Government of Kerala

**REPORT ON SURVEY OF
COMPUTER INSTITUTIONS
IN
KERALA**

**Department of Economics & Statistics
Thiruvananthapuram
June 2006**

Preface

IT enabled service is one of the basic needs in the modern world. Wherever this technology has been optimally suitably used, that sector has achieved greater milestone. This scenario can be seen in many developed countries. In our country also, the IT tools are being used in large scale. With the IT boom, more IT professionals are needed across the country and in the world. In these circumstances, hundreds of private as well as government training institutes have opened up across the country. However the quality of training differs considerably from institute to institute. In Kerala, hundreds of computer institutions are functioning for training as well as software development. The basic statistics of computer institutions in Kerala like activities, education of staff, social background of staff, income and expenditure of the institutions etc. are essential for focusing future development in IT sector. In this context, the department proposed to conduct a study on survey of Computer Institutions in Kerala. The Government agreed to our proposal and accorded sanction for the conduct of the survey in the Stat. Consequently the department conducted the survey (Census survey) in all the districts in 2003-04 utilizing the service of the department personnel. Based on the survey details, the report is prepared along with a directory of computer institutions.

This report is prepared by Sri K. Vimalan, Deputy Director in the computer division of the Directorate. I would like to place my record of appreciation for the hard work put in by him, without his unstinted work this report would not have been completed. Sri. S. Rajendran, Joint Director guided the work. The valuable service rendered by him is appreciable. The coordination work for the preparation of this report was done by Sri Rajendran Kuttikkad, UD Compiler. The data entry module was developed by Sri.S. Anirudhan, Research Assistant and the data processing was done by Sri.K.V Abhilash, UD Compiler in the computer division of the directorate. Sri Saseendran, UD Typist has done the DTP works. Their valuable services are also acknowledged.

I would like to appreciate all the officers who have associated with this work and otherwise helped to make this survey a success.

M. R. Balakrishnan
Director

Thiruvananthapuram
26-06-2006

COMPUTER INSTITUTIONS

I. INTRODUCTION

Information Technology (IT) is the world's fastest growing sector of economic activity. It is transforming resource-based economies to knowledge-based economies. Information services, products and production processes are evolving rapidly. The application and impact of Information Technology is spreading so widely that it is affecting issues as diverse as balance of payment, skill development, design competence, mass media reach, industrial competitiveness, publication, communication, transportation, health, financial infrastructure, industrial productivity and managerial efficiency. The IT industry has been found to be ideal for Kerala in terms of its potential to generate opportunities for employment with little pressure on land, environment and other resources. Use of IT in enhancing the delivery of Government services leads to a very responsive and transparent administration facilitating the empowerment of the people and satisfying their right to information. This is one of the most people-friendly and environment-friendly industries of modern times.

The Information Technology is a tool of productivity and efficiency and will lead to better transparency in the functioning of the administration. With its appropriate use the governance of the State can be made highly effective and citizen-friendly, contributing to the standard of living of the people. IT will be used to deliver Government services in a manner that is affordable, reliable, and accessible to the citizens in a short span of time

One of the critical factors that determines the growth and development of the IT industry is the availability of trained manpower. It is noteworthy that human resources have played an important role in the development of electronics and computer software industry in Kerala. The Government understood the urgency for consolidating and strengthening the core competence of the state on the human resources front to propel the development of IT industry.

According to leading reports, Indian software industry achieved a turnover of 10 billion dollars in the year 2005. The projected demand for trained I.T. professionals is estimated at over 400,000 per year. There is a clear imbalance between the demand and supply of IT professionals with the result that this sector offers one of the highest

remuneration packages. The Internet is a new revolution that is sweeping the world. It promises to change the way we work, live, shop, communicate and entertain ourselves

With the Info Tech boom, hundreds of private computer institutes have opened up across the country. The courses conducted by these institutions range from computer fundamentals to advanced computer languages. However there are no standards of teaching and course content and the quality of students differs considerably from institute to institute.

India has a new mantra - Information Technology (IT) - and almost everyone has started chanting it. This IT mantra has its roots in the "passionate and strategic infection" spread by the unrivalled success of India's export led software industry. This passionate infection has not only made the software sector as one of the high value-addition and net foreign exchange earning industry, but has created history of sorts on the Indian stock exchanges. The potential of its high capacity to generate wealth, foreign exchange and employment has already caught the imagination of India's businessmen, citizens, economists, bureaucracy and politicians, alike. Software driven IT industry is today at the top of India's national agenda as an instrument and a model, for the modernization of India's economy.

The use of IT in Kerala is remarkably increasing day by day. It is obviously seen the essentiality of IT in all developmental activities. In order to consider the IT influence, the infrastructure provider in IT Industry of our State is growing very fast. In this context, the department has proposed to conduct a survey on IT Institution in Kerala. The Government had agreed the proposal and entrusted the department to conduct the survey.

II. Aims of the Survey

The main aims of the survey are as follows

1. To know the number of Computer Institutions functioning in the State.
2. To study the activities under taken by the Computer Institutions.
3. To study the educational qualifications of the staff working in the Computer Institutions.
4. To study the social background of staff working in the Computer Institutions.
5. To calculate the income and expenditure of the Computer Institutions

III. Coverage

The survey covered the whole area of the State. The details regarding the computer institutions were collected in the prescribed schedules. This survey is mainly aimed at the study on computer institutions with type of ownership, number of people engaged with their educational background, courses conducted, working conditions, level of accreditations, year of establishment etc. The Techno Park at Thiruvananthapuram was not covered in this survey due to the fact that information could not be collected for individual units as per the prescribed schedules. However a separate analysis was done on the basis of data collected from Techno Park. Educational institutions offering courses like PGDCA, MSc.(Computer Science), MCA etc. were also brought under the purview of the survey. If an institution has included computer study as one of the subjects in a regular course, that institution will not be treated as a computer institution for the purpose of the Survey.

IV. Methodology

This was a Census Survey and the data was collected in a pre-designed schedule.

The schedules were designed by the Survey and Design division of the Directorate. The enumeration work at field level was done by the statistical investigators of the department under the supervision of Taluk Statistical Officers and Statistical Inspectors at Taluk level, and the Research Officers and Deputy Directors at district level. The State level training and district level training were arranged before conducting the field level operation of the survey. The senior officials from headquarters frequently interacted with the districts and they have done field level inspection during the period of the survey. The scrutiny of the schedules and data entry was done at the district offices. The design of Data Entry Module and the data processing was done at the computer division of the Directorate of Economics & Statistics.

V. Analysis

V.1 Analysis based on Survey Results

The following points were observed while analyzing the results of the Survey.

1. 5971 computer institutions were functioning in the State during the survey period ie during the year 2004. Ernakulam and Idukki districts respectively have the

highest (914) and lowest (122) number of Computer Institutions functioning in the State. (Ref. Table 1)

2. In the case of ownership of the Institutions, 74% are proprietorship, 19% are partnership and the remaining belongs to other categories. (Ref. Table 1)
3. In the proprietorship computer institutions, Ernakulam district has the largest number of institutions functioning in the State while in the case of partnership institutions, Thrissur tops. In both cases, Idukki has the least number of institutions. (Ref. Table 1)
4. In Kerala, 18960 persons are engaged in computer institutions excluding Techno Park. 59% belong to male category and 41% female. Ernakulam district has the largest number of persons working in computer institutions while Wayanad has the least. In the case of gender wise classification, Ernakulam district has the largest representation in both male and female among the districts while Wayanad has the least representation in both categories.(Ref. Table 2)
5. The representation of SC/ST professionals in computer institutions is negligible (<1%) (Ref: Table 3)
6. With regard to qualification, the majority of the people have PGDCA qualification (30%). The other qualified hands are DCA -16%, MCA -6%, B Tech/B Tech with other subjects – 5%, B.Sc. (Computer Science) – 4 % etc. Managerial staff account for 24% and other supporting staff account for 11% of the total employees. (Ref. Table -4).
7. Even though the SC/ST representation in IT Sector is less than 1%, the representation on the basis of qualification is rather high (MCA -3%, PGDCA – 5%, B.Sc. (Computer Science)-5%, DCA-7%). 3% of managerial staff are also from SC/ST category. (Ref. Table-5)
8. In computer institutions in Kerala, 31% of employees are engaged in technical or management side in their own or their partnership institutions. (Ref. Table -6)
9. In the proprietorship computer institutions, the representation of SC and ST workers are 4% and 1 % respectively. In this category, Ernakulam district tops followed by Thrissur (Ref. Table-7)

10. In the computer institutions, household employees account for 21% of the total employees. Of these 5% of employees are from SC/ST category. Hence it is observed that 21% of employees are engaged in their own institutions alone (Ref. Table-8)
11. In the partnership computer institutions, 5 % of employees are from SC/ST category (Ref. Table-10)
12. The computer institutions under Co-operative sector have 4 % of employees from SC/ST category (Ref. Table-11)
13. In the computer institutions registered under limited companies, only 1% of employees are working from SC/ST category. (Ref. Table 12)
14. In activities, 29% of the institutions are conducting computer educational classes and 27% of the institutions are engaged in DTP works. (Ref. Table-13)
15. In Kerala, 19% Computer Institutions have franchise. Thrissur district has the largest number of franchise institutions in the State (Ref. Table-15).
16. As on the date of survey, 160397 peoples were trained through computer institutions in Kerala. 31% of the peoples are trained in short term computer courses. In total, only below 1% people have got degree in specialized courses like MCA, Oracle etc. (ref. Table-16)
17. During the year 2002 and 2003, 7877 and 11095 students respectively have got placement after the completion of their courses. (Ref. Table-18)
18. Advanced computer facilities are provided in majority of the institutions. It is noted that 61 % of machines are either Pentium III or above or Laptop.. (Ref. Table-19).
19. 10124 printers and scanners were being used in computer institutions during the reference year of the survey. In total, 2662 are scanners and others are either Dot Matrix Printers or inkjet printers or laser printers. (Ref. Table-20).
20. In the case of Operating System (OS), 89% of the institutions are using Micro Soft Windows Operating System. In total, 19% of the institutions are working under Windows NT networking environment. During the survey period, it is noticed that 50% of the institutions are still using the first popular Operating System DOS with advanced operating systems. The other networking operating systems like

Linux (19%), Unix (4%), Novell Netware (5%) etc. are also being used in the computer institutions. (Ref. Table-21).

21. The majority of the computer institutions (85%) are running in either rented or partially rented buildings. (Ref. Table-22)
22. The main source of income of computer institutions is from Training (49%) and Data Entry/DTP/Software development (35%). The maximum income is generated at Ernakulam district. Thiruvananthapuram becomes the largest earning district in IT, when the Technopark is also included. (Ref. Table 23)
23. In total, 73% of the institutions are running profitably. The institutions functioning in the districts like Ernakulam, Thrissur and Palakkad are running much profitably than the other districts (around 82% of the institutions). Kasargode district recorded the maximum number of institutions (41%) running at a loss (Ref. Table.25)
24. 35% Computer Institutions in the State were established in 2001 and 2002. In total, before 1998, 13% institutions had only been established. (Ref. Table. 26)
25. In total, 55% of the Computer Institutions are registered in Local Bodies. Only 1% Institutions are registered under universities in Kerala. 25% Institutions are registered under computer associations. (Ref. Table. 27)
26. 5842 out of 18960 persons working in the computer institution are engaged with their own institutions. This indicates that 31% of the persons are self employed in their own computer institutions. (Ref Table.31)
27. In the total managerial staff, 31% are managing their own institutions and 69% of the managerial staff are paid employees. (Ref. Table 31)
28. In total, 64% employees are working in proprietorship institutions. In most of the cases, computer educational institutions are proprietorship institutions. (Ref. Table 32)
29. The density of employees in the proprietorship institutions is less as compared with the other institutions like Limited companies. (Ref. Table 32 & 1)

V.2 Analysis of Computer Institutions at Technopark

Sl No.	Description	Unit	Quantity
1	Total Land	acres	275.64
2	Building Area for Industrial module	Sq. ft	12, 12, 000
3	No. of companies	No.	72
4	Total Investment	Rs. in crores	634.37
5	No. of Employees	No.	11411
6	Leased out land	acres	49.45
7	Building Area in Leased out land	Sq. ft	2,01,700
8	Export 2004-05	Rs. in crores	450

The Technopark is the prime IT Industrial campus of Kerala Government. The Techno park has created 12,12, 000 Sq.ft area for industrial modules. The total land available with Technopark is about 275.64 acres. There are 72 companies functioning in the campus of Technopark. Of the 72 companies, 30% are US based, 40% from Europe, 5% from Middle East, 20% from within Kerala and the rest 5% from outside Kerala. A wide range of activities are under taken in these companies like high speed Scientific Embedded Software, Smart card, Telecom, E-Commerce, Networking, Computer Aided Design, Engineering software, Business Application Software, IT enabled service etc. The total investment of these companies is around 635 Crores and export is around 450 Crores during 2004-05. The number of employees working in this campus is around 11500 and 55% of the direct employees are women.

5	Tax (Annual/12)				
6	Registration (Annual/12)				
7	Rent/ Maintenance etc.				
8	Others expenses				

* Obtain the balance sheet for latest year available.

Block VI Remarks

1. Whether running progressive (Yes-1, No-2):
2. Remarks :

Date:

Name & Signature of the Investigator

Signature of the Research Officer
with remarks if any

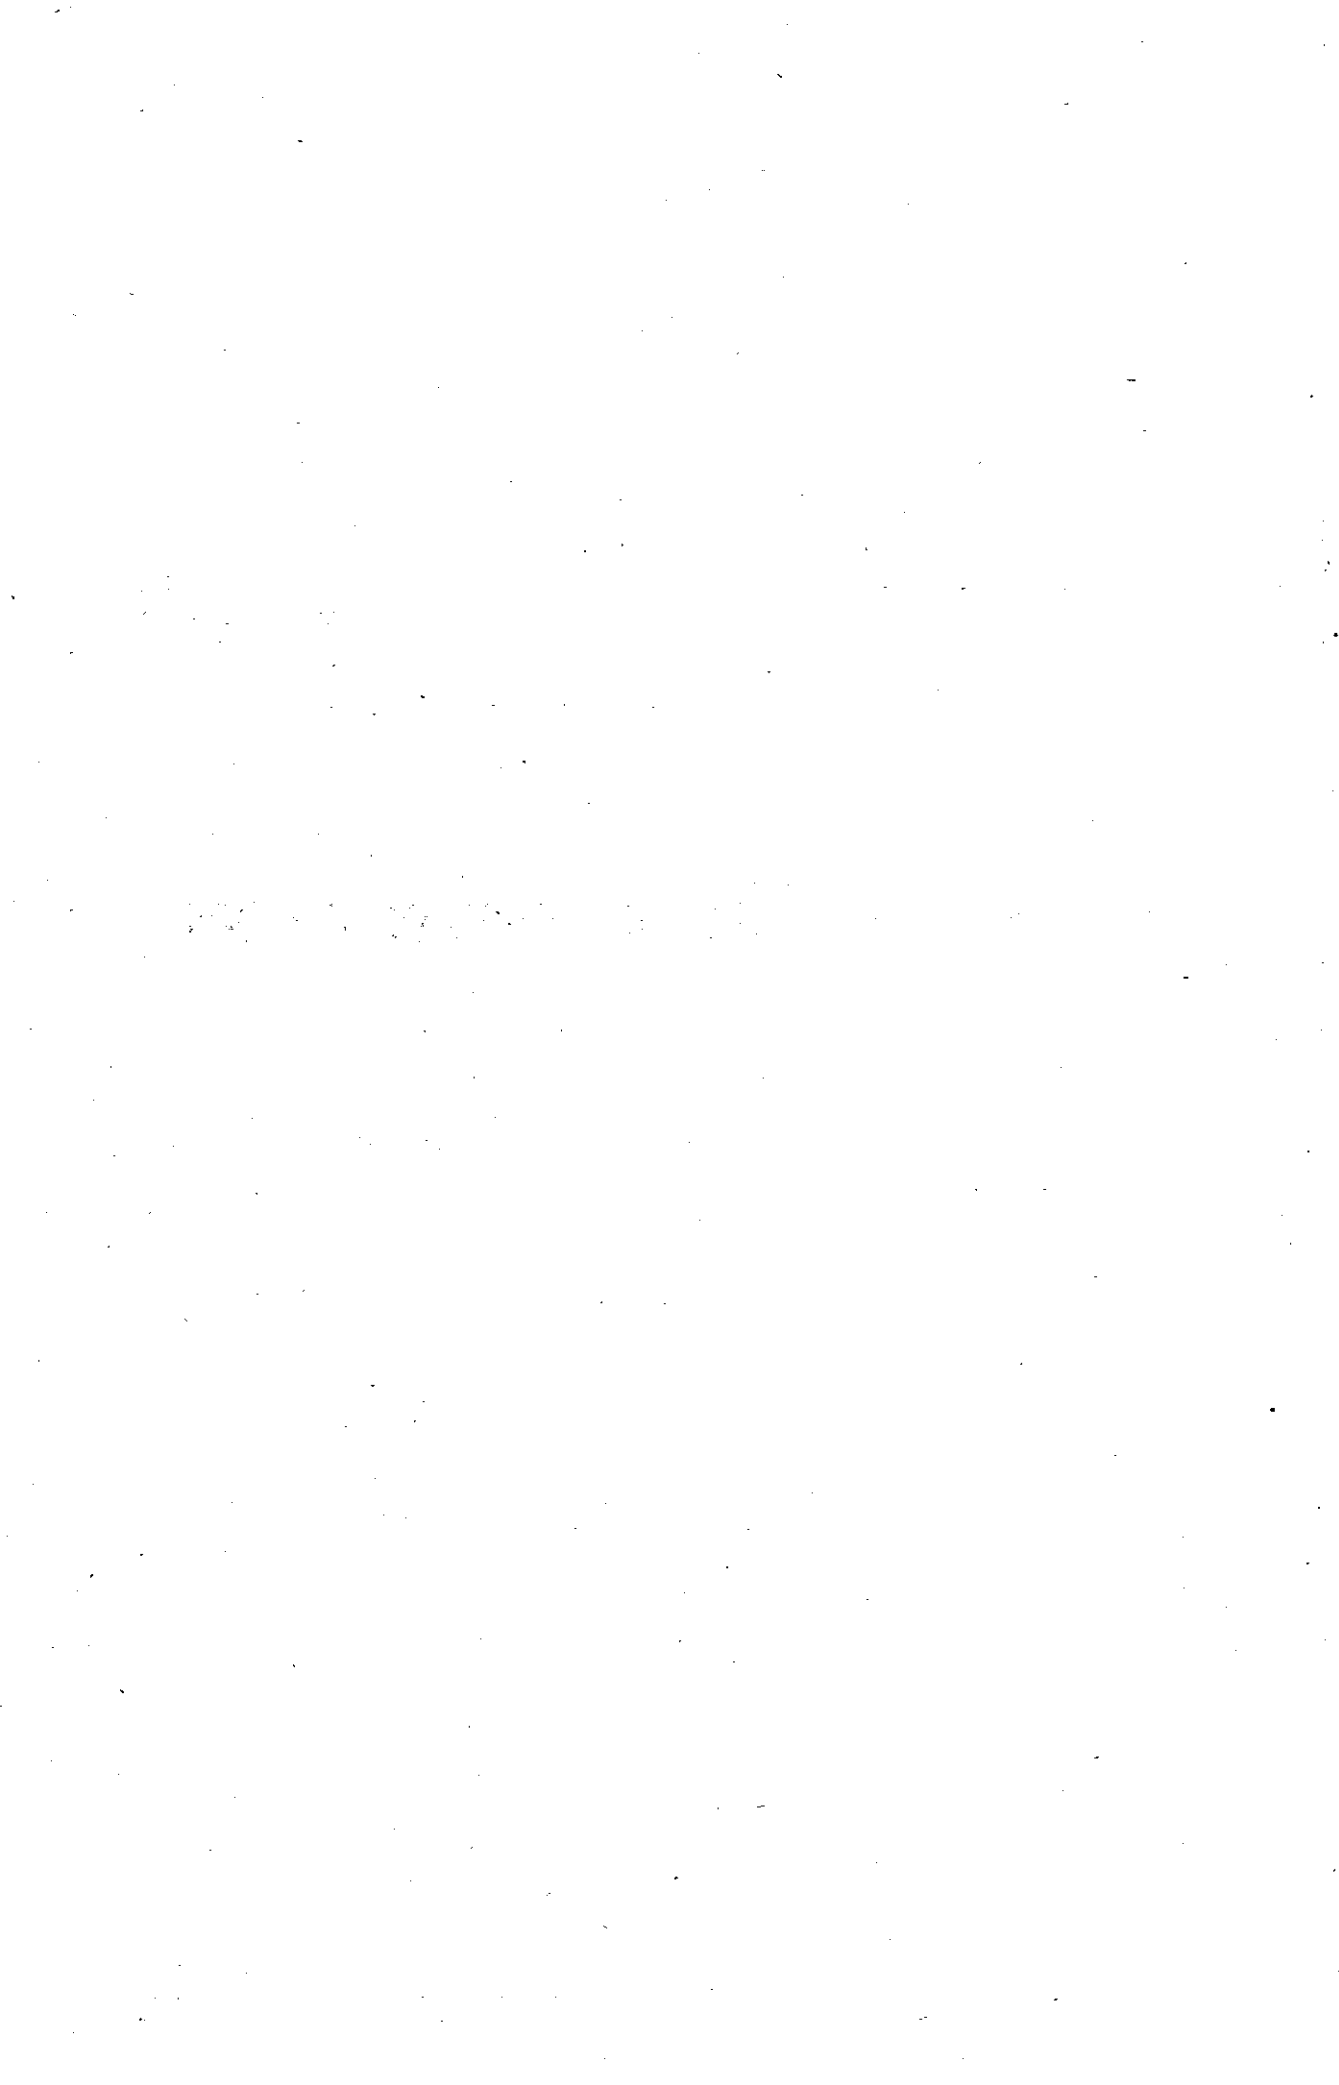

Signature of Deputy Director

CONCLUSION

In Kerala, most of the Computer Institutions are training institutions rather than software development firms. It was observed that many institutions are not running profitably. With regard to employment, 31% of the workers of the institutions are the owners/proprietors themselves. This indicates that self-employment in this sector is comparatively good. The male workers outnumber females in computer institutions other than Technopark. In the case of Technopark, the majority employees are women. This survey of computer institutions reveals that the income generated from software development is better than that from training. Most of the IT Institutions in Technopark, export software to foreign countries. In the context of the present situations, more Technopark like IT parks are needed in our State for earning more foreign exchanges by exporting software. Also the State needs more advanced Computer Training Institutes for conducting training. Even though the State has more Engineering colleges, the quality of technical education is not ensured always. The students who pass out from reputed institutions always have better opportunity in IT field. During the survey period, 160397 peoples were trained, but only around 30000 peoples were employed in Kerala including Technopark. This indicates that the job opportunity in IT in Kerala is very less as compared with the volume of peoples trained. Kerala had set up a Technopark in the beginning of IT revolution, but the neighboring States had a faster growth in IT sector than our State. Also these States offered more job opportunities in IT than our State. In the present scenario of open opportunities in IT field, more qualitative computer training institutions and IT Parks are essential in our State.

The IT development has immense potential to change the economic landscape of Kerala
