# Report on NSS Socio Economic Survey 66<sup>th</sup> Round (JULY 2009- JUNE 2010)

**Employment**

**Unemployment**

## Situation in Kerala

N.S.S. Division  
Department of Economics & Statistics

## Preface

Among the States of India, the problem of unemployment has been more severe in Kerala. To provide reliable and dependable data on labour force and related characteristics of population, the Department of Economics and Statistics (DES), Kerala collected data on various facets of Employment and Unemployment situation of Kerala through the 66<sup>th</sup> round of National Sample Survey (NSS). The survey covered 492 panchayath wards in rural areas and 347 Urban Frame Survey (UFS) blocks in urban areas of Kerala. The field work of the survey covered the period from July 2009 to June 2010. The results of this survey, at state level are presented in this report. District level estimates of selected need based and feasible important indicators of Employment and Unemployment are available in the report on 'Household Consumer Expenditure & Employment - Unemployment Situation in Kerala' based on the central and state sample pooled data of NSS 66<sup>th</sup> round, published by DES.

Through this report we are aiming at providing reliable and dependable estimates of various parameters of 'Employment and Unemployment' situation in Kerala, rather than a detailed analytical study of the situation. This report is prepared in the form of 'Tables' with major 'Highlights' of the survey results. 'Highlights of the survey' gives an overview of major results of the survey through charts and pictures. The main results of this survey that can be used as baseline data for analytical studies on this topic are arranged in tables and are presented in Appendix A. Concepts and definitions used in the collection of data and the sample design on the basis of which the selection of households was made are explained in Appendix B. The estimation procedure followed is given in Appendix C. The Employment and Unemployment Schedule, Schedule 10 used for collecting information on survey topic is given in Appendix D.

The technical assistance provided by NSSO, Government of India and the cooperation extended by the sample households is acknowledged. The work done by the supervisors and field staff who worked tirelessly to make the survey a success, the report writers and all other staff in the Directorate who have contributed in diverse ways to the success of the survey and the subsequent production of the report are duly acknowledged.

I hope that this report will be useful to the planners, policy makers, academicians and researchers. Suggestions for improvement of the content of the report will be highly appreciated.

# Highlights of the Survey Results

Highlights of the

Survey Results

## Head of Household

During 2009-10, about 24 per cent of rural and 22 per cent of urban households of Kerala were headed by females. Number of female-headed households per 1000 households along with the sex-ratio and household size obtained for such female-headed households are shown in Table 3 of Appendix

Average Household Size				Sex Ratio	
Head of hhd		R	U	R	U
		F	4	3.5	1633
M/F	:	4.1	4	1083	1115

Compared to all households female headed households had on an average, a relatively small household size and a much higher sex-ratio

## Principal Household Industry

The industry from which a household derives its major income is an important indicator of the activity pattern of its members. The distribution of households by household principal industry is given below.

Per thousand distribution of households by household industry\*

Sector	Agri.	Mini. & Qua.	Manuf.	Elec.,etc	Const.	Trade	Trans.	Servi.
Rural	268	2	60	1	184	117	72	99
Urban	74	3	96	0	169	171	97	191

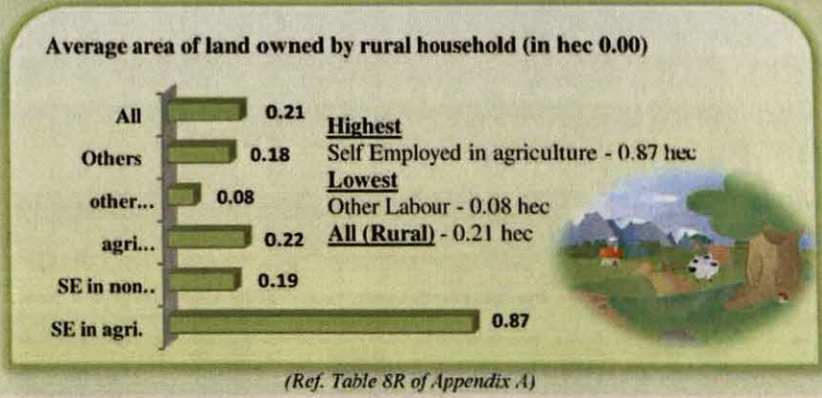

\*hhd industry in this chart excludes not reported cases

In rural Kerala, agriculture was the leading industry with around 27 per cent households depended on it for their principal income, while in urban sector, service sector stood first with around 19 percent of households. (Ref. Table 5 of Appendix A)

## Average Area of Land owned per household (hec. 0.00)

As per the survey data, it is estimated that, the land owned class 0.005 - 0.40 hectares had the highest share of households (nearly 85 per cent). It is observed that, 0.02 per cent of the households belonged to the highest land owned class (4.01 hectares or more) and 4 per cent of the households in the lowest land owned class.

The following chart gives the average area of land owned by rural households for different household type

## Average Area of Land Possessed per 1000 households (hec. 0.00)

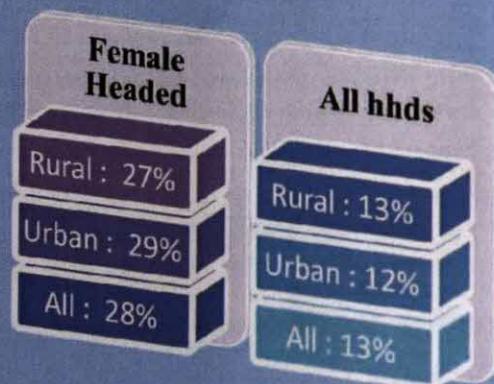

The average area of land possessed as on the date of survey by a rural household was 0.14 hectare. The corresponding average for a female-headed household was 0.13 hectares. Table 9R in Appendix A gives the average area of land possessed per household and the distribution of the households by size class of land possessed.

## Households with no usually employed member of age 15+

Among the households having at least one member of age 15 years and above, about 13 per cent of the rural and 12 per cent of urban households had no usual status employed workers. On the other hand, in the households where the head was a female, the proportion of households with no usually employed member was considerably higher - nearly 27% in rural areas and 29% in the urban areas of Kerala. For more details on this refer table 15 of Appendix A.

Percentage of hhds with no usually employed

## Proportion of Only one Female Worker Households

Proportion of hhs with only one female worker

It is seen from the chart that, in the households where the head was a female the proportion of households with 'only one female worker' was considerably higher - 11 per cent in rural areas and 12 per cent in urban areas. While among all the households, only 4 per cent each in rural and urban areas had only 'only one female worker'. For more details on this refer table 15 of Appendix A.

## General education level of Person

The chart below gives the per cent of persons in the age group 15 or above with general education level secondary or above.

The chart shows that, during 2009-10, in Kerala, as many as 44% rural and 53% urban male population in the age group 15 or above attained general education level secondary and above. For female population, both in rural and urban sector, this proportion was slightly lower than that of male population.

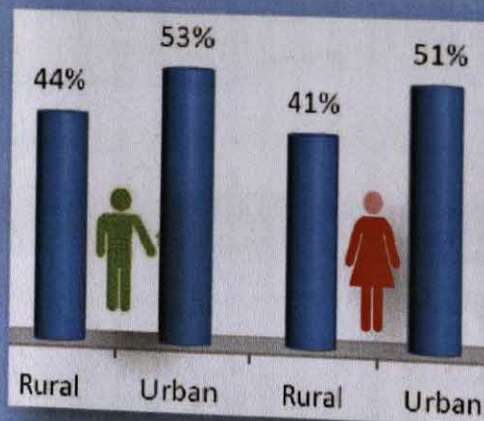

Table 18 in Appendix A shows per 1000 distribution of persons by education level for each age group in Kerala. It is evident that in both the sectors proportion of persons in each education level were lower for females than for males

## Labour Force Participation Ratio

Number of persons in the labour force per thousands persons (LFPR) as per usual principal and subsidiary status combined (PS+SS)

**36%**

During 2009-10, only 36% of Kerala population belonged to the Labour Force

**Rural**  
**36%**

36% of both rural and urban population in Kerala belonged to the labour force. A detailed picture on this can be seen in Table 21 of Appendix A.

**Urban**  
**34%**

The LFPRs based on the various approaches via; Principal status(PS), Principal and subsidiary statuses combined (PS+SS), Current Weekly Status (CWS) and Current Daily Status (CDS) are included respectively in tables 19, 21, 32 and 34 of Appendix A.

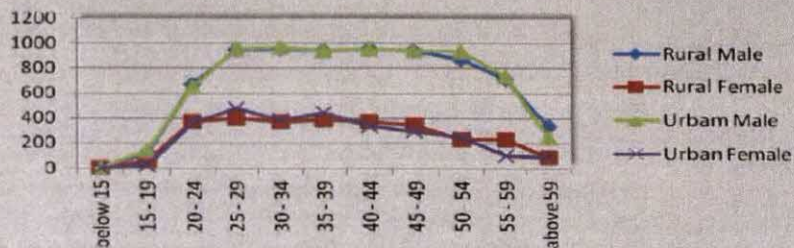

## Gender Gap in Labour Force

Kerala, where women are relatively more educated, experiences one of the lowest female work participation. Labour force participation among women in Kerala was 22% in both rural and urban areas. While among male counterpart 51% in rural and 53% in urban sectors belonged to the labour force.

## Age Specific Labour Force Participation Rate

The LFPRs based on usual status approach (PS+SS), i.e. taking into account both the principal and subsidiary statuses together for different age groups are presented in the below chart

Both in rural and urban, labour force was negligible in the age below 15 years and was highest among 30 to 34 age group for male and 25 to 29 age group for female.

## Labour Force Among Aged People

It can be seen that, based on PS+SS approach, about 34 per cent of the aged males (60 years and above) in rural areas and about 24 per cent of the aged males in urban areas were in the labour force. Whereas only 9 per cent of both rural and urban females in this age group were found to be in the labour force.

Highest LFPR  
in the age group

## Worker Population Ratio

About 34 per cent of the population in Kerala were usually (PS+SS) employed. The proportion were 34 per cent in rural and 33 per cent in urban. The gender differential in the Worker Population ratio was distinct: 50 per cent for males and 19 per cent for females in rural areas, and 51 per cent for males and 18 per cent for females in urban areas.

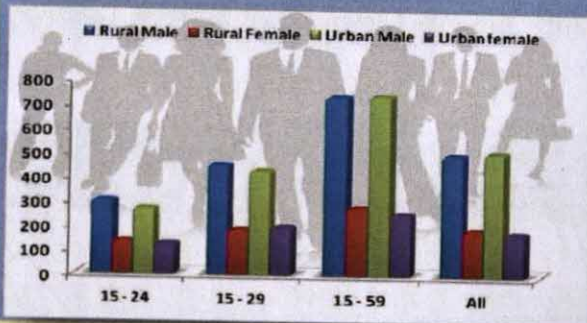

Proportion of Persons Employed per 1000 persons

The worker population ratio estimated as per daily status are slightly lower than the current weekly status rates, which, in turn, were slightly lower than the usual rates. Worker population ratio as per the daily and current weekly statuses are available in table 34 and table 33 respectively.

## Age Specific Worker Population Ratio

The WPRs according to usual status as obtained from the present survey, for certain broad age group have been plotted in the following chart separately for males and females in rural and urban sectors.

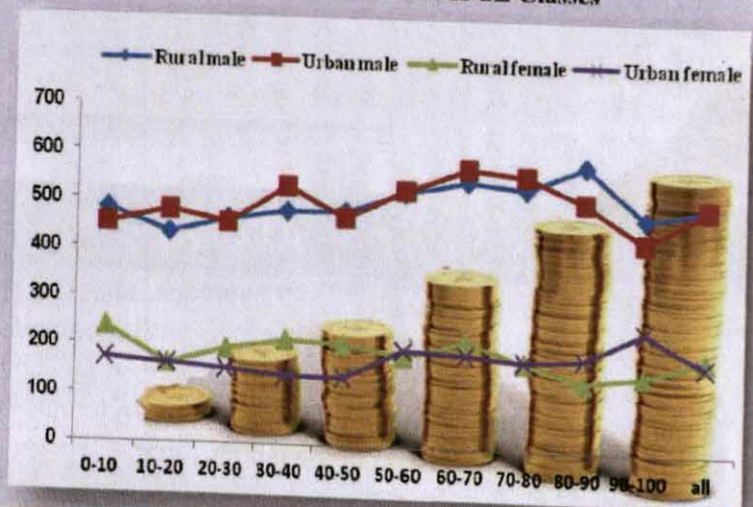

Both in rural and urban and for males and females, the WPR was found to be the highest in the age group 15 - 59 years followed by the youth (15 - 29 years). Thus in Kerala, about 73 per cent of rural males and 74 per cent of urban males in the age group 15 - 59 were usually employed. For females, the corresponding percentage were 28 in rural and 25 in urban areas.

## Household Income and Employment

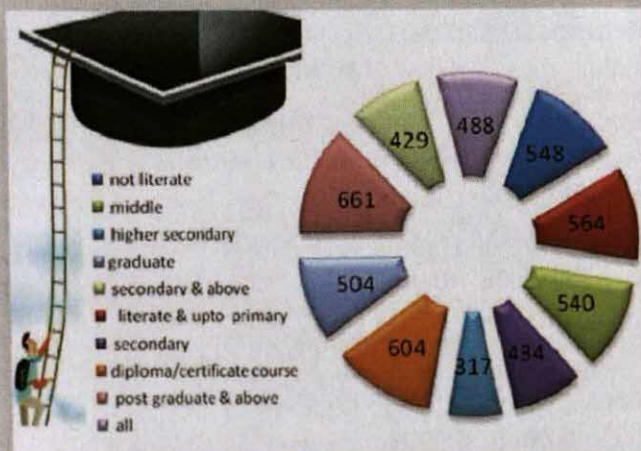

It can be seen from the chart that, for males, both in rural and urban areas, WPR was higher among high income households. But for the females, the pattern was somewhat different. WPR for females in rural areas was higher among low income groups compared to the higher classes. But in urban areas, female WPR was found to be increasing with the increase in MPCE of household.

WPR for Different MPCE Classes

## General Education Level of Usually Employed

Among the persons of age 15 - 59 years, the number of persons who are usually employed in a particular education category, per 1000 persons in that education category is presented in the chart. It is evident from the chart that the employment rate was the highest among people with general education level post graduate and above and least among the people with education level higher secondary.

## Percentage of Persons(Male/Female) Usually Employed in a particular Education Category (in 15-59 age group)

There were substantial gender differentials in WPR for different levels of education in Kerala. Estimates for age groups 0 - 14, 15 - 24, 15 - 29, 15 - 59, 15+ and all are available in Table 25

## Distribution of Usually Employed by Broad Group of Industry

The industrial distribution (primary, secondary and tertiary) of usually employed workers is given in the chart. The chart shows that, during 2009-10, in Kerala, among usually employed males, about 31% in rural and 10% in urban areas were engaged in primary sector (excluding mining and quarrying). Compared to this the proportion of females engaged in primary sector (excluding mining and quarrying) was 45% in rural and 15% in urban areas. Thus in Kerala, the industrial distribution of workers in urban areas was distinctly

different from that of rural areas. In urban areas the share of tertiary sector was dominant followed by that of secondary sector. While primary sector (excluding mining and quarrying) engaged only a small proportion of total workers for both male and females in urban areas of Kerala. (Ref Table 21, col.19 of Appendix A)

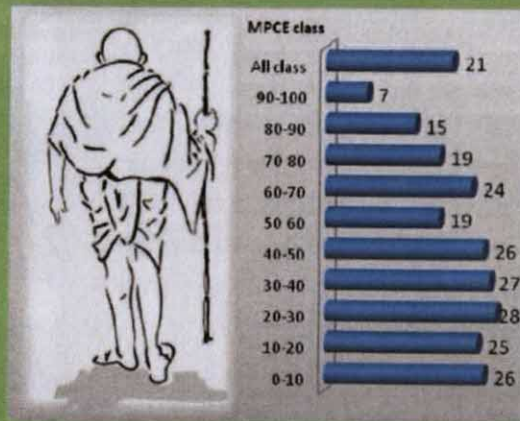

## Rural Household Participation in MGNREG works

The NSS 66th round is the first quinquennial survey, since the major public intervention in the rural labour market made with the enactment of the Mahatma Gandhi National Rural Employment Gurantee Act 2005. To measure the impact of this povery aliviation scheme in Kerala, data related to MGNREG work were collected through the 'employment -

Based on the data collected the percentage of job card holders in rural Kerala for each decile class has been estimated and is presented in the chart. It can be seen from the chart that percentage of job card holder households decreased as we go up in the decile classes. Whereas in the bottom decile class, around 26 per cent of the households had MGNREG job cards, in the top decile class it was 7 per cent.

(Ref. Table 11.R of Appendix A)

Percentage of job card holder households

## Percentage of households got work

The survey results shows that, in Kerala, only a small proportion; 13 per cent of households with MGNREG job card had workerd in MGNREG works. During this period, about 62 per cent households having MGNREG job card did not seek work and around 22 per cent job holder households did not get work eventhough they sought work.

The percentage of MGNREG job card holder households got work in MGNREG for each decile class has been presented in the chart.

Percentage of card holder hhhds got work in MGNREG for each decile class

(Ref. Table 11.R of Appendix A)

Average No. days worked in MGNREG during 365 days for each household type

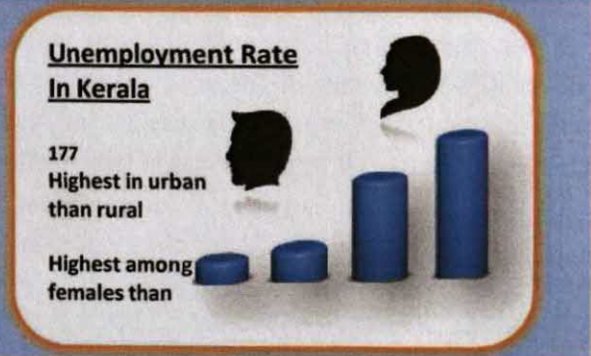

It is observed that the rural households who got work in MGNREG works, worked on an average for 27 days, during last 365days in MGNREG works. Among the households, the households having major income from agriculture labour got the maximum number of days of MGNREG works (32 days) followed by other labour (24 days), self employed in non-agriculture (23 days) and self employed in agriculture (18 days).

(Ref. Table 12.R of Appendix A)

## Unemployment Rate

Number of persons unemployed per thousand persons in the labour force is termed as the unemployment rate. During 2009-10, the unemployment rate according to usual status (PS+SS) in Kerala was 61 in rural and 91 in urban. The unemployment rates according to current daily status approach and weekly status approach can be arrived respectively from tables 34 and 32 in appendix A

## Unemployment Rate as per Different Approaches

The unemployment rate according to current daily status approach are higher than the rates obtained according to usual status approach and weekly status approach, thereby indicating higher degree of intermittent unemployment in Kerala. (Ref. Col.19 of tables 21, 32 & 34 )

## Age Specific Unemployment Rate

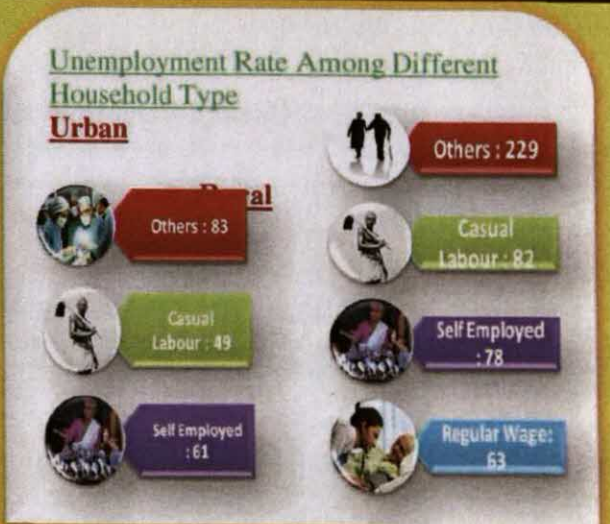

During 2009-10, the Unemployment Rate according to usual status (PS+SS) are presented in the following chart for different age-groups. It is seen from the chart that the pattern in unemployment rate over the age groups is same for all the categories of persons (i.e., for male,

Both among males and females, the Unemployment rate was predominantly high in the age group 15 -24 years; 164 for males and 377 for females. Among the youth, i.e., in the age group 15 - 29, the unemployment rate was 122 and 340 for males and females respectively.

## Unemployment Rate by Household Type

Both in rural and in urban areas, the unemployment rate was the highest among the household type 'Others'. For rural areas, the 'others' category includes mainly the households depending largely upon regular wage earnings and households whose major income is from activities other than economic activities. But, for the urban areas, the 'others' category comprises households whose major income is from activities other than economic activity only. In rural areas, the incident of unemployment was very low for households mainly depending on the earnings from self-

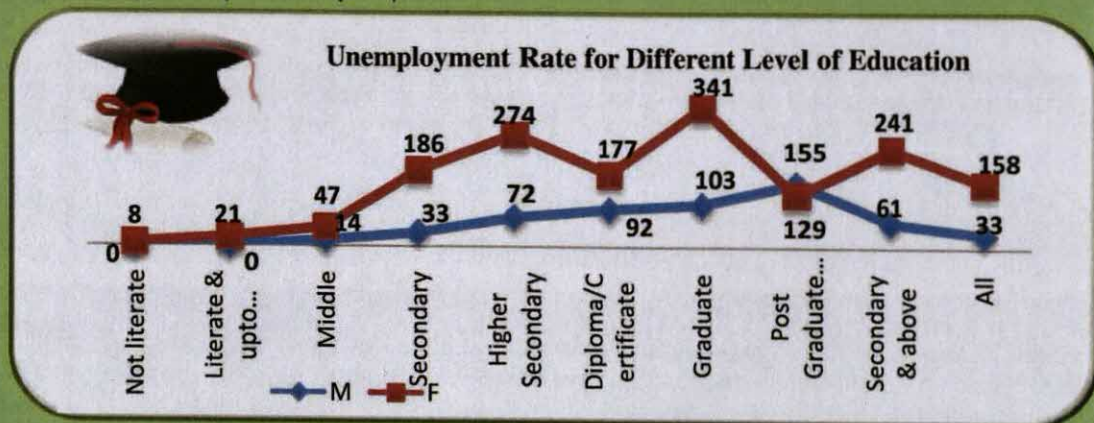

employment and in urban areas this was low among the regular wage earning households. (Ref. Table 28 of Appendix A)

## Unemployment Rate Among Educated

The unemployment rates based on usual status (PS+SS) for different educational attainments in Kerala is given in the following chart. It can be seen from the chart that, in both rural and urban areas, unemployment rate among the educated (secondary and above) was higher than that

was lower than secondary. The unemployment rate among educated females were found to be substantially higher than that for the educated males. This disparity was even more prominent among those whose educational level was higher secondary or graduate.

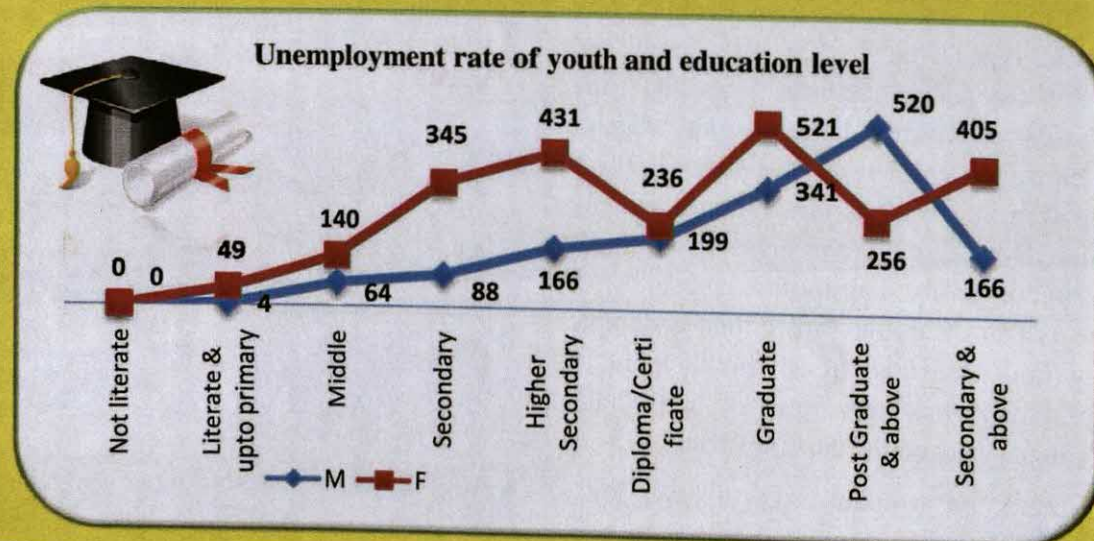

As expected, the unemployment rate among males showed strictly an increasing trend with respect to their level of education. But for females, unemployment rate among those

whose education levels were either diploma/certificate or post graduate & above was lower than that of their preceding education levels.

## Unemployment Rate of the Youth and Educational Level

As expected, the unemployment rates among the youth, i.e., persons in the age group 15 to 29 years are highly related with their educational level. The general feature was that the unemployment rate increased with the level of education.

Moreover, among the educated youth, the unemployment rates were higher for females than males. Another point to be noted is the low unemployment rate among male (youth) with general education levels diploma/certificate or post graduate & above.

## Underemployment

Underemployment rate measures the under-utilisation of labour time of the workers. Some of the persons categorised as usually employed, do not have work throughout the year due to seasonality in work or otherwise and their labour time is not fully utilised they are, therefore, underemployed. This is measured by cross classifying persons by (a) their usual and current weekly status (b) their usual and current daily status (c) their current weekly and current daily statuses.

### (a) Underemployment measured by Usual and Weekly Status

The proportion of usually (PS+SS) employed who were found to be not (i.e., reporting either unemployed or not in labour force) during the week preceeding the date of survey was nearly 1

Proportion(per 1000) of Underemployed PS+SS Vs CWS

per cent for rural male and 0.9 percent for urban male in Kerala. On the other hand for females, underemployment rates were about 10 per cent in rural and 7 per cent in urban areas. Thus the problem of underemployment was more serious among usually employed females than among males, and more in rural than in urban. (Ref. Table 42 of Appendix A)

### (a) Underemployment measured by Usual and Daily Status

The activity pattern of the usually employed during different days within the reference week is also studied with the survey data. It is observed that the proportion of persons-days of the usually employed utilised for work was quite low for females compared to males. During 2009-10, this proportion was estimated at about 32 per cent and 24 per cent for females in rural and urban respectively as against 11 per cent for for both rural and urban males. (Ref. Table 43 of Appendix A)

Proportion(per 1000) of Underemployed PS+SS Vs CDS

### (a) Underemployment measured by Weekly and Daily Status

The under employed as per weekly and daily statuses measures the percentage of person-days on which persons with some work during the reference week were without work on some days of the reference week.

Proportion(per 1000) of Underemployed CWS Vs CDS

The percentage of person-days on which persons with some work during the reference week (according to weekly status) were without work was estimated at about 10 per cent for both rural and urban males and 21 per cent and 16 percent respectively for rural and urban males. Eventhough the magnitude of underemployment measured according to these three cross classifications were different, these rates showed an identical pattern; i.e., higher rate for females than males. (Ref. Table 44 of Appendix A)

Conceptual Framework  
of 66<sup>th</sup> Round

## Conceptual Framework of 66<sup>th</sup> Round

### B.1 Introduction

This chapter describes in detail the concepts and technical terms used in the report for the benefit of users of this report. The sample design on the basis of which the selection of households was made is stated in brief in the section two. A large number of technical terms covering a variety of subject areas were used for the conduct of NSS surveys. For clear understanding of the report, the definitions of these terms and the descriptions of the underlying concepts related to this report have been explained in section three.

### B.2 The survey outline

The Employment Unemployment and Household Consumer Expenditure surveys of NSS are primary sources of data on indicators of labour force and well-being of society at national and state levels. NSS surveys on Employment Unemployment and Household Consumer Expenditure with large sample sizes of households has been conducted quinquennially from 27th round (October 1972 – September 1973) onwards. The NSS 66th round carried out during July 2009 – June 2010 was the eighth quinquennial round in the series, covering subjects of (i) Household Consumer Expenditure and (ii) Employment and Unemployment.

Kerala participated in this survey with 50% additional samples for supplementing the central sample data to derive reliable state specific and sub-state level estimates of labour and consumption, by adopting the same methodology of NSSO. The survey covered 492 panchayath wards and 347 UFS blocks in Kerala. Table B.1.1 gives the number of village/blocks surveyed in the NSS 66th round and number of persons enumerated in different topics of the survey for state samples of Kerala.

Table B.1.1 List of first stage units, households and persons surveyed

Sector	FSU	hhd	Person
Rural	492	3936	16397
Urban	347	2770	11112

The fieldwork of the 66th round of NSSO started from 1st July, 2009 and continued till 30<sup>th</sup> June, 2010. As usual, the survey period of this round was divided into four sub-rounds, each with a duration of three months, the 1st subround period ranging from July to September 2004, the 2nd sub round period from October to December 2010 and so on. An equal number of sample

villages/blocks (FSUs) were allotted for survey in each of these four sub-rounds. The survey used the interview method of data collection from a sample of randomly selected households

### **B.3 Sample design**

A stratified multi-stage design was adopted for the 66th round survey. The FSU were the 2001 Census Panchayat wards in the rural sector and UFS blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs. The various steps involved before making the selection of the FSUs are discussed at length in the following few paragraphs before taking up the issue of selection of USUs within FSUs.

#### **B.3.1 Stratification of the first stage units:**

Within each district of two basic strata were formed as follows: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district.

#### **B.3.2 Sub-stratification:**

There was no sub-stratification in the urban sector. However, to net adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata as follows: substratum 1: all villages with proportion of child workers ( $p$ )  $> 2P$  (where  $P$  is the average proportion of child workers for the State as per Census 2001) substratum 2: remaining villages

#### **B.3.3 Allocation of FSU's among Strata:**

The total number of sample FSUs was allocated to the States and UTs in proportion to population as per Census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between two sectors in proportion to population as per Census 2001 with double weightage to urban sector subject to the restriction that urban sample size did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per Census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

#### **B.3.4 Selection of first-stage units:**

For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement, size being the population of

the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling without Replacement. Both rural and urban samples were drawn in the form of two independent sub-samples.

### B.3.5 Selection of hamlet-groups/sub-blocks:

Selected FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

Table B.3.5.1 Criterion of Hamlet Groups Formation

Approximate Present Population of Sample FSU		No. of Hgs/Sbs to be formed
Districts Except Idukki	Idukki	
Less than 1200	Less than 600	1
1200 to 1799	600 to 899	3
1800 to 2399	900 to 1199	4
2400 to 2999	1200 to 1499	5
... and so on	... and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hg)/ subblocks (sb) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/sb 1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamletgroups/ sub-blocks. The FSUs without hg/sb formation were treated as sample hg/sb number 1.

### B.3.6 Sampling frame of households:

All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub block formation was done, constituted the sampling frame of households.

### B.3.7 Stratification of households:

Three second stage strata (SSS) were formed in the rural and urban areas is given in table B.3.7.1. Identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/combineharvester/ truck/ bus/ etc.; consumer durables like DVD/ VCP/ refrigerator/washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land;

ownership of a good number of cattle, buffaloes and camels (10 or more in number). The cut-off points 'A' and 'B' (in Rs.) were determined from NSS 61st round data for each NSS region for urban areas in such a way that top 10% of the population have MPCE more than 'B' and bottom 30% of the population have MPCE less than A. A total of 8 households were selected for each schedules (1.0 type I, 1.0 type II and 10) from each FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

Table B.3.7.1 Criterion of Second Stage Stratification

SSS	Composition of SSS		No. of hhds to be surveyed	
	Rural	Urban	FSU without Hg/Sb formation	FSU with Hg/Sb formation (for each hg/sb)
SSS 1	Relatively affluent hhds	Hhds having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2	of the remaining hhds having principal earning from non-agricultural activity	Hhds having MPCE of middle 60% of urban population (A ≤ MPCE ≤ B)	4	2
SSS 3	Other hhds	Hhds having MPCE of bottom 30% of urban population (MPCE > A)	2	1

## B.4 Concepts and Definitions

The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

**Household:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb "normally" means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer's/host's household. "Living together" was given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person's family members was household is the total number of persons in the household.

Age (years): The age in completed years, as on the date of survey, of the household members were recorded.

Economic activity: The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets. The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition adopted for the NSS 66th round survey of Employment and Unemployment. Production of any good for own consumption is considered as economic activity by UN System of National Accounts but production of only primary goods for own consumption was considered as economic activity by NSSO. While the former considers activities like own account processing of primary products as economic activities, in the NSS surveys, processing of primary products for own consumption was not considered as economic activity

The term 'economic activity' as defined in the employment and unemployment survey of NSS 66th round, therefore, included: (i) all the market activities performed for pay or profit which result in production of goods and services for exchange. (ii) of the non-market activities, (a) all the activities relating to the primary sector (i.e. industry Divisions 01 to 14 of NIC-2004) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption and (b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor. As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities. Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not.

Activity status: It is the activity situation in which a person was found during the reference period with regard to the person's participation in economic and non-economic activity during the reference period, the appropriate detailed activity status code related to that activity in which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one noneconomic activities. The detailed activity statuses under each of the three broad activity statuses (viz. employed, unemployed and not in labour force) and the corresponding codes used in the survey are given below:

**working (or employed)**

**self-employed**

11 worked in household enterprises (selfemployed) as own-account worker

12 worked in household enterprises (selfemployed) as an employer

21 worked in household enterprises (selfemployed) as helper

61 did not work owing to sickness though there was work in household enterprise

62 did not work owing to other reasons though there was work in household enterprise

**Regular wage/ salaried employee**

31 worked as regular wage/salaried employee

71 did not work owing to sickness but had regular salaried/wage employment

72 did not work owing to other reasons but had regular salaried/wage employment

**Casual labour**

41 worked as casual wage labour in public works other than Mahatma Gandhi NREG public works

42 worked as casual wage labour in Mahatma Gandhi NREG public works

51 worked as casual wage labour in other types of works

**Not working but seeking/available for work (or unemployed)**

81 sought work or did not seek but was available for work (for usual status approach)

81 sought work (for current weekly status approach)

82 did not seek but was available for work (for current weekly status approach)

**neither working nor available for work (or not in labour force)**

91 attended educational institutions

92 attended to domestic duties only

93 attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use

94 rentiers, pensioners, remittance recipients, etc.

95 not able to work owing to disability

97 others (including beggars, prostitutes, etc.)

98 did not work owing to sickness (for casual workers only)

99 children of age 0-4 yearscases, an intensity of 0.5 was given for each of these two economic activities.

It may be noted that codes 61, 62, 71, 72, 82 and 98 were applicable for current weekly status and current daily status approaches only. Moreover, activity status code 41 in the usual

status is used for casual wage labour in all types of public works, whereas in the current activity status, code 41 is for casual wage labour in public works other than MGNREG public works and code 42 is for casual wage labour in MGNREG public works.

Workers (or employed): Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. Relevant activity status codes 11 to 72 were assigned for workers. Workers were further categorized as self-employed (relevant activity status codes: 11, 12, 21, 61, 62), regular salaried/wage employee (relevant activity status codes: 31, 71, 72), and casual wagelabour (relevant activity status codes: 41, 42 and 51). Seeking or available for work (or unemployed): Persons who, owing to lack of work, hadnot worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). Activity status codes 81 or 82 were assigned for unemployed.

Labour force: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. Persons with activity status codes 11 - 82 constituted the labour force.

Not in labour force: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'.

Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in household enterprises. The essential feature of the selfemployed is that they have autonomy (decide how, where and when to produce) and economic independence (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production.

(i) own-account workers: those selfemployed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;

(ii) employers: those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and

(iii) helpers in household enterprise: those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household enterprise on their own but assisted the related person living in the same household in running the household enterprise.

Regular wage/salaried employee: These were persons who worked in others' farm or non-farm enterprises (both household and nonhousehold) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

Casual wage labourer: A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labourer.

Public works: 'Public works' were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programme such as Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc. The coverage of schemes under 'public works' was restricted to those schemes through which the Government generated wage employment under poverty alleviation programme, or relief measures. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. To distinguish between 'public works' and works not classifiable as 'public works', some broad characteristics of 'public work' were identified, viz. the primary objective is generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives. It is to be noted that the existing activity status code 41 (casual wage labour in public works) was

split into two codes for assigning activity status codes as per current daily activity status and current weekly activity status, as follows:

(i) worked as casual wage labour in public works other than Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 41

(ii) worked as casual wage labour in Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 42

Different approaches followed to determine activity status: The persons surveyed were classified into various activity categories on the basis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. The procedures adopted to arrive at the usual status, current weekly status and current daily status are elucidated below.

Usual principal activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the usual principal activity status of the person. To decide the usual principal activity of a person; first a two stage dichotomous classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the labour force (either employed or unemployed) and those not in the labour force depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (not in the labour force). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (employed) or 'not working but seeking and/or available for work' (unemployed) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey.

Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 were assigned to persons classified as workers and codes 91-97 to those not in the labour force. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and 82 (did not seek but was available for work) were assigned to unemployed persons according to current weekly status and current daily status approach.

Usual subsidiary economic activity status: A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

(i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively minor period, which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively minor period but not simultaneously with principal activity, was considered as his/her subsidiary economic activity.

(ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively shorter time in a subsidiary capacity. The economic activity, which was pursued for a relatively shorter time, was considered as his/her subsidiary economic activity.

Usual activity status considering principal and subsidiary status taken together: The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

Current weekly activity status: The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided on the basis of a certain priority cum major time criterion. According to the priority criterion, the status 'working' gets priority over the status 'not working but seeking or available for work' that, in turn, gets priority over the status 'neither working nor available for work'. A person was considered working (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the 7 days preceding the date of survey. A person was considered 'seeking or available for work (or unemployed)' if, during the reference week, no economic activity was pursued by the person but he/she made efforts to get work or had been available for work any time during the reference week though not actively

seeking work in the belief that no work was available. A person who had neither worked nor was available for work any time during the reference week was considered as engaged in non-economic activities (or not in labour force).

After deciding the broad current weekly activity status of a person on the basis of 'priority' criterion, the detailed current activity status was then decided on the basis of 'major time' criterion if that person pursued multiple economic activities. The current weekly activity status of a person could be any of the valid codes within 11 to 98. Of these codes, 11 to 72 pertained to workers, 81 to 82 for unemployed and 91 to 98 for persons not in the labour force.

Current daily activity status: The activity pattern of the population, particularly in the informal sector, is such that during a week, and sometimes, even during a day, a person could pursue more than one activity. Moreover, many people could even undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status for a person was determined on the basis of his/her activity status on each day of the reference week using a priority-cum-major time criterion (day to day labour time disposition). Time disposition was recorded for every member of the sample households. This involved recording of different activities pursued by the members along with the time intensity in quantitative terms for each day of the reference week. The different activities were identified and recorded in terms of 'activity status' and 'industry' codes for persons in urban areas and 'activity status', 'industry' and 'operation' codes for persons in rural areas. The description (and codes used) of current daily activity statuses is the same as those of current weekly activity status. The terms 'industry' and 'operation' are explained later. The following points were considered for assigning the time intensity and determining the current daily status of a person:

- i) Each day of the reference week was looked upon as comprising either two 'half days' or a 'full day' for assigning the activity status. For recording time disposition for activities pursued by a person in a day, an intensity of 1.0 was given against an activity that was done for 'full day' and an intensity of 0.5 against the activity which was done for 'half day'.
- ii) A person was considered 'working' (employed) for the full day if he/she had worked for 4 hours or more during the day. iii) If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she was assigned two out of the various economic activities on which he/she devoted relatively long time on the reference day. In such cases, an intensity of 0.5 was given for each of these two economic activities. for 4 hours or more during the day.
- iii) If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she was assigned two out of the various economic activities on which he/she devoted relatively long time on the reference day. In such cases, an intensity of 0.5 was given for each of these two economic activities.

iv) If the person had worked for 1 hour or more but less than 4 hours, he/she was considered 'working' (employed) for half-day and 'seeking or available for work' (unemployed) or 'neither seeking nor available for work' (not in labour force) for the other half of the day depending on whether he was seeking/available for work or not.

v) If a person was not engaged in any 'work' even for 1 hour on a day but was seeking/available for work for 4 hours or more, he was considered 'unemployed' for the entire day. But if he was 'seeking/available for work' for more than 1 hour and less than 4 hours only, he was considered 'unemployed' for half day and 'not in labour force' for the other half of the day.

vi) A person who neither had any 'work' to do nor was available for 'work' even for half a day was considered 'not in labour force' for the entire day and was assigned one or two of the detailed non-economic activity statuses depending upon the activities pursued during the reference day.

Industry and occupation of the work activity: For the employed persons, to record the industry of work, 5-digit classification of NIC-2004 was used and to record the type of occupation, 3-digit classification of NCO-2004 was used. To identify certain category of workers under Division 95 (Private households with employed persons) of NIC-2004, eight additional codes were used in the survey viz., housemaid /servant (95001), cook (95002), gardener (95003), gatekeeper/choکیدar/watchman (95004), governess/baby-sitter (95005), tutor (95006), driver (95007) and 'others' (95009). Industry Divisions 96 and 97 of NIC-2004 were not used for the purpose of collection of information on industry of activity. The entire activities described under Division 97 are not under the production boundary of Indian System of National Accounts (ISNA) and are not also considered as economic activities in the NSS survey. A part of the activities under Division 96 (viz., hunting and gathering, farming and the production of shelter), which is within the production boundary of ISNA, is also considered as economic activities in NSS surveys and the industry of these undifferentiated activities were judged in the usual manner as done now, by considering the industry in which major time was spent. Thus, this part of activities got classified against the respective industries under divisions 01-14 relating to the primary sector or 45 relating to construction. The rest of Division 96 is outside the production boundary of ISNA and was not considered as economic activity for the NSS survey.

## Sample Design and Estimation Procedure

# Appendix - B

## Sample Design and Estimation Procedure

### 1. Introduction

1.1 The 66<sup>th</sup> round (July 2009-June 2010) of NSS was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. All the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage. In addition to these, all the sample first stage units of the following areas were casualty in different sub-rounds: (i) in sub-rounds 1, 2, and 4, both rural and urban areas of Rajouri district of Jammu & Kashmir, (ii) in sub-round 2, urban areas of Lakhisarai district of Bihar, (iii) in sub-round 3, rural areas of Doda district of Jammu & Kashmir. The estimates of the different sub-rounds, therefore, excluded these areas. The period of survey was of one year duration starting on 1<sup>st</sup> July 2009 and ending on 30<sup>th</sup> June 2010. The survey period of this round was divided into four sub-rounds of three months' duration each, the 1<sup>st</sup> sub-round period ranging from July to September 2009, the 2<sup>nd</sup> sub-round period from October to December 2009 and so on. In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

### 2 Sample Design

2.1 A stratified multi-stage design was adopted for the 66<sup>th</sup> round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs.

2.2 *Selection of the first-stage units:* The various steps involved before making the selection of the FSUs are discussed at length in the following few paragraphs before taking up the issue of selection of USUs within FSUs.

2.2.1 *Sampling Frame for First Stage Units:* For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks constituted the sampling frame. For non-UFS towns, frame consisted of the individual towns (only two towns, viz., Leh & Kargil constituted this frame).

2.2.2 *Stratification of the first stage units:* Within each district of a State/ UT, two basic strata were formed as follows:

- i) rural stratum comprising of all rural areas of the district and
- (ii) urban stratum comprising of all the urban areas of the district.

However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

2.2.3 *Sub-stratification:* There was no sub-stratification in the urban sector. However, to get adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata as follows:

sub-stratum 1: all villages with proportion of child workers ( $p$ )  $> 2P$  (where  $P$  is the average proportion of child workers for the state/ UT as per Census 2001)

sub-stratum 2: remaining villages

2.2.4 *Allocation of FSU's among Strata:* At the all-India level, a total number of 12784 FSUs were allocated for survey in the central sample. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between two sectors in proportion to population as per census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

2.2.5 *Selection of first-stage units:* For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

2.3 *Selection of Ultimate Stage Units (USU) within a FSU:* The remaining paragraphs of this sub-section outlines the various steps leading to the actual selection of USUs within a FSU.

2.3.1 *Selection of hamlet-groups/sub-blocks:* Selected FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb 1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation were treated as sample hg/ sb number 1.

2.3.2 *Sampling frame of households:* All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Stratification of rural households:* For employment and un-employment survey of NSS 66<sup>th</sup> round, all households listed in the selected FSU/hamlet group/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in the rural areas were:

Rural		number of households to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	relatively affluent households	2	1
SSS 2:	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3:	other households	2	1

Identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like DVD/ VCP/ refrigerator/ washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of a good number of cattle, buffaloes and camels (10 or more in number).

2.3.4 *Stratification of urban households*: Three second stage strata (SSS) were formed in the urban areas as follows:

Urban		number of households to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	households having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2:	households having MPCE of middle 60% of urban population (A ≤ MPCE ≤ B)	4	2
SSS 3:	households having MPCE of bottom 30% of urban population (MPCE < A)	2	1

The cut-off points 'A' and 'B' (in Rs.) were determined from NSS 61<sup>st</sup> round data for each NSS region for urban areas in such a way that top 10% of the population have MPCE more than 'B' and bottom 30% of the population have MPCE less than A.

2.3.5 *Selection of households*: For employment-unemployment survey a total of 8 households were selected from each village/FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 66<sup>th</sup> round along with the number of village/blocks actually surveyed and number of persons enumerated in respect of employment and unemployment survey are given for different states and union territories in Table 1 at the end of Appendix-B.

### 3. Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs is briefly indicated below:

#### 3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum (only for rural sector)

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block/ non-UFS town]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb [j = 1, 2 or 3]

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$  if  $D = 1$

= (D - 1) for FSUs with  $D > 1$

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum/sub-stratum (= sum of sizes for all the FSUs of a stratum/sub-stratum)

z = size of sample village used for selection.

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and stratum/sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}$ ,  $\hat{Y}$  = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$  = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/ sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

### 3.2 Estimation of aggregates for a particular sub-sample (m) and stratum (s):

#### 3.2.1 Sub-sample estimate for a sub-stratum in rural areas:

For j-th second stage stratum of a sub-stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[ \frac{H_{11j}}{h_{11j}} \sum_{k=1}^{h_{11j}} y_{i1jk} + D_i^* \times \frac{H_{12j}}{h_{12j}} \sum_{k=1}^{h_{12j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.2 Sub-sample estimate for a stratum in rural areas: Sub-sample estimate for a stratum will be obtained by adding sub-sample wise estimates of all the sub-strata ( $\hat{Y}_s$ ) of the stratum.

#### 3.2.3 Sub-sample estimate for a stratum in urban areas:

For j-th second stage stratum of a stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[ \frac{H_{11j}}{h_{11j}} \sum_{k=1}^{h_{11j}} y_{i1jk} + D_i^* \times \frac{H_{12j}}{h_{12j}} \sum_{k=1}^{h_{12j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.3 Overall Estimate for Aggregates: Overall estimate for aggregates for a stratum ( $\hat{Y}_s$ ) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

#### 3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_s$  over all strata belonging to the State/ UT/ all-India.

3.5 Estimates of Ratios: Let  $\hat{Y}$  and  $\hat{X}$  be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate ( $\hat{R}$ ) of the ratio ( $R = \frac{Y}{X}$ ) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

3.6 *Estimates of Error:* The estimated variances of the above estimates will be as follows:

3.6.1 *For aggregate  $\hat{Y}$ :*

$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$  where  $V\hat{a}r(\hat{Y}_s)$  is given by

$V\hat{a}r(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$  for rural stratum, where  $\hat{Y}_{st1}$  and  $\hat{Y}_{st2}$  are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

and

$V\hat{a}r(\hat{Y}_s) = \frac{1}{4} (\hat{Y}_{s1} - \hat{Y}_{s2})^2$  for urban stratum,  $\hat{Y}_{s1}$  and  $\hat{Y}_{s2}$  being the stratum estimates for sub-sample 1 and 2 respectively.

3.6.2 *For ratio  $\hat{R}$ :*

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[ (\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R}(\hat{Y}_{st1} - \hat{Y}_{st2})(\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

for rural and

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \left[ (\hat{Y}_{s1} - \hat{Y}_{s2})^2 + \hat{R}^2 (\hat{X}_{s1} - \hat{X}_{s2})^2 - 2\hat{R}(\hat{Y}_{s1} - \hat{Y}_{s2})(\hat{X}_{s1} - \hat{X}_{s2}) \right]$$

for urban.

3.7 *Estimates of Relative Standard Error (RSE):*

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

# Appendix **D**

## Schedule 10: Employment and Unemployment

## Appendix - D

RURAL	*
URBAN	

CENTRAL	*
STATE	

**GOVERNMENT OF INDIA  
NATIONAL SAMPLE SURVEY ORGANISATION  
SOCIO-ECONOMIC SURVEY  
SIXTY-SIXTH ROUND: JULY 2009 – JUNE 2010  
SCHEDULE 10: EMPLOYMENT AND UNEMPLOYMENT**

[0] descriptive identification of sample household	
1. state/u.t.:	5. hamlet name:
2. district:	6. ward /inv. unit /block:
3. tehsil/town: *	7. name of head of household:
4. village name:	8. name of informant:

[1] identification of sample household							
item no.	item	code			item no.	item	code
1.	srl. no. of sample village/block				11.	sub-sample	
2.	round number	6	6		12.	FOD sub-region	
3.	schedule number	1	0	0	13.	sample hg/sb number (1/2)	
4.	sample ( <i>central-1, state-2</i> )				14.	second-stage stratum number	
5.	sector ( <i>rural-1, urban-2</i> )				15.	sample household number	
6.	NSS region				16.	srl. no. of informant (as in col. 1, block 4)	
7.	district				17.	response code	
8.	stratum				18.	survey code	
9.	sub-stratum				19.	reason for substitution of original household (code)	
10.	sub-round						

### Codes for Block 1

*item 17: response code:*

informant: *co-operative and capable -1, co-operative but not capable -2, busy -3, reluctant -4, others -9.*

*item 18: survey code:* household surveyed: *original -1, substitute -2, casualty -3.*

*item 19: reason for substitution of original household:*

informant busy -1, members away from home -2, informant non-cooperative -3, others -9.

\* tick mark (✓) may be put in the appropriate place.

[2] particulars of field operation										
srl. no.	Item		investigator			supervisory officer (s)				
(1)	(2)		(3)			(4)				
1.	i) name (block letters)									
	ii) code									
2.	date(s) of :		DD	MM	YY	DD	MM	YY		
	(i) survey/ inspection									
	(ii) receipt									
	(iii) scrutiny									
	(iv) despatch									
3.	number of additional sheets attached									
4.	total time taken to canvass	Schedule 10								
5.	(in minutes)	block 9 of Schedule 10								
6.	whether the schedule contains remarks? (yes -1, no-2)		in block 10/ 11			elsewhere in the schedule				
7.	signature									

**[10] remarks by investigator**

--	--

**[11] comments by supervisory officer (s)**

--	--

[3] household characteristics										
1.	household size				10.	whether the household has NREG job card (yes-1, no-2)				
2.	principal industry (NIC-2004)	description:				11.	whether got work in NREG works during last 365 days (code)			
		code (5-digit)					12.	if code 1 in item 11,		
					13.	mode of payment (code)				
3.	principal occupation (NCO-2004)	description:				is any member of the household the holder of post office account (yes-1, no-2, don't know-9) and number of such accounts in the household as on the date of survey [in items 14 to 17]				
		code (3-digit)								
4.	household type (code)				14.	savings bank				
5.	religion (code)				15.	recurring deposit account				
6.	social group (code)				16.	monthly income accounts scheme				
7.	land owned as on the date of survey (0.000 hectares)				17.	any other account or savings instruments				
8.	land possessed as on the date of survey (0.000 hectares)				has any member used the following services in any Post Office during last 3 months (yes-1, no-2, don't know-9) [items 18 to 20]					
					18.	money order				
9.	land cultivated (including orchard and plantation) during July 2008-June 2009 (0.000 hectares)				19.	instant money order				
					20.	international money transfer service				

Note: 1 acre = 0.4047 hectare, 1 hectare = 10,000 sq. metre

### Codes for Block 3

#### item 4: household type:

for rural areas: self-employed in non-agriculture -1, agricultural labour -2, other labour -3, self-employed in agriculture -4, others -9.

for urban areas: self-employed -1, regular wage/salary earning -2, casual labour -3, others -9.

item 5: religion: Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9.

item 6: social group: scheduled tribe -1, scheduled caste -2, other backward class -3, others -9.

item 11: whether got work in NREG works: got work in NREG works -1, sought but did not get work in NREG works -2, did not seek work in NREG works -3.

item 13: mode of payment: paid: directly into post office account-1, directly into bank account-2, in a gram sabha meeting-3, by the field assistant/mate-4, by an SHG member-5, through a smartcard-6, other-9; not yet paid-7.

[3.1] indebtedness of rural labour household as on the date of survey (i.e., for households with code 1 in item 5, block 1 along with code 2 or 3 in item 4, block 3)				
srl. no. of loan	nature of loan (code)	source (code)	purpose (code)	amount outstanding including interest as on the date of survey (Rs)
(1)	(2)	(3)	(4)	(5)
total				

### Codes for Block 3.1

col. (2): nature of loan: hereditary loan -1, loan contracted in cash -2, loan contracted in kind -3, loan contracted partly in cash and partly in kind -4.

col. (3): source: government -1, co-operative society -2, bank -3, employer/ landlord -4, agricultural/ professional money lender -5, shopkeeper/ trader -6, relatives/ friends -7, others -9.

col. (4): purpose: household consumption: medical expenses -1, educational expenses -2, legal expenses -3, marriage and other ceremonial expenses -4, other household consumption expenses -5; purchase of land/ construction of building -6, other productive purpose -7, repayment of debt -8, others -9.

#### Codes for Block 4

col. (3): **relation to head:**

self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5, grandchild -6, father/mother/father-in-law/mother-in-law -7, brother/ sister/ brother-in-law/ sister-in-law/ other relatives -8, servants/ employees/ other non-relatives -9.

col. (6): **marital status:**

never married -1, currently married -2, widowed -3, divorced/separated -4.

col. (7): **educational level - general:**

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12, postgraduate and above -13.

col. (8): **educational level - technical:**

no technical education -01,  
technical degree in agriculture/ engineering/ technology/ medicine, etc. -02,  
diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07;  
diploma or certificate (graduate and above level) in: agriculture -08,  
engineering/ technology -09, medicine -10, crafts -11, other subjects -12.

col. (9): **status of current attendance:**

currently not attending:  
never attended: school too far -01, to supplement household income -02,  
education not considered necessary -03, to attend domestic chores -04,  
others -05;

ever attended but currently not attending: school too far -11, to supplement household income -12, education not considered necessary -13, to attend domestic chores -14, others -15;

currently attending in: EGS/NFEC/AEC -21, TLC -22, pre-primary (nursery/ Kinder garten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary-26, higher secondary-27, graduate in: agriculture -28, engineering/ technology -29, medicine -30, other subjects -31; post graduate and above -32, diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37; diploma or certificate (graduate level) in: agriculture -38, engineering/ technology -39, medicine -40, crafts -41, other subjects -42; diploma or certificate in post graduate and above level-43.

col. (10): **type of institution:** government -1, local body -2, private and aided -3, private and unaided -4, not known -5.

col. (12): **whether receiving/received any vocational training:**

yes: receiving formal vocational training -1; received vocational training: formal -2, non-formal: hereditary-3, self-learning-4, learning on the job-5, others -6;  
did not receive any vocational training -7.

col. (13): **field of training:**

mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work-09, creative arts/ artists -10, agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13, office and business related work -14, driving and motor mechanic work -15, beautician, hair-dressing & related work -16, work related to tour operators/ travel managers -17, photography and related work -18, work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.

col. (15): **source from where degree/diploma/certificate received/to be received:**

Industrial Training Institutes (ITIs)/Industrial Training centers (ITCs) -01, School offering vocational courses (Secondary, Higher Secondary level) -02, UGC (first degree level) -03, Polytechnics -04, Community Polytechniques/ Jansiksha Sansha -05, National Open School -06, Hotel Management Institutes -07, Food craft & Catering Institutes -08, Small Industries Service Institutes/District Industries Centres/Tool Room Centres -09, Fashion Technology Institutes -10, Tailoring, Embroidery and Stitch Craft Institutes -11, Nursing Institutes -12, Rehabilitation/ Physiotherapy /Ophthalmic and Dental Institutes -13, Institutes giving Diploma in Pharmacy -14, Hospital and Medical Training Institutes -15, Nursery Teachers' Training Institutes -16, Institutes offering training for Agricultural Extension -17, Training provided by Carpet Weaving Centers -18, Handloom/ Handicraft Design Training Centers/ KVIC -19, Recognised Motor Driving Schools -20, Institute for Secretariat Practices -21, Recognised Beautician Schools -22, Institutes run by Companies/ Corporations -23, Institutes for Journalism and Mass Communication -24, other institutes -99.

col. (16): **whether the vocational training was ever helpful in getting a job:**

yes: was helpful in taking up self-employment activity- 1, was helpful in taking up wage/salaried employment-2, was not helpful-3, not applicable-4.

[4] demographic particulars of household members

srl. no.	name of member	relation to head (code)	sex (male-1, female - 2)	age (years)	marital status (code)	educational level		status of current attendance (code)	for persons of age below 30 years, current attendance in educational institution for codes 21-43 in col. 9, type of institution (code)	for persons of age 15 to 45 years, whether currently registered with employment exchange (yes-1, no-2)	whether receiving/ received any vocational training (code)	for persons of age 15 to 59 years for codes 1 & 2 in col. 12				for code 2 in col. 12, whether the vocational training was ever helpful in getting a job (code)	
						general (code)	technical (code)					field of training (code)	duration of training (in weeks)	source from where degree/ diploma/ certificate received/ to be received (code)			
						(7)	(8)					(13)	(14)	(15)			
(1)																	

### Codes for Block 5.1

col. (3): **status:**

worked in h.h. enterprise (self-employed): own account worker -11, employer-12, worked as helper in h.h. enterprise (unpaid family worker) -21; worked as regular salaried/ wage employee -31, worked as casual wage labour: in public works -41, in other types of work -51; did not work but was seeking and/or available for work -81, attended educational institution -91, attended domestic duties only -92, attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use -93, renters, pensioners, remittance recipients, etc. -94, not able to work due to disability -95, others (including begging, prostitution, etc.) -97.

col. (5): **industry:** 5-digit code as per NIC-2004.

col. (6): **occupation:** 3-digit code as per NCO-2004.

col. (8): **location of workplace:**

workplace in rural areas and located in: own dwelling unit-10, structure attached to own dwelling unit-11, open area adjacent to own dwelling unit-12, detached structure adjacent to own dwelling unit-13, own enterprise/unit/office/shop but away from own dwelling-14, employer's dwelling unit -15, employer's enterprise/unit/office/shop but outside employer's dwelling -16, street with fixed location-17, construction site-18, others -19; workplace in urban areas and located in: own dwelling unit-20, structure attached to own dwelling unit-21, open area adjacent to own dwelling unit-22, detached structure adjacent to own dwelling unit-23, own enterprise/unit/office/shop but away from own dwelling-24, employer's dwelling unit -25, employer's enterprise/unit/office/shop but outside employer's dwelling -26, street with fixed location-27, construction site-28, others -29; no fixed workplace -99.

col. (9): **enterprise type:** proprietary: male -1, female -2; partnership: with members from same hh. -3, with members from different hh. -4; Government/public sector-5, Public/Private limited company-6, Co-operative societies/trust/other non profit institutions -7, employer's households(i.e., private household: employing maid servant, watchman, cook, etc.) -8, others -9.

col. (11): **number of workers in the enterprise:** less than 6 -1, 6 & above but less than 10 -2, 10 & above but less than 20 -3, 20 & above -4, not known -9.

col. (12): **type of job contract:** no written job contract -1; written job contract: for 1 year or less -2, more than 1 year to 3 years -3, more than 3 years -4.

col. (14): **availability of social security benefits:**

eligible for: only PF/pension (i.e., GPF, CPF, PPF, pension, etc.) -1, only gratuity -2, only health care & maternity benefits -3, only PF/pension and gratuity -4, only PF/pension and health care & maternity benefits -5, only gratuity and health care & maternity benefits -6, PF/pension, gratuity, health care & maternity benefits -7; not eligible for any of above social security benefits -8.

col. (15): **method of payment:** regular monthly salary -1, regular weekly payment -2, daily payment -3, piece rate payment -4, others -5.

col. (16): **whether worked under given specifications:** yes: wholly -1, mainly -2, partly -3; no-4, not known -9

col. (17): **who provided credit / raw material / equipments:** own arrangement -1; provided by the enterprise: credit only -2, raw material only -3, equipments only -4, credit and raw material only-5, credit and equipments only -6, raw material and equipments only -7, credit, raw material and equipments -8; not known -9

col. (18): **no. of outlets of disposal:** one outlet -1, two outlets -2, three or more outlets -3; not known -9.

col. (21): **period of seeking/available for work during last 365 days:** sought/available for: less than 1 month -1, 1 month & above but less than 3 months -2, 3 months & above but less than 7 months -3, 7 months & above but less than 10 months -4, 10 months to 12 months -5; did not seek/ not available -6.

col. (22): **seeking or available for the type of occupation:**

3 -digit code as per NCO-2004.

### Codes for Block 5.2

col. (3): **status:** codes as in col. 3, block 5.1. (only codes 11 to 51 are applicable here).

col. (5): **industry :** 5-digit code as per NIC-2004.

col. (6): **occupation :** 3-digit code as per NCO-2004.

col. (7): **location of workplace:** codes as in col. 8, block 5.1.

col. (8): **enterprise type:** codes as in col. 9, block 5.1.

col. (10): **number of workers in the enterprise:** codes as in col. 11, block 5.1.

col. (11): **type of job contract:** codes as in col. 12, block 5.1.

col. (13): **availability of social security benefits:** codes as in col. 14, block 5.1.

col. (14): **method of payment :** codes as in col. 15, block 5.1.

col. (15): **whether worked under given specifications:** codes as in col. 16, block 5.1.

col. (16): **who provided credit / raw material / equipments:** codes as in col. 17, block 5.1.

col. (17): **no. of outlets of disposal:** codes as in col. 18, block 5.1.

**[5.1] usual principal activity particulars of household members**

srl. no. as in col. 1, bl.4	age (years) as in col. 5, bl. 4	usual principal activity			for persons with industry groups 012, 014, 015 and divisions 02 - 99 in col. 5										for persons of age below 75 years with codes 81-97 in col. 3, seeking or available or suitable for the type of occupation (3-digit NCO-2004 code)									
		description			for codes 31, 41 & 51 in col. 3				for code 11, 12 or 21 in col. 3				type of specifications <i>(written-1, oral-2, not known-9)</i>	(20)	(21)	(22)
