INTRODUCTION

The Department of Economics and Statistics (DES) is responsible for the systematic collection and analysis of various types of price data, which are broadly classified into Farm prices, Wholesale prices, Retail prices, and Wage rates. These data are crucial for calculating key economic indicators such as the Consumer Price Index (CPI), Wholesale Price Index (WPI), Parity Index (which compares the prices received and paid by farmers), and the Agricultural Wage Index. These indices help in tracking price trends and understanding the overall price movement in the economy. Once the price data are scrutinized and compiled, they are forwarded to both Central and State Governments and various agencies like the Coconut Development Board, State Agricultural Prices Board, Reserve Bank of India, Supply co, All India radio, Coconut and Arecanut Development Board, Commissioner of Civil supplies and Consumer Affairs as well as numerous other sectoral boards, research institutions, and development agencies.

The Prices Division of the Department of Economics & Statistics, functioning under the Additional Director (Prices), oversees the technical aspects of collecting various types of price data. This data is used for computing important economic indices and is also transmitted to various data

users for analysis and policy-making purposes.

In this context, price statistics serve as an essential tool for monitoring market trends, assessing inflationary pressures, and formulating appropriate policy responses. A comprehensive and timely collection, analysis, and dissemination of price data not only facilitate transparency in market operations but also supports informed decision-making by policymakers, researchers, and the general public. This report aims to present a detailed overview of the price movements of essential commodities, drawing insights from systematic data collection across regions, to reflect the changing dynamics of the economy.

FARM PRICES

Since 1954, the Department of Economics and Statistics has been collecting farm prices of major agricultural commodities cultivated in the state. These prices are broadly classified into Farm Wholesale Price and Farm Retail Price.

I. Farm Wholesale Price

The Farm Wholesale Price of a commodity refers to the average price received by farmers for bulk quantities of their produce at the village level or directly at the farm site. In certain cases, especially for perennial crops like coconut or

arecanut, farmers may even sell the produce while it is still on the tree. To capture these prices accurately, the Department of Economics and Statistics collects data through Taluk Statistical Officers from all 77 revenue taluks across the state on a fortnightly basis. A total of 81 wholesale commodities with significant marketable surplus are selected for this purpose, ensuring comprehensive coverage of key agricultural products. This data plays a vital role in understanding farm-level price trends and supporting policy decisions related to the agricultural sector.

II. Farm Retail Price

In addition to Farm wholesale prices, the Department of Economics and Statistics also collects Farm Retail Prices, which represent the average prices farmers receive when selling their produce in smaller quantities, often directly to consumers or in local markets. These prices provide valuable insights into the earnings of farmers from small-scale sales. Farm Retail Price data for 63 selected agricultural items are collected by Taluk Statistical Officers from all 77 revenue taluks across the state. This data collection is carried out on the last working day of every month, ensuring consistency and reliability in tracking price trends at the farm retail level. The information gathered is crucial for assessing farm-level income, understanding rural market dynamics, and aiding in the formulation of supportive agricultural policies.

MARKET WHOLESALE PRICE.

Wholesale prices of agricultural commodities are collected under the Market Intelligence Scheme and refer to the rates at which large-volume transactions are made for resale. These prices are not the maximum, minimum, or simple average, but represent the modal price - the price at which most transactions occur during the peak marketing period of the day, providing a more accurate reflection of prevailing market conditions.

RETAIL PRICES

The “retail price” of a commodity is defined as the price, which the ultimate consumer pays for relatively small transactions of the commodity. The following are the different types of retail prices being collected by the Department:

1. Weekly and monthly Retail prices of goods and services consumed by the working-class family (Agricultural and Industrial workers) in Schedules III (a) & III (b) respectively for the construction of Consumer Price Index.
2. Retail prices of additional items collected from District Headquarters as an appendix to III (a) being catered to the data users as and when needed.
3. Retail prices of 50+28 essential commodities collected from District Headquarters (daily).

4. Retail prices of 20+9 certain essential commodities collected from District Headquarters (weekly).
5. Retail and wholesale prices of Fruits collected from District Headquarters (Weekly).
6. Retail prices of 18 notified species of forest produce.
7. Retail prices of Ayurveda raw materials.
8. Retail prices of dietary articles (quarterly).
9. Market rate of waste paper, Coir, Spices, Salt, Cocoa, Fruits, Coconut Husk, Coconut Shell.

Retail Prices of Essential Commodities

Variations in the retail prices of essential commodities have a direct impact on individual incomes and, in turn, on the overall economy. A rise in prices puts significant pressure on consumers, while a fall below a certain level can negatively affect the real income of subsistence farmers, leading to serious economic consequences. Therefore, a close and continuous study of the absolute prices of various commodities and their movements is essential for formulating effective measures to ensure price stability and protect both consumers and producers.

Retail prices of 50 + 28 essential items are collected daily from the district headquarters in the schedule particularly designed for it collected and reports sent to the office of the Chief Minister on every working day. Along with

this, the prices of 20 + 9 selected items are also collected on a weekly basis. The department is also collecting weekly retail and wholesale prices of Fruits.

Market Rate of Waste Paper and Other Scrap Items.

The market rate of different items of waste paper is being collected from district headquarters on a monthly basis. This is mainly intended for fixing rate for the disposal of waste paper from Government offices.

Weekly Wholesale Price of Coir.

Information on prices of selected varieties of coir from important Coir producing centers of the State is being collected by this Department in every week.

Weekly Wholesale Price of Coconut Husk.

Weekly Prices of Spices.

Weekly prices of Nutmeg, Mace, Cinnamon and Cloves, Pepper, Vanilla are collected from Kottayam, Idukki, Wayanad and Thrissur districts.

Weekly Wholesale, Retail Prices & Stock of Salt.

Monthly Wholesale, Retail Prices & Stock of Salt.

Monthly Wholesale and retail prices of Salt with stock information are collected from 14 district headquarters on the last working day of the month.

Weekly Prices of Cocoa.

Price Index Numbers

Index Numbers are the devices to measure the relative movements in variables. They are used to compare the level of certain phenomenon between different times or between different places or between categories such as persons or objects. It is a technique of estimating general trends in prices, production and other economic and social variables and have been rightly called the “Economic Barometers”. Most of the current indices are indicators of changes over time in respect of economic characteristics like

prices, output, wages etc. These are termed as price indices, production indices, wage indices etc. Index numbers play a vital role in business planning and drafting of executive policies. The different types of indices being included in this book are the following.

1. Consumer Price Index (CPI) Numbers for IW & AL with base 2011-12 = 100
2. Whole Sale Price Index (WPI) Numbers with base 2015-16=100 (Agri. year)
3. Parity Index Numbers with base 1952-53 = 100 (Agri. Year) for January 2020 to June 2020 and base 2019-20 = 100 (Agri. Year) for July 2020–December 2020.
4. Wage Index Numbers with base 2019-20 = 100 (Agri. Year)
5. Consumer Price Index Rural Urban Combined (CPI (R/U/C) with base 2018 =100

Consumer Price Index Numbers

Consumer Price Index (CPI) is designed to measure the changes over time in the level of retail prices of a fixed set of goods and services (Consumption basket) consumed by an average family of a defined population group at a particular place. The retail price of a commodity is defined as the price which the ultimate consumer pays for relatively small transactions of the commodity. The consumption pattern and the prices paid by the consumer will normally vary from family to family. Hence the section or segment for which Index number is referred is to be clearly defined. (For Agricultural Labourers & Industrial workers (AL & IW)).

Wage Index

The data on daily wages of various categories of Agricultural Labourers are being collected from 28 centers in the State. The wage index is prepared using wage.

The wage indices are being prepared for the following categories.

- 1) Skilled labour
 - a) Carpenter
 - b) Mason
- 2) Paddy filed labour
 - a) Bunding (Men)

- b) Transplanting (Women)
- 3) Other agricultural labour
 - a) Rubber Tapping (400 Trees)
 - b) Coconut Plucking
 - c) Arecanut Plucking
 - d) Head load (Women).

Parity Index

Parity index indicate the level of the prosperity of the farmers. It indicates the state of affairs of the farmers receiving value for their products and expending money for cultivation of the crops and for their own living. It is the ratio of the index of prices received by the farmers and the index of prices paid by the farmers, expressed as a percentage.

Wholesale Price Index (WPI)

The wholesale prices being collected under the Market Intelligence Scheme is utilized for computing WPI for agricultural commodities. In the calculation of the index 24 important agricultural commodities are included. Commodity wise, Group/sub group wise wholesale price indices are being prepared by this.
