NATIONAL SAMPLE SURVEY, JULY 1964  
(19th ROUND)

Tables with Notes on Housing Conditions

1.1 This report presents the data on the conditions of residential housing and facilities enjoyed by the households in Kerala, collected by the National Sample Survey in its nineteenth round. The survey was conducted both in rural and urban areas of the State. The field work of the 19th Round commenced in July 1964 and was completed in June 1965. In all schedules canvassed from 956 households from 360 Sample Villages in the rural areas and 408 sample households from 144 sample Blocks in the urban areas were utilised for preparing this report.

1.2 The results of the survey give a general idea of the housing conditions prevailing in the rural and urban areas of the State. The basic information collected relate to the type of structure of the house, age of the building, nature of drinking water facility available, monthly rent, type of latrines, bath room facilities, number of rooms etc.. These can be used as indicators of 'housing condition' in the State.

1.3 Type of structure: All residential buildings have been classified into 3 types viz. pucca, kuteha and semi-pucca. A pucca structure is one whose plinth (and floor), walls and roof are made of burnt bricks, tiles, stones, cement, concrete and/or timber. A kutchha structure is one whose plinth walls and roof are made of mud, grass, leaves, reeds and/or thatch. Bricks without any cementing material used in the construction of plinth and country tiles used in thatching the roof are regarded as "katcha" material. A semi-pucca structure is one whose plinth, walls and roof or any two of these are made of "pucca" building materials and the rest with "kutcha" material. A structure whose wall and/or roof are built of corrugated iron or zinc or asbestos sheets is treated as semi pucca regardless of other materials used in its construction. It will be seen from Table (1) below that nearly 45% of the rural households live in kutchha houses and 25% in semi-pucca houses and only about 30% in pucca houses. As against this in the urban areas nearly 44% of the households live in pucca houses, 22% in semi-pucca houses and 34% in kutchha houses.

TABLE No.(1): Percentage distribution of households by type of structure

No. of Sample Villages: 360.  
 " Blocks : 144

Type of structure	Percentage of households		
	Rural	Urban	Total
1	2	3	4
Pucca	29.75	43.97	31.80
Kutcha	45.07	34.37	43.53
Semi-pucca	25.18	21.66	24.67
Total	100.00	100.00	100.00

Contd....

	1	2	3	4
No. of sample households				
	State Sample	645	263	908
	Central sample (half sample only)	311	145	456
	Combine	956	408	1364
Estimated No. of households				
	State sample	2554200	397850	2952050
	Central sample	2463120	442540	2305660
	Combined	2508660	420195	2928855

Thus the kutchha houses are predominant in the rural areas and pucca houses in the urban areas of the State.

1.5 It will be evident from Table (A-3) of the Appendix I that in the rural areas a little more than 70% of the households with per capita expenditure less than Rs.8/- per month reside in 'kutchha' structural houses and this percentage within each expenditure group decreases with increase in monthly per capita expenditure of the household. At the extreme per capita expenditure group, only about 6% of households having per capita monthly expenditure as Rs.75/- and above reside in 'kutchha' houses.

1.6 It can be seen from Table (B-2) of Appendix I that of the households residing in pucca houses in urban areas only 1% belong to per capita expenditure group less than Rs.8/- and 11% in the group 75 rupees and above. About 5% of these households belonging to per capita expenditure group of 11-15 rupees, nearly 14% to group 15 to 21 rupees, 22% to group 21 to 28 rupees, 25% to group 28 to 43 rupees and 7% to group 43 to 55 rupees.

1.7 It can be seen again from Tables (A-2) and (B-2) of Appendix I that maximum concentration of households residing in 'kutchha' houses is located in monthly per capita expenditure group of Rs.15/- to Rs.18/- for both rural and urban areas. Percentage of households residing in pucca type of houses is maximum (14%) for households with monthly per capita expenditure between Rs.28/- and Rs.34/- in rural area and Rs.34/- to 43/- in urban areas. Households residing in "semi-pucca" type of households are observed to be mainly located in per capita expenditure group of Rs.15 to Rs.18/- in both rural and urban areas of the State.

1.8 Age of house and type of structure:

TABLE No. 2(a): Percentage distribution of households by type of structure and age at houses

RURAL

Base: All households

Type of structure	Age of houses						All
	Less than one year	1-5 years.	6-10 years.	11-20 years.	20 years & above	1	
1	2	3	4	5	6	7	
Pucca	1.34	4.74	5.29	6.87	11.51		29.75
Kutcha	2.05	9.55	9.39	9.55	14.52		45.07
Semi-pucca	0.47	3.32	4.34	6.79	10.26		25.18
Total:	3.86	17.61	19.02	23.21	36.30		100.00

Note: for sample households, estimated No. of households etc. please refer table-i.

URBAN

Pucca	1.56	3.50	8.95	10.11	19.85	43.97
Kutcha	2.85	3.50	7.53	8.56	11.93	34.37
Semi-pucca	0.13	2.85	4.02	5.71	8.96	21.66
Total:	4.54	9.85	20.49	24.39	40.73	100.00

It is seen from Table 2(a) that 36% of households in rural areas and nearly 41% in urban areas reside in houses built 20 years ago or earlier. Again nearly 4% of the households in the rural areas and almost the same proportion of households in urban areas may be considered as residing in newly built houses (i.e. age less than one year). Estimated number of households residing in houses of ages between 1 and 5 years constitute nearly 18% of all households in rural areas as against nearly 10% in urban areas. About 19 and 23% of households in rural areas reside in houses which are 6 to 10 years and 11 to 20 years old respectively while corresponding figures for urban areas are 20% and 24% respectively.

1.9 It will also be seen that nearly 15% of households in rural areas reside in 'kutcha' type of houses built 20 years ago or earlier. Only 20% of households reside in 'kutcha' houses built within one year. And, the percentage of households residing in 'kutcha' type of houses of ages 1 to 5 years, 6 to 10 years and 11 to 20 years respectively, is more or less the same. The table further shows that about 1% of households, residing in pucca houses, live in buildings built within one year at the time of enquiry, about 5% of the households live in 'pucca' households built 1 to 5 years ago and 6 to 10 years at the time of enquiry. Nearly 7% of households live in 'pucca' houses built 11 to 20 years ago and 12% of the households live in 'pucca' houses built 20 years ago or earlier in the rural areas of the State. The percentage of households living in 'semi-pucca' type of houses in rural areas is almost similar to that of 'pucca' type of houses.

1.10 In the urban areas of the State nearly 20% of the households live in houses which are 'pucca' and built 20 years ago or earlier. About one and a half percent of households only reside in houses constructed within one year preceding the time of enquiry, whereas 12% of households live in pucca buildings constructed within one and 10 years ago and about 10% between 11 and 20 years ago from the reference date.

TABLE No.2(b): Percentage distribution of households by type of structure and age of houses.

RURAL

Base - households by each age group

Type of Structure	Age of houses						All
	Less than 1 year.	1-5 years	5-10 years	11-20 years	20 years & above		
1	2	3	4	5	6	7	
Pucca	34.69	26.91	27.80	29.60	31.74	29.75	
Kutcha	53.06	54.26	49.38	41.15	40.00	45.07	
Semi-pucca	12.25	18.83	22.82	29.25	28.26	25.18	
Total	100.00	100.00	100.00	100.00	100.00	100.00	

URBAN

Pucca	34.28	35.53	43.67	41.49	48.73	43.97
Kutcha	62.86	35.52	36.71	35.11	29.30	34.37
Semi-pucca	2.86	28.95	19.62	23.40	21.97	21.66
Total	100.00	100.00	100.00	100.00	100.00	100.00

1.11 It will be seen from Table 2(b) that the percentage of households residing in pucca houses of ages less than 1 year, between 1 and 5 years, 6 and 10 years, 11 and 20 years and 20 years and above vary between 27 and 35% in rural areas. It will also be seen that within each age group of houses 40 to 54 percent of households live in 'kutcha' type of houses and 12 to 29 percent of households in semi pucca type of houses. In the urban areas percentages of households residing in 'kutcha' houses belonging to the above mentioned age groups vary between 29 and 63 within each group and these percentages decreases with the increase in age of houses. It will be further seen that about 34 to 49 percent of households within each age group reside in 'pucca' buildings and are in an increasing order with the increase in age. And, 3 to 29 percent of households within each age group reside in semi-pucca houses. The variation in percentage of households residing in 'kutcha' type of houses in urban areas is from 29 to 63 among different age groups as against 14 and 26 for households residing in 'pucca' and semi-pucca type of houses respectively.

1.12 This table further shows that in rural areas, households residing in houses having pucca, kutcha and semi-pucca type of structures built within one year on the date of the survey comprise 35, 53 and 12 percent of the households respectively residing in houses of the same age group. The corresponding figures in urban areas are however 34, 63 and 3 percent respectively. Again, 40 percent of rural households are observed to be residing in 'kutcha' houses, 32 percent and 28 percent in pucca and semi-pucca houses built 20 years ago or earlier, while in urban areas 49 percent of households residing in houses built 20 years or earlier live in pucca houses, 29 percent in kutcha houses and 22 percent in semi-pucca houses. In rural areas 54, 49 and 41 percent of households residing in houses of age groups 1 to 5 years, 6 to 10 years and 11 to 20 years respectively reside in 'kutcha' houses. Whereas 27, 28 and 30 percent of the households of the respective age groups mentioned above reside in pucca houses and 19, 23 and 29 percent reside in semi-pucca houses. In urban areas 36, 44 and 41 percent of households residing in houses of age groups 1 to 5 years, 6 to 10 years and 11 to 20 years are residents of pucca houses, as against 36, 37 and 35 percent in 'kutcha' and 29, 20 and 23 percent in semi-pucca houses.

TABLE No.2(c): Households by each type of structure (Baso)

RURAL

Type of structure	Age of houses					All
	Less than 1 year.	1-5 years	5-10 years	11-20 years	20 years & above	
1	2	3	4	5	6	7
Pucca	4.51	15.91	17.78	23.08	38.72	100.00
Kutcha	4.55	21.19	20.84	21.19	32.23	100.00
Semi-pucca	1.88	13.17	17.24	26.96	40.75	100.00
Total	3.87	17.60	19.02	23.20	36.31	100.00

URBAN

Pucca	3.54	7.97	20.35	23.01	45.13	100.00
Kutcha	8.30	10.19	21.89	24.90	34.72	100.00
Semi-pucca	0.60	13.17	18.56	26.35	41.32	100.00
Total	4.54	9.86	20.49	24.38	40.73	100.00

1.13 Table 2(c) shows that about the same proportion (5%) of households residing on the date of survey in pucca and 'kutcha' houses in rural areas live in houses built within one year. About 2 percent of the households residing in 'semi-pucca' houses live in buildings having age less than one year. Residential buildings of 18 and 23 percent of households in rural areas residing in houses

having 'pucca' type of structure belong to age groups 6 to 10 years and 11 to 20 years respectively. The corresponding figures for 'kutcha' and 'semi-pucca' type of structures are 21 for both age groups and 17 & 27 respectively. Houses of 39, 32 and 41 percent of households residing in pucca, kutcha and semi-pucca houses respectively are more than 20 years old.

**1.14** In urban areas it is seen that nearly 4, 8 and 1 percent of households residing in 'pucca', 'kutcha' and 'semi-pucca' houses respectively live in houses of age less than one year whereas 8, 10 & 13 percent of households residing in 'pucca', 'kutcha' and 'semi-pucca' type of houses respectively live in houses 1 to 5 years old. Again houses of about 19 to 20 percent of households residing in 'semi-pucca' or 'pucca' buildings are of age 6 to 10 years and 22 percent of households residing in 'kutcha' houses live in houses of the same age. Again, houses of 23, 25 and 26 percent of households residing in 'pucca', 'kutcha' and 'semi-pucca' type of houses respectively are 11 to 20 years old and houses of 45, 35 and 41 percent of household residing in these three types of houses respectively are found to be built 20 years ago or earlier on enquiry. That is to say that two out of every five households residing in semi-pucca houses live in buildings which are more than 20 years old.

**1.15 Cost of repair and maintenance:**

**TABLE No.3: Average annual cost of repair and maintenance per household**

Type of structure	Annual cost of repair and maintenance in Rs. (0.00)		
	RURAL	URBAN	STATE
1	2	3	4
Pucca	5.62	12.20	6.75
Kutcha	2.77	5.25	3.03
Semi-pucca	3.89	5.64	4.12
Total	3.75	7.96	4.31

Table (3) shows that the annual expenditure for repair and maintenance of residential dwellings is Rs. 3.75 per household during one year in rural areas as against Rs. 7.96 in urban areas. This expenditure per such household against 'pucca' type of houses is Rs. 5.62 in rural areas and Rs. 12.20 in urban areas, the later being more than double the former. Amount spent per household reporting expenditure on account of repairs etc. for 'kutcha' type of houses is nearly half of the 'pucca' type of houses in the rural areas and a little less than half in the urban areas. Expenditure on this account per such household against 'semi-pucca' type of houses in rural and urban areas is Rs. 3.89 and Rs. 5.64 respectively.

1.16 Rent:

TABLE No.4: Average monthly rent per household residing in rented houses

Type of structure	Monthly rent in Rs.(0.00)		
	RURAL	URBAN	STATE
1	2	3	4
Pucca	6.70	17.42	12.00
Kutcha	8.26	6.52	7.46
Semi-pucca	4.85	6.13	5.51
Total	6.97	12.41	9.62

In Table 4 it will be seen that the monthly rent paid per household residing in rented houses is on an average Rs.6.97 in rural areas and Rs.12.41 in urban areas. Rent paid against pucca type of houses are Rs.6.70 and Rs.17.42 in rural and urban areas respectively as against Rs.8.26 and Rs.6.52 for 'kutcha' type of houses. Thus it is evident from the data that while the rent of kutcha houses is higher than the pucca houses in rural areas, in the urban areas, the rent of 'pucca' type houses is nearly 3 times that of 'kutcha' type houses. Semi-pucca type of houses fetched an average monthly rent of Rs.4.85 and Rs.6.13 in the rural and urban areas in the State.

1.17 Source of drinking water:

TABLE No.5: Percentage distribution of households by source of drinking water

	Percentage		
	RURAL	URBAN	STATE
1	2	3	4
Taps	2.61	29.96	6.53
Power operated tube wells	0.47	0.39	0.46
Hand operated i.e. hand pumped tube wells	0.16	..	0.14
Other wells	82.87	63.55	80.10
Others	13.89	6.10	12.77
TOTAL:	100.00	100.00	100.00

Table 5 shows that nearly 30 percent of households in urban areas have taps provided by Municipality or any other local or public body as the source of drinking water whereas only 2.6 percent of households in rural areas have tap as the source of drinking water. 83 percent of households in rural areas get their drinking water from wells as against 64 percent in urban areas.

Provision of water from power operated tube wells is enjoyed by almost equal percentage of households in rural and urban areas. While facility of hand operated tube wells is almost negligible in the rural areas, it is nil in the urban areas.

1.18 Provision of facility and type of latrine in urban areas

TABLE No.6: Percentage distribution of households by type of latrine facilities (URBAN)

Type of latrine	Percentage		
	State sample	Central sample	Combined
Built up in individual use	29.86	22.17	25.81
Built up in common use	20.82	20.69	20.75
No built up latrine	49.32	57.14	53.44
Total:	100.00	100.00	100.00

Data on facility and type of latrine provided for the use of the household was collected in urban areas only. The results presented in table 6 show that in urban areas one household out of every four households has a 'built up' type of latrine for exclusive use of the households. Nearly 21 percent of households have facility of 'built up' type of latrine to be jointly used by more than one household and 53 percent of households do not have any facility of 'built up' type of latrine.

1.19 Number of rooms:

TABLE No.7: Percentage distribution of households by number of rooms

No. of rooms	Percentage		
	RURAL	URBAN	STATE
One	25.18	25.03	25.15
Two	34.41	28.66	38.59
Three	19.89	18.42	19.68
Four and above	20.52	27.89	21.58
Total	100.00	100.00	100.00

It is seen from Table 7 that 25 percent households in the State reside in one roomed apartment. And 34 and 29 percent of households live in two roomed houses in rural and urban areas respectively. About 20 percent households in rural areas and 18 percent in urban areas reside in houses having three rooms. And 21.58 of the households reside in houses with four or more rooms.
