold storage is based on the results available from Annual Survey of Industries (ASI). The constant price estimates are prepared by deflating the current price estimates with index of agriculture production.

Storage (n.e.c) : This is an unorganized part and the base year GVA has been prepared as a product of adjusted GVAPW of ES 2001-02 and labour input estimates based on Employment-Unemployment Survey, 1999-00 of 55th round & Population Census 2001. The GVA per worker of all types of storage category is obtained by subtracting the number of workers in public sector warehousing and cold storage covered under ASI from the total labour input estimates. For subsequent years the constant price estimates are prepared by moving the base year GVA with inter survey average compound growth rate observed between 1993-94 and 1999-2000 Employment & Unemployment surveys of NSS. The constant price GVA is inflated with CPI Industrial worker to get the current price estimates for subsequent year.

GDP of Kerala originating from Storage sector for the year 2008-09(Quick) has been estimated as Rs9404Lakhs at current prices and Rs6334Lakhs at constant prices. This sector gave a contribution of 0.05% at current prices and 0.05% at constant prices to the GSDP estimates and shows an increase of 10.01% at current prices and a decrease of 0.98% at constant prices compared with the previous years. The estimates of Storage sector of Kerala shows a compound annual growth rate of 7.54% at current prices and 2.92% at constant prices between 1999-2000 and 2008-09.

GDP of Kerala originating from Storage sector for has been estimated as Rs8548Lakhs at current prices and Rs6397Lakhs at constant prices and All India GDP from this sector were estimated as Rs261500Lakhs at current prices and Rs 174600Lakhs at constant prices. In Kerala this sector gave a contribution of 0.05% at current prices and 0.05% at constant prices to the GSDP estimates and shows an increase of 9.62% at current prices and an increase of 5.81% at constant prices compared with the previous years. In this year Storage sector of India gave a contribution of 0.06% at current prices and 0.06% at constant prices to the All India GDP and shows an increase of 3.24% at current prices and a decrease of 1.36% at constant prices compared with the previous years. The estimates of Storage sector of Kerala shows a compound annual growth rate of 7.23% at current prices and 3.41% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 7.87% at current prices and 2.55% at constant prices.

DDP Originating from Storage sector (at factor cost) for 2006-07 - at current & constant prices (Rs in Lakhs) Base Year 1999-2000

DDP Originating from Storage sector (at factor cost) for 2007-08(P) - at current & constant prices (Rs in Lakhs) Base Year 1999-2000

Trade, Hotels and Restaurants

The economic activities covered in this sector are

- (i) Wholesale and retail trade in all commodities both produced at home (including exports and imported),
- (ii) Purchase and selling agents, brokers and auctioneers,
- (iii) Services rendered by hotels and other lodging places, restaurants, cafes and other eating and drinking places.

The GDP estimates of both trade sector and hotels and restaurants sector are prepared separately for (a) Public part (b) Private organised part, consisting of Private corporate sector and Trading Co-operatives (applicable only for trade) and (c) Private Unorganised part.

The Trade Sector includes wholesale and retail trade in all commodities whether produced domestically, imported or exported. It covers activities of purchase and selling agents, brokers and auctioneers. Wholesale trade covers units, which resale without transformation, new and used goods generally to retailer and industries, commercial establishments, institutional and professional users or to other wholesalers. Retail trade covers units, which mainly resale without transformation new and used goods for personal or household consumption. This sector, now, also comprises of maintenance and repair of motor vehicles and repair of personal household goods. As per NIC 1998 classification, this sector consists of following five categories:

- Maintenance and repair of motor vehicles (502+50404)
- Sale of motor vehicles (50-502-50404)
- Whole sale trade except of motor vehicles + Auctioning activities (51+74991)
- Repair of personal household goods (526) and
- Retail trade (except motor vehicles) (52-526)

Current price estimates of GVA in respect of public sector are based on annual budget documents and annual report of trading enterprises. In the case of private corporate sector and the co-operatives the estimates are based on sample studies undertaken by the Reserve Bank of India (RBI) and annual report of the National Bank for Agriculture and Rural Development (NABARD) respectively. For the remaining unorganised part of trading activity, estimates for the base year are based on the results of surveys conducted by the NSSO. For other years, estimates in respect of unorganised

trade and hotels are compiled by extrapolating the base year estimates with the help of a specially compiled Gross Trading Index (GTI). The GTI is compiled for the commodity producing sectors and imports on the basis of value of output and commodity-wise marketable surplus ratios and trade margins, separately at current and constant prices.

The hotels and restaurants sector covers services rendered by hotels and other lodging places, restaurants, cafes and other eating and drinking places. As per the NIC 1998 classification, it consists of following two categories

- Hotels, camping sites etc (NIC 98 code-551) and
- Restaurants, bars and canteens (NIC 98 code-552)

Current price estimates of GVA in respect of public sector units engaged in hotels and restaurants are based on the analysis of annual budget documents and budget documents. In the case of private organised sector the estimates are based on sample studies undertaken by the Reserve Bank of India (RBI). For the remaining private unorganised part, estimates for the base year are based on the value added per worker from enterprise survey and labour input estimates from Employment-Unemployment survey. For other years, estimates in respect of un-organised hotels and restaurants are compiled by extrapolating the base year estimates with the help of a specially compiled Gross Trading Index (GTI). The GTI is compiled for the commodity producing sectors and imports on the basis of value of output and commodity-wise marketable surplus ratios and trade margins, separately at current and constant prices.

GDP of Kerala originating from Trade, Hotels and Restaurants sector for the year 2008-09(Quick) has been estimated as Rs4294939Lakhs at current prices and Rs2892087Lakhs at constant prices. This sector gave a contribution of 22.62% at current prices and 21.39% at constant prices to the GSDP estimates and shows an increase of 17.50% at current prices and an increase of 5.74% at constant prices compared with the previous years. The estimates of Trade, Hotels and Restaurants sector of Kerala shows a compound annual growth rate of 12.46% at current prices and 7.62% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Trade, Hotels and Restaurants sector has been estimated as Rs3655391Lakhs at current prices and Rs2735029Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs71926100Lakhs at current prices and Rs 49768500Lakhs at constant prices. In Kerala this sector gave a contribution of 22.06% at current prices and 21.64% at constant prices to the GSDP estimates and shows an increase of 14.71% at current prices

and an increase of 9.72% at constant prices compared with the previous years. In this year Trade, Hotels and Restaurants sector of India gave a contribution of 16.65% at current prices and 15.90% at constant prices to the All India GDP and shows an increase of 14.85% at current prices and an increase of 10.13% at constant prices compared with the previous years. The estimates of Trade, Hotels and Restaurants sector of Kerala shows a compound annual growth rate of 11.84% at current prices and 7.86% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 13.89% at current prices and 8.76% at constant prices.

Banking and Insurance

The main activities covered under this sector are banking and insurance which comprises of:

- commercial banks;
- banking department of Reserve Bank of India (RBI);
- public non-banking financial corporations;
- organised non-banking financial companies engaged in trading in shares, investment holdings, mutual funds, loan finance and the like activities;
- unorganised non-banking financial institutions/undertakings such as professional money lenders and pawn brokers;
- post office savings banks including operations concerning cumulative time deposits and national saving certificates;
- co-operative credit societies; and
- life and non-life insurance activities.

Under the NIC 1998, this sector consists of codes 651-Monetary Intermediation, 659-Other financial intermediation, 660-Insurance and pension funding, except compulsory social security, 671-Activities auxiliary to financial intermediation, except insurance and pension funding, and 672-Activities auxiliary to insurance and pension funding.

Estimates of GSDP for banking and insurance are considered as part of supra-regional sectors and the national level estimates are allocated to States by the CSO. Annual Reports/Accounts of the public sector banks, companies and corporations like Life Insurance Corporation (LIC), State Financial Corporations etc. are major sources of data. The budget documents of Department of Posts provide the necessary data in the case of post office savings and postal life insurance.

Banks: The gross output of banks and similar financial institutions is estimated in two components viz., actual service charges and the imputed service charges. The GDP from this sector is estimated by income method using readily available source material for each of the sub-sectors.

Detailed data are available from the annual reports of the Reserve Bank of India, Non-banking financial companies and corporations and also the Life Insurance and General Insurance Corporations. In respect of post office savings banks and postal life insurance, data are available from the annual budget documents of the Central

Government. Data in respect of co-operative credit societies are available from the NABARD. Estimates at constant price are arrived at by using suitable quantum indices in each case.

GDP of Kerala originating from Banking and Insurance sector for the year 2008-09(Quick) has been estimated as Rs913430Lakhs at current prices and Rs767129Lakhs at constant prices. This sector gave a contribution of 4.81% at current prices and 5.67% at constant prices to the GSDP estimates and shows an increase of 14.98% at current prices and an increase of 5.04% at constant prices compared with the previous years. The estimates of Banking and Insurance sector of Kerala shows a compound annual growth rate of 12.37% at current prices and 10.21% at constant prices between 1999-2000 and 2008-09.

For the year GDP of Kerala originating from Banking and Insurance sector has been estimated as Rs794452Lakhs at current prices and Rs730287Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs24137700Lakhs at current prices and Rs 22188400Lakhs at constant prices. In Kerala this sector gave a contribution of 4.79% at current prices and 5.78% at constant prices to the GSDP estimates and shows an increase of 12.91% at current prices and an increase of 15.13% at constant prices compared with the previous years. In this year Banking and Insurance sector of India gave a contribution of 5.59% at current prices and 5.78% at constant prices to the All India GDP and shows an increase of 13.50% at current prices and an increase of 15.37% at constant prices compared with the previous years. The estimates of Banking and Insurance sector of Kerala shows a compound annual growth rate of 12.05% at current prices and 10.88% at constant prices between 1999-2000 and 2007-08. During this period the All India estimates shows a compound annual growth rate of 10.88% at current prices and 9.72% at constant prices.

Real Estate, Ownership of Dwellings and Business Services

The estimates of real estate, legal services and business services (except software development) are prepared using labour input and value added per worker approach. The estimates of software development activities are prepared using National Association of Software and Service Companies (NASSCOM) data of output from these services and Gross Value Added (GVA) to Gross Value Output (GVO) ratio obtained from the annual reports of the various companies engaged in software development activities. For ownership of dwellings the methodology consists of estimating the gross rental of residential buildings (including owner occupied) and deducting there from the cost of repairs and maintenance to obtain the estimates of GVA.

Real estate activities (NIC-98, code 70):

These includes buying, selling, renting and operating of self-owned or leased real estate such as apartment building and dwelling, non-residential buildings, developing and subdividing real estates into lots etc. Also included are developments and sale of land and cemetery lots, operating of apartment hotels and residential mobile home sites, development on own account involving construction classified in class 4520 of NIC 1998. Purchase, sale, letting and operating of real estate – residential and non-residential buildings, Developing and subdividing real estate in to lots, Lessors of real property, real estate activities with own or leased property not else where classified (n.e.c.), real estate activities, on a fee or contract basis. Further activities relating to buying selling renting managing and appraising real estate on a fee or contract basis are also included.

Ownership of Building:

In the production boundary of national accounts only two categories of services produced by households for own final consumption are included, namely,

(a) services of owner – occupied dwellings;

Owner-occupies are deemed to own household unincorporated enterprises that produce housing services for their own consumption; and

(b) domestic services produced by employing paid staff;

Households are deemed to own household unincorporated enterprises in which they employ paid staff like servants, cooks, gardeners, etc. to produce services for their own consumption.

Business services:

- Renting of machinery and equipment without operator (NIC-98 code 71);

The activities covered under this compilation categories are; renting of machinery and equipment without operator and personal and household goods. The estimates of GVA for these activities for the year 1999-2000 have been compiled by using labour input method. The VAPW of rural / urban areas of Enterprise survey, 2001-02 of NSS 57th Round and labour input estimates based on EUS 1999-2000 of the 55th Round have been used to prepare the GVA estimates for the base year. For subsequent years, the estimates of labour input have been prepared using the population growth rate as projected by the Office of the Registrar General of India (RGI). The value added per worker of rural and urban areas are projected to subsequent years using CPI(AL) and CPI(IW) respectively.

- Computer and related activities in Private Sector (NIC-98 code 72) :

The activities covered under this compilation category are hardware consultancy, software consultancy and supply, data processing, database activities, maintenance and repair of office/accounting/computing machinery and other computer related activities. The estimates of GVA for 1999-2000 series of NAS have been compiled separately for organized and unorganized sector. GVA estimates for organized sector are prepared using NASSCOM data of output of software services and GVA of output ratio obtained from analysis of available annual reports of software companies on year to year basis. The estimates of GVA for the year 1999-2000 for unorganized sector have been prepared by using labor input method based on GVAPW estimates of ES 2001-02 and the labor input estimates from EUS 1999-2000 of NSS 55th Round, separately for rural and urban areas. For subsequent years, the estimates of labor input in the unorganized sector are prepared using the growth observed in the organized sector. The value added per worker of rural and urban areas are projected to subsequent years with the CPI (AL) and CPI(IW) respectively.

- Legal activities (NIC 98 Code 7411):

This compilation category includes legal services such as those rendered by advocates, barristers, solicitors, pleaders, mukatiars, etc. (law court activities are classified in class 7523 of NIC 1998). The estimates of GVA for legal services for the base year 1999-2000 have been prepared by using the labor input method based on VAPW estimates of NSS enterprise survey of 2001-02 and labor input estimates based on EUS 1999-2000 of NSS 55th Round, worked out separately for rural/urban and organized/un-organised segments.

- Accounting, Book Keeping and Related activities in Private Sector (NIC-98, code 7412):

The activities covered under this compilation category are accounting, book keeping and auditing activities and tax consultancy services. The estimates of GVA for accounting and book keeping services etc., in the private sector for the base year 1999-2000 have been prepared by using the labor input method based on GVAPW estimates of NSS Enterprise survey of 2001-02 and labor input estimates based on EUS 1999-2000 of NSS 55th Round, worked out separately for rural and urban areas.

- Research and development (NIC-98 codes 73,7413,7414,742,743, 74991)

This compilation category has been obtained by re-grouping the activities under business services and other services. In the 1993-94 series, the estimates of Research and Scientific services (NIC-87 code 922) were included under 'other services'. In NIC-98, this activity is classified under code 73, which is under 'business services'. In 1999-2000 series of NAS, the estimates of this activity are included under 'business services' only. Similarly, the GVA estimates of 'press agency activities' falling under NIC-87 code 897 were being compiled, though not exclusively, under the category of 'business services' in 1993-94 series. Now this activity falls under 'news agency activities' which is classified under NIC-98 code 922. The GVA estimates from this category are included under 'other services' in the new series. Thus the comparison of GVA estimates of 'business services' in the 1993-94 series, and 1999-2000 series, has to be done keeping in view these changes in grouping. The estimates of GVA for this compilation category have been for organized and un-organised and rural/urban areas for the base year 1999-2000 by using VAPW estimates of NSS Enterprise survey of 2001-02 and labor input estimates based on EUS 1999-2000 of NSS 55th Round. For subsequent years, the estimates of labor input have been prepared using the population growth rate as projected by the Office of RGI. The value added per worker of rural and urban areas have been projected to subsequent years with CPI (AL) and CPI (IW) respectively.

GDP of Kerala originating from Real Estate, Ownership of Dwellings and Business Services sector for the year 2008-09(Quick) has been estimated as Rs1984485Lakhs at current prices and Rs1275554Lakhs at constant prices. This sector gave a contribution of 10.45% at current prices and 9.43% at constant prices to the GSDP estimates and shows an increase of 17.57% at current prices and an increase of 10.38% at constant prices compared with the previous years. The estimates of Real Estate, Ownership of Dwellings and Business Services sector of Kerala shows a compound

annual growth rate of 16.17% at current prices and 10.60% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Real Estate, Ownership of Dwellings and Business Services sector has been estimated as Rs1687929Lakhs at current prices and Rs1155565Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs35271900Lakhs at current prices and Rs23570000Lakhs at constant prices. In Kerala this sector gave a contribution of 10.19% at current prices and 9.14% at constant prices to the GSDP estimates and shows an increase of 17.63% at current prices and an increase of 12.49% at constant prices compared with the previous years. In this year Real Estate, Ownership of Dwellings and Business Services sector of India gave a contribution of 8.16% at current prices and 7.53% at constant prices to the All India GDP and shows an increase of 13.28% at current prices and an increase of 8.55% at constant prices compared with the previous years. The estimates of Real Estate, Ownership of Dwellings and Business Services sector of Kerala shows a compound annual growth rate of 15.99% at current prices and 10.63% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 13.52% at current prices and 7.94% at constant prices.

Public Administration and Defence

Public administration and defence (NIC 1998 code 75) covers services rendered by the general government i.e., Central and State governments, Corporations, Municipalities, District Panchayath, Block Panchayath and Grama Panchayat. Public services in quasi government bodies are also included under these economic activities. These services relate to the organs of state dealing with collection of taxes, other fiscal services, interest payments and servicing of debts, defence services administrative services (such as external affairs, police, jails, supplies and disposal, pensions), social and community services (viz., social security, welfare and relief on account of natural calamities) and economic services (e.g. agriculture, animal husbandry, industries and community development). The activities of the Issue department of the RBI and EFPO are like that of administrative departments and therefore these activities are also included. However, economic services like irrigation, forestry etc., are included under respective industry groups. Thus, irrigation systems come under 'agriculture', construction activity undertaken by government under 'construction', education and medical & health services in 'other services' industry groups. The departmental commercial enterprises of government such as railways, posts and communications, overseas communication services, forests, road transport, power projects, distilleries, television and radio broadcasting, milk supply schemes, manufacturing industries including defence manufacturing establishments and government printing presses are included in the appropriate industry groups.

For the estimation of GVA normally, goods and services produced for own final consumption or own capital formations are valued on the basis of prices of similar goods and services produced by market producers. However, in the case of general government, which is engaged in non-market production, its output cannot be valued with these imputation procedures, as suitable prices for similar services produced by the market producers are not available. For these reasons, and also to ensure that the various non-market services produced by government units and NPISHs are valued consistently with each other, the SNA recommends that they are all valued by the sum of costs incurred in their production, namely, as the sum of:

- Intermediate consumption;
- Compensation of employees;

- Consumption of fixed capital; and
- Other taxes, less subsidies; on production.

Annual estimates of NVA, which comprises only the compensation of employees, are compiled from the government budget documents. The CFC estimated separately is added to NVA to arrive at GVA estimates. Estimates of GVA at constant prices are compiled by deflating the current price NVA by consumer price indices (CPI) of Industrial Workers and adding to it the CFC at constant prices.

GDP of Kerala originating from Public Administration and Defence sector for the year 2008-09(Quick) has been estimated as Rs896860Lakhs at current prices and Rs607012Lakhs at constant prices. This sector gave a contribution of 4.72% at current prices and 4.49% at constant prices to the GSDP estimates and shows an increase of 11.33% at current prices and an increase of 0.19% at constant prices compared with the previous years. The estimates of Public Administration and Defence sector of Kerala shows a compound annual growth rate of 11.23% at current prices and 6.50% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Public Administration and Defence sector has been estimated as Rs805594Lakhs at current prices and Rs605846Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs23368100Lakhs at current prices and Rs 16203400Lakhs at constant prices. In Kerala this sector gave a contribution of 4.86% at current prices and 4.79% at constant prices to the GSDP estimates and shows an increase of 21.47% at current prices and an increase of 16.25% at constant prices compared with the previous years. In this year Public Administration and Defence sector of India gave a contribution of 5.41% at current prices and 5.18% at constant prices to the All India GDP and shows an increase of 10.93% at current prices and an increase of 4.23% at constant prices compared with the previous years. The estimates of Public Administration and Defence sector of Kerala shows a compound annual growth rate of 11.21% at current prices and 7.32% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 8.42% at current prices and 3.57% at constant prices.

Other Services

The economic activities covered under this sector are

- (i) Coaching and Tuition (NIC-98 codes 80903 and 80904),
- (ii) Education excluding Coaching and Tuition (NIC-98 code 80(-)80903 and (-) 80904,
- (iii) Human health activities including veterinary activities,
- (iv) Sewage and refuse disposal, Sanitation activities (NIC-98 code 90) ,
- (v) Activities of membership organizations (+) social work, (NIC-98, code 91+853) ,
- (vi) Recreational cultural and sporting activities (NIC-98 code 92),
- (vii) Washing and cleaning of textiles and fur products (NIC-98 code 9301),
- (viii) Hair dressing and other beauty treatments (NIC-98 code 9302),
- (ix) Funeral related activities (NIC-98 code 9303+9309) ,
- (x) Private households with employed persons (NIC -98 code 95),
- (xi) Custom tailoring (NIC-98 code 18105), and
- (xii) Extra territorial organizations and bodies (NIC-98 code 99)

The sources of data are:

- (i) Employment and Unemployment survey data of NSS 55th Round and population Census 2001 estimates of work force;
- (ii) Value added per worker from enterprise survey, NSS 57th Round;
- (iii) Budget documents for data relating to activities of these services covered under Government;
- (iv) Annual report/Accounts of corporations; and
- (v) Consumer price index for agriculture labour - CPI(AL), Consumer Price Index for Industrial workers - CPI(IW)

All the activities are broadly grouped under three segments, namely, public sector, private organized sector, and private unorganized sector. While the estimates of GVA in respect of activities covered under public sector are compiled by analyzing the budget documents and annual accounts of the concerned units, those of private organized and private unorganized segments are prepared following the labour input method and benchmark-indicator procedures.

Generally, the GVA estimates for non-public sector segments are prepared separately for organized segments. Initially estimates are prepared for a benchmark year (usually the base of current national series), and for subsequent years, the benchmark year's GVA estimates are extrapolated with suitable indicators. The benchmark year GVA estimates are prepared as a product of estimated workforce engaged in the economic activity and the

estimated value added per worker (VAPW), separately for organized and unorganized segments. For the current NAS series (base year 1999-2000), the workforce estimates are from the NSS 55th Round (1999-2000) survey results, and the estimates of VAPW are from the results NSS 57th round (2001-02). The GVA estimates for the base year have been prepared separately for rural/urban areas and also separately for organized/unorganized segments. It may be mentioned that the NSS 57th Round survey results provide the data separately for corporate sector and unorganized sector.

For subsequent years, the estimates of workforce in the respective activities have been prepared using the inter survey average compound growth rate of quinquennial Employment & Unemployment surveys as observed between 1993-94 and 1999-2000 of NSS50th and NSS 55th Round survey results. The value added per worker of rural/ urban areas and organized/unorganized segments have been projected to subsequent years with the CPI (AL) and CPI (IW) respectively. The GVA estimates have then be compiled as product of workforce and VAPW for the respective rural/urban and organized/unorganized segments.

GDP of Kerala originating from Other Services sector for the year 2008-09(Quick) has been estimated as Rs1679721Lakhs at current prices and Rs1124968Lakhs at constant prices. This sector gave a contribution of 8.85% at current prices and 8.32% at constant prices to the GSDP estimates and shows an increase of 14.34% at current prices and an increase of 2.42% at constant prices compared with the previous years. The estimates of Other Services sector of Kerala shows a compound annual growth rate of 11.47% at current prices and 6.62% at constant prices between 1999-2000 and 2008-09.

For the year 2007-08(P) GDP of Kerala originating from Other Services sector has been estimated as Rs1469002Lakhs at current prices and Rs1098352Lakhs at constant prices and in this year All India estimates of this sector were estimated as Rs34491700Lakhs at current prices and Rs 24922200Lakhs at constant prices. In Kerala this sector gave a contribution of 8.86% at current prices and 8.69% at constant prices to the GSDP estimates and shows an increase of 19.34% at current prices and an increase of 12.29% at constant prices compared with the previous years. In this year Other Services sector of India gave a contribution of 7.98% at current prices and 7.96% at constant prices to the All India GDP and shows an increase of 15.65% at current prices and an increase of 8.52% at constant prices compared with the previous years. The estimates of Other Services sector of Kerala shows a compound annual growth rate of 11.12% at current prices and 7.15% at constant prices between 1999-2000 and 2007-08 and in this period the All India estimates shows a compound annual growth rate of 11.51% at current prices and 7.07% at constant prices.
