Preface

This report is the analysis on Gross Fixed Capital Formation in Kerala during the year 2011-12 to 2018-19. This is the third report, published by Department of Economics and Statistics. The first report on Gross Fixed Capital Formation in Kerala for the period 1980-81 to 1985-86 was published in 1990 and the second report for the period 1985-86 to 1988-89 was published in 1994.

Gross Fixed Capital Formation is that part of states total expenditure which is not consumed but added to its fixed tangible assets and stocks. It consists of the acquisition of fixed assets like buildings, civil works, machinery, vehicles etc. and change in stock of raw material, finished goods and semi finished goods.

State level performance of the economy is analysed by computing different macroeconomic state level indicators like Gross State Domestic Product, Net State Domestic Product, Per capita income, Gross fixed capital formation, Gross capital formation, Consumption Expenditure etc. These estimates are prepared by using the concept & methodology adopted by CSO (Central Statistics Office)&SNA(System of National Account) 2008. Based on the nature of economic activity (As per NIC (National Industrial Classification) 2008), these institutional units are grouped into different industries and various sectors. The object of the study is to bring out a clear picture of the growth of capital formation in private, public and household sectors.

The dedicated efforts made by all officers and staffs of State Income Division of Department of Economics and Statistics to bring out this publication are very much appreciated. I hope that this publication is useful to administrators, planners and researchers.

Chapter 3

GFCF of Kerala Economy

GFCF by industry of use

Fixed Capital expenditure on Kerala economy is prepared in three sectors namely Public sector, Private Corporate Sector and Household sector. The estimates for the public sector are analysed from the budget documents and annual accounts of public corporations. The estimates for private corporations are mainly prepared using information on financial parameters of establishments from the indicator survey on Business Register. As regards the 'Households' sector, benchmark results obtained from various NSS surveys (especially the capital stock to output/GVA ratios) and growth rates in Gross Value Output (GVO), GVA etc. are used to obtain the GFCF estimates (by extrapolating the benchmark capital stock data with the growth observed in GVO (or GVA) and taking the difference between two years' capital stock data. Fixed assets are broadly classified under four categories viz. I. Dwellings, Other Buildings & Structures; II. Machinery & Equipments; III. Cultivated Biological Resources; and IV. Intellectual Property Products. The estimates have been prepared for the disaggregated level of assets, as per SNA 2008, based on the information available.

Gross Fixed Capital Formation of State economy

GFCF of economy can be prepared in current price and constant price with base year. GFCF of State economy has been prepared from the year 2011-12 to 2018-19 at current price level and also in constant price level.

I. GFCF of State Economy At Current Prices

The Sectorwise Gross Fixed Capital Formation during the year from 2011-12 to 2018-19 at current price is shown in the following tables. The contribution each sector, shares of each sector to the state economy and its graphs are depicted in the following

a. Sector wise GFCF of State Economy At Current Prices

Table-1

Graph-3

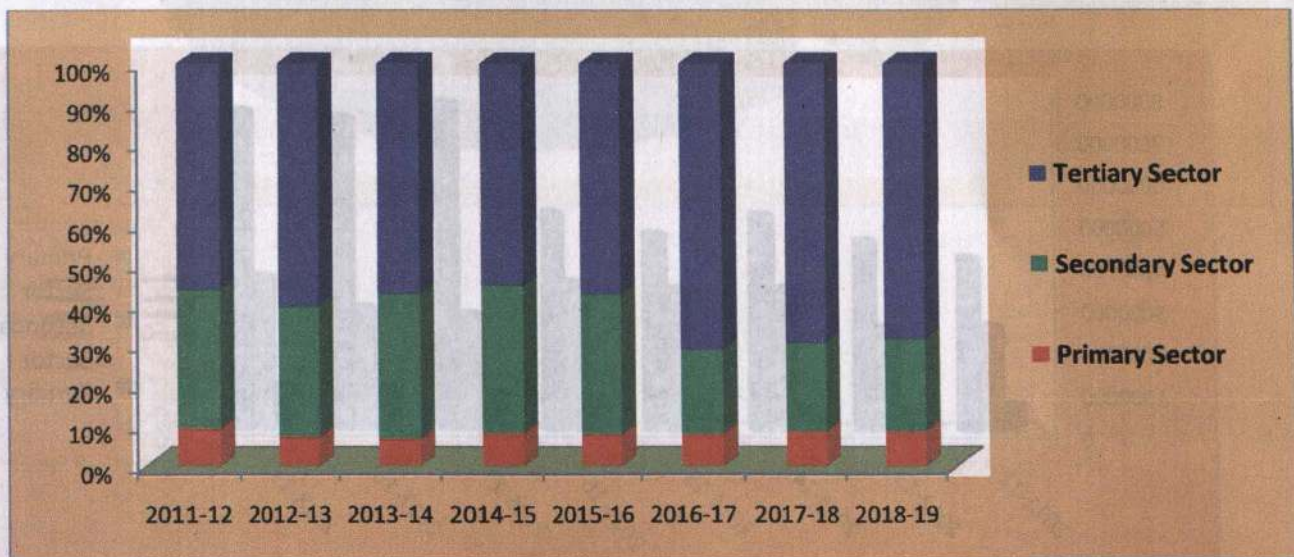

Sectoral Contribution of GFCF of the State (At Current Prices) in 2018-19

The above chart explicit that in 2018-19 the GFCF from Tertiary sector is up to 70% and the GFCF from Primary Sector is only below 9%.

Graph-4

Percentage of distribution of Sector wise GFCF of State at current Price from 2011-12 to 2018-19

The percentage distribution of sector wise GFCF (table-II and graph-4), reveals that the share of primary sector is only below 10%. The table also shows a declining trend in the secondary sector from 34% to 22.92%.

Ib. Sector wise GFCF of State Economy At Constant Prices from 2011-12 to 2018-19

The three Sector wise (Primary, Secondary, Tertiary) State level Gross Fixed Capital Formation during the year from 2011-12 to 2018-19 at constant price is shown below in the table.

Table-III

Total	100	100	100	100	100	100	100	100

The above table shows at constant prices the GFCF contribution in the primary sector is only below 10%. The GFCF share from the Secondary sector is between 25% & 40%. The major share of GFCF is from the Tertiary Sector and the contribution is between 54% and 68%. It is depicted in Graph 7.

Graph 6

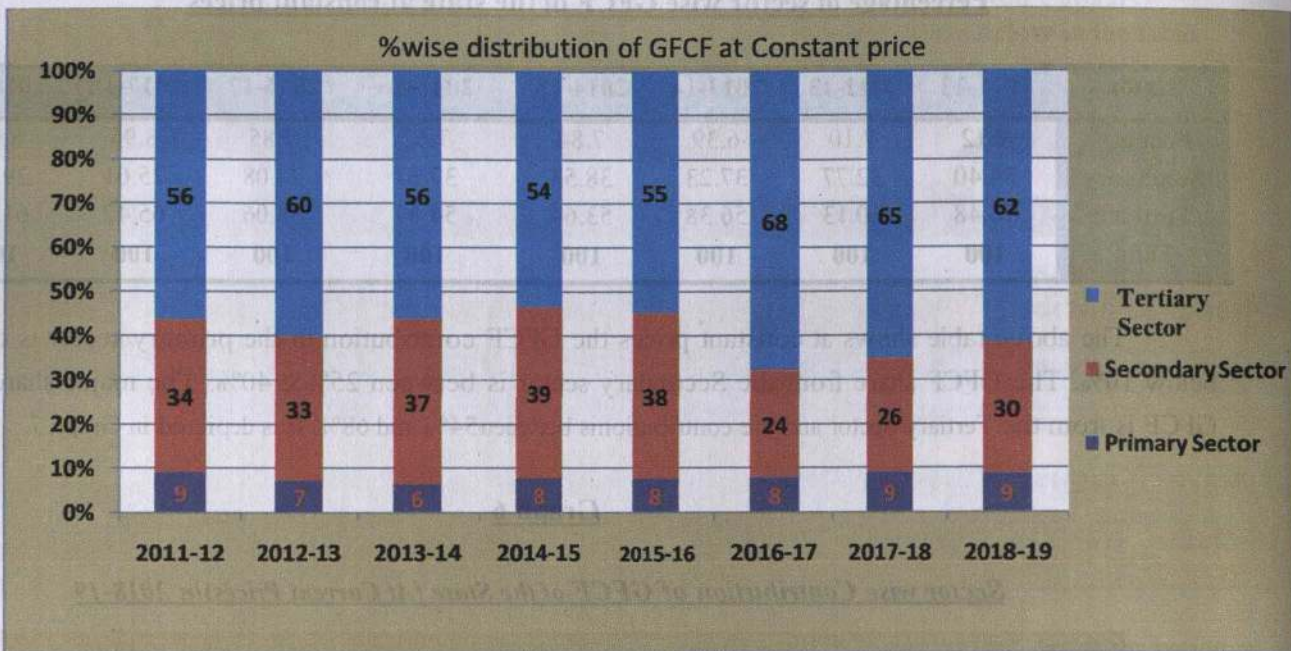

Sector wise Contribution of GFCF of the State (At Current Prices) in 2018-19

The above chart shows that in 2018-19 the GFCF from Tertiary sector is up to 62%, GFCF from Secondary sector is up to 30% and the GFCF from Primary Sector is only below 9%.

1c. Institutionwise GFCF of the State at Current price

In the economy, money is circulating mainly through the three Institution Sectors i.e., Public Sector, Private Sector and Household Sector. If we take GFCF calculation on the basis of institution wise, we can find that the major contribution is from the Private sector. The Table-V and Graph-8 shows the State GFCF in Institution wise at current price.

Chapter 4

GFCF of Public Sector

Estimates of GFCF in Public Sector are based on the analysis of actual expenditure recorded in Annual reports of different public sector organizations. Fixed assets have been classified by type of assets, industry of use and also by type of institution. Industry of use indicates sectors/sub-sectors of the economy. By type of institution means Central / State Administration Departments, Departmental Enterprises, Non Departmental Enterprises, Local bodies, Quasi Local self Government and Supra-Regional Sectors. GFCF estimates of public sector comprise the following. (i) Report on State & central government Budget documents (ii) Annual Financial Statements (AFS) of all local self Government Institutions (iii) Annual Accounts of Non Departmental & commercial Undertakings (iv) Annual Estimates of Supra regional Sectors.

Estimation approach

The estimates of state & central governments are obtained by the analysis of government budget documents. This is achieved through the economic cum purpose classification of budget documents. The estimates of local self Government Institutions are obtained from the detailed analysis of Annual Financial Statement (AFS) of local bodies existed in the state. The annual financial statement of each local bodies existed in the state is collected from Information Kerala Mission (IKM). This AFS is analysed through the economic cum purpose classification codes of local bodies, the capital expenditure generated from local bodies is computed. The estimates of Non Departmental & commercial Undertakings are obtained from the analysis annual report of state and central Non Departmental & commercial Undertakings existed in the state. The estimates of supra regional sector are prepared by CSO and supplied to states.

Chapter 5

GFCF of Private Corporate Sector

GFCF estimates of this sector are purely based on the indicator survey on the selected establishments from the Business Register. At national level the data obtained from Ministry of Corporate Affairs (MCA 21) is used to compute the GVA, GFCF of private corporate sector. But at state level, MCA 21 data base is not available. Hence for the computation of GFCF estimates of private corporate sector at state level, an indicator survey is conducted on selected establishments in Business Register.

Estimation approach

Firstly the establishments having 50 or more employees in Business Register are selected for the survey. According to the location of the establishments, these selected establishments are split in to 14 districts. Through the District offices and the Statistical investigators in the taluk, the data in prescribed schedule is collected. Suitable multipliers are used for non responding units. Year wise details of these selected establishments (Production, Value, Investment, Capital investment) are collected for the year 2011-12 onwards. Data collected from these establishments is arranged in three digit NIC and state wise. Three digit NIC wise details are again grouped to obtain industry wise estimates. Finally using the state level ASI (Annual Survey of Industries) ratio of Capital Investment to total Investment, asset wise ratio of all India level estimates of private corporate sector, industry wise and asset wise estimates of GFCF of private corporate sector at state level are prepared.

The Sector wise GFCF of Private Corporate sector at Current Price is given below in Table XIII

In the table we can see that from the year 2015-16 GFCF of Tertiary sector is increasing from 55% to 85%. At the same years GFCF of secondary sector is decreasing to 15% from 44%. The GFCF of Primary sector is always below mere 1%.

Graph-15
GFCF of Private Corporate Sector at Current Price

The above graph shows not only a steep increasing of GFCF in the year 2016-17 from 2015-16 in the tertiary sector but also a steep decrease of GFCF in secondary sector.

GFCF of Private Corporate sector at Constant Price

The Sector wise GFCF of Private Corporate sector at Constant Price is given below in Table XV

The above table explains that more amount of GFCF at constant price in the private corporate sector is from the Tertiary Sector and fewer amounts are from the Primary Sector. In 2018-19 the amount of GFCF in the Tertiary sector and Primary sector is decreasing than 2016-17 and 2017-18. The table shows in 2018-19 GFCF in the Secondary sector is increasing than in 2016-17 and 2017-18.

The above table demystifying that the GFCF from primary sector is below 1% and the major portion is from the Tertiary Sector. In 2016-17 and 2017-18 GFCF from Tertiary Sector is 82.13% and 81.82% respectively and in 2018-19 GFCF from Tertiary Sector is 75.38%. And at constant price, the share of GFCF from Primary and Secondary sector is 0.31% and 24.31% respectively.

Chapter 6

GFCF of Household Sector

Estimates of GFCF in Household sector are purely based on National Sample Survey(NSS) socio economic surveys and the growth rate of state level GVA of different industries. The main survey result used for the estimation is All India Debt & Investment Survey (AIDIS) 2012-13 &NSS 67th round Unincorporated (Non-Agricultural) Enterprises survey excluding Construction, 2010-11.

Estimation approach

The industry wise estimation details are described in the following

Crops

The estimates for the base year are obtained by using the results of (AIDIS). The fixed capital expenditures of land, orchard & plantations, livestock used as fixed assets, agriculture machinery & equipment & Transport equipment obtained from AIDIS. Using this, asset wise estimates are computed for the base year 2011-12. Based on the growth of state level GVA of crops sector, the asset wise GFCF estimates of the succeeding years are computed.

Live stock

The estimates for the base year 2011-12 are obtained by using the results of (AIDIS). The fixed capital expenditures of barns and animal sheds, orchard & plantations, livestock used as fixed assets, agriculture machinery & equipment & transport equipment are obtained from AIDIS. Using this, asset wise estimates are computed for the base year 2011-12. Based on the growth of state level GVA of Livestock sector, the asset wise GFCF estimates of the succeeding years are computed.

Forestry

The Government of Kerala have taken over the private forests of the state by an Act. Also from the Forest survey of India report, Proportion of Area under Private Forests in the States to total area under private Forests is zero. Therefore, the capital expenditure on forest preservation, extension etc. of the state is the contribution of the public sector only.

Fisheries

GFCF estimate of the base year is obtained by using the state level GVA on Fisheries and fixed capital expenditure on Fish catching. Asset wise GFCF is estimated by comparing the all India GFCF estimates on fisheries. Based on the proportion of state production to total production (marine and inland fish) on fisheries the estimates of the succeeding years are computed.

Mining

GFCF estimate of the base year is obtained by using the state level GVA on Mining and comparing the all India GFCF estimates on Mining. Based on the growth of GVA of minor minerals the estimates of the succeeding years are computed.

Manufacturing

The GFCF estimates for unorganised manufacturing sector are obtained by using the results of NSS 67th round Unincorporated (Non-Agricultural) Enterprises survey excluding Construction, 2010-11. Base year GFCF estimate is obtained by using the stocks in asset wise (DOBS, M&E, CBR & IPP) and the state level Net Additions (GFCF) to GVA ratio obtained from NSS 67 the round. Based on the growth of state level GSVA of Manufacturing, the estimates for the succeeding years are computed.

Electricity, Gas, Water Supply & Other utility services

GFCF estimate of the base year is obtained by using the state level GVA on this sector and comparing the all India GFCF estimates on this sector. Asset wise GFCF is estimated by the ratio of the asset wise estimates of non departmental and commercial enterprises related to this sector. Based on the growth of GSVA of Electricity, Gas, Water Supply & Other utility services the estimates of the succeeding years are computed.

Construction

The GFCF estimates for the base year are obtained by using the capital stocks & capital output ratio. Asset wise GFCF is estimated by comparing the all India asset wise GFCF estimates on construction. Based on the growth of GSVA of construction, the estimates of the succeeding years are computed.

Service Sector

It includes Trade & Repair Services, Hotels & Restaurants, Transport, Storage, Communication & Services related to broadcasting Real estate, ownership of dwelling and Professional Services and other services including education and health.

The GFCF estimates for unorganised sectors are obtained by using the results of NSS 67 th round. Base year GFCF estimate is obtained by using the stocks in asset wise (DOBS, M&E, CBR & IPP) and the state level Net Additions (GFCF) to GVA ratio obtained from NSS 67 th round. Based on the growth of state level GSVA of respective industries, the estimates for the succeeding years are computed.
