## VITAL STATISTICS BULLETIN—1979

### *Introduction*

This Bulletin presents the Vital Statistics of the State for the calendar year 1979. At present Birth and Death Registration in the State is governed by the Registration of Birth and Death Act of 1969 and the Rules made thereunder in 1970. The Director of Panchayats is the Chief Registrar and the Additional Director, Economics and Statistics is the Additional Chief Registrar. The District Panchayat Officers are the District Registrars. In the Panchayats the Executive Officers are the Statuatory Registrars while in Municipalities and Corporations the Commissioners are the Registrars. The local Registrars are responsible for the maintenance of Births and Deaths Registers at the lowest level. The data relating to vital events received from the registering authorities are scrutinised, coded, punched and tabulated by the Vital Statistics Unit of the Directorate of Economics and Statistics. This bulletin contains the results of the analysis of the data for the year 1979.

### *2. Source of the data*

The relevant details of birth such as date of birth, sex of child, literacy of mother and father, occupation, religion, age of mother, type of attention etc. are recorded in the birth register and date of death, age, sex, occupation religion and cause of death etc. of the deceased are recorded in the death register kept by the local Registrars. These details are transferred to the Birth and Death cards prescribed by the Department of Economics and Statistics and such filled-in-cards are forwarded periodically to the Directorate of Economics and Statistics by the concerned Registrars.

### *3. Limitations of the data*

The total number of registered events under Civil Registration is likely to be less than that of actual events occurred. From the data received it is seen that the registered rate in the urban area is very high due to the fact that the registration is defects and the hospital facilities in the urban areas is utilised by the rural people also.

### *4. Processing of data*

The data are processed through manual and mechanical tabulation. About 5.3 lakhs birth cards and 1.18 lakhs death cards received have been analysed and the Bulletin prepared.

### *5. Vital Rates*

The data available from the events reported are used for arriving at the following registered Vital rates.

(a) *Crude Birth Rate.*—Crude Birth Rate is the number of live birth per thousand population (Mid-year)

(b) *Crude Death Rate.*—Crude Death Rate is the number of deaths per thousand population (Mid-year)

(c) *Infant Death Rate.*—Infant Death Rate is the number of deaths of infants below one year of age out of thousand live births in the year.

The still-birth rates of Cannanore, Kottayam, Alleppey, Malappuram and Idukki are below State average.

**Conclusion**

According to Sample Registration the Birth rate for the State for the year 1979 was 25.8. But as per civil registration the Birth rate is 21.88 only. Similarly the death rate was 6.9 as per Sample Registration as against 4.8 under civil registration. It can be seen that the registration of births in the State was lower by 15.2 per cent and that of deaths by 30.4 per cent.

It is therefore suggested that the implementing authorities of the Act should take further steps for registering all the vital events in the State so as to ensure complete coverage.
