Dated**28.06.2025**.....

PREFACE

The Price is a value of commodity/service expressed in terms of money at a specified time and place. Agricultural price is an important economic variable. Price data is very important for policy formulation and also for taking very important administrative and executive decisions.

Economics and Statistics department is the nodal agency for the collection, compilation and dissemination of price statistics in the state. The department is collecting various prices such as Farm Wholesale and Retail prices, Market wholesale prices of various commodities, Retail prices of essential commodities etc.

“**Report on Analysis of Farm Prices 2022**” deals with Farm Wholesale and Retail prices collected and published fortnightly and monthly respectively. The prices of essential inputs such as seeds, fertilizers, labor, and fuel directly impact production costs. Fluctuations in these costs can lead to corresponding changes in farm prices to maintain profitability.

This report is prepared by the joint effort of the officers working in the Price Division of this Directorate. I appreciate your acknowledgment of the efforts made by Shri Rajendran Nair S, Assistant Director in preparing the report. His dedication and hard work are commendable. Suggestions for improvement of this report are highly appreciated.

FARM WHOLESale PRICE

Data Analysis - Major Crops - Farm Wholesale Price

This report contains the analysis of Farm wholesale prices of different varieties of crops that are abundantly available in different farm sites in the state of Kerala, during the year 2022.

For the making of this report, we considered the state average price of the crops. The fluctuation in price and other trends exhibited in prices from the beginning to the end of the year 2022.

The item wise price trends are as follows:

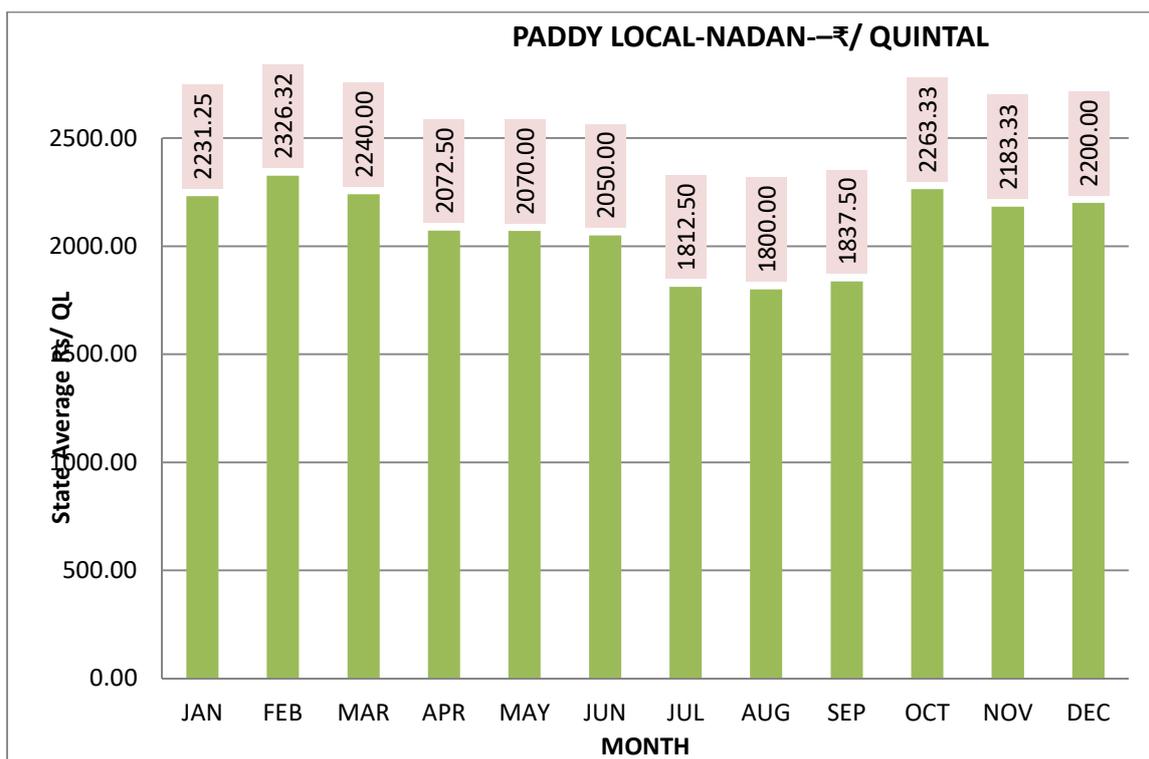

PADDY-LOCAL-NADAN-₹/ Quintal

The data on Paddy Local prices across various districts of Kerala shows notable fluctuations throughout the year. Some districts, like Kozhikode, exhibit significant price variations, with prices ranging from 2575 to 3200, reflecting volatility in the market. On the other hand, districts like Idukki and Kannur maintain more stable pricing, staying consistent at 2400 and 2200 respectively. The state average also fluctuates, peaking at 2326.32 and dipping to 1812.50, indicating a general downward trend towards the mid-year before slightly recovering. The data reflects a noticeable inflation trend in the price of Paddy Local across Kerala, with an overall upward movement in several districts. For instance, the price in Kozhikode has steadily increased from 2575 to 3200, indicating rising costs. Similarly, while some districts like Wayanad show more gradual increases, others like Palakkad and Pathanamthitta experience relatively stable pricing. The state average also fluctuates, peaking at 2326.32 in some months before dipping to lower levels.

Detailed table is attached in appendix Table 1 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	2231.3	2326.3	2240	2072.5	2070	2050
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	1812.5	1800	1837.5	2263.3	2183.3	2200

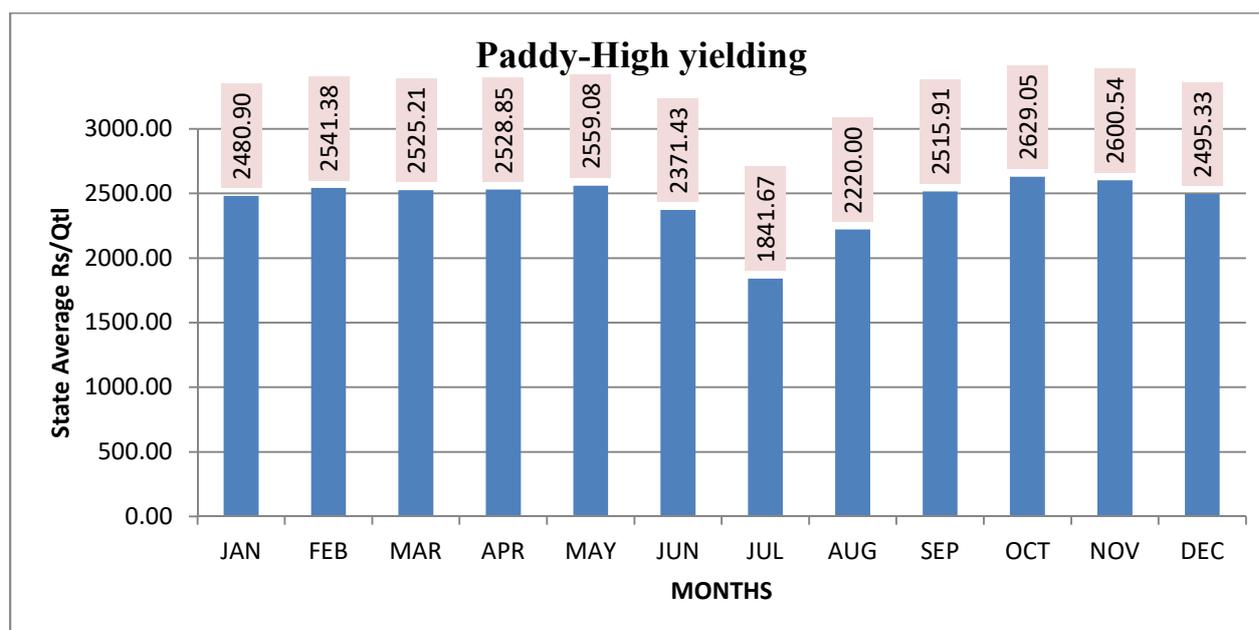

Paddy - High Yielding –₹/ Quintal

The data for Paddy Local - High Yielding prices across districts in Kerala shows some clear seasonal trends, with fluctuations that indicate inflationary pressures and regional price variations. For instance, districts like Thiruvananthapuram and Kollam maintain relatively higher and more stable prices, ranging from 2800 to 3000, while Malappuram and Kozhikode show a noticeable decline, particularly in the middle of the year, with prices dropping to as low as 1925. Prices generally rise toward the end of the year, especially in areas like Thiruvananthapuram and Kannur, where prices reach the maximum of 3000. The state average fluctuates between 2371.43 and 2629.05, highlighting the overall upward trend in the latter months.

Detailed table is attached in appendix Table 2 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	2480.9	2541.4	2525.2	2528.9	2559.1	2371.4
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	1841.7	2220	2515.9	2629.1	2600.5	2495.3

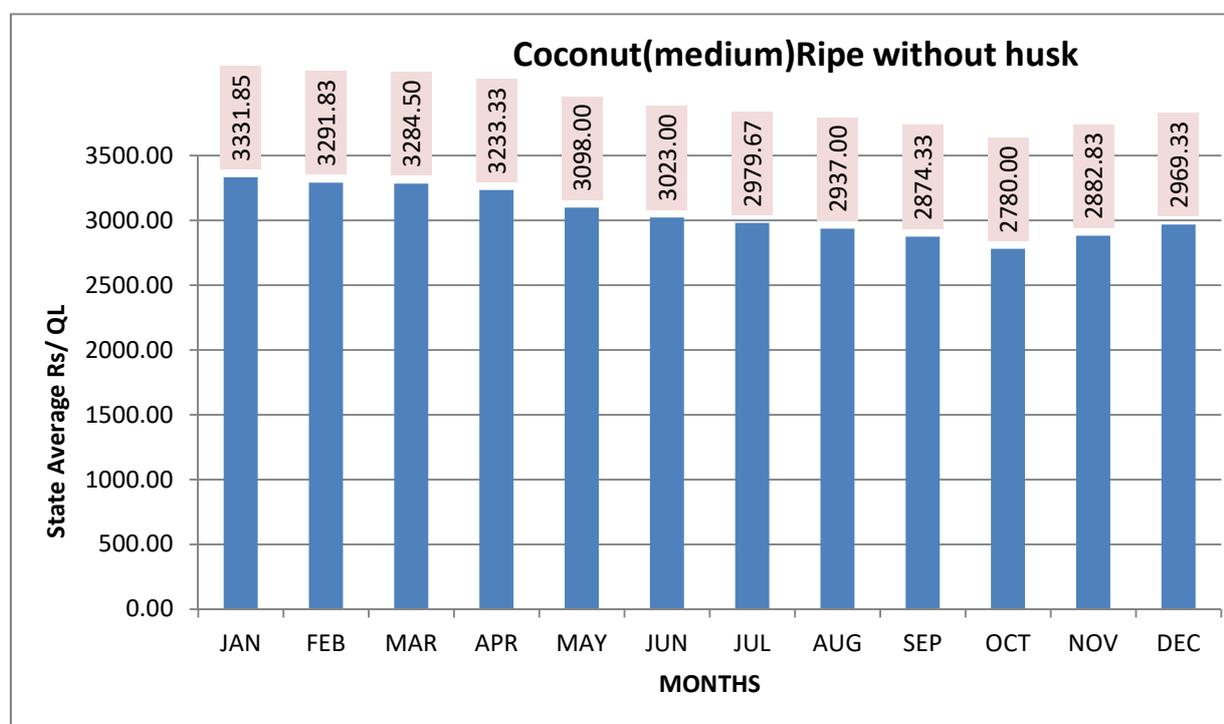

COCONUT (MEDIUM)-RIPE (WITHOUT HUSK) -₹/ Quintal

The data for Coconut (Medium) with and without husk shows fluctuations in prices across various districts in Kerala throughout the year. The highest prices are observed in Alappuzha and Kollam, with Alappuzha peaking at 4325 in January and Kollam reaching 4275 in July. In contrast, districts like Palakkad and Idukki show relatively lower prices, with Palakkad reaching a minimum of 2241.67 in June. The state average price follows a downward trend from 3331.85 in January to 2780.00 in October, before slightly recovering in December. The highest prices tend to be in the first half of the year, while a dip is observed toward mid-year.

Detailed table is attached in appendix Table 3 – A.

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	3331.9	3291.8	3284.5	3233.3	3098	3023
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	2979.7	2937	2874.3	2780	2882.8	2969.3

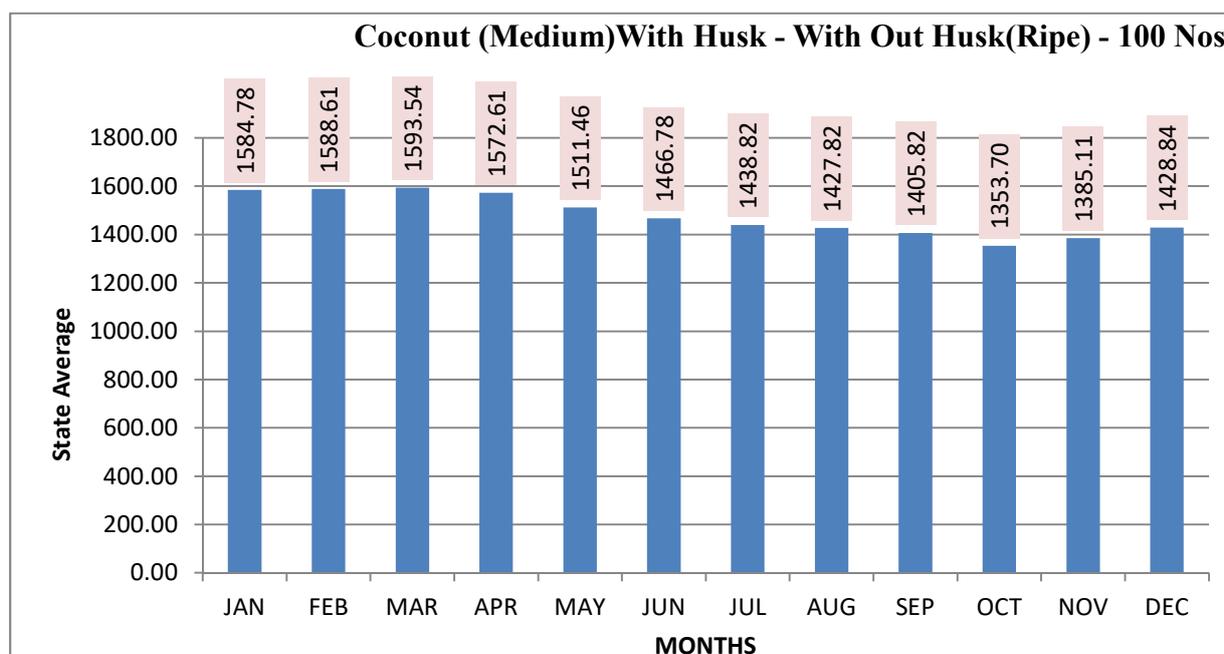

Coconut (Medium) - With Out Husk(Ripe) - --₹/ 100 Nos

The data for Coconut (Medium) with husk and without husk (ripe) across various districts in Kerala reflects a pattern of price fluctuations over the course of the year. In January, the prices are higher in districts like Kollam and Alappuzha, with Kollam reaching 2091.67 and Alappuzha at 2000. However, by mid-year, many districts experience a decline, particularly in places like Malappuram and Palakkad, where prices drop to as low as 866.07 and 1062.50, respectively, in October. The maximum price peaks in Kollam at 2155 in April, and the minimum price is observed in Malappuram and Palakkad in June. The state average starts at 1584.78 in January but decreases gradually through the months, reaching a low of 1353.70 in October, before recovering slightly to 1428.84 in December.

Detailed table is attached in appendix Table 4 - A.

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	1584.8	1588.6	1593.5	1572.6	1511.5	1466.8
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	1438.8	1427.8	1405.8	1353.7	1385.1	1428.8

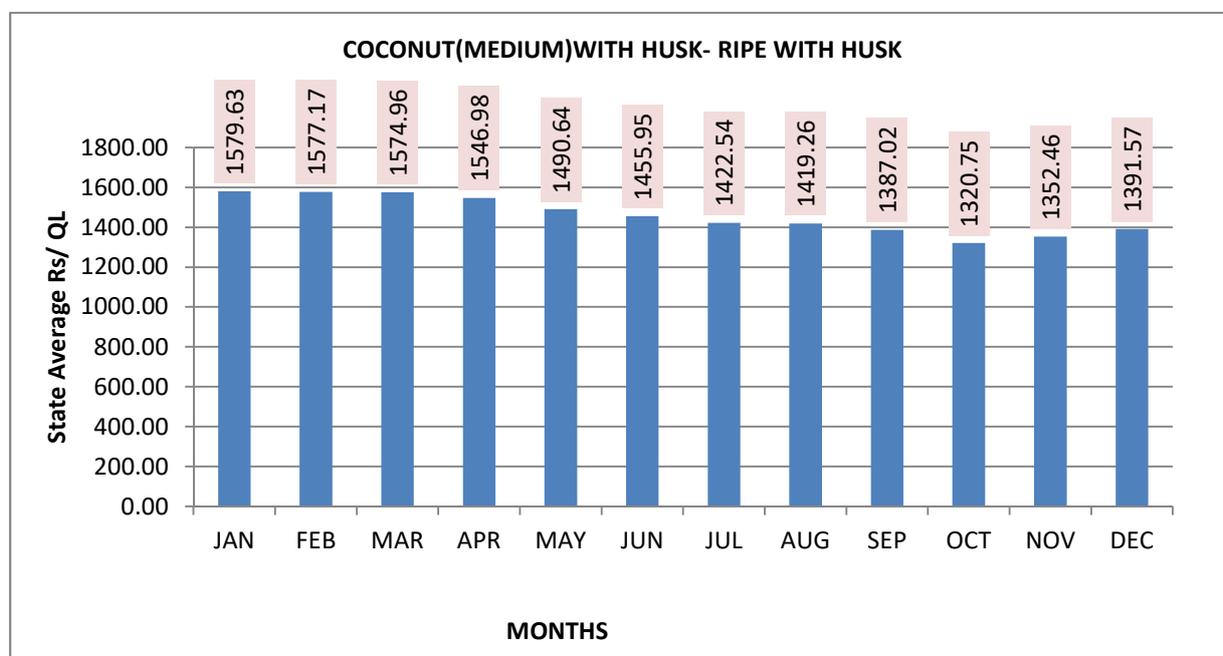

COCONUT (MEDIUM) RIPE WITH HUSK –₹/ 100 Nos.

The price of coconuts (medium, ripe with husk, 100 nos.) shows significant fluctuations across districts and months in Kerala. Coastal districts like Kollam and Alappuzha generally have higher prices, ranging between ₹1,900–₹2,100, while northern districts like Malappuram and Kannur record lower prices, often below ₹1,200. Idukki consistently has the highest prices, peaking at ₹2,300 in March–April. Prices tend to dip during the monsoon months (June–August) in most districts, likely due to increased supply. Thrissur, Palakkad, and Malappuram show the lowest prices, with Palakkad dropping to ₹1,062.50 in June.

Detailed table is attached in appendix Table 5 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	1579.63	1577.17	1574.96	1546.98	1490.64	1455.95
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	1422.54	1419.26	1387.02	1320.75	1352.46	1391.57

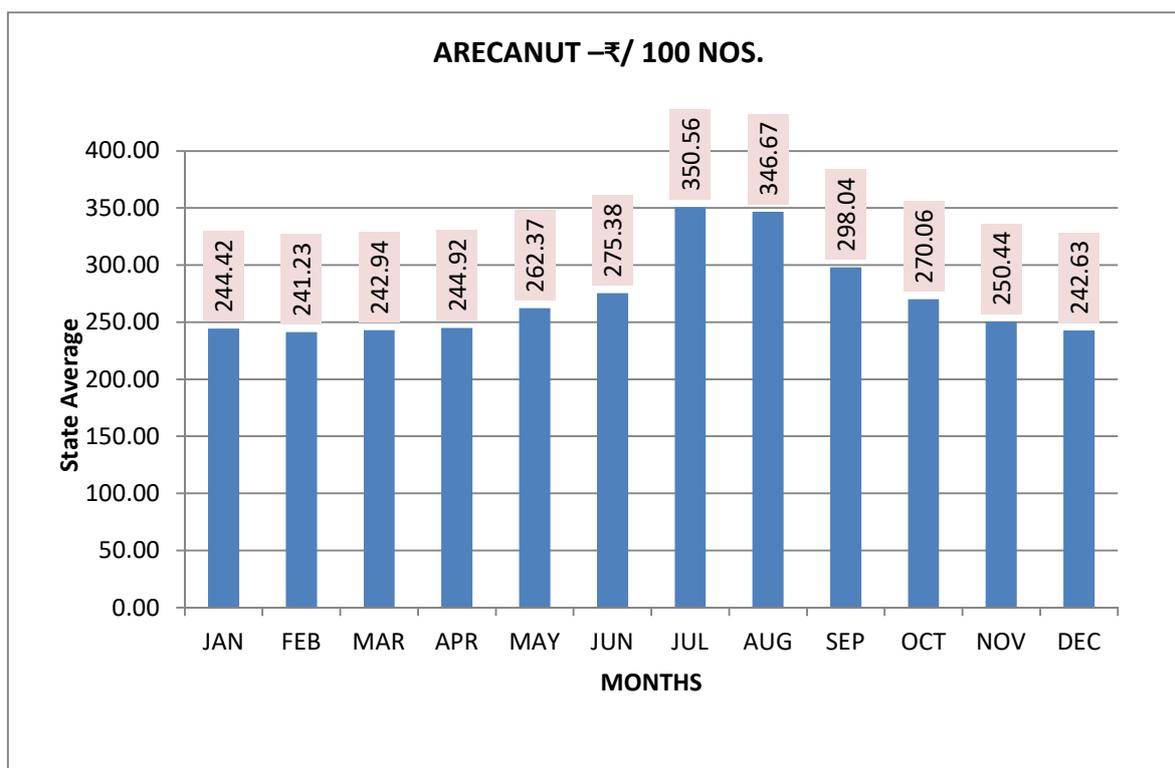

ARECANUT RIPE-100 NUMBERS-₹/ 100Numbers

The price of Arecanut (Ripe-100 Numbers) exhibits notable fluctuations throughout the year, with significant variations across different districts in Kerala. Prices tend to rise during certain months, such as May, June, and July, reaching peaks in some districts like Alappuzha and Kollam, where prices exceed 400 to 700 Rupees per 100 numbers. Conversely, during off-season months like January and February, prices often dip, with districts like Idukki and Thiruvananthapuram reporting the lowest prices, sometimes falling to around 120 Rupees. Detailed table is attached in appendix Table 6 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	244.42	241.23	242.94	244.92	262.37	275.38
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	350.56	346.67	298.04	270.06	250.44	242.63

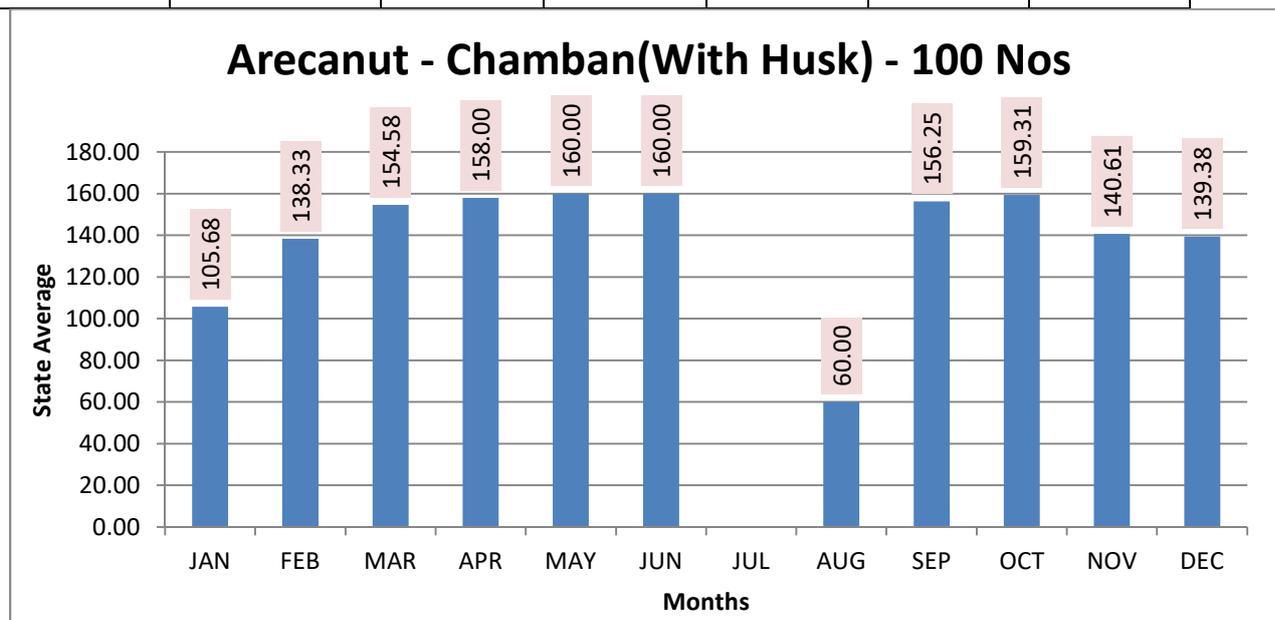

ARECANUT CHAMBAN WITH HUSK-₹/ 100Numbers

The price of Arecanut (Chali / Chamban) in Kerala shows notable fluctuations across districts and months in 2022. The highest prices were recorded in Kannur (₹265 in October) and Palakkad (₹175 in September), while the lowest prices were seen in Pathanamthitta (₹73.50 in January) and Idukki (₹38.75 in December). The state average price rose from ₹105.68 in January to a peak of ₹160 in May–June, before sharply dropping to ₹60 in August due to possible seasonal oversupply. Prices rebounded in September–October (₹156–₹159) but declined again towards the year-end. Wayanad showed significant volatility, with prices falling to ₹60 in August–September before recovering. Overall, Kannur and Palakkad had the most stable high prices, while Idukki and Pathanamthitta saw the lowest rates. Monsoon months (August) experienced the sharpest declines, likely due to increased harvest pressure.

Detailed table is attached in appendix Table 7 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	105.68	138.33	154.58	158	160	160
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	-	60	156.25	159.31	140.61	139.38

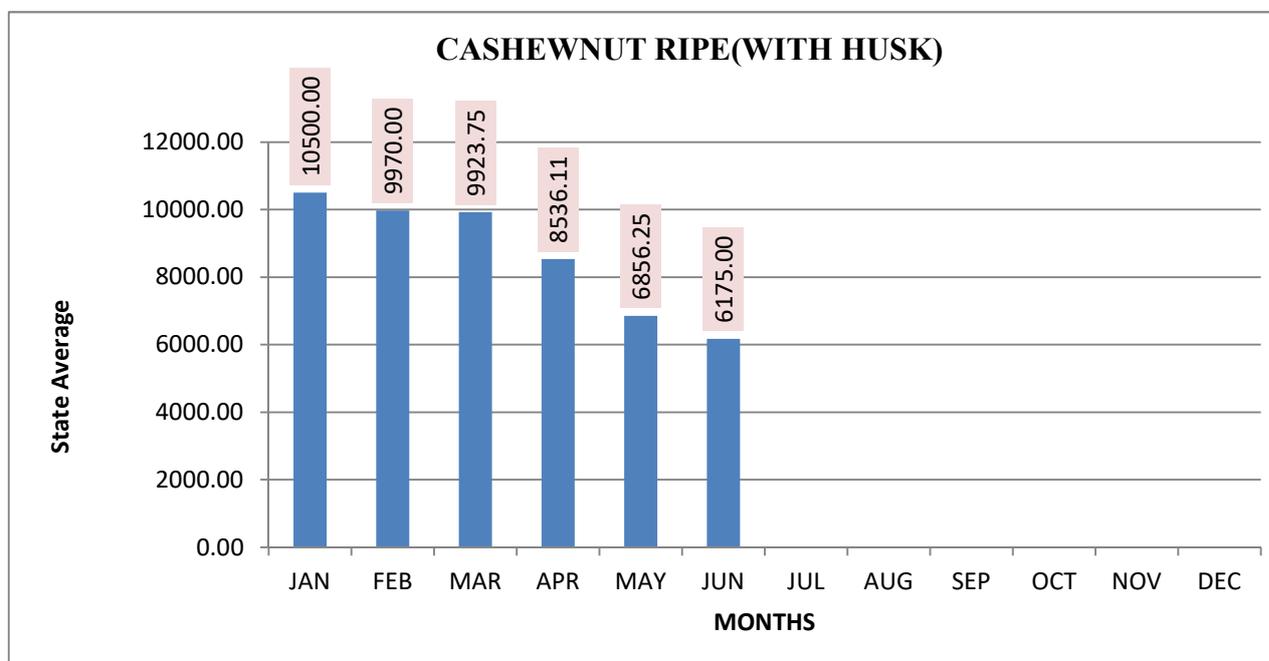

Cashewnut (Ripe with Husk) -₹/ Quintal

The price of Cashew (Ripe with Husk) shows significant fluctuations across various months and districts in Kerala. In January, prices are uniformly high at around 10,500 Rupees per 100 kg, but they gradually decline through the months, reaching the lowest point in June, with prices dropping to around Rs. 6,175/-. This decline is particularly notable in districts like Kozhikode, where prices dip below Rs.5,000/- in some months. Prices tend to peak again in the early months of the year, with the highest values recorded in districts like Kannur and Kasaragod, which stay around 10,500 Rupees.

Detailed table is attached in appendix Table 8 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	10500	9970	9923.8	8536.1	6856.3	6175
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	-	-	-	-	-	-

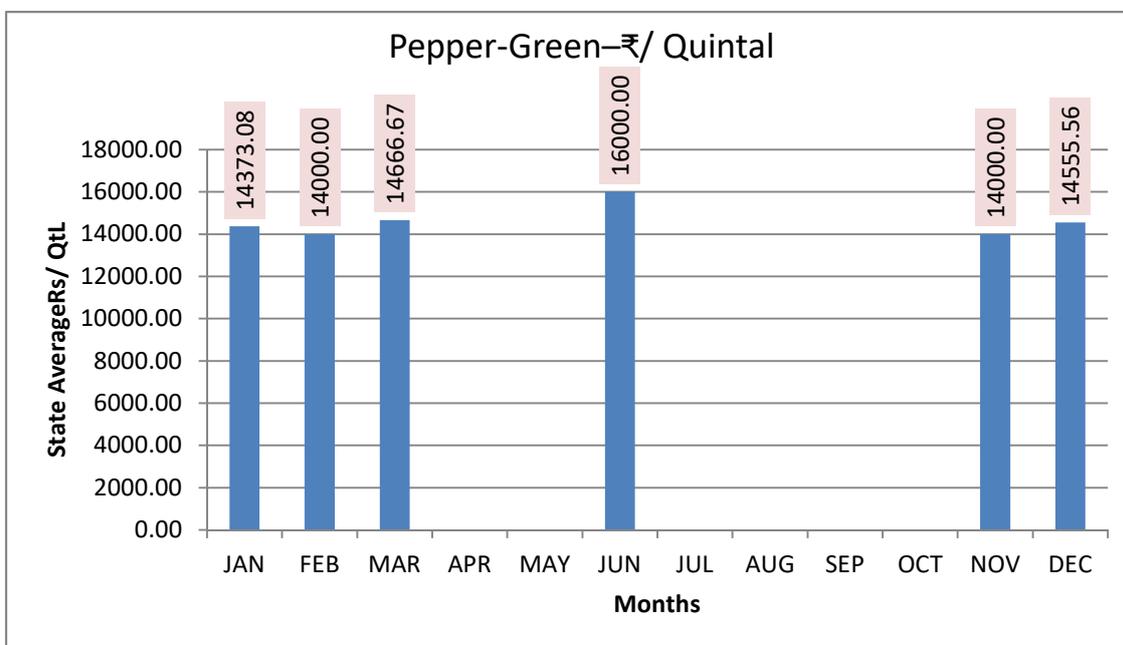

PEPPER-GREEN-₹/ Quintal

The price of Green Pepper shows noticeable fluctuations throughout the year, though the variations are relatively limited compared to other commodities. In January and March, the price is higher, with averages around 14,000 to 17,000 Rs. per 100 kg, while the price slightly drops in February to 14,000 INR. Interestingly, there are gaps in the data for several months, including April and May, with prices remaining stable around Rs.16,000/- when available. The most significant spike occurs in December, where the price jumps to Rs.23,000 in Thiruvananthapuram.

Detailed table is attached in appendix Table 9 – A.

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	14373	14000	14667			16000
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average					14000	14556

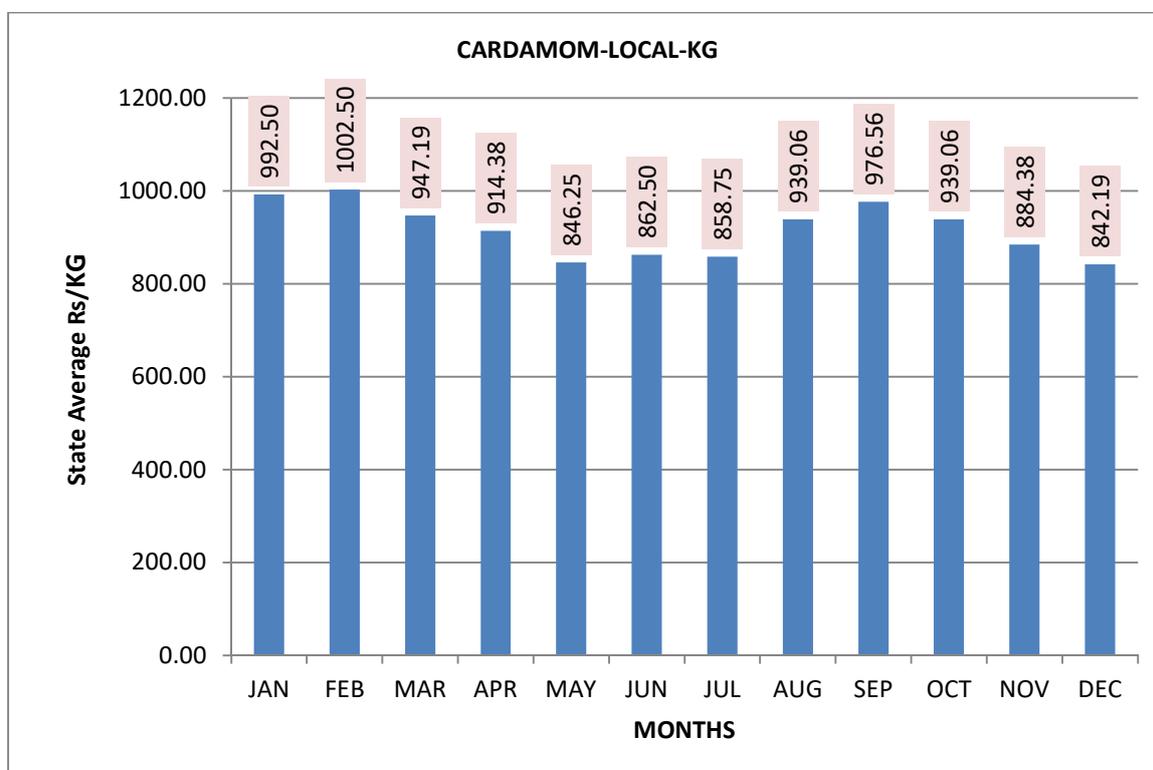

CARDAMOM-LOCAL-₹/ KG

The price of cardamom shows considerable fluctuation throughout the year, reflecting seasonal patterns and market conditions. In the beginning of the year, prices are higher, peaking at ₹1002.50 in February. As the months progress, prices generally decrease, reaching their lowest point in July at ₹858.75. This decline is likely due to seasonal variations in production and lower demand. However, there is a slight recovery in the later months, with prices rising again in August and September, before falling back in November and December.

Detailed table is attached in appendix Table 10 – A.

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	992.5	1002.5	947.19	914.38	846.25	862.5
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	858.75	939.06	976.56	939.06	884.38	842.19

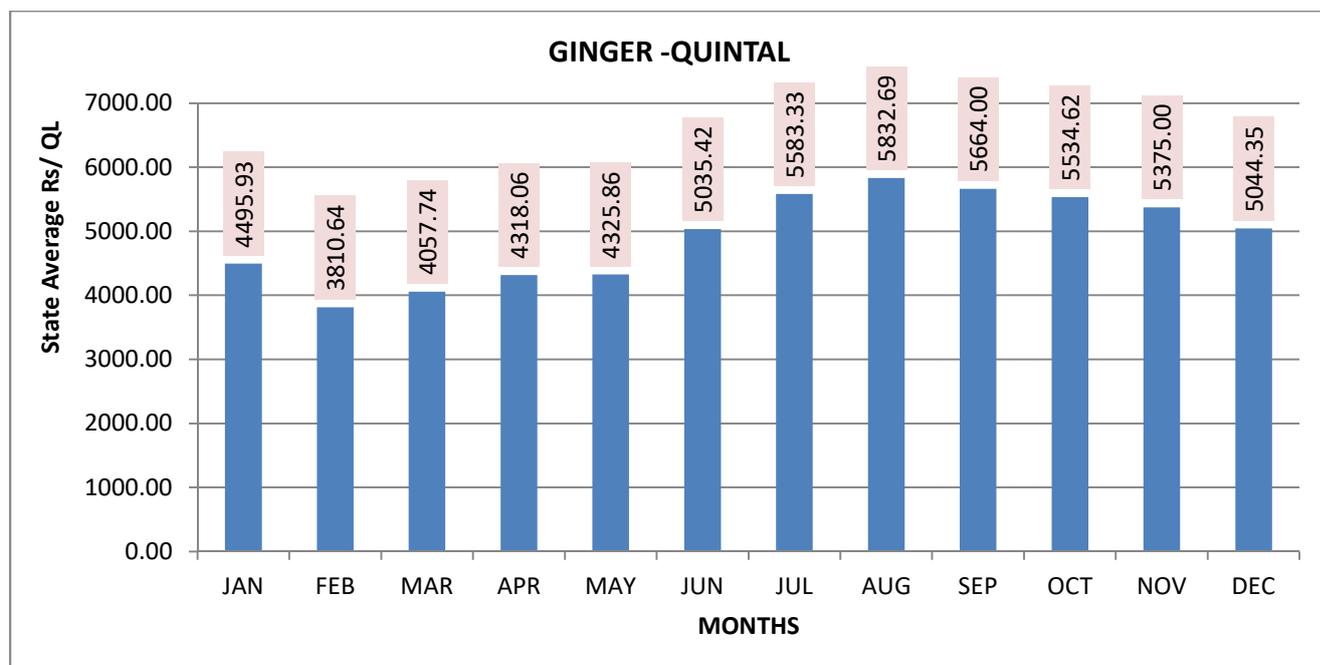

GINGER-₹/ Quintal

The price of ginger experiences notable fluctuations across the year, with significant changes observed from month to month. In January, the average price stands at ₹4495.93, but it drops sharply to ₹3810.64 in February, reflecting lower demand or seasonal production changes. Prices generally rise from March to July, peaking in July at ₹5583.33, which may be linked to higher demand or seasonal shortages. The price starts to decline again from August onwards, reaching ₹5044.35 by December. This fluctuation is influenced by factors like weather conditions, crop yield variations, and market demand. The highest prices are observed in districts like Kollam and Thiruvananthapuram, while the lowest prices appear in Wayanad and Palakkad.

Detailed table is attached in appendix Table 11 – A.

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	4495.9	3810.6	4057.7	4318.1	4325.9	5035.4
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	5583.3	5832.7	5664	5534.6	5375	5044.4

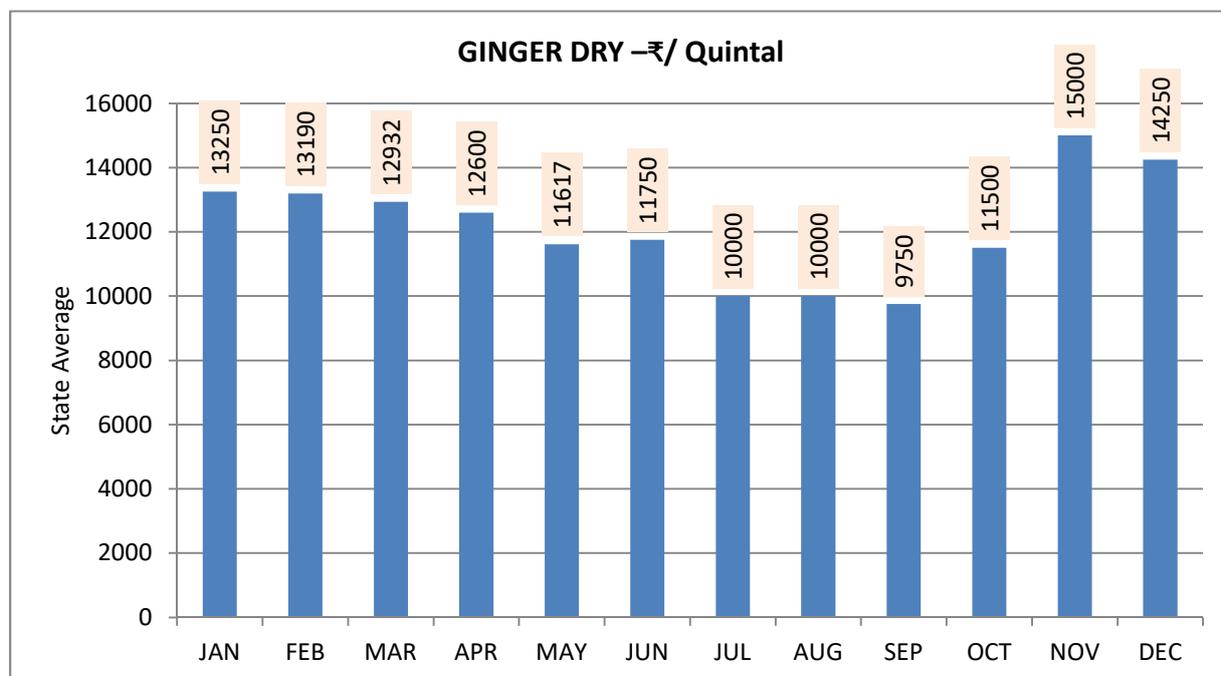

GINGER DRY –₹/ Quintal

The price of dry ginger shows considerable fluctuation throughout the year. In January, the average price is ₹13,250, and it remains relatively high through February at ₹13,190. Prices start to decline from March onwards, reaching a low of ₹10,000 in July and August. However, prices increase sharply in November to ₹15,000 and remain high in December, peaking at ₹14,250. For example, districts like Wayanad and Kozhikode show considerable price variations, with Wayanad's prices reaching as low as ₹9,000 in May and June but rising again towards the end of the year.

Detailed table is attached in appendix Table 12 – A.

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	13250	13190	12932	12600	11617	11750
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	10000	10000	9750	11500	15000	14250

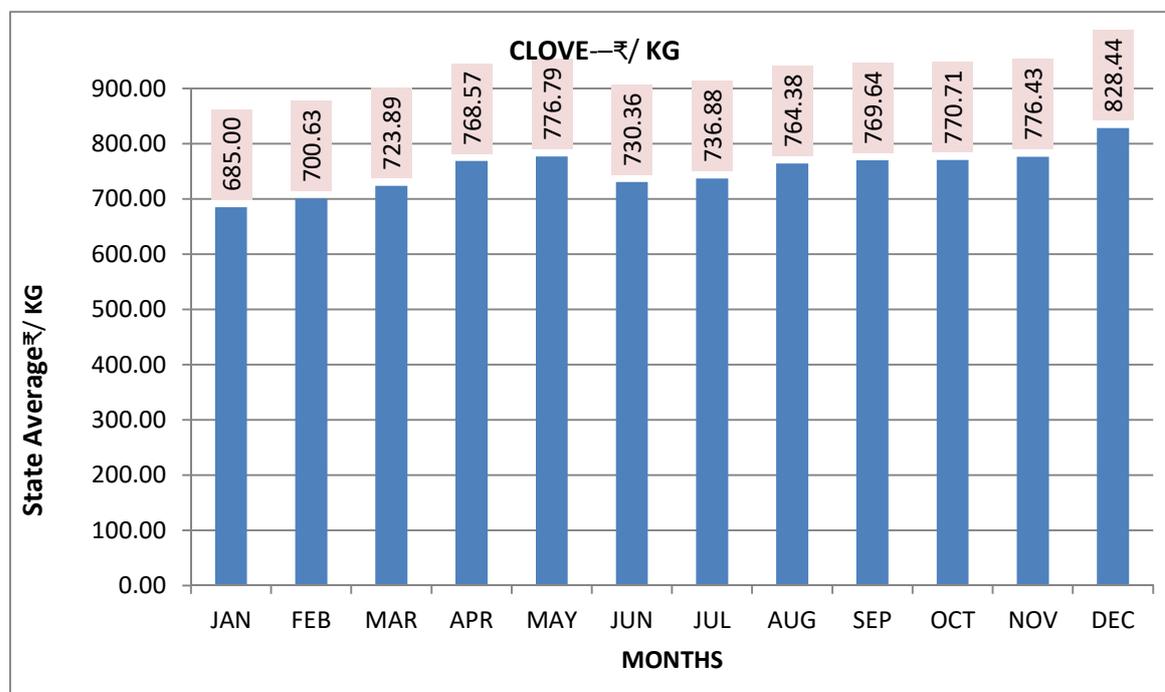

CLOVE-₹/KG.

The price of cloves exhibits noticeable fluctuations throughout the year, with the average price gradually increasing from January (₹685.00) to May (₹776.79). Prices reach a peak in April and May at ₹768.57 and ₹776.79, before experiencing a slight decline in June and July (₹730.36 and ₹736.88, respectively). The price then climbs again in November and December, with a significant spike to ₹828.44 in December, possibly due to higher demand during the festive season or tighter supply. Regional price variations also occur, with some districts like Idukki and Kozhikode showing slightly higher prices, while Palakkad sees a sharp increase in December.

Detailed table is attached in appendix Table 13 – A.

The table and graph given below shows the monthly state average price.

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	685	700.63	723.89	768.57	776.79	730.36
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	736.88	764.38	769.64	770.71	776.43	828.44

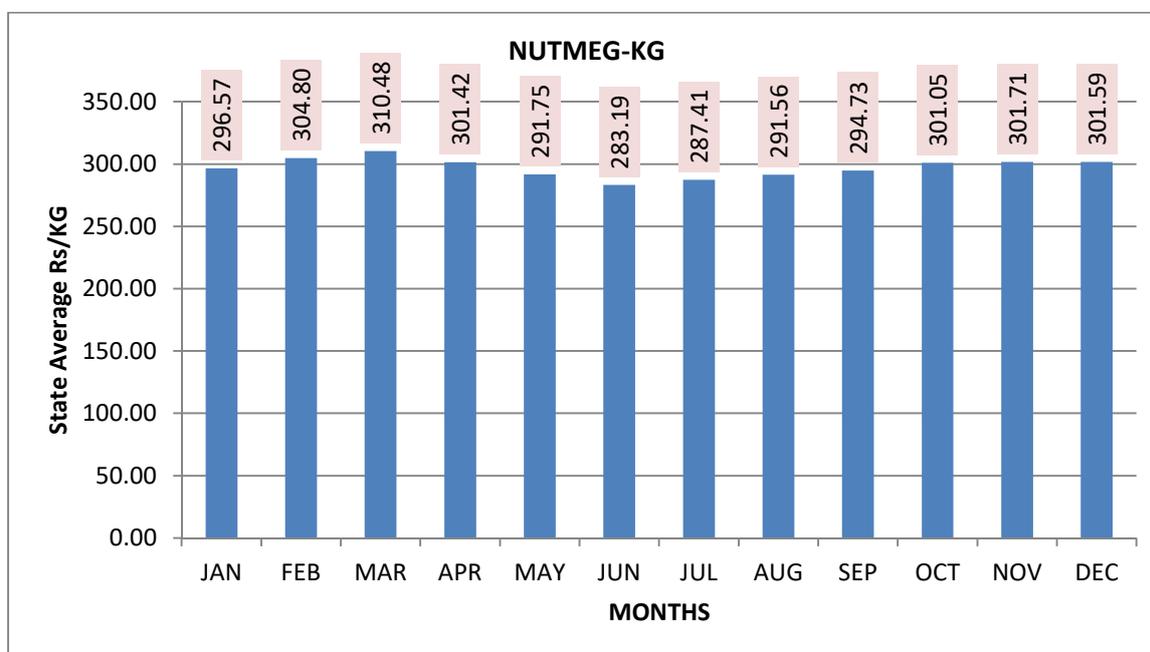

NUTMEG-₹/KG

The price of nutmeg shows a clear fluctuation throughout the year, with the average price starting at ₹296.57 in January and gradually increasing to a peak of ₹310.48 in March. From April to June, prices begin to decrease, reaching their lowest point of ₹283.19 in June. However, prices rise again in July and continue to increase through October, with a slight dip in September. The highest prices are seen in Malappuram and Kozhikode, while Thiruvananthapuram and Kollam tend to have lower prices. In December, the prices stabilize around ₹301.59.

Detailed table is attached in appendix Table 14 – A.

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	296.57	304.8	310.48	301.42	291.75	283.19
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	287.41	291.56	294.73	301.05	301.71	301.59

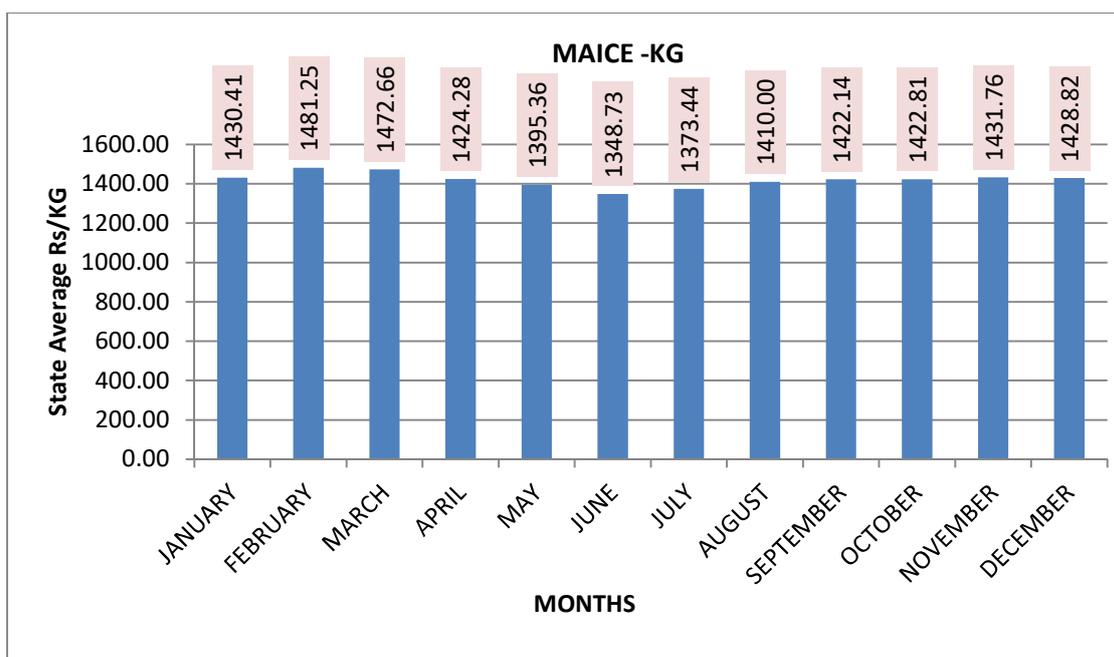

MAICE ₹/KG

The price of maice shows significant fluctuations throughout the year. Starting at ₹1,430.41 in January, the price increases steadily in February to ₹1,481.25 and remains relatively high during March at ₹1,472.66. From April to June, the price decreases to a low of ₹1,348.73. There is a slight rebound in July and August, with prices rising again, reaching ₹1,410.00. By October and November, prices stabilize around ₹1,422, before slightly dipping in December to ₹1,428.82. Regional price variations also occur, with Kozhikode and Palakkad showing some of the highest prices, while districts like Kollam and Thiruvananthapuram tend to have lower prices.

Detailed table is attached in appendix Table 15 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	1430.41	1481.25	1472.66	1424.28	1395.36	1348.73
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	1373.44	1410	1422.14	1422.81	1431.76	1428.82

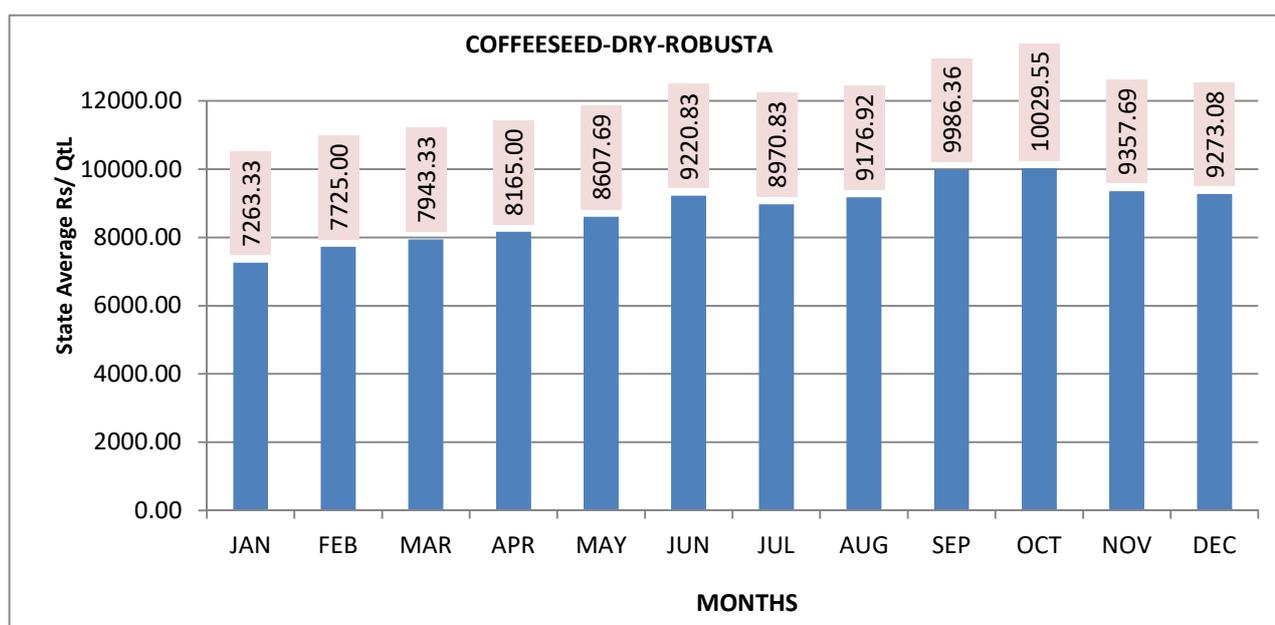

COFFEE SEED-ROBUSTA-₹/QUINTAL

The price of Robusta coffee seeds experiences notable fluctuations throughout the year. In January, the state average is ₹7,263.33, and it gradually increases, reaching ₹7,725.00 in February. Prices continue to rise through March and April, peaking at ₹8,607.69 in May. The price stays relatively high in June and July, averaging ₹9,220.83 and ₹8,970.83, respectively. A slight dip occurs in August, but by September, prices surge again to ₹9,986.36. The prices slightly decrease during October and November, reaching ₹9,357.69, before stabilizing in December at ₹9,273.08. Regional variations are also significant, with districts like Palakkad reaching prices as high as ₹13,150.00 in December, while Pathanamthitta and Thiruvananthapuram have lower prices,

Detailed table is attached in appendix Table 16 – A.

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	7263.33	7725	7943.33	8165	8607.69	9220.83
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	8970.83	9176.92	9986.36	10029.6	9357.69	9273.08

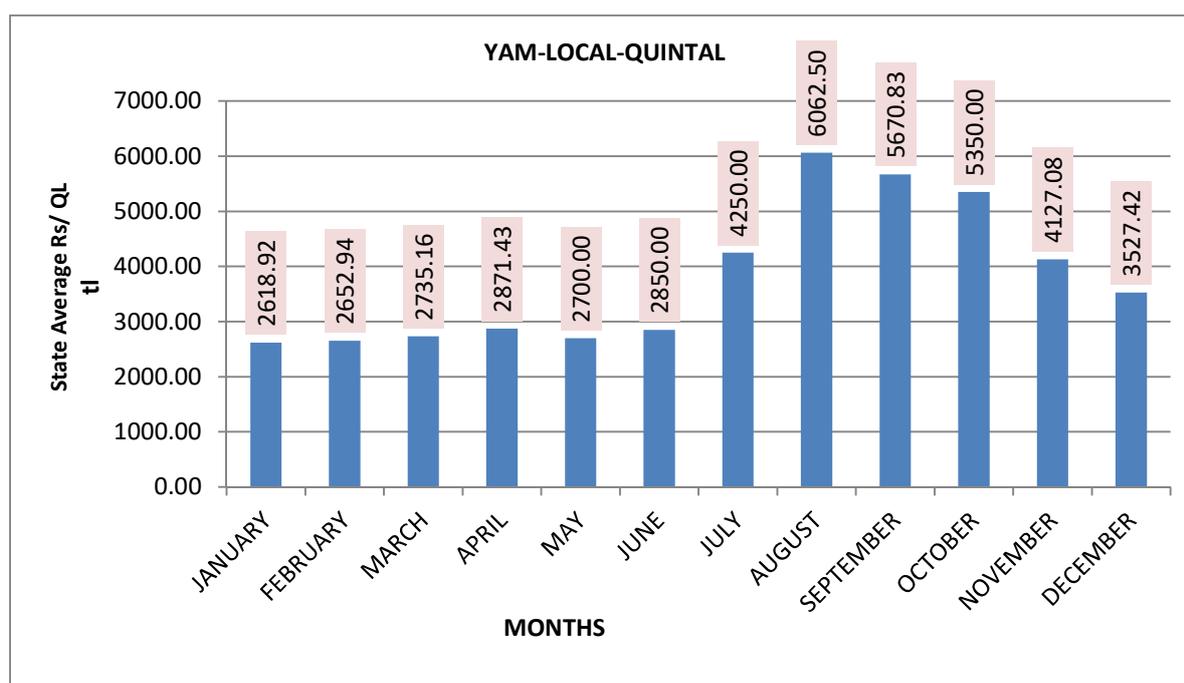

YAM-LOCAL-₹/QUINTAL

The price of local yam experiences considerable fluctuation throughout the year. Starting at an average of ₹2,618.92 in January, prices gradually increase in February and March, reaching ₹2,735.16 by the end of March. The price sees a more significant rise in April, reaching ₹2,871.43, before dipping to ₹2,700.00 in May. The price stays relatively stable in June and July at ₹2,850.00, but then sharply rises to ₹4,250.00 in July. A notable spike occurs in August, where the average price soars to ₹6,062.50, before falling to ₹5,350.00 in October. The year ends with a slight decrease in November to ₹4,127.08, and a further dip to ₹3,527.42 in December. Regional price differences are prominent, with districts like Kollam and Alappuzha seeing significant peaks, particularly in August, while areas like Wayanad and Kottayam experience lower prices throughout the year.

Detailed table is attached in appendix Table 17 – A.

The table and graph given below shows the monthly state average price

ELEPHANTFOOT YAM-LOCAL QUINTAL

The price of Elephant Foot Yam (Local Quintal) across various districts in Kerala shows significant fluctuations throughout the year. The highest prices are observed in Alappuzha during June (₹4100.00) and July (₹3750.00), while the lowest prices are consistently seen in Wayanad, particularly in February (₹1050.00) and March (₹1029.17). The state average price gradually increases from January (₹1804.17) to June (₹2113.46), peaking in July (₹2816.22), and then gradually declines towards the end of the year. Districts like Pathanamthitta and Alappuzha frequently record higher prices, while Wayanad and Malappuram tend to have lower prices. The data indicates a seasonal trend, with prices rising during the mid-year months.

Detailed table is attached in appendix Table 18 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	1804.17	1841.94	1874.56	1912.95	1950.64	2113.46

BRINJAL-LOCAL -₹/ Quintal

The price of local brinjal shows significant fluctuation throughout the year across various districts. Prices tend to peak in January and February, with the state average reaching 4544.44 and 4431.25 respectively, reflecting higher demand or limited supply at the start of the year. By March, prices decline to an average of Rs.3711.11, continuing a gradual dip until reaching their lowest point in December, at 2125.00 in some regions. Thiruvananthapuram consistently maintains a relatively high price, while regions like Kollam and Kottayam experience sharp drops in prices during certain months. Overall, the price trend reveals a clear seasonal cycle with significant variation depending on the time of year and location.

Detailed table is attached in appendix Table 20 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	4544.44	4431.25	4356.25	3711.11	3805.56	3806.25

CUCUMBER-₹/QUINTAL

The State average price showed notable fluctuations during the year. In January, the average stood at a relatively high level of 2060.53, followed by a sharp decline in February (1483.52) and March (1350), indicating a significant fall in prices during the early months. Prices recovered moderately in April (1510.96) but again softened in May (1448.89) before showing a marginal increase in June (1482.81). During the second half of the year, the State average remained largely stable in July (1474.19) but rose sharply in August to 2034.56, reflecting a strong upward movement. Thereafter, prices moderated in September (1765.76) and increased again in October (1888.38). In the final months, the average showed a slight decline and stabilisation, registering 1772.79 in November and 1771.71 in December. Overall, the trend indicates pronounced volatility with a mid-year recovery and relatively stable prices towards the end of the year.

Detailed table is attached in appendix Table 23 - A

MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	1474.19	2034.56	1765.76	1888.38	1772.79	1771.71

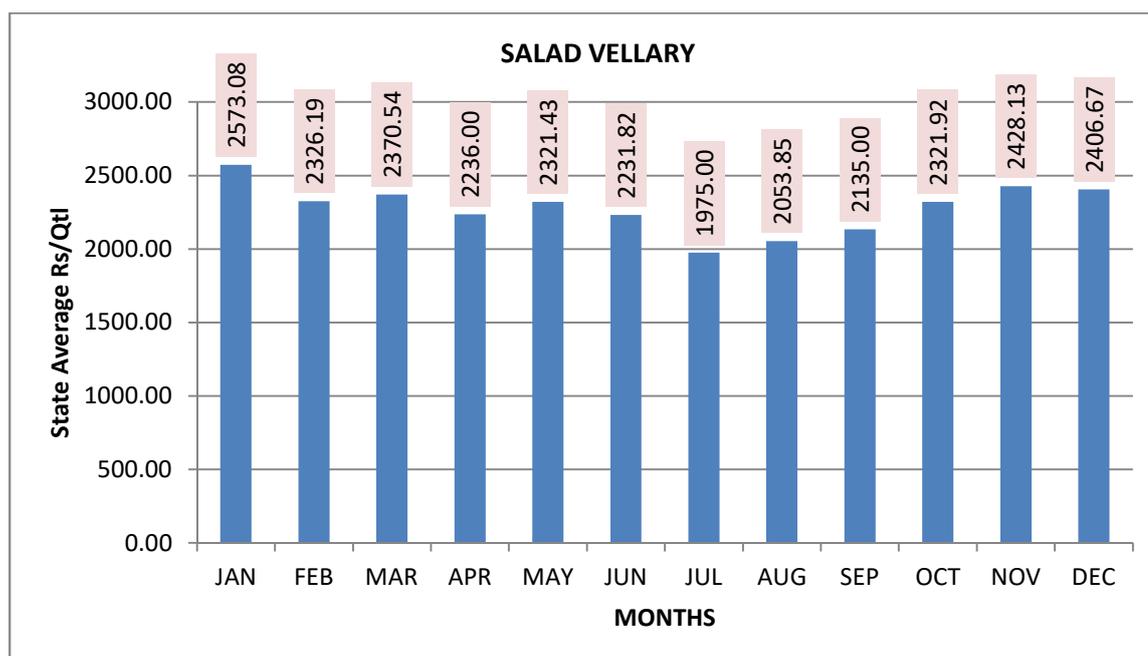

SALAD VELLARY-₹/ QUINTAL

The price of "Salad Vellary" (likely a type of cucumber or melon) demonstrates significant fluctuation across districts and months, revealing potential disparities in market dynamics and agricultural practices. For instance, Thiruvananthapuram shows a peak price of ₹4875 in January, sharply contrasting with other districts. Conversely, prices in some regions like Wayanad and Idukki remain absent, possibly indicating limited cultivation or data collection. The wide ranges between maximum and minimum prices, such as the difference of ₹3675 in Thiruvananthapuram. Furthermore, the State Average line highlights an overall trend of price variation throughout the year, with a general decline from January to September, followed by a slight increase towards December.

Detailed table is attached in appendix Table 24 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	2573.08	2326.19	2370.54	2236	2321.43	2231.82
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	1975	2053.85	2135	2321.92	2428.13	2406.67

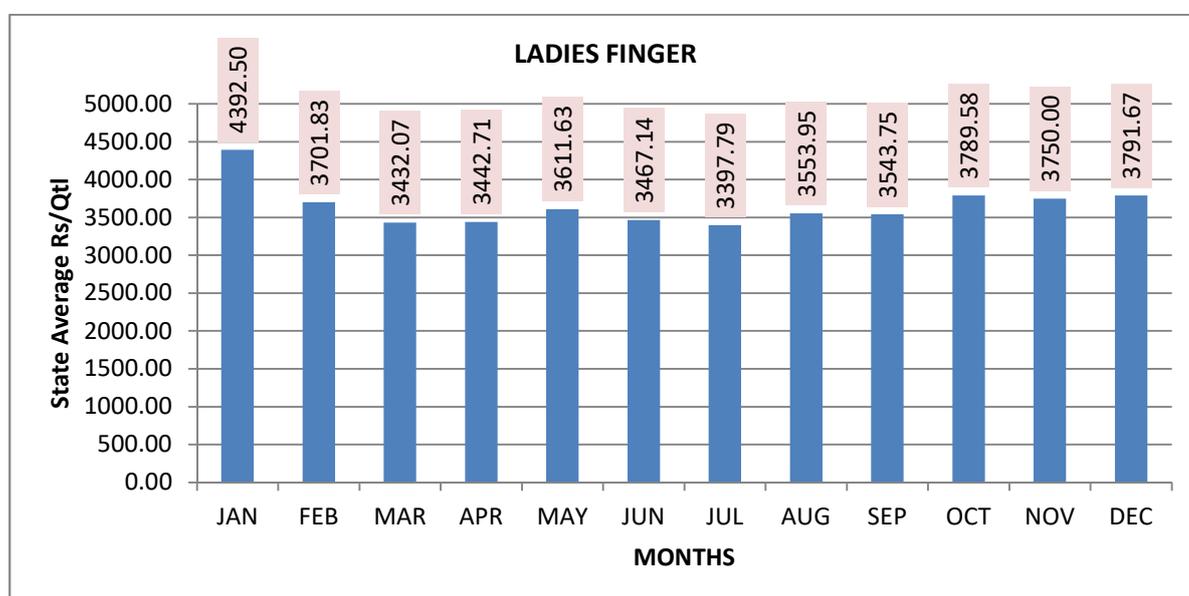

LADIES FINGER LOCAL - ₹/QUINTAL

The price of "Ladies Finger Local" exhibits significant fluctuation across districts and throughout the year. For instance, while Thiruvananthapuram shows a relatively narrow range of prices, other districts like Ernakulam see prices jump from ₹3783 in January to ₹5000 by December. The state average line illustrates a general trend of lower prices in the middle of the year, with a gradual increase towards the beginning and end. The difference between the maximum and minimum prices highlights the potential impact these factors can have on market values.

Detailed table is attached in appendix Table 25 - A

The table and graph given below shows the monthly state average price

PUMPKIN-LOCAL--₹/QUINTAL

The price of pumpkins shows noticeable fluctuations throughout the year across various districts. In January, prices are higher, with the state average at 1964.29, but they drop significantly by May, reaching the lowest point of 1564.69. Prices generally remain relatively stable during the middle of the year, with slight increases in June and July. However, by August, there is a marked increase, with prices rising again towards the end of the year. The highest prices are observed in months like February and October, while prices dip in the spring and early summer months.

Detailed table is attached in appendix Table 27 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	1964.29	1984.52	1791.45	1702.66	1564.69	1583.04
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	1593.52	1640.44	1807.44	1800.6	1888.14	1843.4

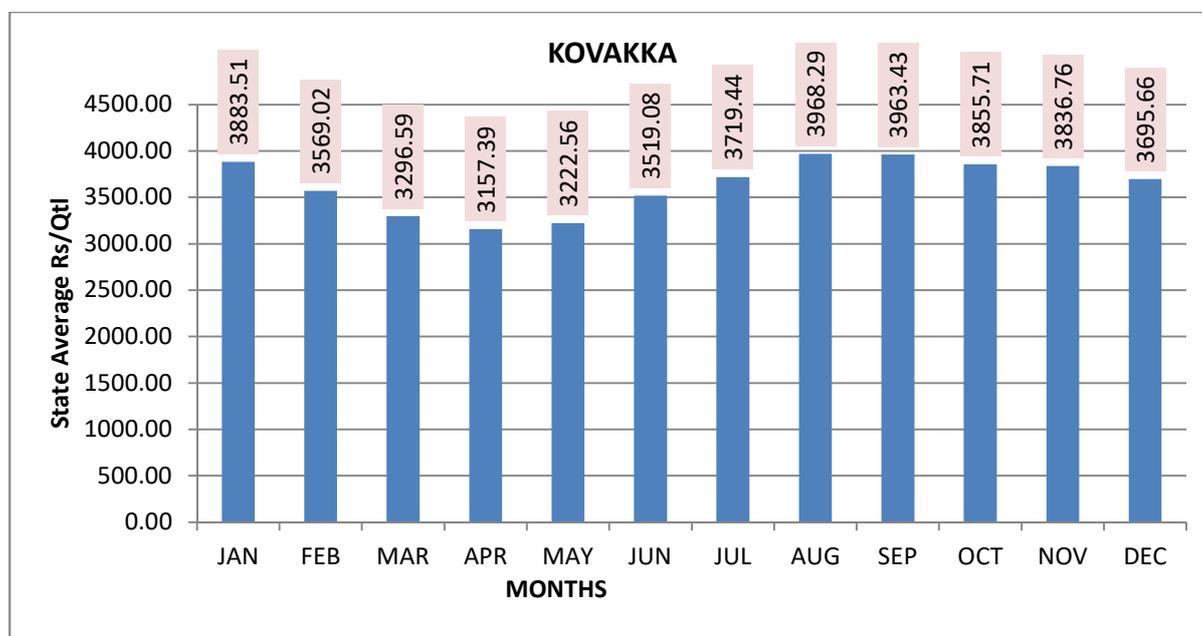

KOVAKKA-₹/QUINTAL

The price of Kovakka experiences significant fluctuations throughout the year across various districts, with noticeable peaks and dips. In January, prices are higher, with the state average at 3883.51, and they gradually decrease until April. By mid-year, prices tend to rise again, peaking around August and September, where they hover just below 4000.00. Notably, the highest prices are seen in Kollam, which peaks at 6200.00 in September, while the lowest prices are typically seen in the beginning of the year, particularly in Thiruvananthapuram and other districts, where prices can dip to around 1700.00.

Detailed table is attached in appendix Table 28 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	3883.51	3569.02	3296.59	3157.39	3222.56	3519.08
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC

BITTERGOURD--₹/QUINTAL

The price of bitter gourd shows significant fluctuations throughout the year, reflecting seasonal changes and varying demand across districts. In January, the prices are relatively high, with the state average at 5727.55, but they decrease steadily in the following months, reaching their lowest point in June and July, around 4851.39. Prices then begin to rise again, peaking in October at 5558.54, before slightly dropping in December. The highest prices are observed in Kollam, which peaks at 8683.33 in January, while the lowest prices are recorded in Wayanad and Malappuram, where prices can dip as low as 1500.00.

Detailed table is attached in appendix Table 29 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	5727.55	5068.27	4706.94	4654.72	5056.4	4862.16
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	4851.39	5032.86	5248.75	5558.54	5482.5	4986.36

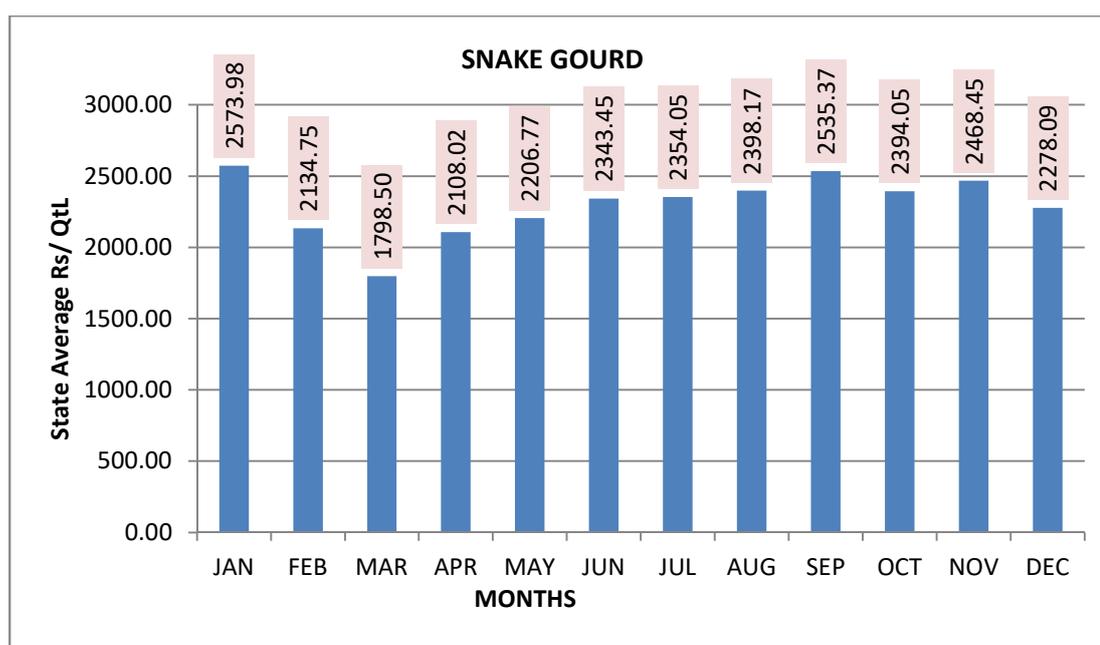

SNAKE GOURD-₹/QUINTAL

The price of Snake guard in Kerala exhibits notable fluctuations across districts and months, with the highest prices recorded in Kannur (₹4000.00 in August and November) and Kozhikode (₹3600.00 in December). The lowest prices were observed in Malappuram (₹756.25 in March and ₹1262.50 in December). Prices generally peak during the mid to late months of the year, particularly in August and November, likely due to seasonal demand or supply constraints. The state average remains relatively stable, ranging between ₹1798.50 (March) and ₹2573.98 (January). Districts like Kollam and Alappuzha show significant price increases during certain months, while others like Idukki have no data, making their trends unclear.

Detailed table is attached in appendix Table 30 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	2573.98	2134.75	1798.5	2108.02	2206.77	2343.45

State Average	2354.05	2398.17	2535.37	2394.05	2468.45	2278.09

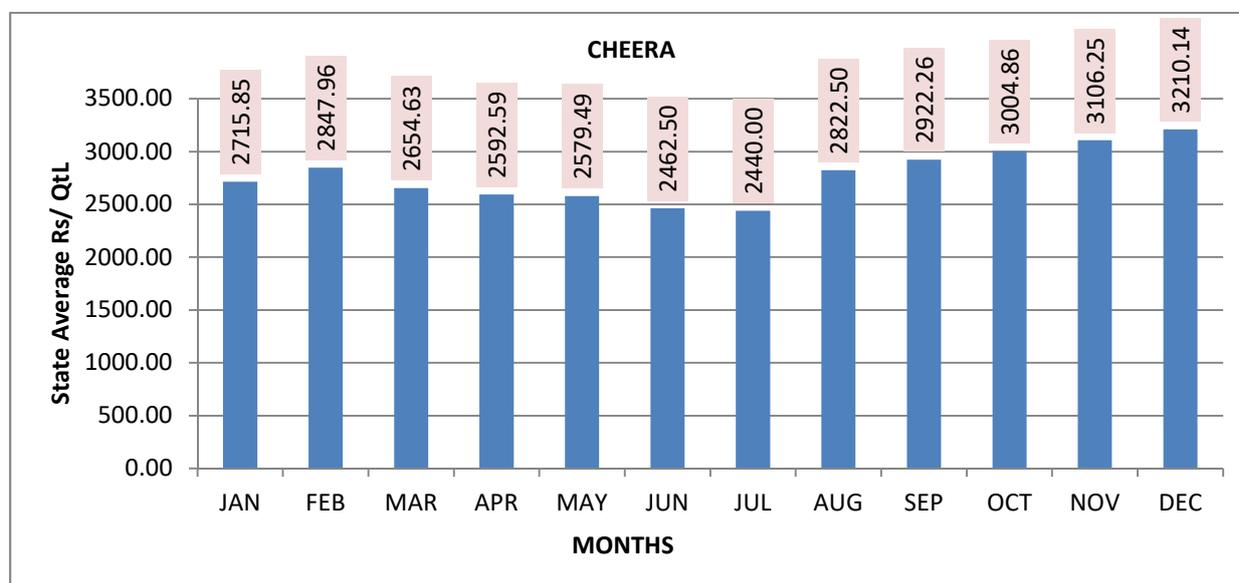

CHEERA-₹/QUINTAL

The price of Cheera (amaranth) shows notable fluctuations throughout the year, with variations across different months. In January, the state average starts at 2715.85 and gradually rises to 3210.14 by December. Prices peak during February and November, reaching 2847.96 and 3106.25, respectively, while the lowest prices occur in June, dipping to 2462.50. Regional differences also contribute to the price shifts, with districts like Alappuzha and Kollam seeing higher prices compared to areas like Malappuram and Ernakulam. Seasonal factors, availability, and local demand likely influence these changes, with prices rising in the middle months before stabilizing towards the year's end.

Detailed table is attached in appendix Table 31 - A.

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	2715.85	2847.96	2654.63	2592.59	2579.49	2462.5

GREEN CHILLI-₹/QUINTAL

The price of green chilli demonstrates significant fluctuations throughout the year, with noticeable peaks and troughs in different months. Starting in January, the state average is relatively moderate at 6527.50, but prices begin to rise sharply in February and March, peaking at 7938.89. Prices then remain relatively high through April, before dipping slightly in May to 6588.46. The highest recorded prices are seen in Kollam, where they reach an impressive 18,360 in February. In contrast, the lowest prices occur in Wayanad, where they drop to around 2,600 in January and remain lower throughout the year. By mid-year (June and July), the state average reaches 7182.61 and 8040.22. The year ends with a steady decrease, with December prices averaging 6823.91.

Detailed table is attached in appendix Table 32 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	6527.5	7863.04	7938.89	7596.15	6588.46	7182.61
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	8040.22	8233.33	7716	7454	7227.08	6823.91

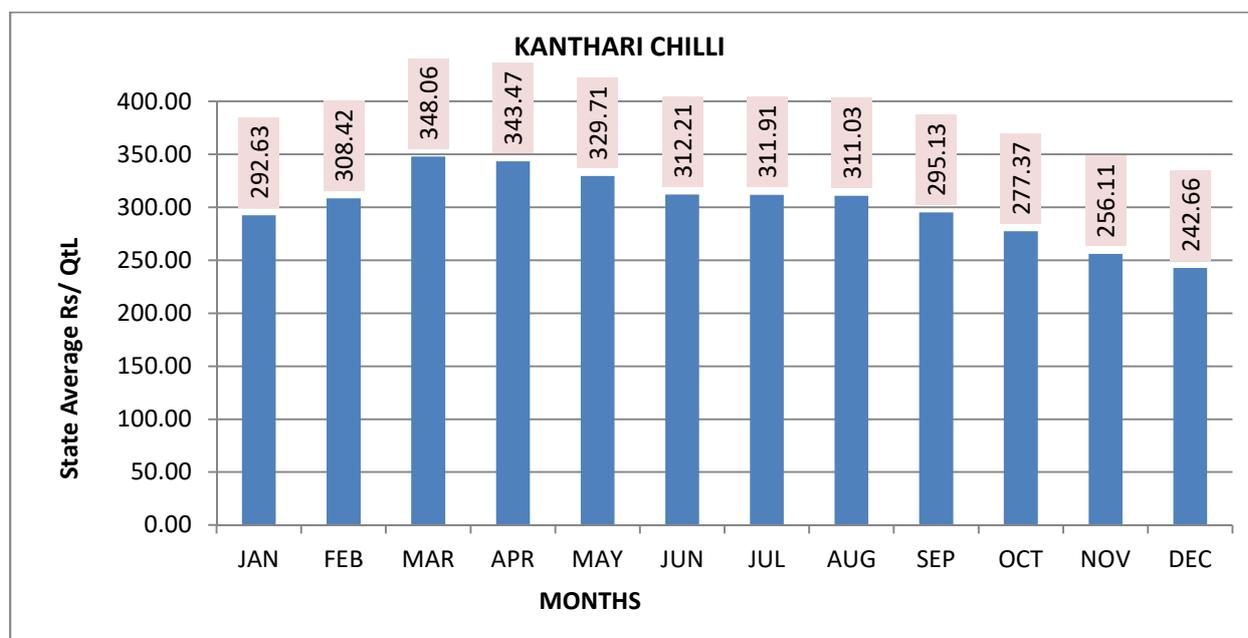

KANTHARI CHILLI-₹/KG.

The price of Kanthari chilli exhibits some fluctuation throughout the year, with noticeable peaks and dips. The state average starts at Rs.292.63 per kg in January and gradually decreases to 242.66 Rs per kg in December. Prices are highest in March and April, reaching Rs.348.06 and Rs.343.47, respectively. Conversely, prices drop in October and November, reaching their lowest point at 256.11 Rs per kg and 242.66 Rs per kg. Regionally, Thiruvananthapuram maintains a stable price of 400 Rs per kg throughout the year, while districts like Kollam and Kottayam show more variation, reflecting local supply and demand dynamics.

Detailed table is attached in appendix Table 33 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	292.63	308.42	348.06	343.47	329.71	312.21
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	311.91	311.03	295.13	277.37	256.11	242.66

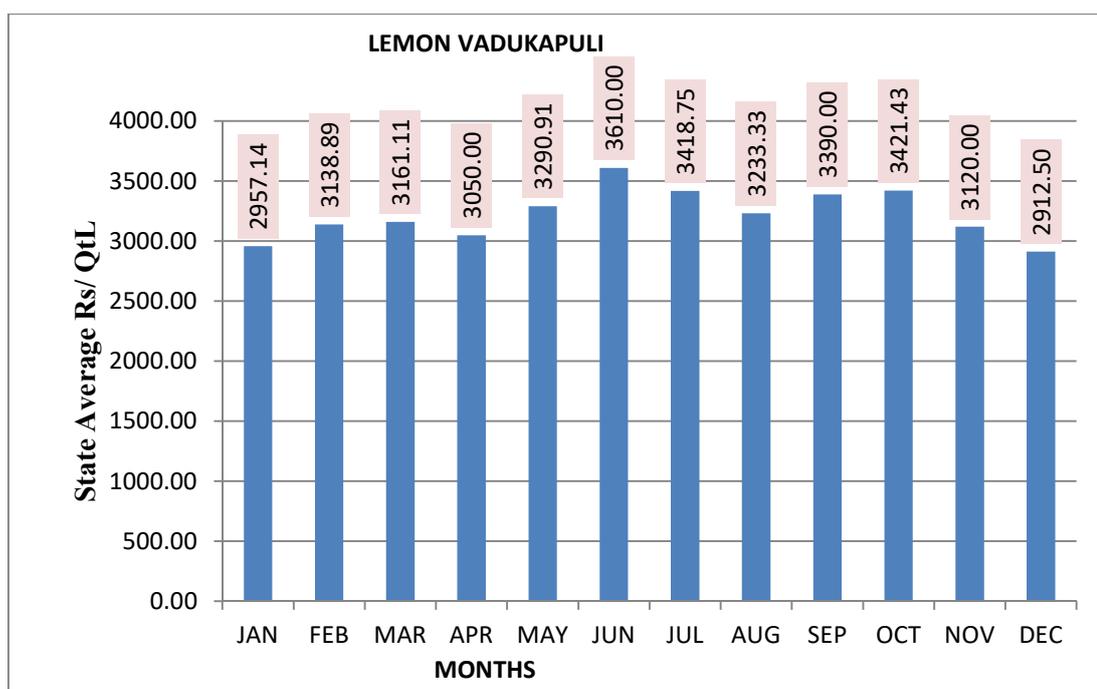

LEMON-VADUKAPULI-₹/QUINTAL

The price of Lemon-Vadukapuli shows significant fluctuations, with the highest prices consistently recorded in Kollam, peaking at ₹5500.00 in September. In contrast, Wayanad maintains the lowest price throughout the year at a steady ₹1200.00. The state average fluctuates moderately, ranging from ₹2912.50 (December) to ₹3610.00 (June), reflecting seasonal variations. Pathanamthitta also shows notable price trends, with prices declining gradually from ₹5100.00 in January to ₹3500.00 in August. Overall, the data highlights stark regional disparities, with Kollam and Pathanamthitta experiencing higher prices, while Wayanad remains consistently low.

Detailed table is attached in appendix Table 34 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	2957.14	3138.89	3161.11	3050	3290.91	3610

State Average	3418.75	3233.33	3390	3421.43	3120	2912.5

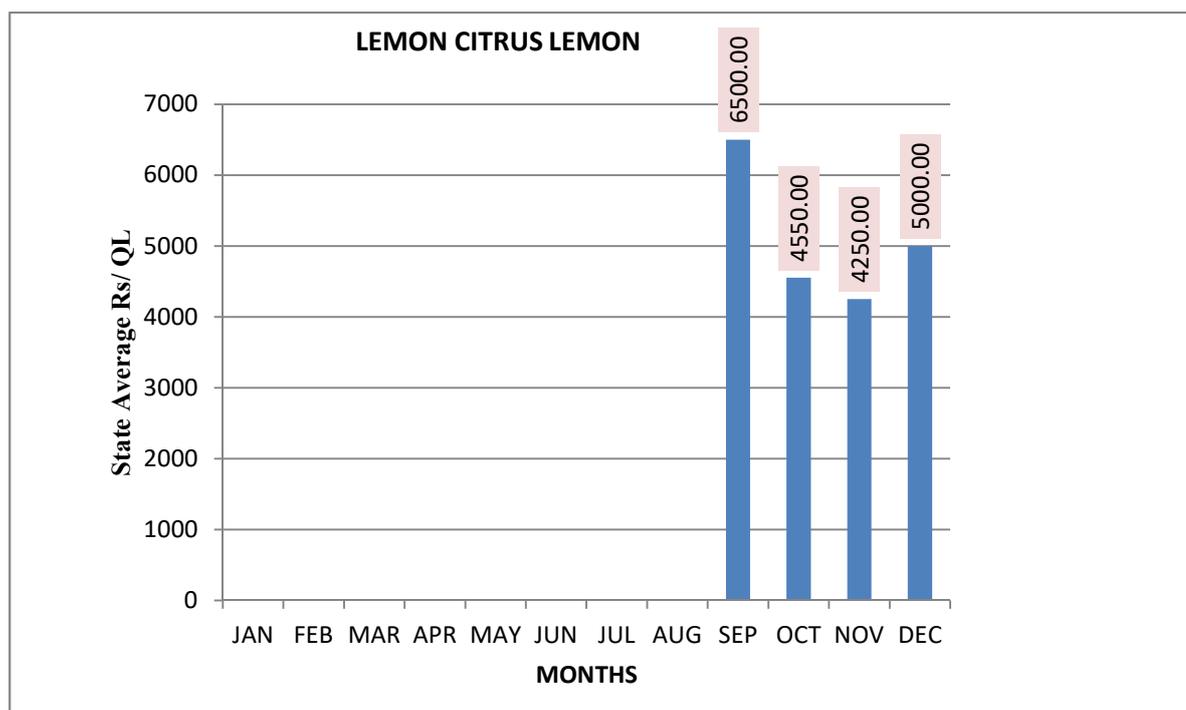

LEMON-CITRUS LEMON-₹/QUINTAL

The price data for Lemon Citrus Lemon-Quintal in Kerala is limited to the latter half of the year, with significant fluctuations observed from September to December. Prices peaked in September at ₹6,500.00 (Palakkad), followed by a sharp decline to ₹5,600.00 in October and ₹5,000.00 in November and December. Wayanad entered the market in November and December with a consistently lower price of ₹3,500.00, contributing to the minimum price. The state average reflects volatility, dropping from ₹6,500.00 in September to ₹4,250.00 in November before rising slightly to ₹5,000.00 in December. The stark contrast between Palakkad's higher prices and Wayanad's lower rates suggests regional supply disparities, though sparse data for most districts limits a comprehensive analysis. Overall, prices trend downward post-September, with temporary stabilization in December.

Detailed table is attached in appendix Table 35 - A

The table and graph given below shows the monthly state average price

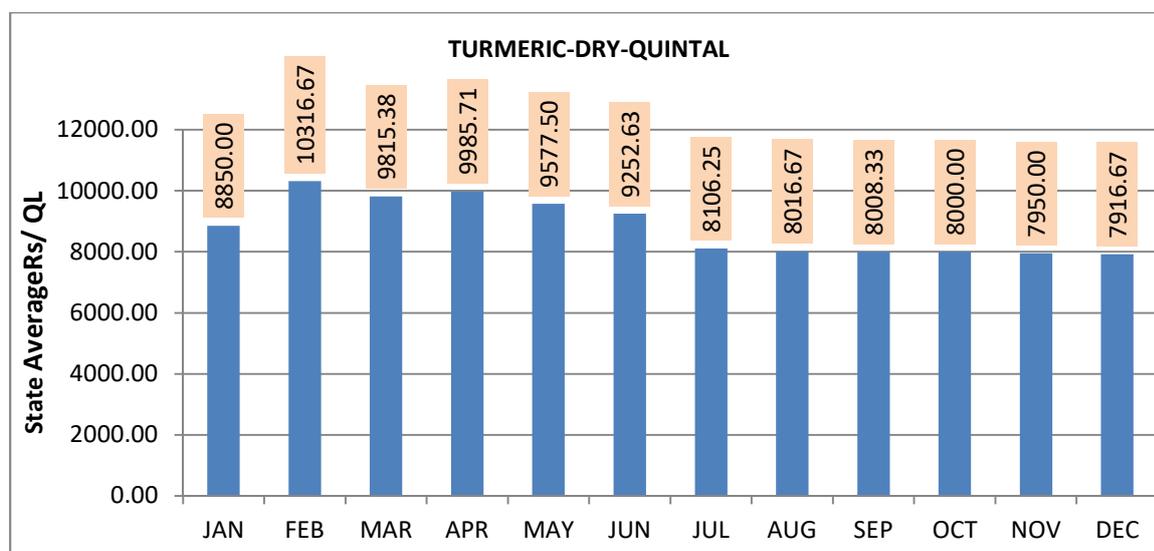

TURMERIC-DRY –₹/QUINTAL

The State average price exhibited a generally declining trend over the year. Prices increased from 8850.00 in January to a peak of 10316.67 in February, after which a downward movement was observed in March (9815.38). A marginal recovery occurred in April (9985.71), but prices again softened in May (9577.50) and June (9252.63). The decline became more pronounced during the second half of the year, with the State average falling to 8106.25 in July and remaining relatively stable around the 8000 level from August to October. In the final months, prices continued to ease slightly, registering 7950.00 in November and 7916.67 in December. Overall, the data indicate a steady easing of prices after the early-year peak, with relative stability at lower levels towards the end of the year.

Detailed table is attached in appendix Table 36 – A

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	3792.91	4101.01	4825.35	5422.9	5457.75	5836.03
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	5432.5	5535.92	5250	4678.82	4134.86	3942.96

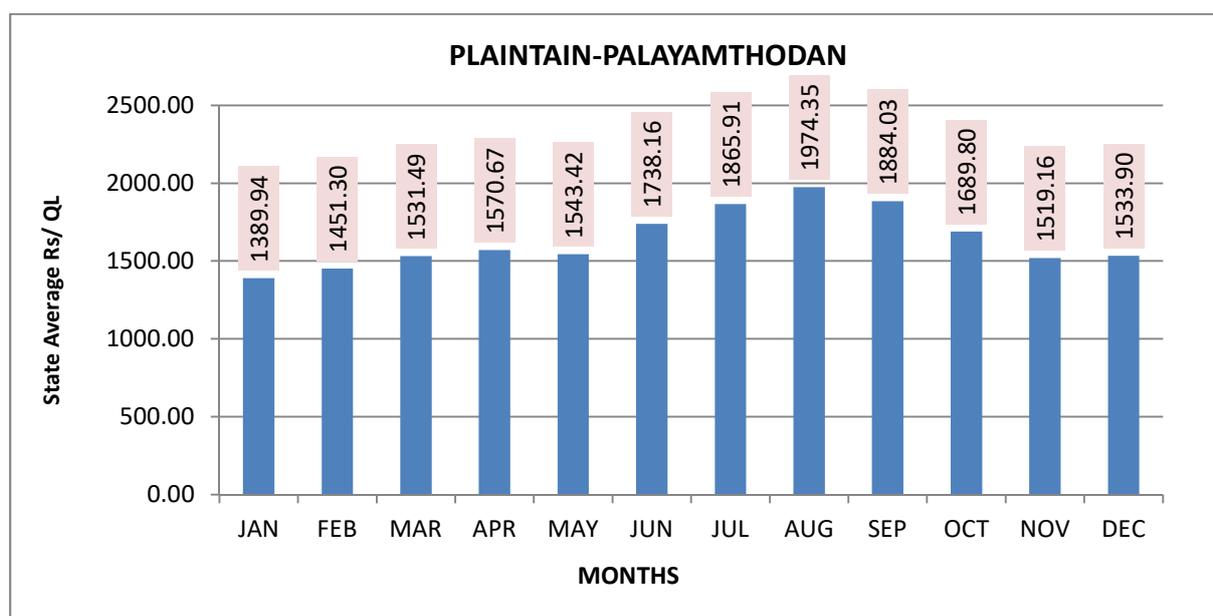

PLANTAIN-PALAYAMTHODAN-₹/QUINTAL

The price of Plantain - Palayamthodan (Quintal) in Kerala exhibits significant fluctuations across districts and months in 2022. Prices peaked in July-August, with the highest rates recorded in Kollam (₹3,100.00 in July, ₹3,141.67 in August) and Kasaragod (₹2,550.00 in August), reflecting seasonal or demand-driven spikes. The lowest prices were observed in Thrissur (₹1,020.00 in January) and Malappuram (₹842.86 in June), likely due to localized oversupply or lower demand. The state average rose steadily from ₹1,389.94 in January to a yearly high of ₹1,974.35 in August, followed by a gradual decline toward the year-end (₹1,533.90 in December). Notably, Kasaragod maintained the highest annual prices (₹2,331.25–₹2,625.00), while Malappuram and Thrissur consistently reported lower rates. Mid-year months (June-August) saw the sharpest increases. Regional disparities are stark: coastal districts like Alappuzha and Kollam showed moderate volatility, while highland districts like Idukki and Wayanad remained relatively stable.

Detailed table is attached in appendix Table 38- A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	1389.94	1451.3	1531.49	1570.67	1543.42	1738.16

State Average	4022.95	4277.05	4254.11	3913.49	3621.05	3553.38

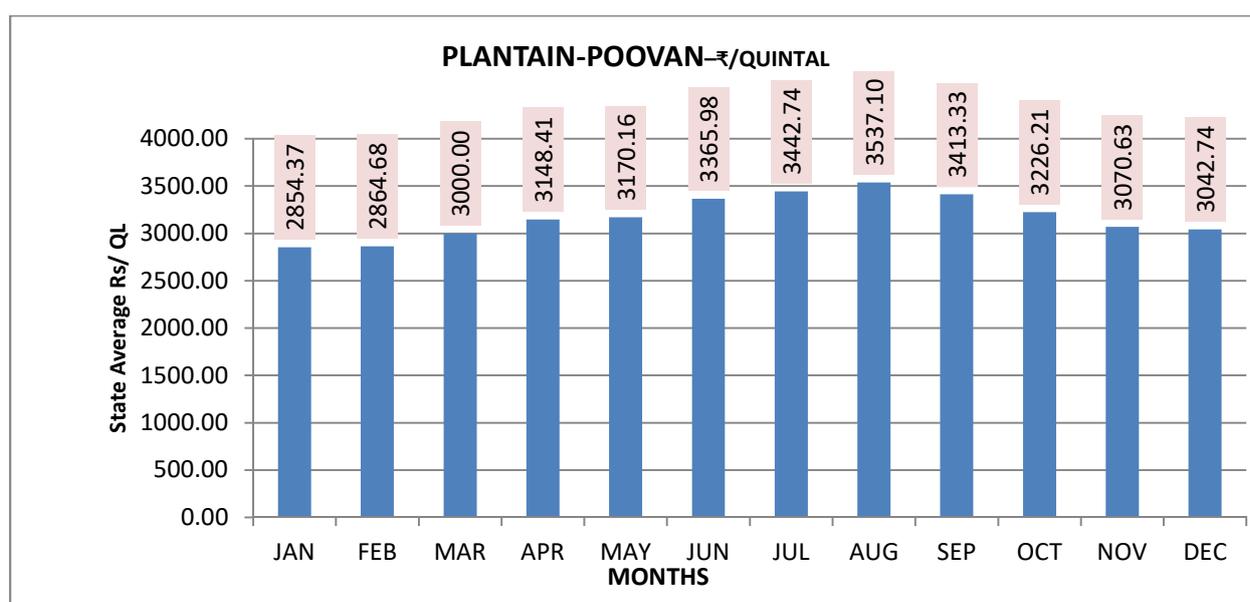

POOVAN-₹/QUINTAL

The price of Poovan-Quintal in Kerala shows marked fluctuations across districts and months in 2022, peaking in July-August. The highest prices were recorded in Kollam (₹5,450.00 in July and ₹5,333.33 in August) and Alappuzha (₹4,900.00 in August). Conversely, the lowest prices were observed in Kottayam (₹2,030.00 in January) and Palakkad (₹2,230.00 in December). The state average rose steadily from ₹2,854.37 in January to a yearly peak of ₹3,537.10 in August, followed by a gradual decline to ₹3,042.74 by December. Mid-year months (June-August) saw the sharpest increases. Districts like Kollam and Alappuzha exhibited significant volatility, while Thrissur and Malappuram remained relatively stable. Regional disparities are evident, with northern districts (Kannur, Kasaragod) maintaining higher averages compared to central regions (Kottayam, Palakkad). Prices ranged from ₹2,030.00 (January) to ₹5,450.00 (July).

Detailed table is attached in appendix Table 40 - A

KUDAMPULI-DRY-₹/QUINTAL

The State average price remained relatively stable throughout the year with only marginal fluctuations. During the first half of the year, the average declined slightly from 17436.96 in January to 17363.04 in February, followed by a gradual increase in March (17604.76) and April (17857.50). Prices remained almost unchanged in May (17847.50) before easing in June to 17397.73. In the second half of the year, the State average rose moderately in July (17590.91) and remained nearly stable in August (17522.73). A mild downward trend was observed in September (17277.08) and October (17010.42), after which prices recovered in November (17307.69) and December (17384.00). Overall, the trend reflects price stability with minor seasonal variations and no sharp movements during the year.

. Detailed table is attached in appendix Table 54 - A

BETAL LEAVES--₹/80NOS

The price of Betel leaves (80 nos) exhibits noticeable fluctuations across districts throughout the year. Thiruvananthapuram experiences moderate pricing, starting at ₹63.50 in January and gradually decreasing, with prices hovering around ₹50 in the later months. Kollam sees significant price variation, peaking at ₹158.33 in January and then gradually falling to ₹62.50 by December. Pathanamthitta follows a similar trend, with a sharp decline from ₹131.67 in January to ₹46.67 in December. Palakkad maintains the lowest price range, staying between ₹30 and ₹40 for most of the year. The state average price fluctuates from ₹83.08 in January to ₹52.71 in December, reflecting the general decline in prices as the year progresses.

Detailed table is attached in appendix Table 55 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN

PADDY STRAW-40KG--₹/ BUNDLE

The price of Paddy Straw (40 kg bundle) in Kerala exhibits notable fluctuations, with the highest prices observed in Kollam (₹750.00 from January to May) and the lowest in Thrissur (₹153.33 in April). Prices sharply decline from June onward, with the maximum dropping to ₹280.00 (Kozhikode) and the state average plummeting to ₹215.00 in June, reflecting potential post-harvest supply surges. Regional disparities are stark: northern districts like Kasaragod and Kozhikode show moderate stability, while southern regions like Kollam experience volatility. The state average trends downward from ₹313.33 in January to ₹230.00 by December, though incomplete data for many districts (e.g., Thiruvananthapuram, Idukki) limits a comprehensive analysis. Notably, Wayanad maintains consistently low prices (₹200.00–₹210.00), while Malappuram and PALAKKAD show mid-year spikes. Overall, prices range from ₹153.33 (April) to ₹750.00 (January–May).

FARM RETAIL PRICE

Data Analysis - Farm Retail Price

This report contains the analysis of Farm Retail prices of different varieties of crops that are abundantly available in different farm sites in the state of Kerala, during the year 2022. For the making of this report, we considered the state average price of the crops. The fluctuation in price and other trends exhibited in prices from the beginning to the end of the year 2022. The item wise price trends are as follows:

Coconut - With Husk –₹/1 No

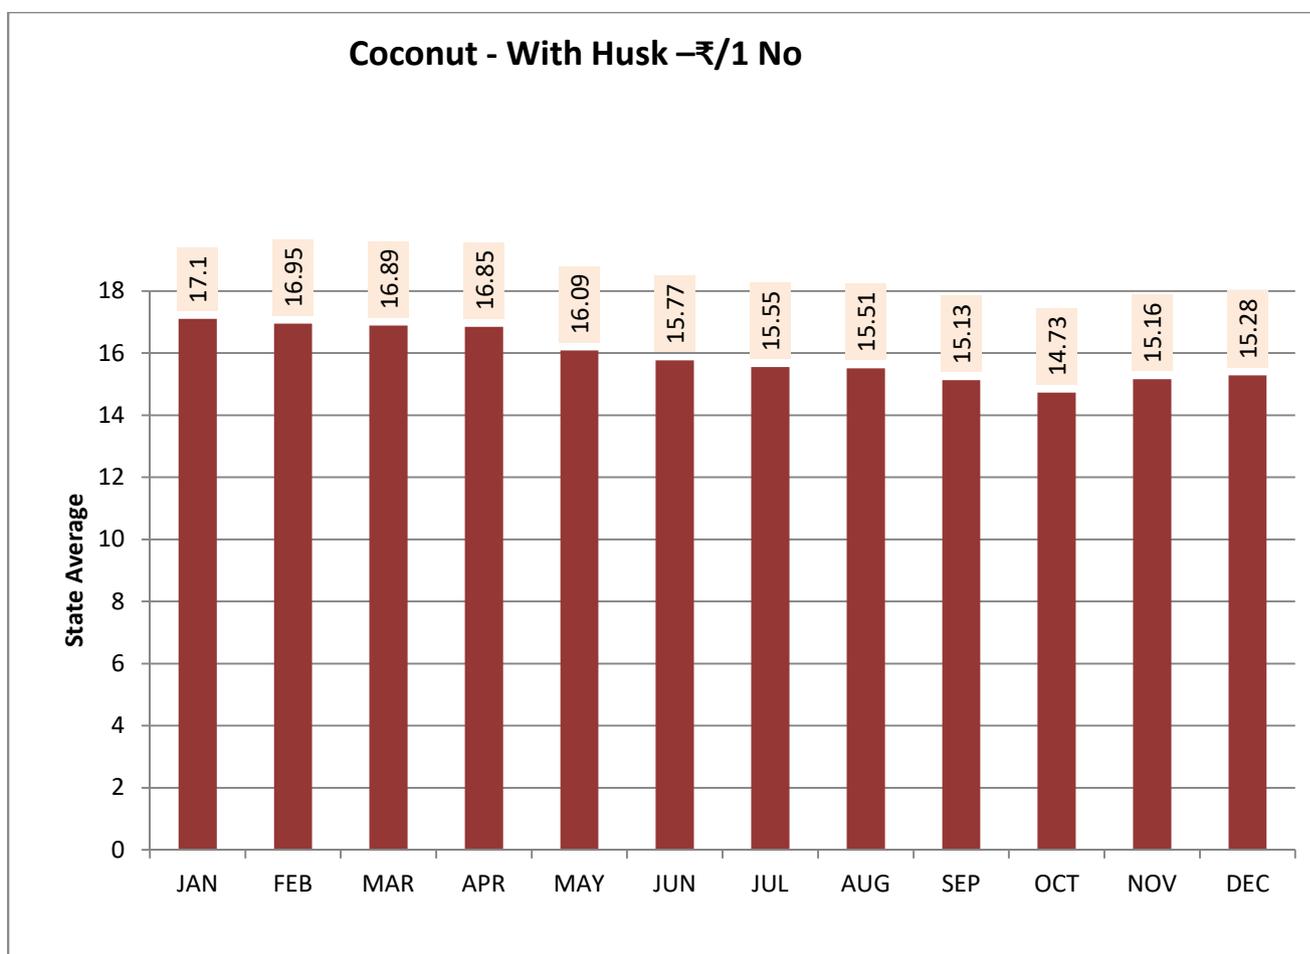

The price exhibits a downward price trajectory from January to October, followed by a modest recovery in November and December. Prices stabilize slightly after October but remain below the annual average. Jan–Mar), Prices gradually decline (17.10 → 16.89), indicating stable but weakening demand or surplus supply. (Apr–Jun). Accelerated decline (16.85 → 15.77), likely linked to post-harvest supply surges or reduced off-season demand. (Jul–Sep), Stabilization at lower levels (15.55 -15.13), reflecting market equilibrium. October hits the annual low (14.73), followed by a rebound in November and December.

Detailed table is attached in appendix Table 57 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	17.1	16.95	16.89	16.85	16.09	15.77

MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	15.55	15.51	15.13	14.73	15.16	15.28

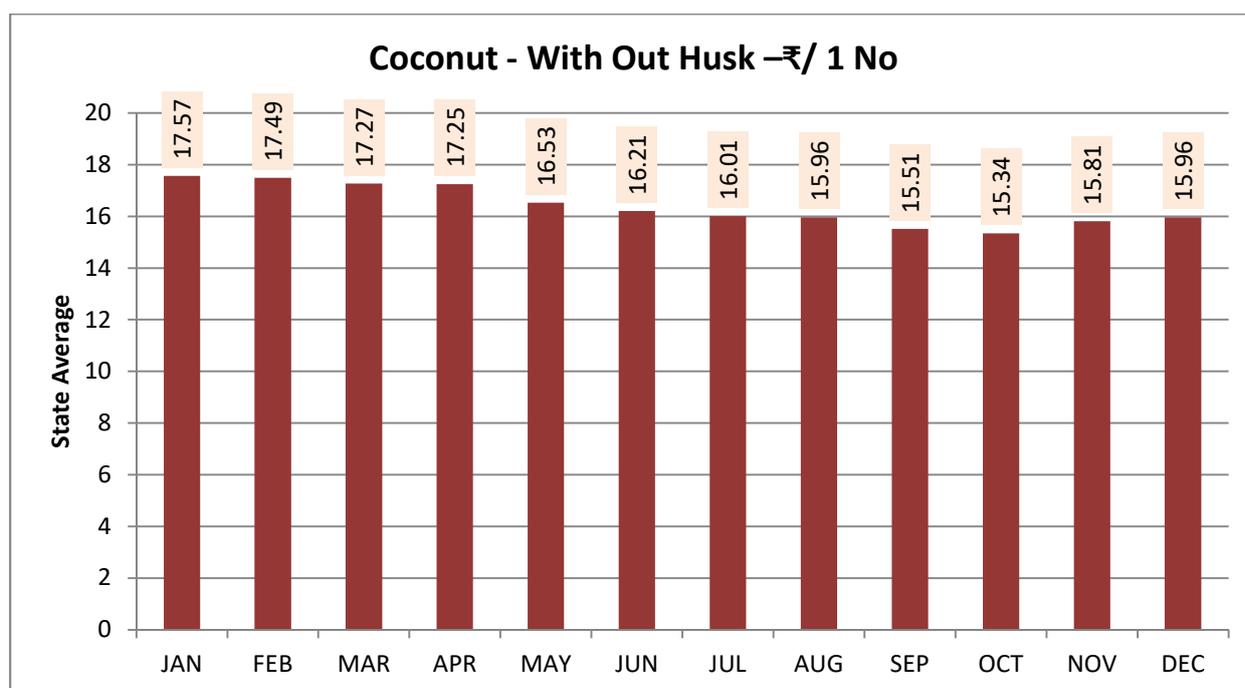

Coconut - With Out Husk –₹/ 1 No

The price follows a steady decline from January to October, reaching its lowest annual price, followed by a moderate recovery in November and December. Despite the rebound, prices remain below the starting January value. It's a decline from January to October, then a rebound. The highest and lowest points are January and October respectively. The sharpest drop might be between April (17.25) and May (16.53), which is a 4.2% decrease. That's a bit less than the previous 4.5% but still significant. The steepest drop in the second dataset is actually from September to October, from 15.51 to 15.34, which is a smaller percentage but part of the continued decline.

Detailed table is attached in appendix Table 58 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	17.57	17.49	17.27	17.25	16.53	16.21
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	16.01	15.96	15.51	15.34	15.81	15.96

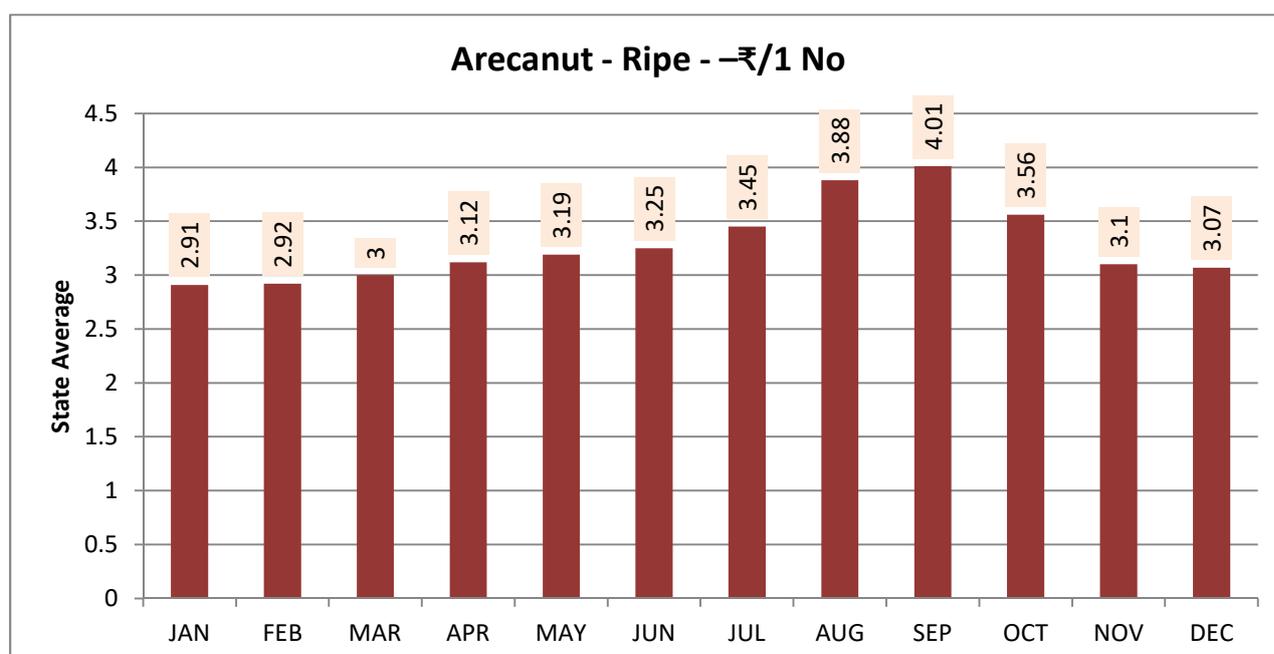

Arecanut - Ripe - -₹/1 No

A steady upward price trajectory from January (2.91) to September (4.01), peaking in September with a 37.8% annual increase, followed by a sharp decline in October (3.56) and a continued downturn through December (3.07). Key observations include the highest price in September (4.01) and the steepest monthly rise between August (3.88) and September (4.01), reflecting potential supply constraints or heightened demand mid-year. The sharpest drop occurs from September to October (-11.2%), likely due to post-harvest supply surges or reduced demand, with prices stabilizing slightly but remaining elevated compared to early-year levels.

Detailed table is attached in appendix Table 59 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	2.91	2.92	3	3.12	3.19	3.25

State Average	474.15	474.61	471.50	477.17	470.72	477.29

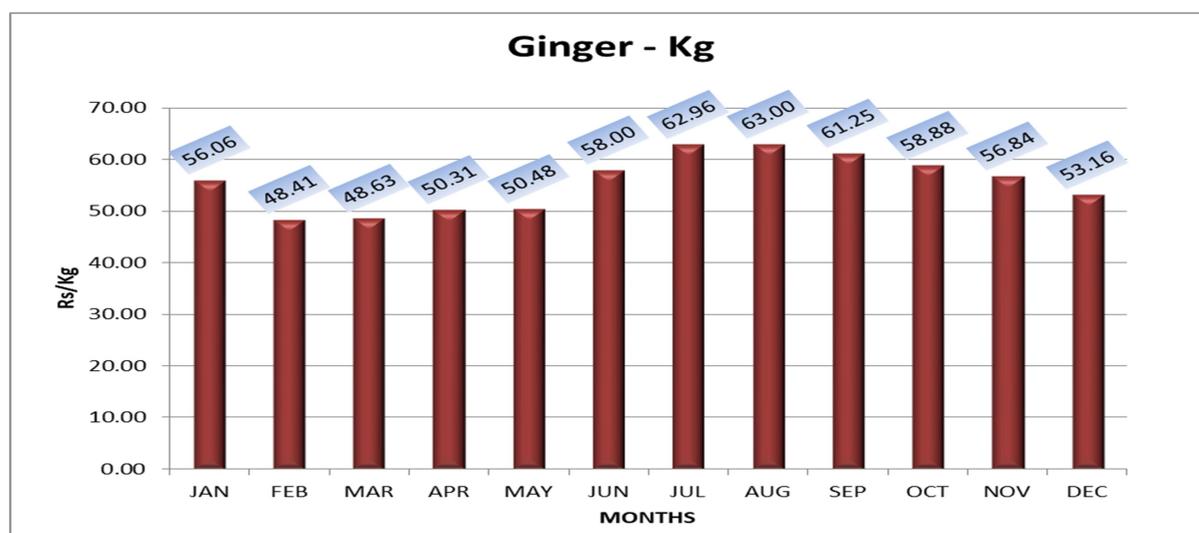

Ginger - ₹/ Kg

The State Average prices showed noticeable fluctuations over the year. During the first half of the year, prices declined from 56.06 in January to a low of 48.41 in February, remained almost stable in March (48.63), and then showed a gradual recovery in April (50.31) and May (50.48). A sharp increase was observed in June, with the average rising to 58.00. In the second half of the year, the upward trend continued, reaching the annual peak in July (62.96) and August (63.00). Thereafter, prices began to moderate, declining to 61.25 in September and further to 58.88 in October. This downward trend continued in November (56.84) and December (53.16). Overall, the price movement reflects a clear seasonal pattern, with lower levels in the early months, a peak during the mid-year period, and a gradual decline towards the end of the year.

Detailed table is attached in appendix Table 61 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	56.06	48.41	48.63	50.31	50.48	58
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	62.96	63.00	61.25	58.88	56.84	53.16

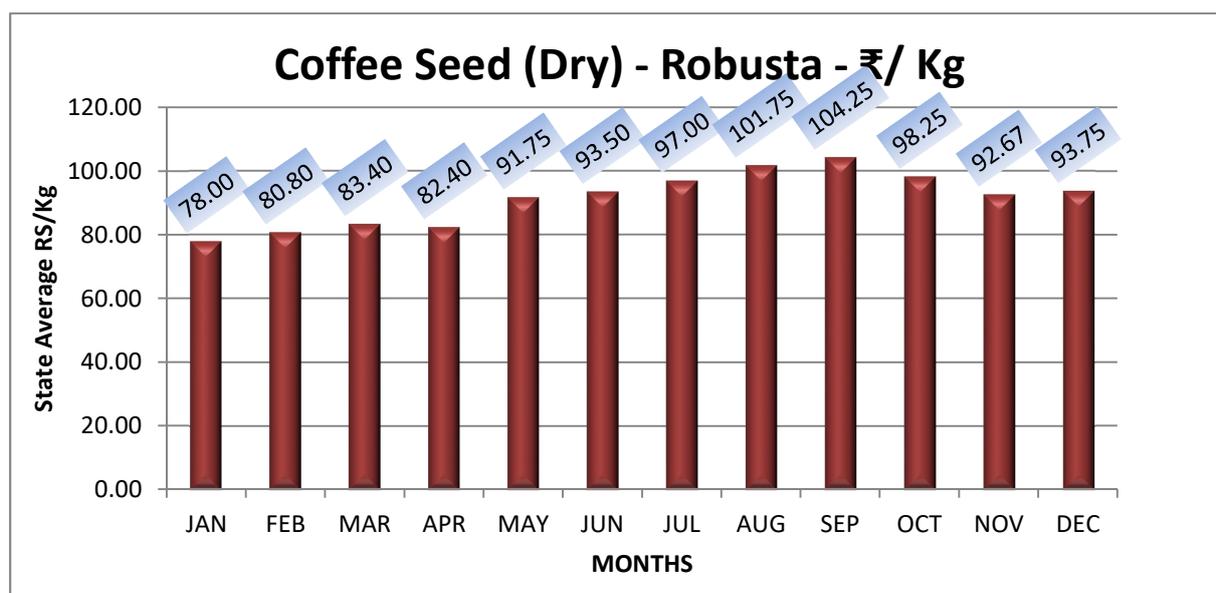

Coffee Seed (Dry) - Robusta - ₹/ Kg

The price exhibits a strong upward trend from January (78.00) to September (104.25), peaking with a 33.7% annual increase, followed by a moderate decline in Q4, stabilizing at 93.75 in December. Key observations include the steepest monthly rise between August (101.75) and September (104.25), reflecting potential supply tightness or heightened demand, and the sharpest drop from September to October, likely due to post-harvest supply influx or profit-taking. Prices rebound slightly in December, ending 20.2% higher than January, indicating annual appreciation despite Q4 volatility. Mid-year surges (e.g., May to June: 91.75 - 93.50).

Detailed table is attached in appendix Table 62 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	78	80.8	83.4	82.4	91.75	93.5
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	97.00	101.75	104.25	98.25	92.67	93.75

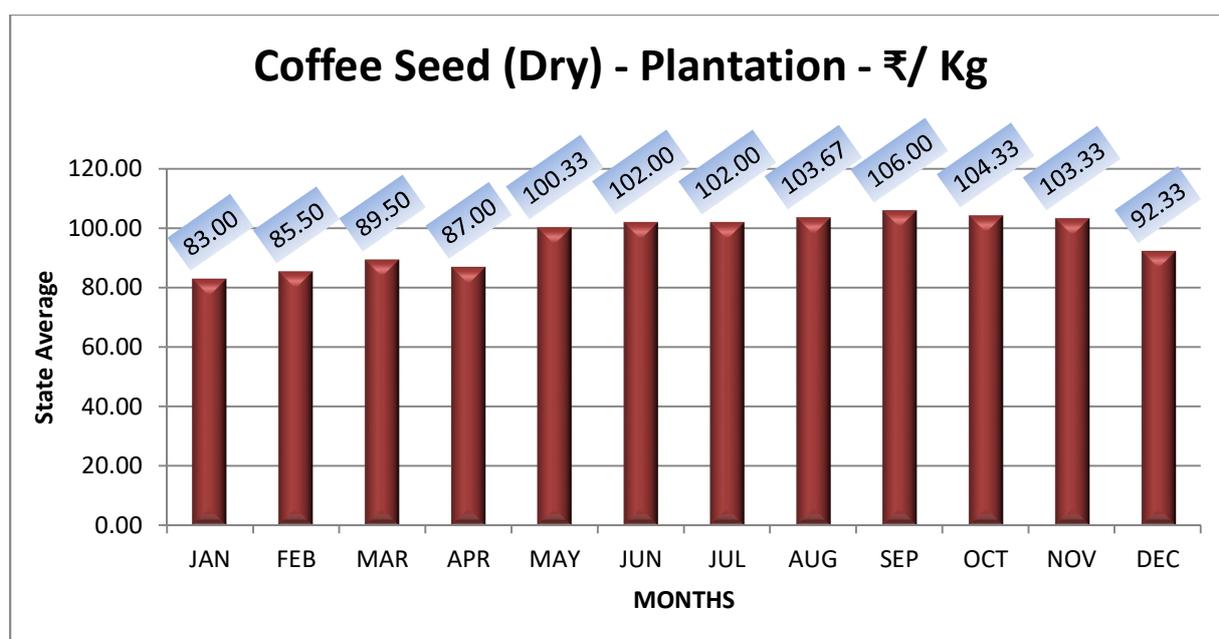

Coffee Seed (Dry) - Plantation- ₹/Kg

The price demonstrates a pronounced upward trajectory from January (83.00) to September (106.00), marking a 27.7% annual increase, followed by a sharp Q4 correction to December (92.33). Key observations include the highest price in September (106.00) and the steepest monthly surge between April (87.00) and May (100.33), a 15.3% jump, likely driven by supply shortages or speculative demand. Prices stabilize mid-year (June–August: 102.00–103.67) before peaking in September, then decline steadily through December, with the sharpest drop from November (103.33) to December (92.33, -10.6%). Despite the Q4 slump, December prices remain 11.2% higher than January.

Detailed table is attached in appendix Table 63 - A

Tapioca - Raw - ₹/ Kg

The price experiences a sustained upward trend from January (16.42) to October (35.76), surging 117.7% annually, followed by a moderate correction in November (34.38) and December (31.91). Key observations include the steepest monthly rise between May (24.54) and June (29.07), a 18.4% jump, likely driven by tightening supply or seasonal demand, and the peak price in October (35.76). Prices decline in Q4, with the sharpest drop from October to November (-3.9%), suggesting post-harvest supply influx or reduced buyer momentum. Despite the correction, December prices remain 94.3% higher than January, underscoring robust annual growth fuelled by mid-year volatility.

Tapioca - Dried and Boiled - ₹/Kg

The price exhibits a steady upward trajectory from January (49.83) to December (72.50), marking a 45.5% annual surge, with only a minor mid-year correction in July (68.44). Prices rise consistently, peaking in December, and the steepest monthly increase occurs between May (62.70) and June (68.67), a 9.5% jump, likely tied to seasonal demand or supply chain pressures. Despite a slight dip in July, the market rebounds, reaching new highs in Q4, with November (72.00) and December (72.50) reflecting sustained buyer momentum.

Detailed table is attached in appendix Table 65 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	49.83	51	54.67	58.89	62.7	68.67

State Average	68.44	68.86	71.13	71.00	72.00	72.50

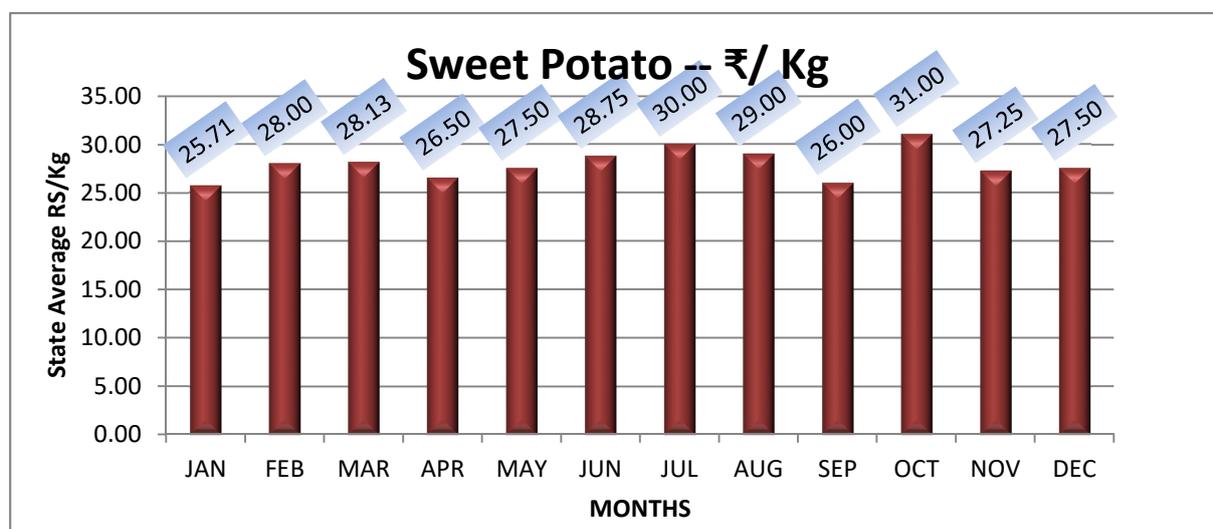

Sweet Potato - ₹/ Kg

The price displays volatile price movements with an initial rise from January (25.71) to July (30.00), peaking mid-year, followed by a sharp decline in September (26.00) and an unexpected surge to the annual high in October (31.00), before retreating to 27.50 in December. Key fluctuations include the steepest monthly increase from September to October (+19.2%), likely tied to seasonal demand or supply disruptions, and the sharpest drop from October to November (-12.1%), suggesting post-harvest surplus or reduced buyer activity. Prices remain 7.0% higher annually by December compared to January, reflecting moderate growth amid cyclical swings, while mid-year stability (May–August: 27.50–30.00) indicates balanced market conditions. The October peak highlights potential external influences.

Detailed table is attached in appendix Table 66 - A

The table and graph given below shows the monthly state average price

Yam - Local - ₹/ Kg

The price exhibits extreme volatility, beginning with a steady rise from January (30.22) to April (34.19), followed by a mid-year surge peaking in September (73.75), and a sharp correction to December (36.30). Key fluctuations include the highest price in September (73.75) and the steepest monthly surge from July (30.00) to August (69.67), a 132% spike, likely driven by supply shortages or speculative trading. Prices collapse post-September, with the sharpest drop from September to October (-18.6%), suggesting post-harvest supply influx or demand contraction. Despite the volatility, December prices remain 20.1% higher than January, reflecting annual appreciation amid erratic swings.

Detailed table is attached in appendix Table 67 - A

The table and graph given below shows the monthly state average price

Elephant Foot Yam - Local - ₹/Kg

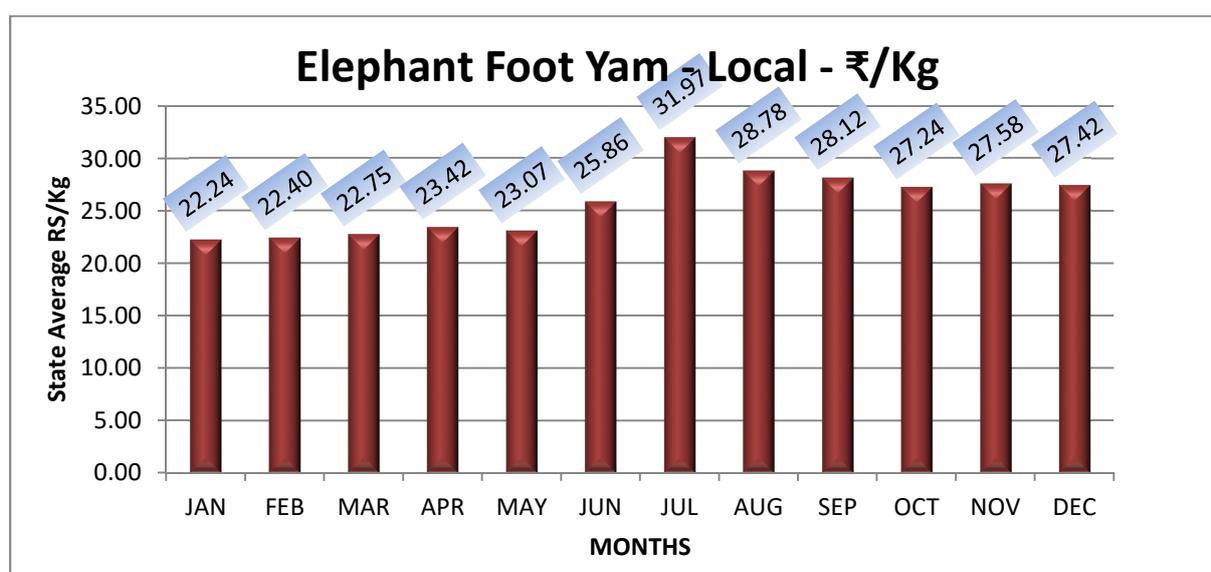

The price shows moderate volatility with a gradual rise from January (22.24) to April (23.42), followed by a mid-year surge peaking in July (31.97), and a steady decline through December (27.42). Key fluctuations include the highest price in July (31.97), marking a 43.8% increase from January, and the steepest monthly rise from June (25.86) to July (31.97), a 23.6% jump. Prices retreat post-July, with the sharpest drop from July to August (-10.0%), suggesting post-harvest supply recovery or reduced buyer activity, before stabilizing near 27.42 by December. Despite the correction, December prices remain 23.3% higher than January, reflecting annual appreciation driven by mid-year volatility.

Detailed table is attached in appendix Table 68 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	22.24	22.4	22.75	23.42	23.07	25.86

Colocassia - Local - ₹/Kg

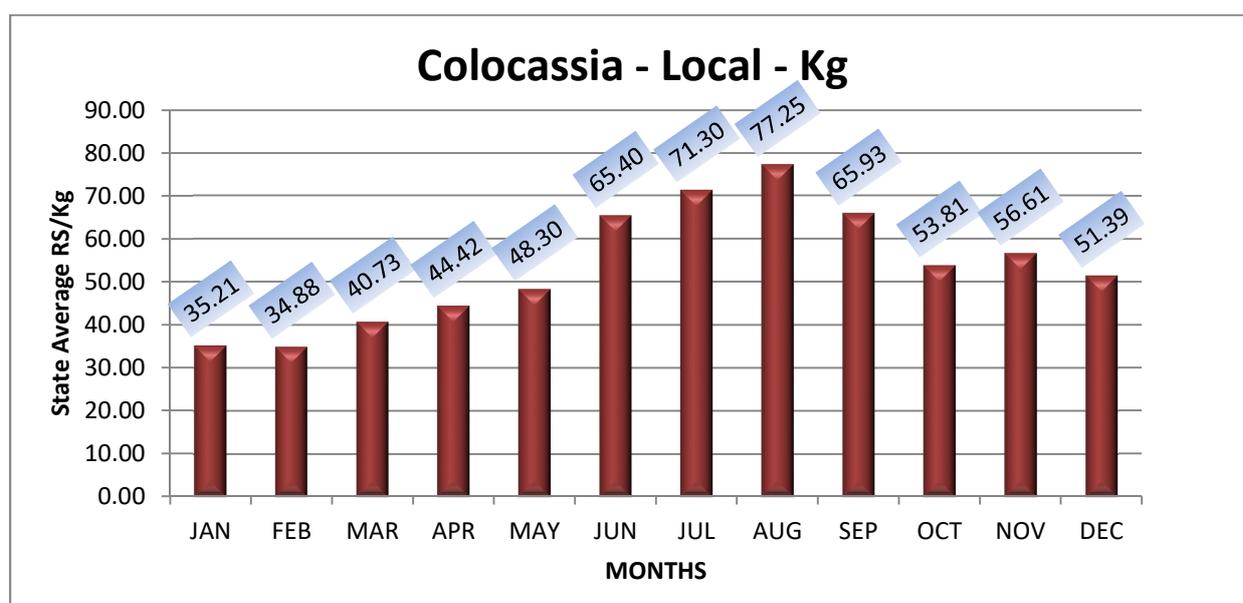

The price demonstrates extreme volatility, beginning with a steady climb from January (35.21) to August (77.25), surging 119.5% annually, followed by a sharp correction to December (51.39). Key observations include the steepest monthly rise from May (48.30) to June (65.40), a 35.4% spike, and the peak price in August (77.25). Prices decline sharply post-August, with the most significant drop from August to September (-14.7%), suggesting post-harvest supply influx or reduced buyer momentum, before stabilizing near 51.39 by December. Despite the Q4 downturn, December prices remain 45.9% higher than January, reflecting strong annual growth amid mid-year volatility.

Detailed table is attached in appendix Table 69 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	35.21	34.88	40.73	44.42	48.3	65.4

MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	71.30	77.25	65.93	53.81	56.61	51.39

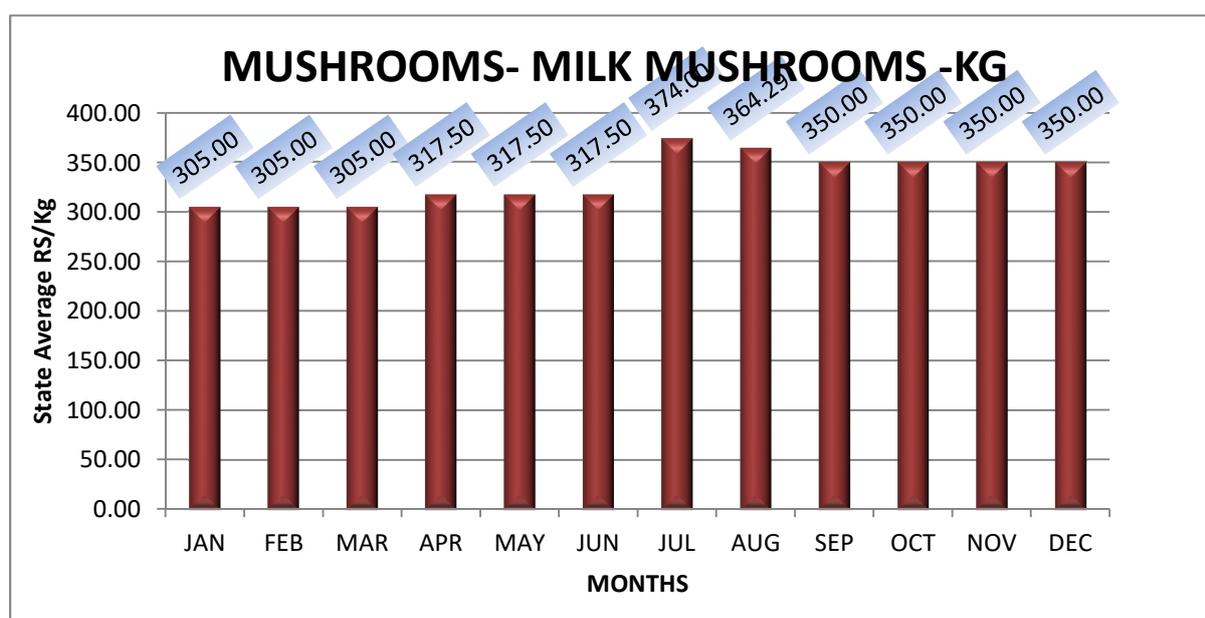

Mushrooms - Milk Mushrooms - ₹/Kg

A sharp mid-year surge peaking in July (374.00), and a gradual decline to 350.00 by September, where prices stabilize through December. Key fluctuations include the steepest monthly rise from June (317.50) to July (374.00), a 17.8% spike, likely tied to seasonal demand peaks or supply constraints, and the highest annual price in July (374.00). Prices retreat modestly post-July, dropping -6.4% by August and stabilizing at 350.00 for the remainder of the year, suggesting market equilibrium post-surge. Despite volatility, December prices remain 14.8% higher than January.

Detailed table is attached in appendix Table 70 - A

Lemon - Citrus Lemon - ₹/Kg

In September, the average is 62.00, which then drops sharply to 42.50 in October. However, there is a slight increase in November to 47.50, followed by a significant rise in December to 65.00—the highest recorded value in the available data. The missing data for the first eight months makes it difficult to assess annual trends. However, the available figures suggest fluctuations, with a notable decline in October before a recovery in November and December. Further data collection is needed to understand the full yearly pattern.

Detailed table is attached in appendix Table 89 - A

The table and graph given below shows the monthly state average price- ₹/Kg

Turmeric - Raw - ₹/Kg

Price starts at 23.62 Kg in January, rises to 29.00 Kg in February, and peaks at 30.65 Kg in March, indicating strong early-year output. A slight decline occurs in April (26.55 Kg), followed by steady figures around 26.88 Kg (May), 27.60 Kg (June), and 27.75 Kg (July), suggesting consistent mid-year price. August sees a sharp surge to 45.00 Kg, the highest monthly average, likely due to harvest season. A drop follows in September (40.00 Kg) and continues declining through October (27.50 Kg), November (25.00 Kg), and December (18.88 Kg), reaching the year's lowest point.

Detailed table is attached in appendix Table 91 - A

The table and graph given below shows the monthly state average price- ₹/Kg

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	23.62	29	30.65	26.55	26.88	27.6
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	27.75	45.00	40.00	27.50	25.00	18.88

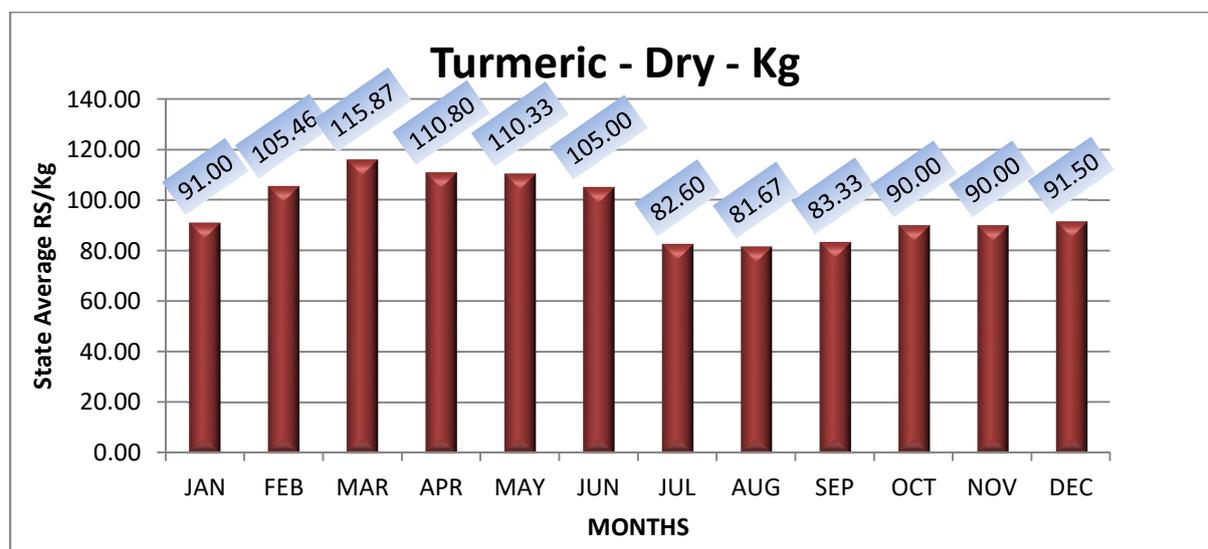

Turmeric - Dry - ₹/Kg

Price starts strong at 91.00 Kg in January and steadily increases, peaking at 115.87 Kg in March—the highest monthly output. A gradual decline follows, with 110.80 Kg (April), 110.33 Kg (May), and 105.00 Kg (June), indicating reduced but still high price. A sharp decrease occurs in July (82.60 Kg), falling further in August (81.67 Kg) and stabilizing around 83.33 Kg (September). Price rebounds in October (90.00 Kg) and remains steady in November (90.00 Kg), closing the year slightly higher at 91.50 Kg (December).

Detailed table is attached in appendix Table 92 – A

The table and graph given below shows the monthly state average price- ₹/Kg

Banana - Local - ₹/Kg

The data reveals a clear seasonal trend in local banana price, with output starting at 41.45 Kg in January and gradually increasing to a peak of 62.14 Kg in June, indicating strong mid-year yields likely due to favorable growing conditions. After June, price slightly declines but remains relatively high, averaging around 57-60 Kg in July and August, before experiencing a more noticeable drop from September (56.07 Kg) to December (43.75 Kg), suggesting reduced supply toward the year-end. The highest price occurs in June, while the lowest post-peak figures are seen in December, possibly due to seasonal harvesting patterns or climatic influences. Overall, the first half of the year shows consistent growth, while the second half sees a gradual decline.

Detailed table is attached in appendix Table 93 - A

Plantain - Palayamthodan - ₹/Kg

The monthly state average price for Plantain - Palayamthodan (in Kg) shows a steady increase in price from 17.01 Kg in January to a peak of 22.95 Kg in August, reflecting optimal growing conditions during the mid-year months. The upward trend is consistent from January to August, with the highest output occurring in July (21.53 Kg) and August (22.95 Kg), likely due to seasonal rainfall and favourable agricultural practices. After August, price gradually declines, dropping to 19.70 Kg in October and stabilizing around 18-18.5 Kg in November and December, suggesting a post-monsoon slowdown. The lowest price occurs in January (17.01 Kg), while the highest is in August (22.95 Kg).

Detailed table is attached in appendix Table 94 - A

The table and graph given below shows the monthly state average price - ₹/Kg

Plantain - Njalipoovan/Rasakadali - ₹/Kg

The monthly state average data for plantain - njalipoovan/rasakadali (in kg) demonstrates a consistent upward trend from 32.44 kg in january to its annual peak of 46.76 kg in august, indicating optimal cultivation conditions during this period. Price rises steadily throughout the first half of the year, with particularly strong growth between june (42.74 kg) and august (46.76 kg), likely reflecting ideal monsoon conditions and maturation cycles. Following the august peak, output experiences a gradual decline, decreasing to 45.59 kg in september, 42.07 kg in october, and stabilizing near 40 kg in november and december. The data reveals a clear seasonal pattern, with the lowest price occurring in january (32.44 kg) and the highest in august (46.76 kg), suggesting this variety's growth cycle benefits most from mid-year climatic conditions. The relatively small difference between the peak and subsequent months (September-December) indicates sustained post-harvest availability, though at slightly reduced levels. Detailed table is attached in appendix Table 95 - A

The table and graph given below shows the monthly state average price - ₹/Kg

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	32.44	33.87	35.86	37.98	38.22	42.74
MONTHS	JUL	AUG	SEP	OCT	NOV	DEC
State Average	43.13	46.76	45.59	42.07	40.01	39.31

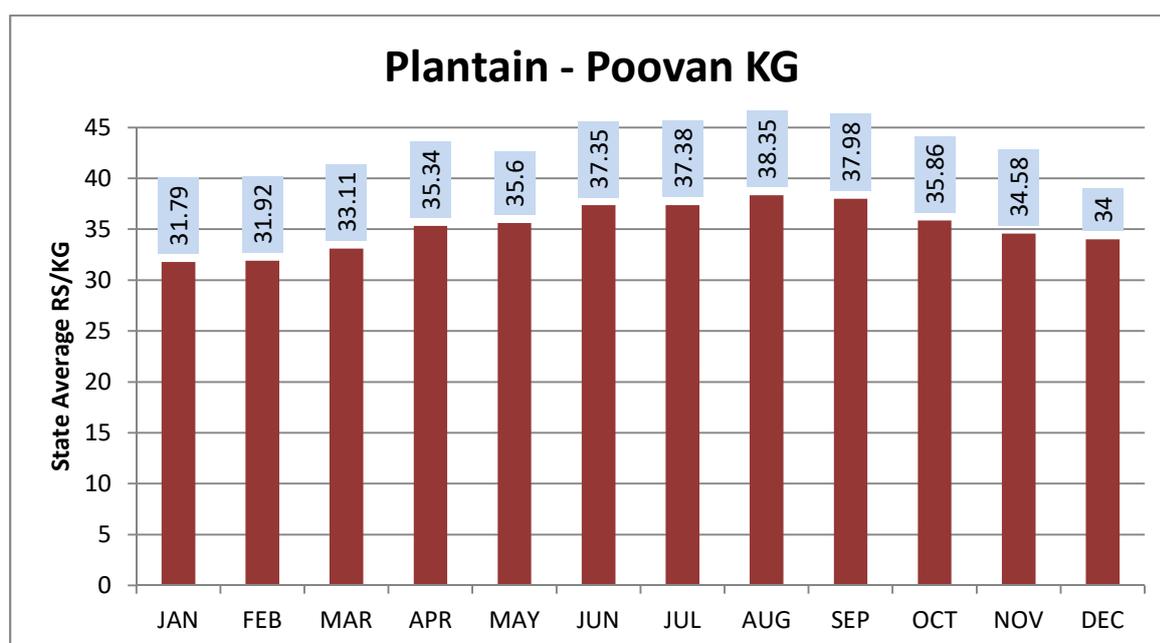

Plantain - Poovan - ₹/Kg

The state average prices for Plantain - Poovan - Kg show a generally increasing trend with some minor fluctuations. Starting at ₹31.79, the prices saw a steady rise to ₹33.11, followed by sharper increases to ₹35.34 and ₹35.60. The peak was observed at ₹38.35 after consistent growth through ₹37.35 and ₹37.38. A slight decline followed, with prices tapering down to ₹37.98, ₹35.86, ₹34.58, and finally ₹34.00. Despite a few dips towards the end, the overall trend suggests a progressive price increase over the observed period.

Detailed table is attached in appendix Table 96 - A

Plantain - Robusta - ₹/Kg

The monthly state average data for Plantain - Robusta (in Kg) shows a gradual increase in price from 16.41 Kg in January to a peak of 21.82 Kg in August, reflecting favorable growing conditions during the mid-year months. Price steadily rises each month from January through August, suggesting that seasonal factors such as temperature, rainfall, and agricultural practices support growth during this period. After reaching the highest point in August, price experiences a decline from September onwards; dropping to 19.94 Kg in October and remaining relatively stable around 19 to 19.66 Kg in November and December.

Detailed table is attached in appendix Table 97 - A

The table and graph given below shows the monthly state average price- ₹/Kg

Plantain - Kappapazham/ Chenkadali - ₹/Kg

The price fluctuates throughout the year but shows a gradual upward trend from January to August. After peaking in August, it declines slightly toward December. Prices rise steadily from January (₹40.95) to February (₹42.62) but drop slightly in March (₹41.90) and April (₹41.45). A sharp increase begins in May (₹42.33), accelerating in June (₹45.90) and peaking in August (₹46.75). Post-August, prices decline gradually, with the most notable drop in October (₹45.32) and November (₹44.22).

Pappaya - Green Medium - 1 No

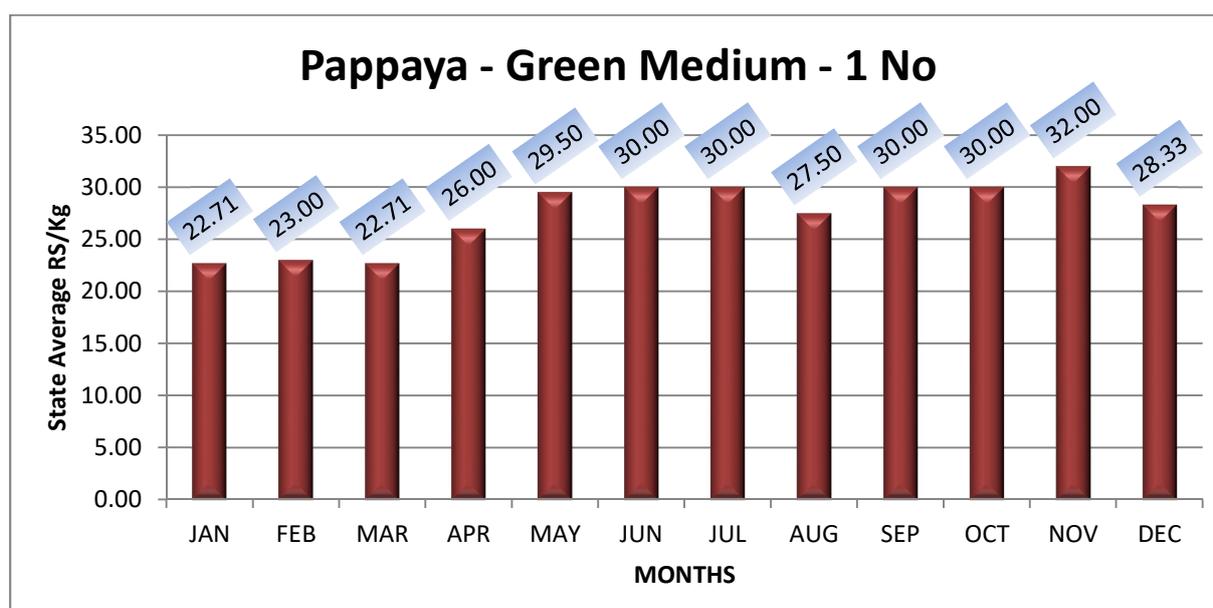

The average price of green papaya shows a gradual upward trajectory from January to November, peaking in November, followed by a slight decline in December. Despite minor mid-year fluctuations, the trend reflects sustained growth in prices during the latter half of the year. Prices remain stable in the first quarter (Jan–Mar: ₹22.71–₹23.00) but rise sharply in April (₹26.00). A steady increase follows from May (₹29.50) to July (₹30.00), with prices plateauing at ₹30.00 through July and September. A temporary dip occurs in August (₹27.50), interrupting the upward trend, but prices rebound to ₹30.00 in September and October. Prices peak in November (₹32.00) before declining in December (₹28.33).

Detailed table is attached in appendix Table 102 - A

State Average	30.00	27.50	30.00	30.00	32.00	28.33

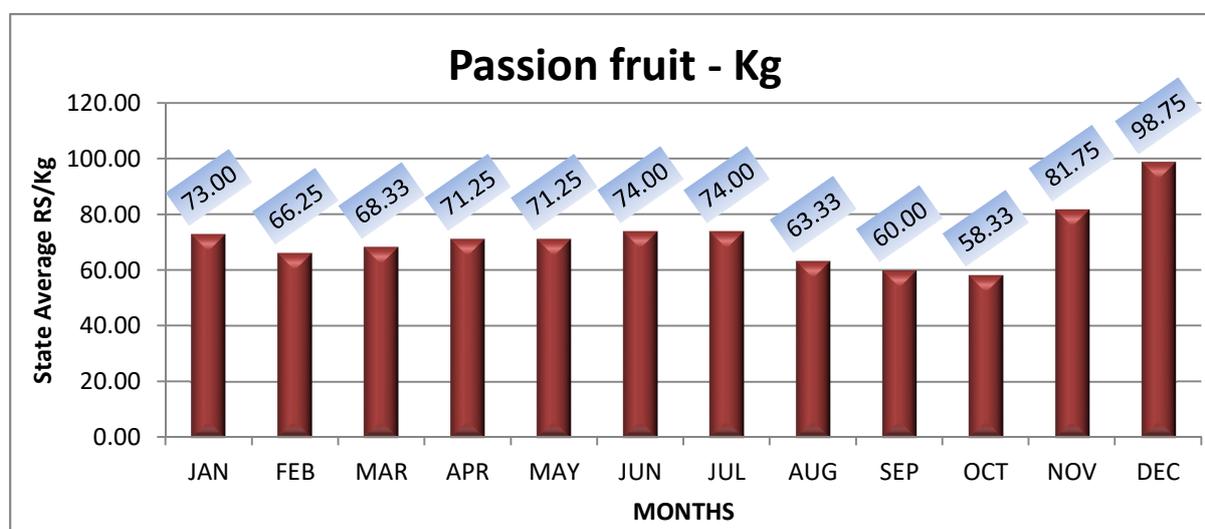

Passion fruit - ₹/Kg

The prices of passion fruit show noticeable fluctuations throughout the year. In January, the average price stands at ₹73.00, marking a strong start. The price dips slightly in February to ₹66.25, and recovers in March to ₹68.33. A steady increase is observed through April and May, both reaching ₹71.25, followed by a peak at ₹74.00 in both June and July. However, from August onward, the prices begin to decline, dropping to ₹63.33, and continuing downward to ₹60.00 in September and ₹58.33 in October—the lowest point in the year. A significant rebound occurs in November, where prices jump to ₹81.75, and this upward trend continues sharply into December, reaching the highest average price of ₹98.75. Overall, the data reflects seasonal variation in passion fruit prices. The mid-year period (June–July) maintains stability, while late-year months (November–December) exhibit a strong price surge. Detailed table is attached in appendix Table 103 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN

Avocado fruit - ₹/Kg

From January to July, the price of Avocado fruit remains constant at ₹55.00 per kilogram, indicating a stable market during the first half of the year. In August, there is a noticeable increase to ₹60.00, marking the highest price in the dataset. This spike could indicate a temporary shortage or heightened demand. However, the price drops sharply in September to ₹45.00, and further declines in October to ₹40.00, reflecting a significant decrease of 27% from the August peak.

Detailed table is attached in appendix Table 104 -A

State Average	55	60	45	40	-	-

Soursop - ₹/Kg

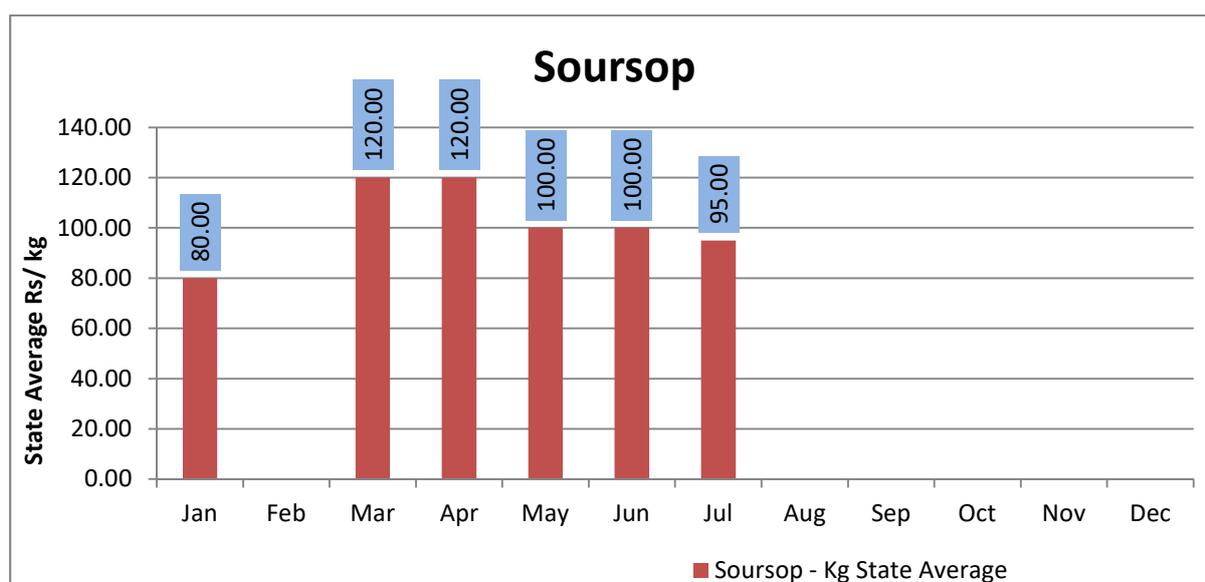

The price of Soursop starts at ₹80.00 in January, indicating a modest market rate at the beginning of the year. There is no data for February, suggesting either no trade activity or unavailable records for that month. In March and April, the price surges sharply to ₹120.00, marking the highest point in the dataset. This spike possibly reflects peak demand or limited availability, likely during harvest or a short supply period. From May to July, the prices begin to decline gradually. In May and June, the price drops to ₹100.00, and by July, it further reduces to ₹95.00.

Detailed table is attached in appendix Table 105 - A

Jackfruit - Green Medium - 1 No(Approximately 5 Kg)

The price of Jackfruit begins the year at a high average of ₹117.86 in January and slightly decreases to ₹112.00 in February. A more noticeable drop follows in March, bringing the price down to ₹96.60. This declining trend continues into April (₹76.23) and May (₹52.45), before reaching a mid-year low of ₹49.61 in June. In July, the price plummets drastically to just ₹8.00, likely indicating peak harvest season, oversupply, or a drop in quality due to high availability. This month records the lowest price of the year. There is no data available for August through October, suggesting minimal or no market activity, possibly due to off-season conditions. In November, prices begin to recover, reaching ₹68.00, and by December, Jackfruit prices surge to ₹143.00, the highest price recorded for the year.

Detailed table is attached in appendix Table 106 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN
State Average	117.86	112.00	96.60	76.23	52.45	49.61

State Average	8.00	-	-	-	68.00	143.00

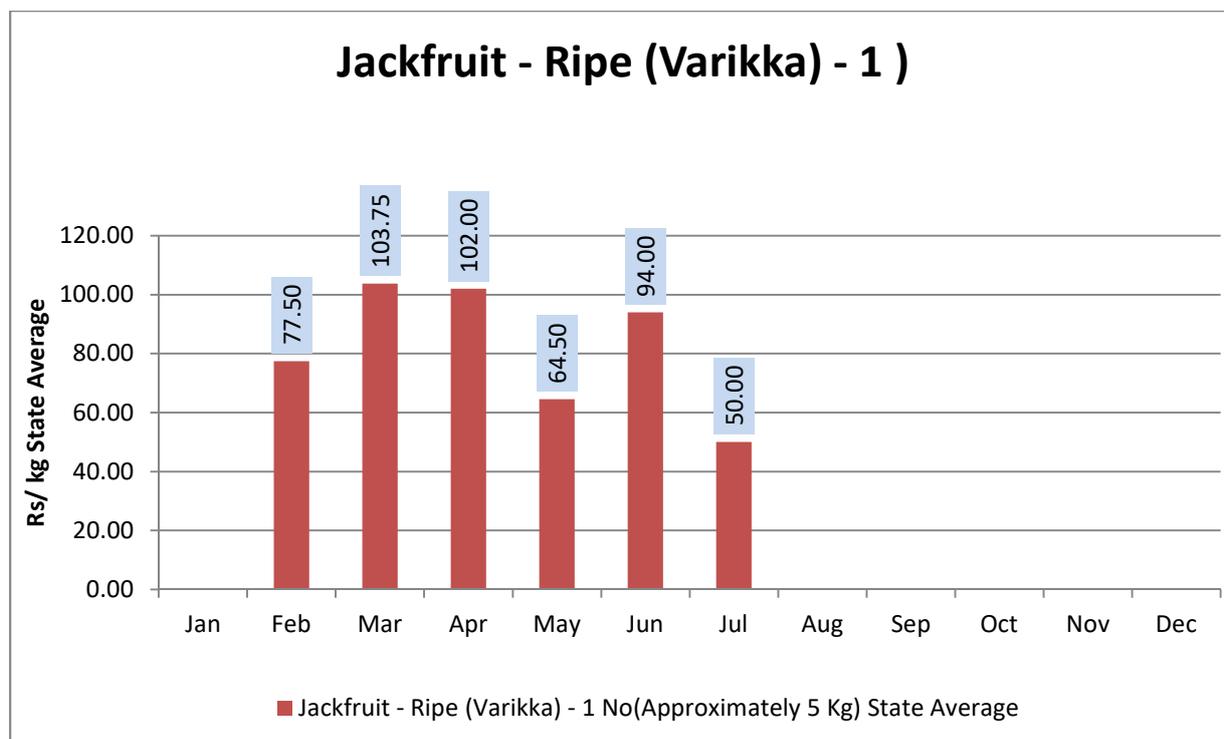

Jackfruit - Ripe (Varikka) - ₹/ 1 No

In February, the price enters the market at ₹77.50, and then peaks sharply in March at ₹103.75, reflecting a period of high demand or limited availability. In April, the price remains high at ₹102.00, sustaining the momentum from March. However, a steep decline follows in May, where the price falls to ₹64.50, possibly due to increased supply or reduced market interest. Interestingly, in June, the price recovers to ₹94.00. However, by July, the price again drops significantly to ₹50.00, the lowest value recorded in the year.

Detailed table is attached in appendix Table 107 -A

The table and graph given below shows the monthly state average price

Tamarind - With out Seed and Husk - ₹/ Kg

Tamarind maintains a high and stable price trend throughout the year, indicating its consistent demand and market value. The year begins with a strong price of ₹149.57 in January, but a slight dip follows in February to ₹144.29, which marks the lowest price point of the year. Prices then begin to recover in March (₹148.62) and April (₹147.76), returning close to January levels. From May to July, prices stabilize around ₹149.58 to ₹150.75, reflecting a period of steady market balance between supply and demand. In August and September, the price increases to ₹151.18 and ₹152.00 respectively.

Detailed table is attached in appendix Table 109 -A

The table and graph given below shows the monthly state average price- ₹/ Kg

MONTHS	JAN	FEB	MAR	APR	MAY	JUN

Kudampuli - Dry - ₹/ Kg

Kudampuli prices show a moderately fluctuating trend throughout the year. The year starts strong in January with a price of ₹197.48, one of the higher values for the year. In February, there is a dip to ₹191.40, but it recovers slightly in March (₹193.00) and continues rising in April (₹195.00). The peak occurs in May at ₹198.65, marking the highest price point of the year. From June onward, the prices gradually decline, reaching ₹192.19 in June, ₹190.00 in July, and ₹186.61 in August. This period shows a clear downward trend, possibly due to increased availability or reduced demand post-harvest. The lowest price of the year appears in October at ₹184.09, after which a slight recovery is seen in November (₹186.85) and December (₹192.50). Overall, Kudampuli prices fluctuate within a fairly narrow range, staying consistently above ₹184.

Detailed table is attached in appendix Table 110 - A

The table and graph given below shows the monthly state average price

MONTHS	JAN	FEB	MAR	APR	MAY	JUN

Betal leaves - ₹/ 20 Nos

The price of Betal leaves begins the year on a high note, with January recording the highest price at ₹23.99. This is closely followed by March at ₹23.21, suggesting strong demand or limited supply during the early months of the year. February maintains a relatively high price of ₹22.23, aligning with the trend. From April onward, the market sees a significant decline in prices. April falls sharply to ₹17.95, and May dips further to ₹17.24, marking the beginning of a sustained downward trend. During the mid-year months of June to September, prices remain fairly stable but lower than in the first quarter, fluctuating slightly around the ₹18 range. July sees a slight increase to ₹19.53, but this does not sustain in the following months. The lowest prices are recorded in the final quarter, with October at ₹17.00, November at ₹15.76, and December at ₹15.27, which is the lowest of the year. Overall, Betal leaves experience a clear declining trend, starting from a strong first quarter and gradually losing value through the rest of the year. Detailed table is attached in appendix Table 111 - A

Paddy Straw - 10 Kg Bundle - - ₹/ 1 Bundle

The price of Paddy Straw starts the year moderately at ₹75.79 in January. A sharp upward trend follows, peaking at ₹89.23 in March, the highest value of the year, indicating strong demand or limited availability during this period. February and April also maintain relatively high values at ₹87.17 and ₹82.91, respectively. In May, the price slightly dips to ₹85.56, continuing to stay on the higher end of the yearly range. However, from June onward, the market experiences a significant decline, falling to ₹65.00 in June and ₹75.00 in July. August data is unavailable, but by September, the price drops steeply to ₹56.67, one of the lowest recorded values. The market recovers slightly in October to ₹67.50, but this uptick is not sustained, as November and December prices slip again to ₹66.25 and ₹57.50, respectively. Detailed table is attached in appendix Table 112 - A
