Preface

Price analysis is a vital instrument for measuring the relative movements of various economic and social variables. It serves as a foundational technique for estimating general trends in prices, production, and consumption patterns. These analyses help track fluctuations over time and provide insights that are crucial for economic planning, forecasting, and policy formulation.

The Department of Economics & Statistics undertakes the regular collection, compilation, and analysis of diverse categories of price data. These are generally classified into three main categories: wholesale prices, retail prices, and miscellaneous price data. This comprehensive dataset is used to compute a range of economic indicators that collectively present a clear and detailed picture of price trends across the economy.

The present report, "*Report on Analysis of Miscellaneous Prices - 2022*," focuses on analysing the prices of a wide array of commodities. It covers 50 essential items and 20 additional commodities, along with weekly data on essential goods. Furthermore, the report includes miscellaneous items such as waste paper, scrap materials, cocoa, spices, salt, coir, and coconut husk. These items provide important insights into market trends and resource utilization patterns.

The preparation of this report has been a collaborative effort by the dedicated officers of the Price Division within the Directorate. Their commitment and diligence have been instrumental in bringing out this publication successfully. I would like to extend my sincere appreciation to Shri Rajendran Nair S., Assistant Director, for his commendable work in compiling and preparing this report.

Thiruvananthapuram

Data analysis of Miscellaneous Price based on Price Statistics 2022

This report presents a comprehensive analysis of price data, which is broadly categorized into two key types: **Wholesale Prices** and **Retail Prices**. These data serve as vital inputs for the computation of various economic indicators and provide a clear picture of price movements within the economy.

The process of price collection and analysis covers a wide range of items essential to daily life and economic activity. Specifically, this report analyzes:

- Prices of **20 items**
- Prices of **50 essential items**
- **Retail Prices of Certain Essential Commodities (Additional Items)**
- **Wholesale and Retails Fruits**
- **Miscellaneous items**, including the prices of **waste paper, scrap materials, cocoa, spices, salt, coir, and coconut husk**

Contents

Data analysis of Miscellaneous Price based on Price Statistics 2022.....	2
Prices of 20 items.....	8

Prices of 20 items

Tobacco (₹/kg)

The district-wise price trend during the year indicates clear regional variations with moderate month-to-month changes. Thiruvananthapuram recorded the lowest price levels, remaining mostly stable with a yearly average of ₹92.75, while Kollam and Kottayam showed complete price stability throughout the year at ₹120 and ₹110 respectively. Pathanamthitta and Alappuzha experienced gradual increases during the middle of the year, followed by slight declines towards the end. Idukki, Ernakulam, and Thrissur maintained high and largely uniform prices, with minor reductions observed during the last quarter. Palakkad and Malappuram showed noticeable fluctuations, reflecting seasonal and market-related influences. Kozhikode recorded comparatively higher prices with a clear upward movement from May onwards, resulting in a high yearly average of ₹345.50. Wayanad maintained moderate price levels with limited variation, whereas Kannur consistently reported the highest price at ₹380 throughout the year. Kasargod showed an increase from ₹180 to ₹200 during the year and remained stable thereafter. Overall, the state average exhibited a mild upward trend during the mid-year months, peaking around May–September, and settled at a yearly average of ₹214.10, indicating generally stable prices with regional disparities.

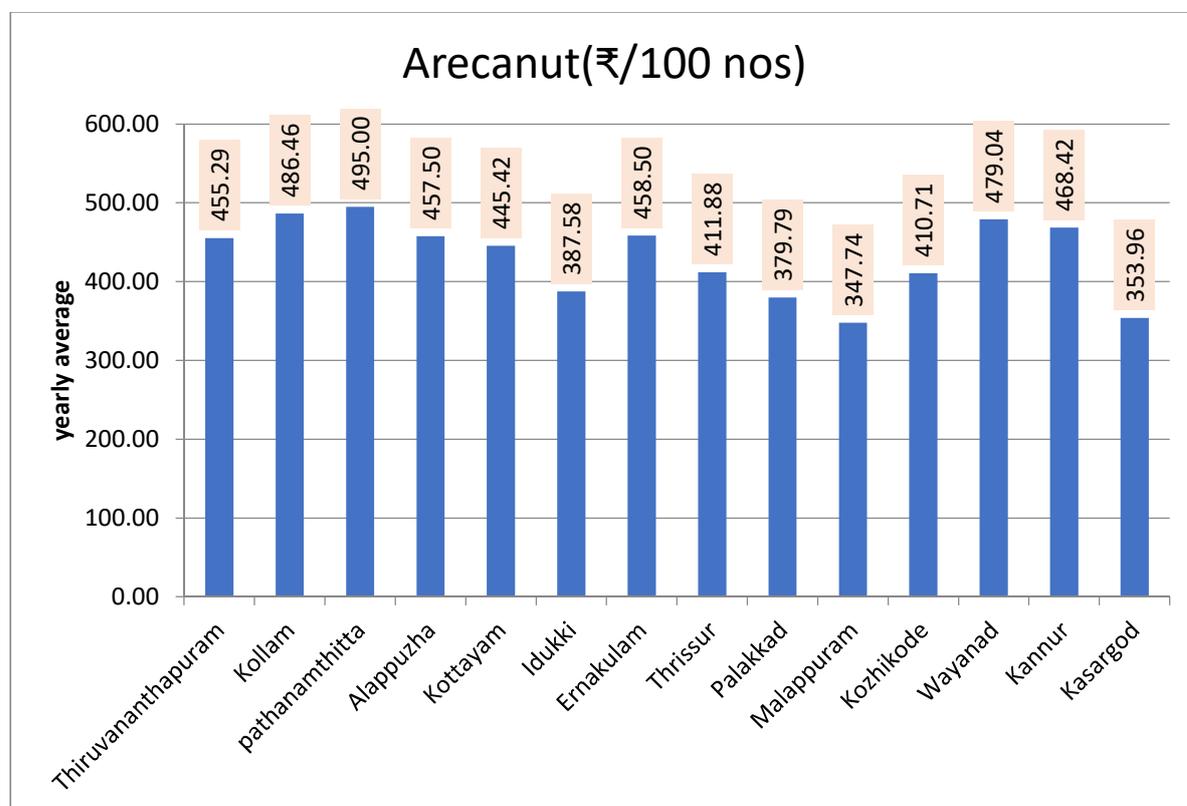

Table 01- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Arecanut(₹/100 nos)

The price trend of arecanut during the year exhibited notable seasonal fluctuations across districts. Prices generally remained moderate during the first half of the year and increased sharply during the monsoon months, particularly in July and August, before declining towards the end of the year. Thiruvananthapuram and Kollam recorded moderate price levels with pronounced mid-year peaks, while Pathanamthitta, Kottayam, and Ernakulam showed relatively higher and more stable trends. Idukki experienced a significant dip during April–May followed by a gradual recovery in the subsequent months. Wayanad and Kannur reported comparatively higher prices, whereas Malappuram and Kasargod recorded lower price levels overall. Kozhikode and Thrissur showed moderate fluctuations without extreme volatility. The state average clearly reflects this seasonal pattern, rising from around ₹390 in the early months to above ₹560 during July–August and settling at a yearly average of ₹431.23, indicating strong seasonal influence on arecanut prices across the state.

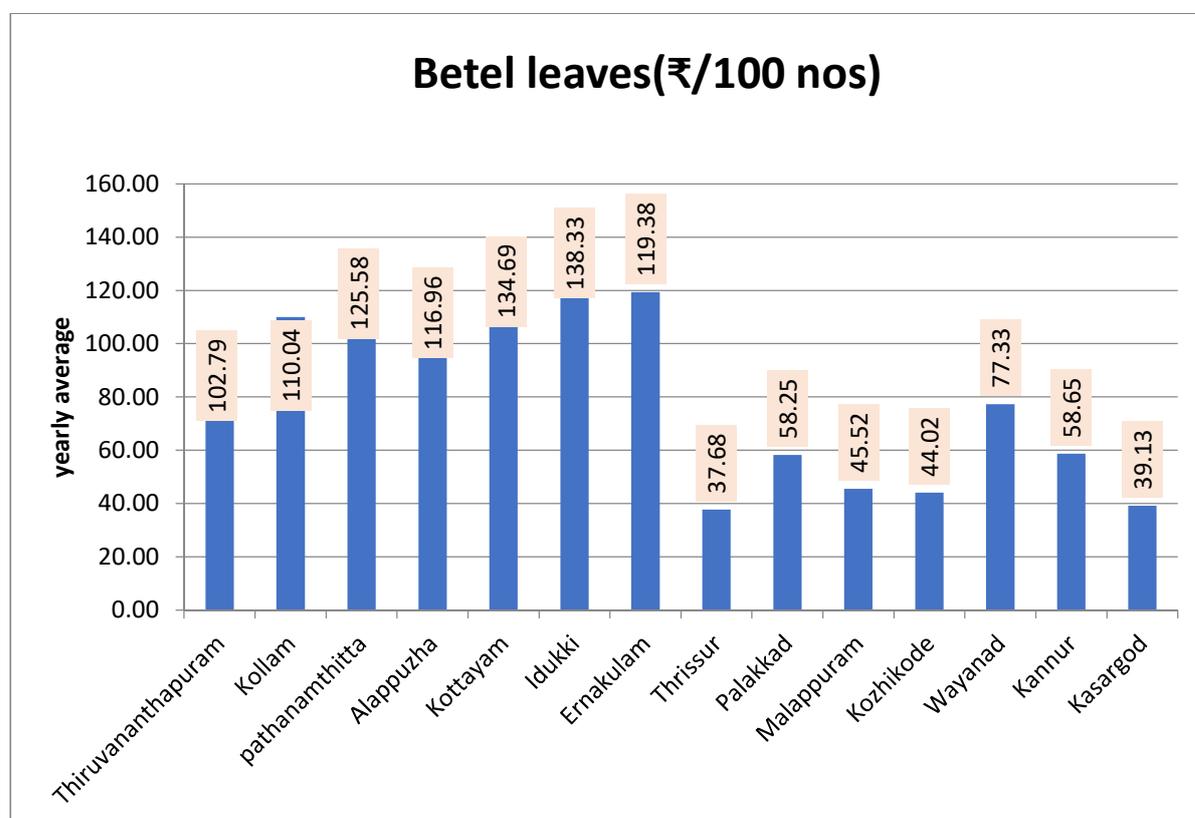

Table 02- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Betel leaves (₹/100 nos)

The price trend of betel leaves during the year showed considerable seasonal variation across districts. Prices were generally higher during the beginning of the year and declined sharply during the summer months, particularly in April and May, before showing a gradual recovery from July onwards. Southern districts such as Thiruvananthapuram, Kollam, and Pathanamthitta recorded relatively higher prices with noticeable fluctuations, while Kottayam reported the highest yearly average, reflecting stronger demand or limited supply. Idukki maintained comparatively stable prices for most of the year, with a mild decline towards the end. Central and northern districts, including Thrissur, Palakkad, Malappuram, Kozhikode, Kannur, and Kasargod, consistently recorded lower price levels with limited volatility. Wayanad showed moderate prices with a clear dip during mid-year. The state average highlights this pattern, falling from over ₹118 in January to below ₹70 during May–June and settling at a yearly average of ₹86.31, indicating strong seasonal influence on betel leaf prices.

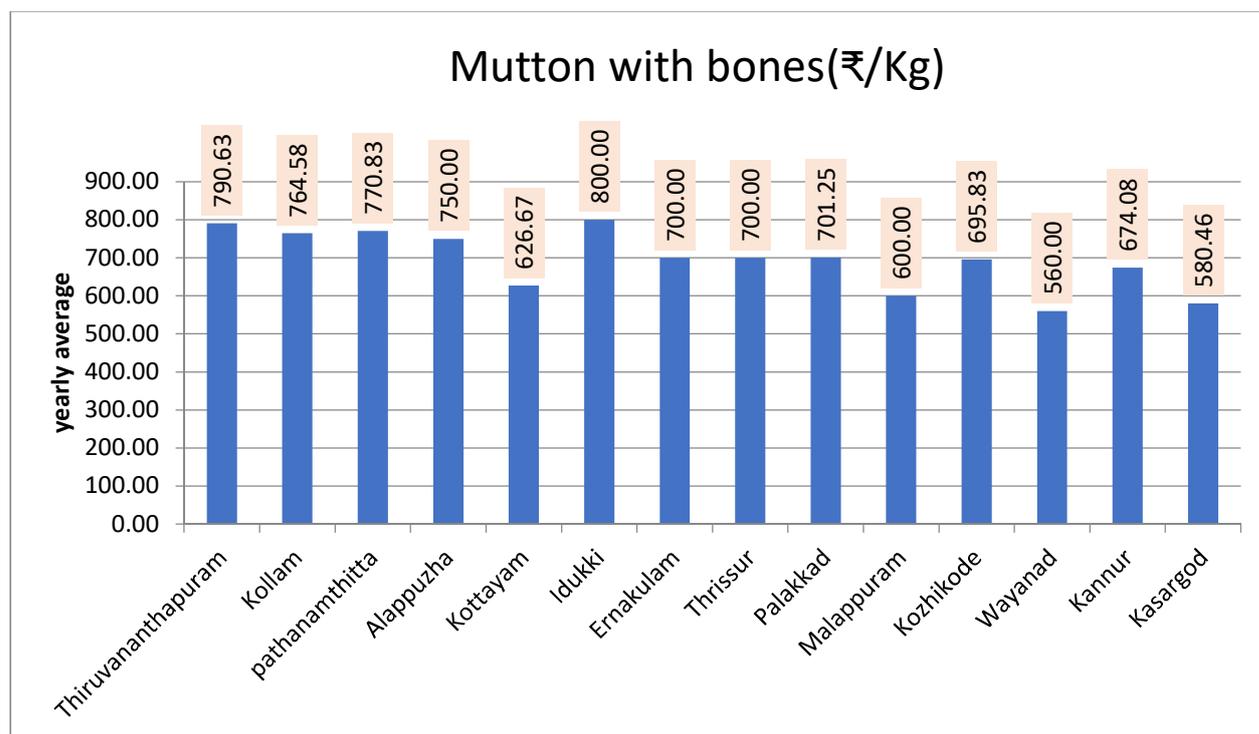

Table 03- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

mutton with bones(₹/Kg)

The price of mutton with bones in Kerala remains relatively stable throughout the year, with minor fluctuations across districts. Idukki maintains the highest and most consistent price at ₹800 per kg, while Wayanad has the lowest at ₹560. Most districts, including Alappuzha, Ernakulam, and Thrissur, show no monthly variation, indicating steady demand and supply. However, some districts like Thiruvananthapuram, Kollam, and Pathanamthitta experience slight increases, peaking at ₹800 in the latter half of the year, possibly due to festive demand. Kottayam and Kannur show minor upward trends towards the year-end, while Kasargod has irregular dips (₹557.50 in March). The state average stays around ₹690–704, reflecting overall price stability. Northern districts like Malappuram and Wayanad consistently have lower prices. Overall, mutton prices exhibit minimal volatility, with regional differences driven by local market dynamics rather than seasonal factors.

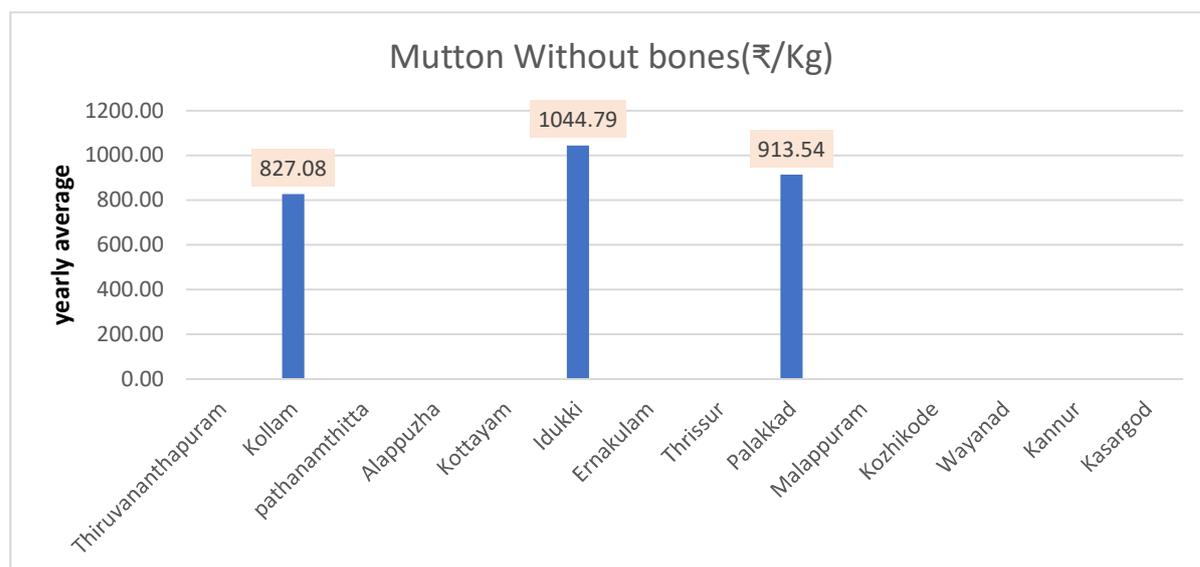

Table 04- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Mutton without bones (₹/Kg)

The price data for mutton without bones in Kerala shows significant gaps, with only Kollam, Idukki, and Palakkad reporting consistent monthly prices, while most other districts have no recorded data. Idukki has the highest prices, averaging ₹1,045 per kg, with minor dips in August (₹1,025) and September (₹1,012.50) before stabilizing back at ₹1,050. Kollam shows a steady increase from ₹800 to ₹900 from September onwards, likely due to festive demand. Palakkad maintains relatively stable prices, averaging ₹913.54, with a slight decline from ₹950 in early months to ₹900 for most of the year. The state average (calculated only from available data) hovers around ₹916–950, peaking towards the year-end. The lack of data in most districts suggests either limited availability of boneless mutton or inconsistent reporting. Overall, where data exists, prices are stable with minor seasonal fluctuations, but the sparse records make broader trends difficult to assess.

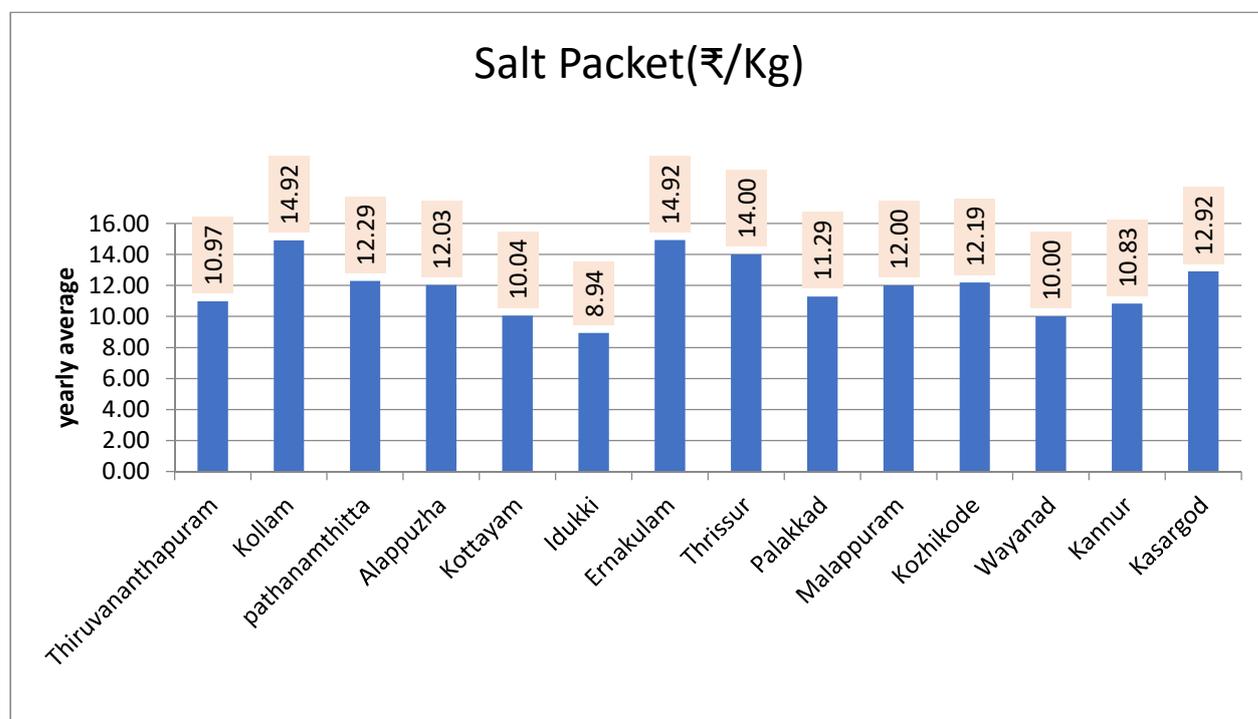

Table 05- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Salt packets (₹/kg)

The price of salt packets in Kerala shows moderate fluctuations, with distinct regional variations and a gradual upward trend throughout the year. Southern districts like Thiruvananthapuram, Pathanamthitta, and Alappuzha start at ₹10 but see a steady rise, peaking at ₹12–₹14 by year-end. Kollam and Ernakulam maintain higher prices (₹14–₹16), with minor mid-year increases. Central districts like Thrissur and Malappuram remain stable (₹12–₹14), while Kottayam and Wayanad show no change (₹10). Idukki has the lowest average price (₹8.94), though it rises to ₹10 in later months. Kannur sees a sharp spike in November–December (₹14–₹15). The state average climbs from ₹11.07 in January to ₹12.84 in December. Overall, salt prices remain relatively stable in most districts but exhibit seasonal increases in coastal and urban areas, suggesting logistical or demand-driven influences.

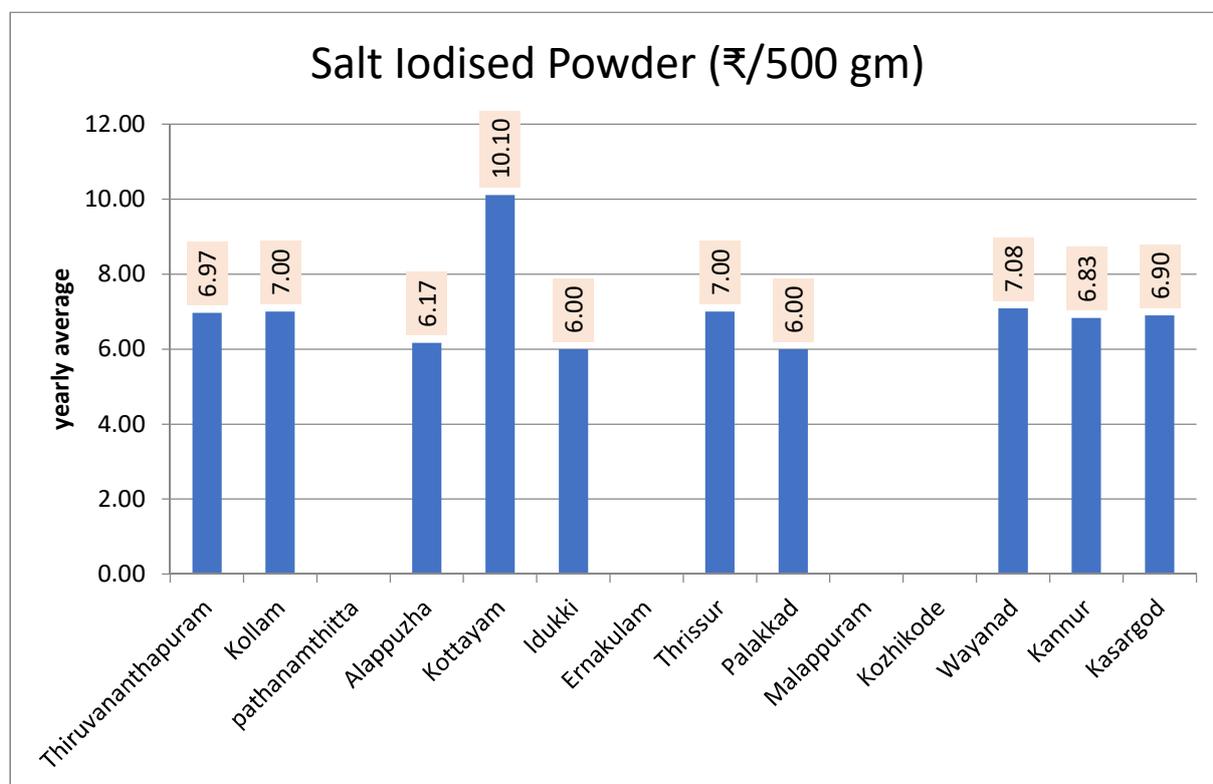

Table 06- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Iodized salt powder (₹/500 gm)

The price of iodized salt powder (500 gm) in Kerala shows moderate fluctuations with regional variations, though data gaps exist in several districts. Thiruvananthapuram records a notable mid-year increase from ₹6 to ₹8 (July–December). Kollam shows a gradual rise from ₹6 to ₹7.50, while Alappuzha remains stable at ₹5.50–₹5.88 before jumping to ₹7 from August onward. Kottayam stands out with consistently higher prices (₹10–₹10.75), possibly due to local market dynamics. Most other districts (Idukki, Palakkad, Thrissur, Wayanad, Kannur, and Kasargod) maintain stable prices between ₹6–₹8, with minor increases in Kasargod (₹8 in December) and Wayanad (₹8 in December). The state average rises gradually from ₹6.55 in January to ₹7.45 in December. Overall, while some districts experience seasonal price hikes, iodized salt remains relatively stable. The lack of data in Ernakulam, Malappuram, and Kozhikode limits a complete analysis.

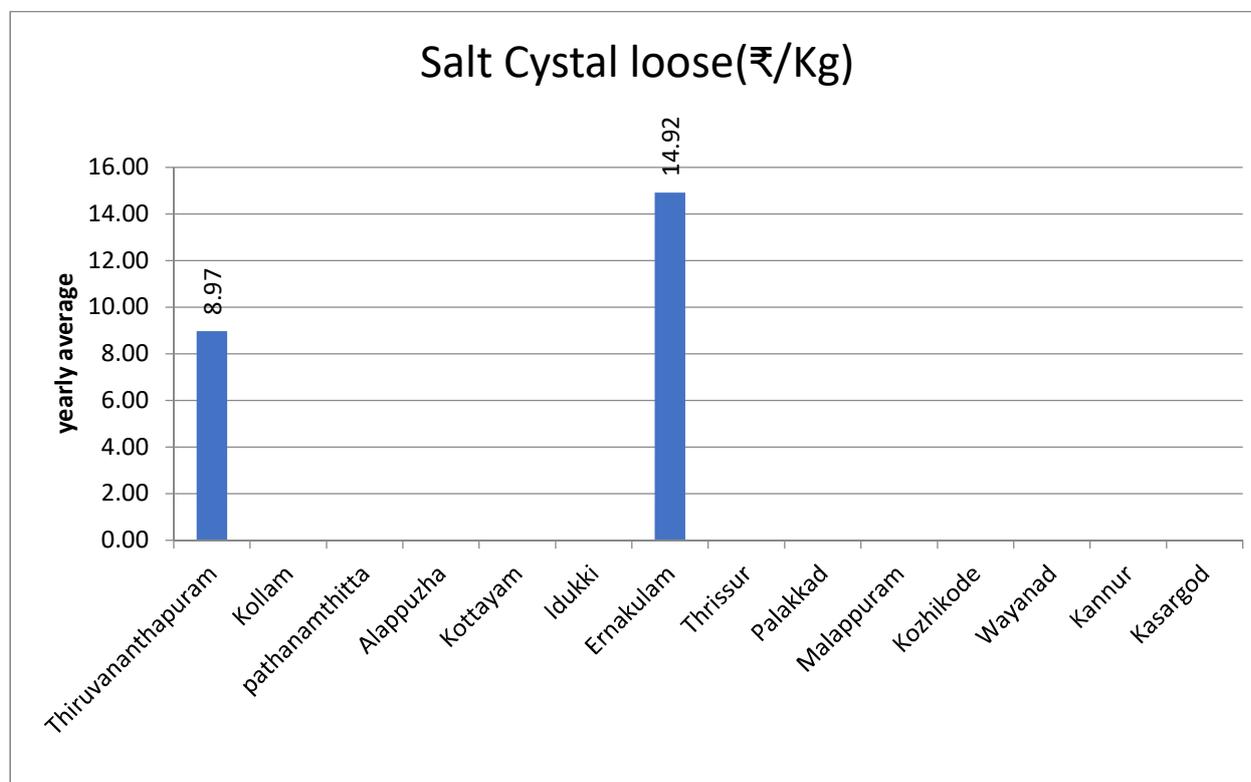

Table 07- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Loose crystal salt(₹/Kg)

The price data for loose crystal salt in Kerala is extremely limited, with only Thiruvananthapuram and Ernakulam reporting consistent monthly figures. Thiruvananthapuram shows a stable price of ₹8 for the first half of the year, rising to ₹10 from July onward. In contrast, Ernakulam maintains significantly higher prices throughout the year, averaging ₹14.92, with a peak of ₹16 in July and a slight dip in August (₹15.25). The state average, calculated from these two districts, increases gradually from ₹11 in January to ₹12.9 in December, reflecting an overall upward trend. However, the absence of data from most districts—particularly northern regions—makes it difficult to assess broader market dynamics. The available data suggests regional disparities, with urban centers like Ernakulam having substantially higher prices than Thiruvananthapuram, possibly due to transportation costs or local demand. Without more comprehensive reporting, the analysis remains partial, highlighting the need for more consistent price tracking across all districts.

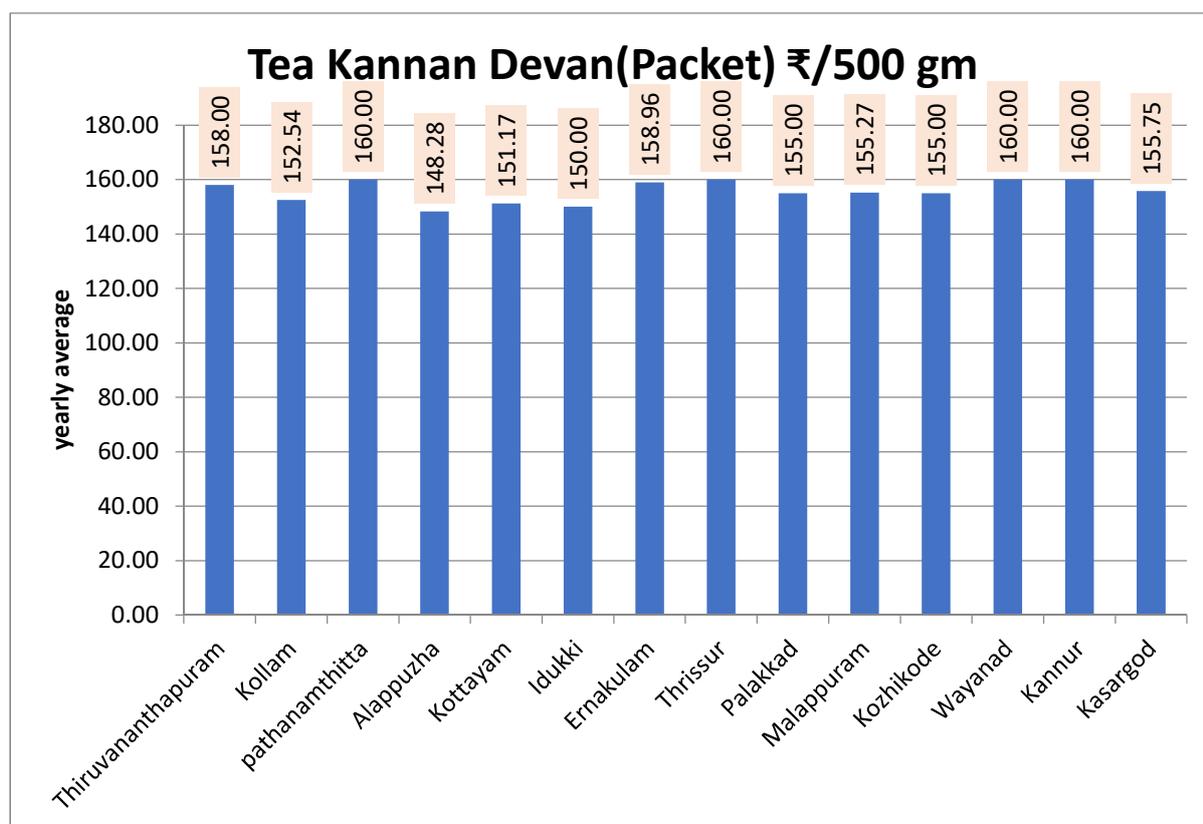

Table 08- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Kannan Devan tea (₹/ 500gm packet)

The price of Kannan Devan tea (500 gm packet) in Kerala shows remarkable stability across most districts, with only minor fluctuations observed in a few regions. Thiruvananthapuram, Pathanamthitta, Idukki, Thrissur, Wayanad, and Kannur maintain a constant price of ₹150–₹160 throughout the year. Kollam and Kottayam experience slight increases towards the year-end (peaking at ₹160 in November–December), likely due to festive demand. Alappuzha shows a gradual upward trend, rising from ₹144 to ₹152, while Ernakulam starts at ₹150 but stabilizes at ₹160 after February. Palakkad, Malappuram, and Kozhikode remain stable at ₹155, with Malappuram recording a negligible increase to ₹156 by year-end. Kasargod is an exception, dropping from ₹158 to ₹155 from April onward. The state average stays consistent (₹154–157), reflecting minimal overall variation.

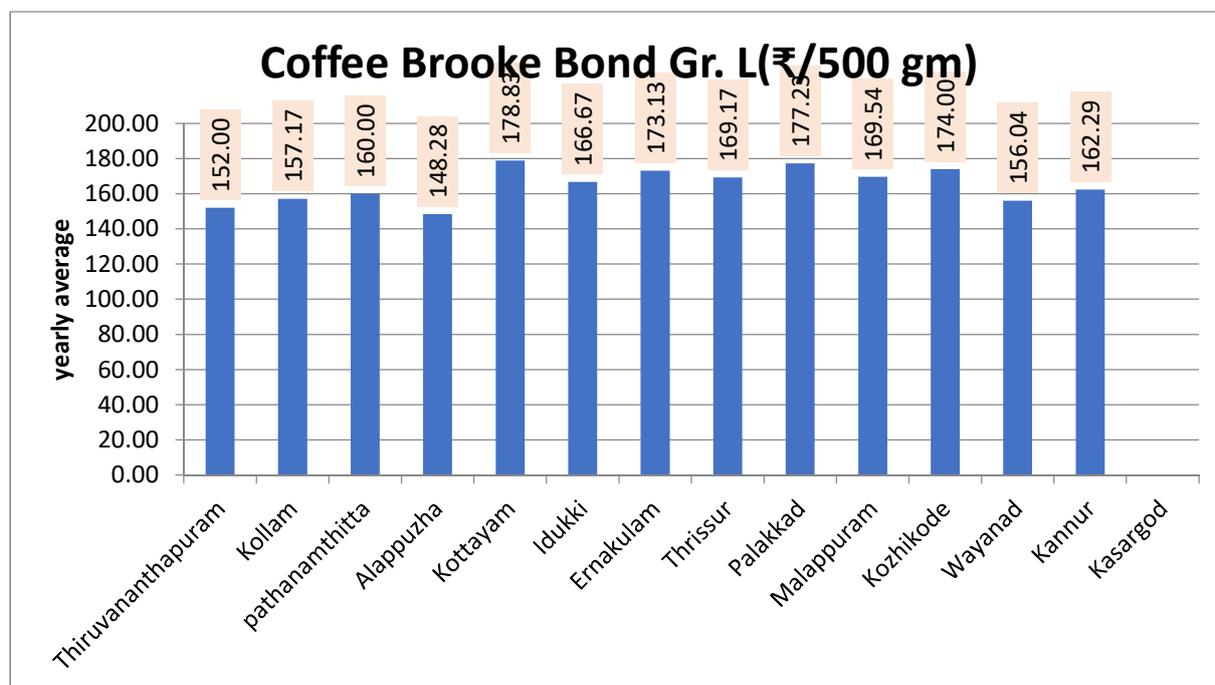

Table 09- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Brooke Bond Green Label coffee (₹/500 gm. packet)

The price of Brooke Bond Green Label coffee (500 gm packet) in Kerala exhibits significant regional variations and notable fluctuations, particularly in the second half of the year. While Thiruvananthapuram and Pathanamthitta maintain stable prices (₹152 and ₹160, respectively), other districts show upward trends, especially from October to December. Kollam sees a sharp rise from ₹155 to ₹167.80 by year-end, while Kottayam climbs steadily to ₹185. Ernakulam, Thrissur, and Palakkad experience substantial increases, with Palakkad peaking at ₹200 in December—a 30% jump from its January price (₹153.50). Northern districts like Kozhikode and Malappuram also show gradual hikes, reaching ₹180–₹183 by December. Idukki stands out with a mid-year spike (from ₹150 to ₹175 in May). In contrast, Alappuzha and Wayanad remain relatively stable, with only minor fluctuations. The state average rises consistently, starting at ₹155.96 in January and reaching ₹173.55 in December, reflecting broad inflationary pressure on coffee prices. The absence of data for Kasargod limits a complete analysis. This makes Brooke Bond Green Label coffee one of the more volatile branded commodities in Kerala's retail market.

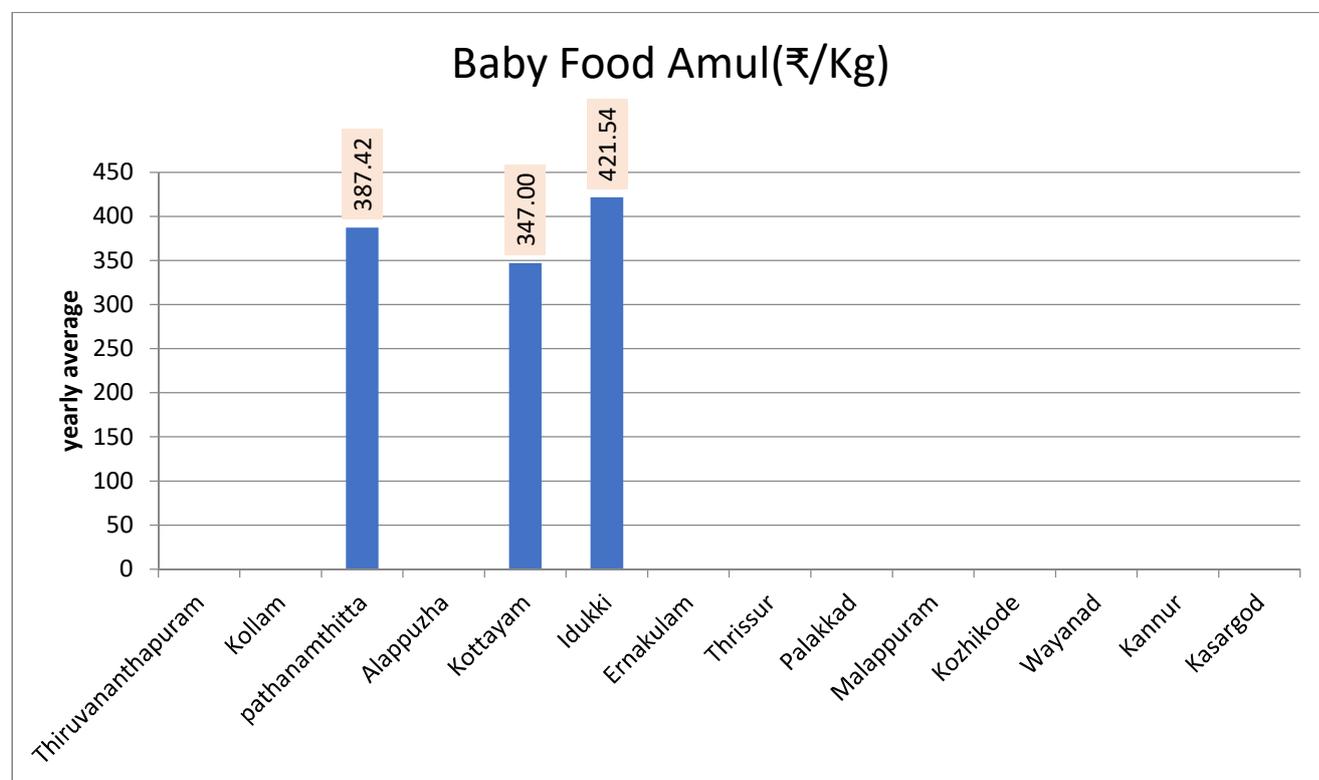

Table 10- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Amul baby food (₹/Kg)

The price data for Amul baby food in Kerala is highly limited, with only Pathanamthitta, Kottayam, and Idukki reporting consistent figures. Kottayam maintains a stable price of ₹347 throughout the year, showing no fluctuations. In contrast, Pathanamthitta records a minor increase from ₹385 to ₹390 between July and October, likely due to logistical or demand factors. Idukki shows the most significant variation, starting at ₹394.50 in January, rising to ₹430 from May onward—a 9% increase. The state average, calculated from these three districts, rises gradually from ₹375.50 in January to ₹389 by October, driven largely by Idukki’s spike. The absence of data from other districts—particularly urban centers like Thiruvananthapuram and Ernakulam—makes broader trends difficult to assess. However, the available data suggests regional disparities, with Idukki being the most expensive market. The overall stability in Kottayam and Pathanamthitta indicates controlled pricing in accessible regions, while remote areas like Idukki face steeper costs. More comprehensive reporting is needed for a complete analysis.

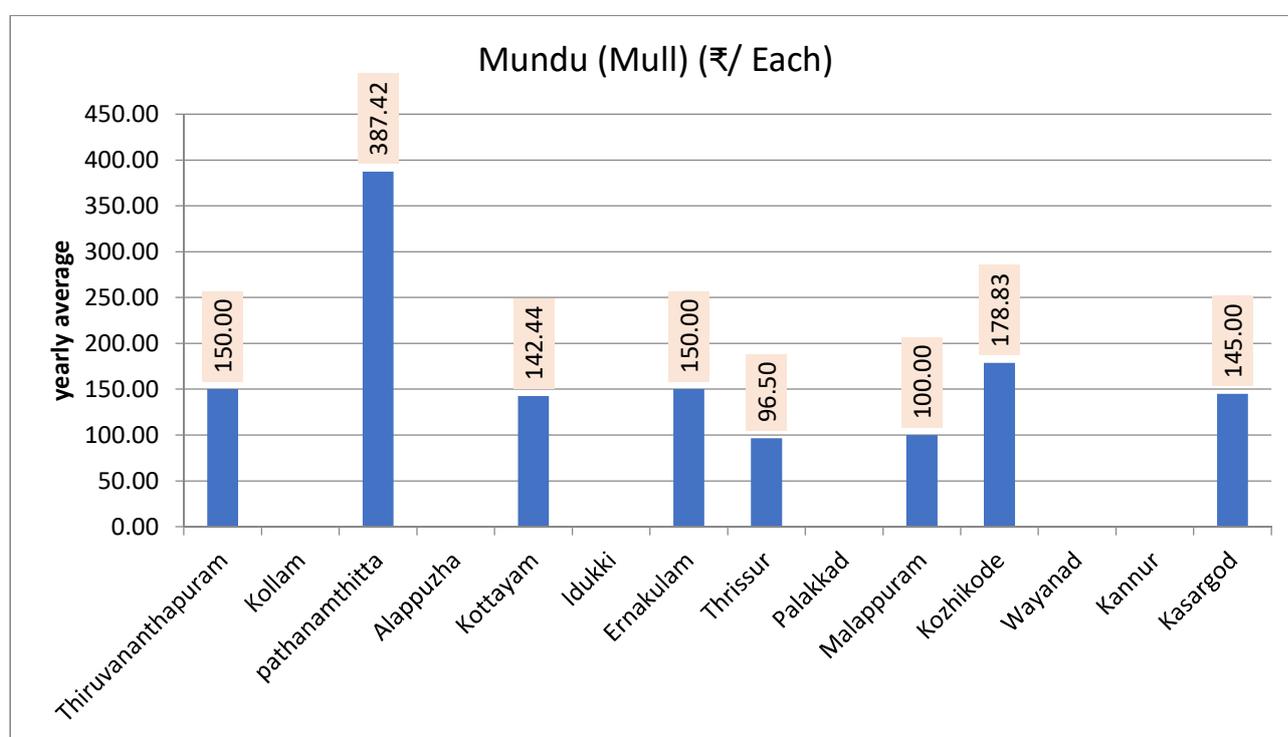

Table 11- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Mundu (Mull) (₹/ Each)

The price of Mundu (Mull) in Kerala shows stark regional disparities, with Pathanamthitta being the most expensive (₹385–₹390) and Thrissur the cheapest (₹90–₹108). While Thiruvananthapuram and Ernakulam maintain a steady ₹150 throughout the year, Kottayam exhibits minor fluctuations (₹140–₹148), peaking in June–July before settling back at ₹140. Thrissur sees a 20% price hike from ₹90 to ₹100 in June, rising further to ₹108 in December. Malappuram remains stable at ₹100, while Kasargod holds at ₹145 consistently. Kozhikode shows a slight increase from ₹172 in January to a stable ₹180 from March onward. The state average, influenced by Pathanamthitta’s high prices, ranges between ₹166.50 and ₹170.38, masking extreme local variations. The absence of data from half the districts—especially northern regions like Kannur and Wayanad—limits a complete analysis, but the available data highlights significant cost differences based on geography, with central and southern districts generally more expensive.

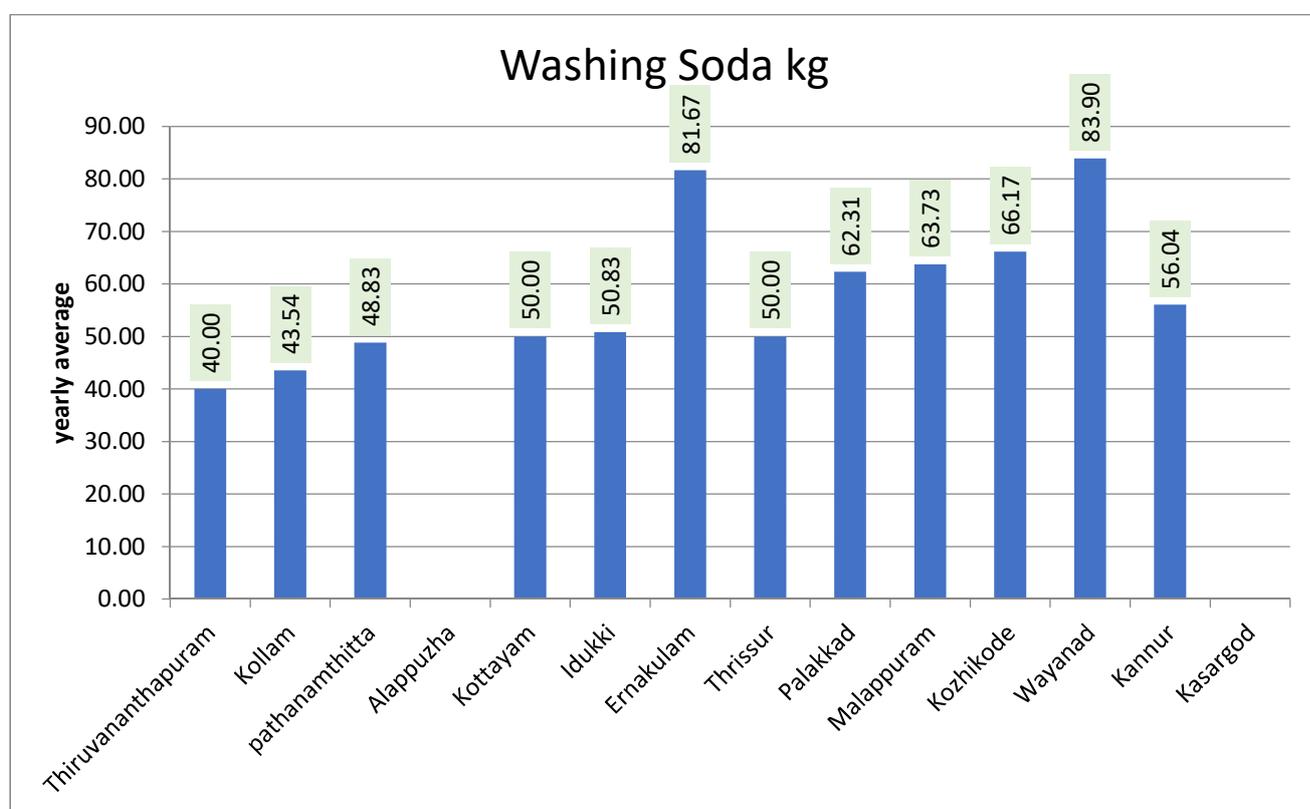

Table 12- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Washing soda(₹/Kg)

Washing soda prices in Kerala during the year showed a consistent rising trend with wide inter-district variation. Thiruvananthapuram maintained a uniform price of ₹40 per kg throughout the year, while Kottayam and Thrissur remained stable at ₹50 per kg. Ernakulam reported significantly higher prices, holding at ₹80 per kg for most months and increasing to ₹85 per kg from September onwards, resulting in a high yearly average of ₹81.67 per kg. Districts such as Palakkad, Malappuram, Kozhikode, Idukki, and Wayanad experienced sharp increases from the middle of the year, with Wayanad recording the highest price of ₹100 per kg in December. Kannur showed relatively moderate prices with a slight decline during the early months before stabilising. Data was not available for Alappuzha and Kasargod. At the state level, the average price rose steadily from ₹51.75 per kg in January to a peak of ₹64.38 per kg in September, before marginally easing, resulting in an overall yearly average of ₹58.09 per kg, indicating strong upward pressure on washing soda prices over the year.

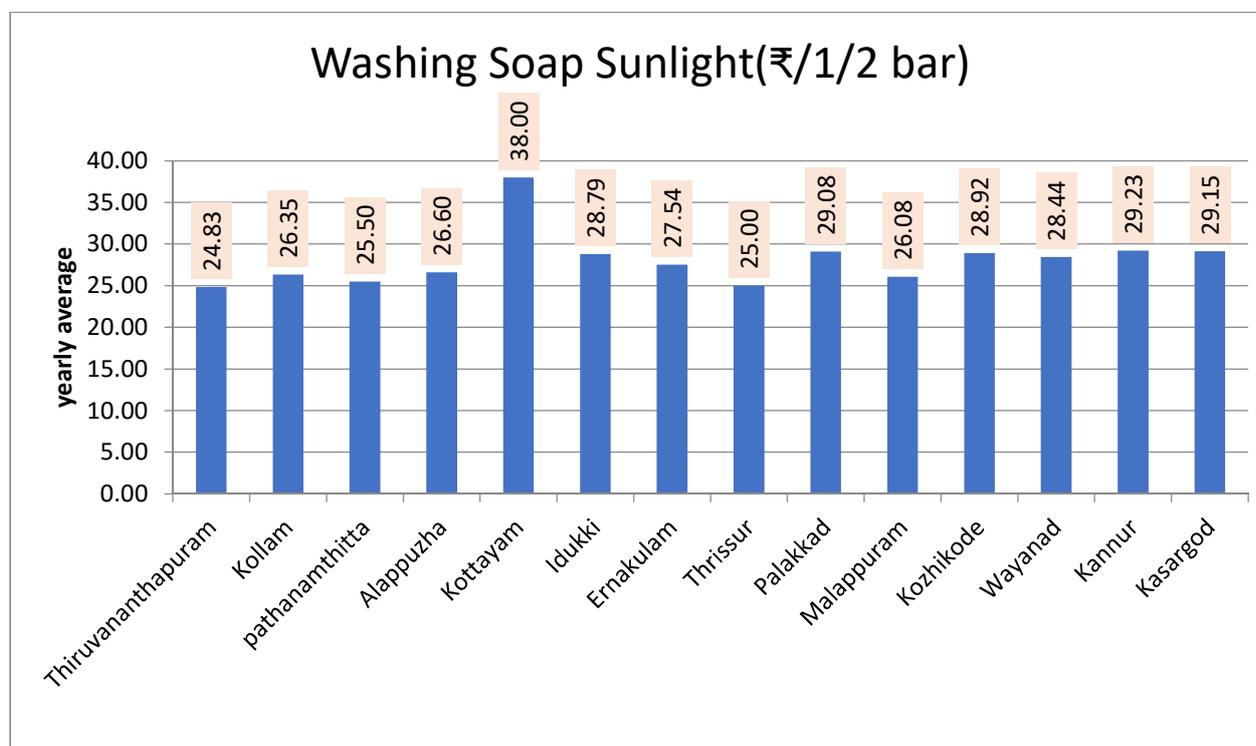

Table 13- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Sunlight washing soap (₹/1/2 bar)

The price of Sunlight washing soap in Kerala shows a clear upward trend across most districts, with prices typically rising between June and December. While Thiruvananthapuram starts at a stable ₹20, it jumps to ₹30 by July 50% increase—and remains high. Similarly, Kollam, Pathanamthitta, and Ernakulam experience gradual hikes, peaking at ₹30–₹32 by year-end. Kottayam stands out as the most expensive market, maintaining a constant ₹38 throughout the year—nearly double the initial price in some districts. Northern regions like Kozhikode, Kannur, and Kasargod follow a synchronized pattern, rising from ₹25 in early months to ₹32 by December. Idukki and Wayanad also show increases, though slightly more moderate. The state average climbs steadily from ₹23.82 in January to ₹31.86 by December, reflecting broad inflationary pressure. Notably, July marks a turning point, with most districts seeing sharp jumps. Only Kottayam remains immune to fluctuations, suggesting local pricing controls or distribution advantages. The data indicates that washing soap prices are highly sensitive to seasonal and regional factors, with uniform upward trends despite varying baseline costs.

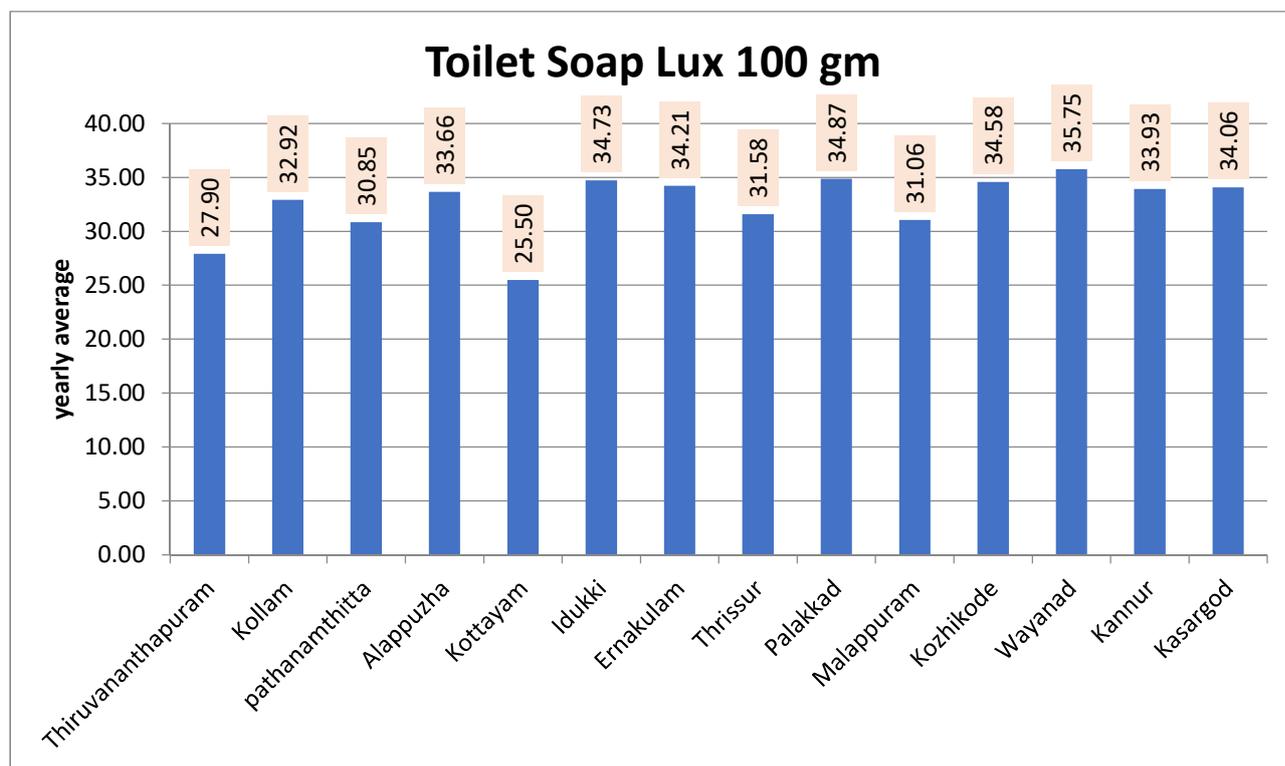

Table 14- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Lux toilet soap (₹/100 gm)

The price of Lux toilet soap (100 gm) in Kerala exhibits clear seasonal and regional variations, with most districts showing a steady upward trend from June to December. Southern districts like Thiruvananthapuram start at ₹25 but rise sharply to ₹31 by July, while Kollam and Pathanamthitta follow a similar pattern, peaking at ₹36–₹37.20 by year-end. Kottayam is an exception, maintaining a stable ₹25 for most of the year before a slight rise to ₹28 in November. Northern regions, including Kozhikode, Wayanad, and Kannur, show consistent increases, with Wayanad reaching the highest peak (₹38 from July onward). Central districts like Ernakulam and Thrissur also record significant jumps, particularly in July (₹35). The state average climbs from ₹28.82 in January to ₹35.57 in December, reflecting a 23% annual increase. Notably, July marks a turning point, with prices rising sharply likely due to monsoon-related supply disruptions or festive demand. Idukki and Palakkad are among the costlier markets, averaging ₹34.73–₹34.87, while Kottayam remains the most affordable. The data suggests uniform inflationary pressures across Kerala, though the degree of fluctuation varies by district, influenced by local demand and logistical factors.

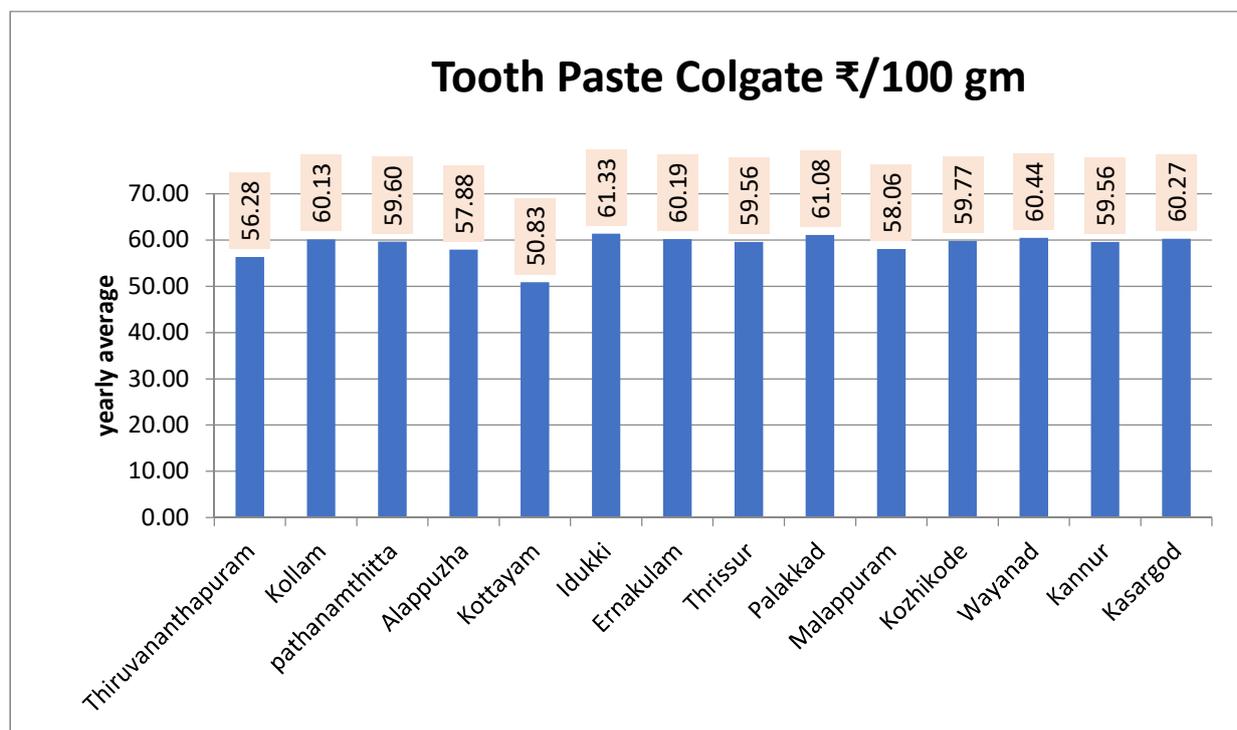

Table 15- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Colgate toothpaste (₹/100 gm)

The price of Colgate toothpaste (100 gm) in Kerala shows consistent inflation across districts, with a clear mid-year surge typically beginning in June-July. Southern districts like Thiruvananthapuram demonstrate a sharp ₹13 jump (from ₹50 to ₹63) between June and July, while Kollam and Pathanamthitta follow a more gradual rise, peaking at ₹66 by December—a 20-25% annual increase. Kottayam remains an outlier with stable pricing (₹50 for most of the year) until a late ₹5 hike in November. Northern regions exhibit synchronized trends, with Kozhikode, Wayanad, and Kannur maintaining ₹60-63 from July onward, while Kasargod shows a dramatic ₹6.50 spike in June. The state average climbs steadily from ₹54.64 in January to ₹62.44 in December, reflecting 14.3% yearly inflation. Notably: July emerges as the critical inflationary month, with 12/14 districts recording price jumps (typically ₹60→₹63), suggesting manufacturer-led nationwide price revisions. Mountainous Idukki maintains premium pricing (₹58-63), while coastal Alappuzha shows unusual year-end deflation (₹60.50→₹56). Palakkad and Ernakulam mirror corporate pricing patterns, reaching ₹63 by July and sustaining it, whereas Malappuram delays inflation until June (₹52→₹63).

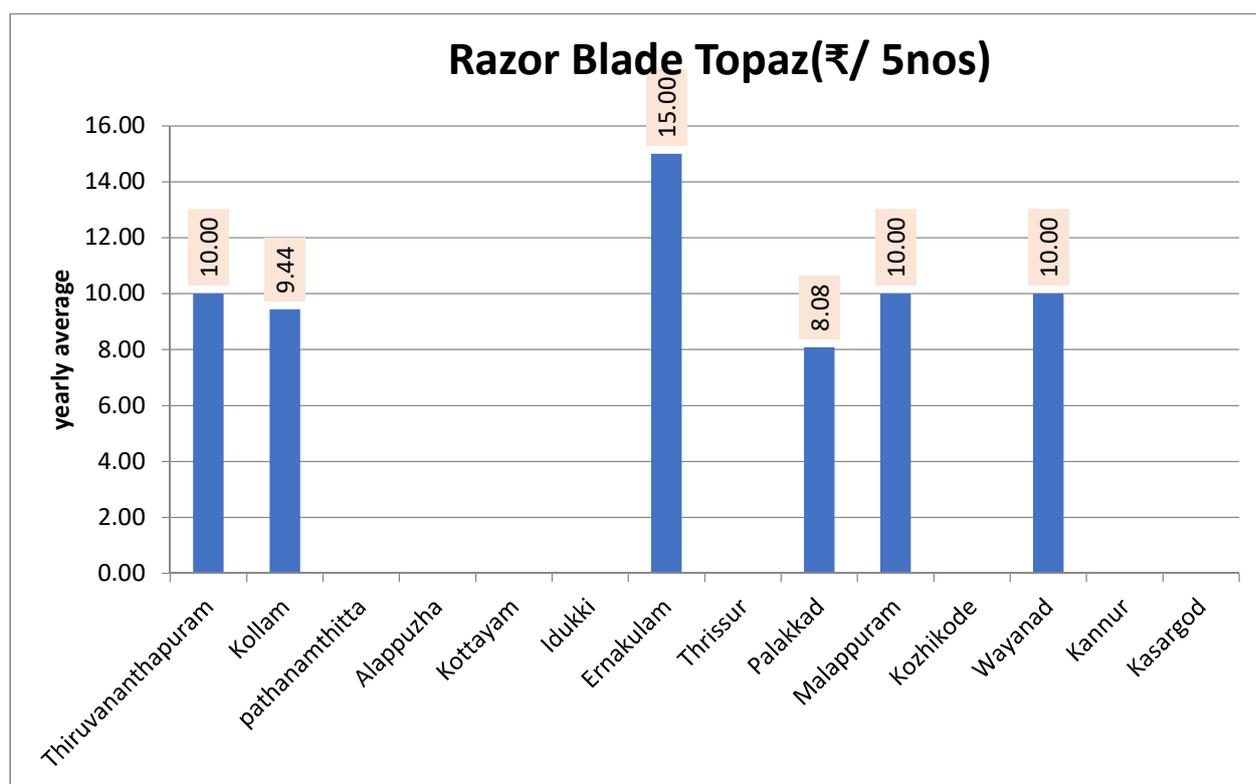

Table 16- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Topaz razor blades (₹/ 5nos)

The price of **Razor Blade Topaz** during the year shows an overall stable to moderately increasing trend across the districts. In Thiruvananthapuram, Malappuram, and Wayanad, the price remained constant at ₹10 throughout the year, indicating price stability. Kollam experienced a gradual increase from ₹7 in January to ₹10 by May, which then remained unchanged for the rest of the year, resulting in a yearly average of ₹9.44. Ernakulam consistently recorded the highest price at ₹15 across all months, while Palakkad showed a steady rise from ₹7 in the first half of the year to ₹10 by December. Several districts reported no price data during the year. At the state level, the average price increased steadily from ₹9.83 in January to ₹10.83 in December, with an annual average of ₹10.42, reflecting a mild upward price movement over the year.

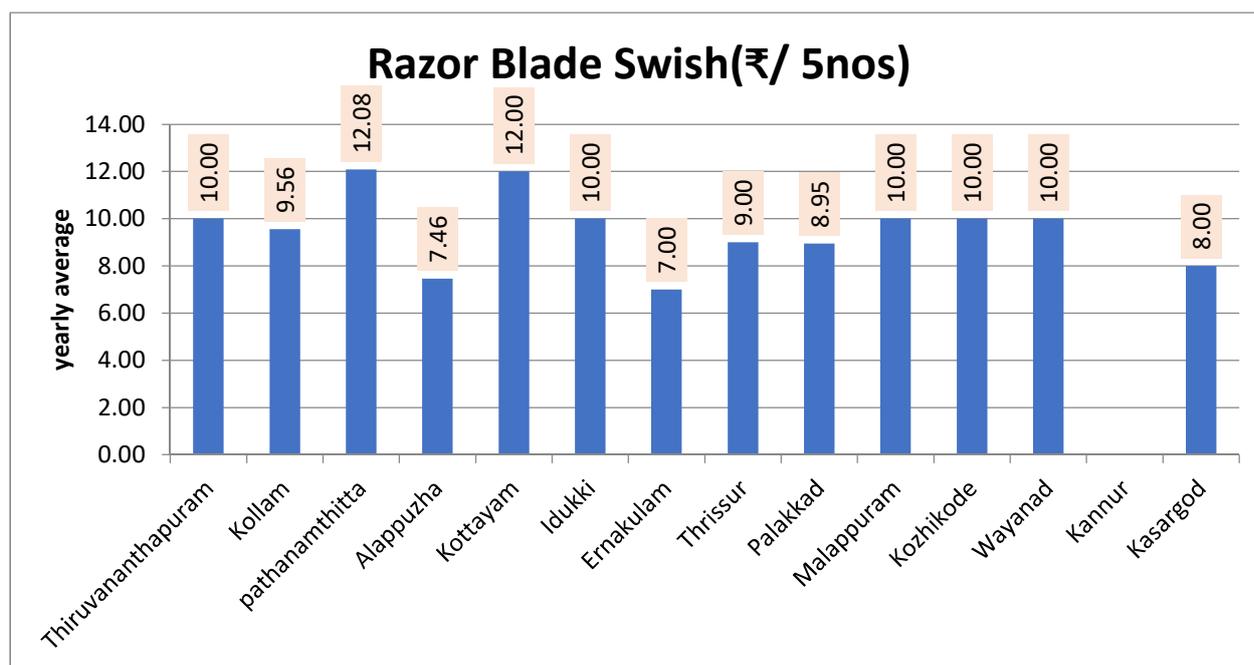

Table 17- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Swish razor blades (₹/ 5nos)

The price of Swish razor blades in Kerala displays moderate regional variations with limited fluctuations in most districts. Thiruvananthapuram, Idukki, Malappuram, and Kozhikode maintain a stable ₹10 throughout the year, while Kollam shows a gradual rise from ₹8 to ₹10 by May. Pathanamthitta stands out with a 40% price surge in July (₹10 to ₹14), maintaining this elevated level thereafter – the highest recorded price among reporting districts. In contrast, Alappuzha and Ernakulam remain at the lower end (₹7-9), though Alappuzha shows a late-year increase to ₹9 by November. Kottayam consistently charges a premium ₹12, while Kasargod holds at ₹8 without variation. Palakkad demonstrates a mid-year adjustment, rising from ₹8 to ₹10 between July-August. The state average creeps up marginally from ₹9.15 in January to ₹9.92 by year-end, reflecting Pathanamthitta's disproportionate influence. Three distinct pricing tiers emerge: premium (Kottayam ₹12), mid-range (₹10), and budget (₹7-9), suggesting local market segmentation rather than state wide pricing uniformity. The product shows greater volatility than Topaz blades, particularly in Pathanamthitta, while maintaining remarkable stability in 8 of 12 reporting districts. The absence of Kannur's data slightly limits the analysis, but the available figures indicate selective inflationary pressure rather than blanket price hikes.

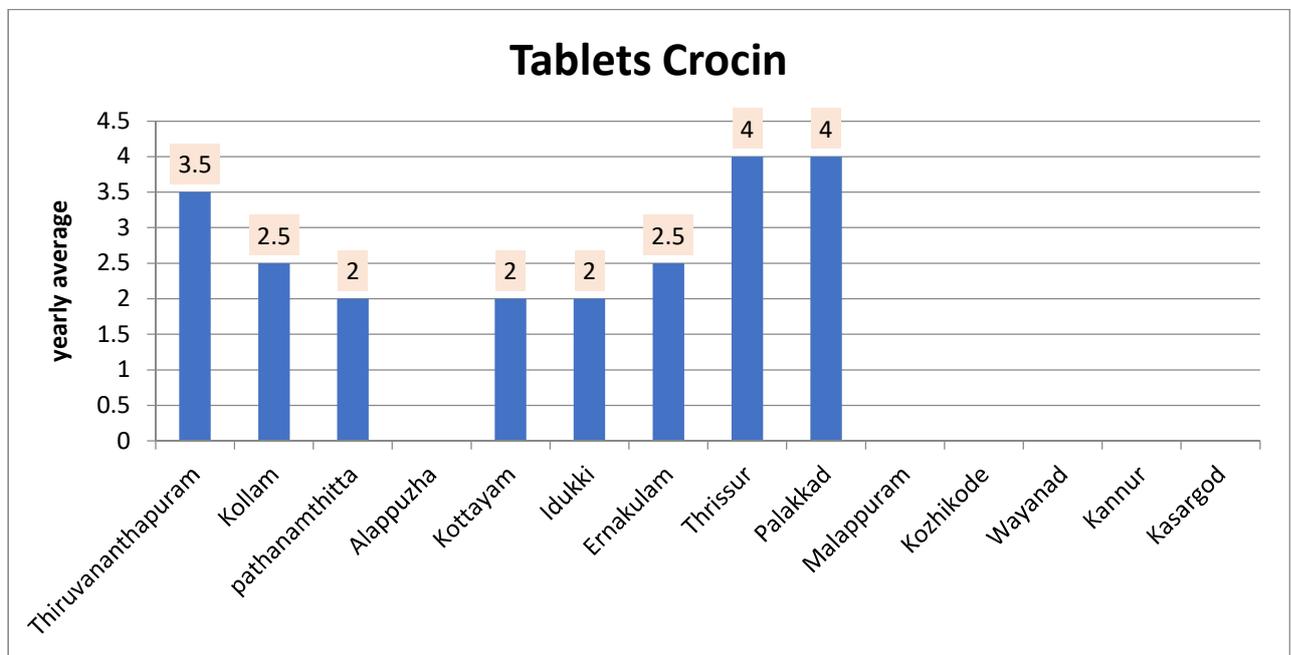

Table 18- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Crocin tablets (₹/2 tabs)

The price data for Crocin tablets in Kerala reveals absolute price stability in all reporting districts, with no fluctuations observed throughout the year. Thiruvananthapuram maintains the highest price at ₹3.50 consistently, while Kollam and Ernakulam stick to ₹2.50. Most districts (Pathanamthitta, Kottayam, and Idukki) show unwavering pricing at ₹2.00, demonstrating the most affordable rates. Notably, Thrissur and Palakkad sustain a higher fixed price of ₹4.00 - double the cheapest available rate. The state average remains constant at ₹2.50 across all months, though this calculation excludes non-reporting districts (Alappuzha, Malappuram, Kozhikode, Wayanad, and Kannur). The complete absence of price movements suggests strict price controls, uniform distribution costs, or manufacturer-mandated pricing for this essential medicine. The data highlights significant regional price disparities (₹2.00 to ₹4.00) for the same product. The stability contrasts sharply with more volatile commodity prices, indicating Crocin's status as a tightly regulated pharmaceutical product in Kerala's markets.

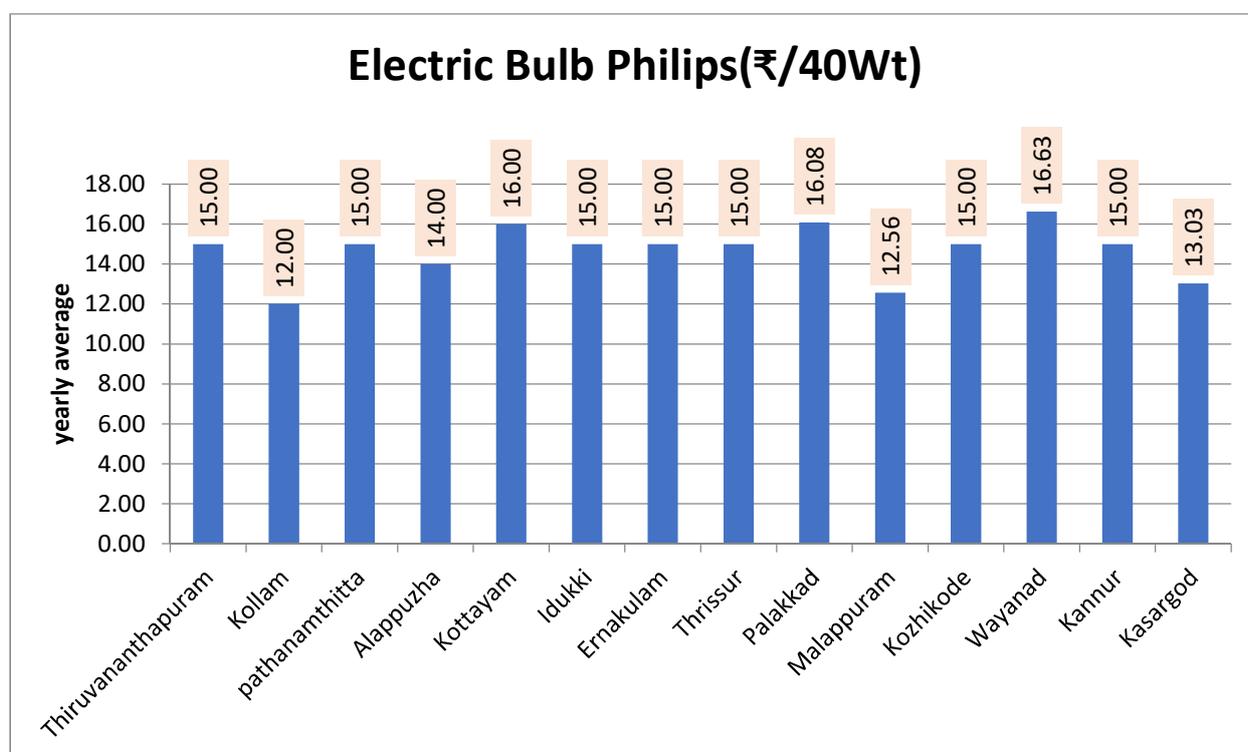

Table 19- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Philips electric bulbs Each(₹/40Wt)

The price of Philips electric bulbs in Kerala demonstrates remarkable stability across most districts, with only Palakkad, Malappuram, and Wayanad showing minor fluctuations. Thiruvananthapuram, Pathanamthitta, Idukki, Ernakulam, Thrissur, and Kozhikode maintain a constant ₹15 throughout the year, while Kollam remains at ₹12 and Alappuzha at ₹14. Kottayam consistently charges the highest fixed price at ₹16. The few districts with variations include. Palakkad, which rises from ₹15 to ₹17 between June and July, maintaining this level thereafter. Malappuram, showing a slight increase from ₹12 to ₹13 from June onward. Wayanad, climbing from ₹15 in January to ₹17 by April and sustaining this price. The state average edges up marginally from ₹14.43 in January to ₹14.92 from July onward, reflecting these limited adjustments. Kannur and Kasargod have incomplete data but suggest stable pricing at ₹15 and ₹13 respectively.

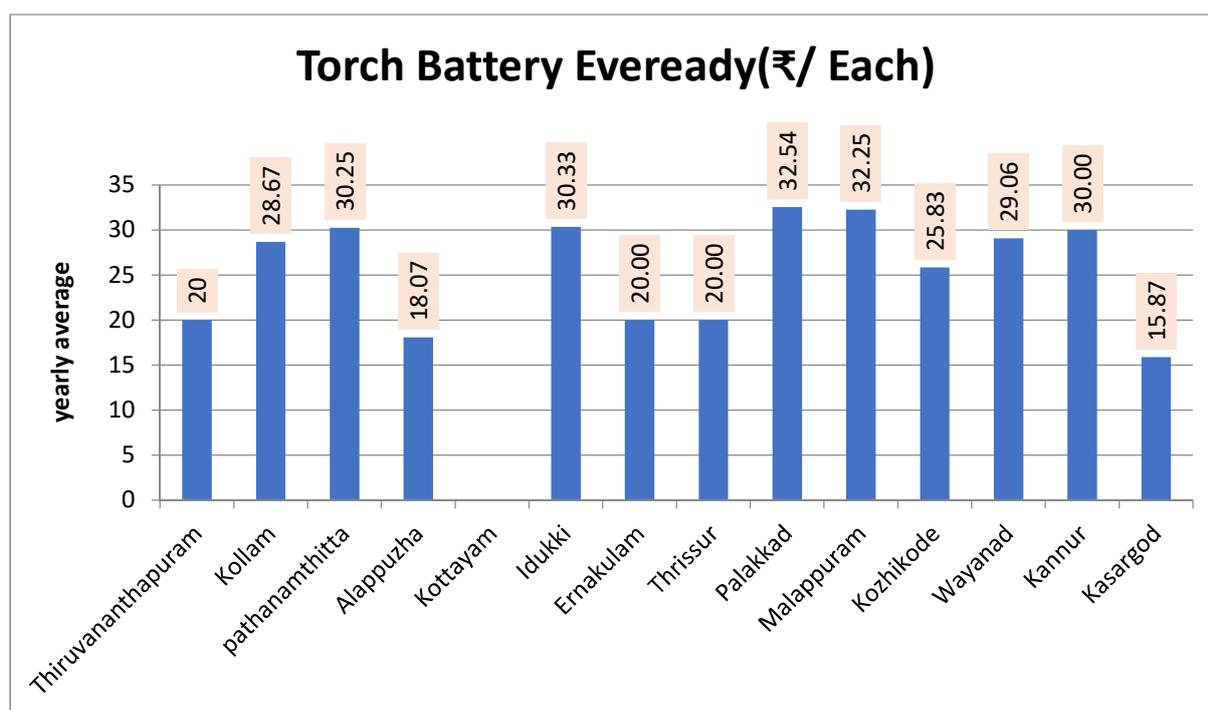

Table 20- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Eveready torch batteries(₹/ Each)

The price of Eveready torch batteries in Kerala shows regional stability with selective year-end surges, particularly in northern districts. Thiruvananthapuram, Ernakulam, and Thrissur maintain a constant ₹20 throughout the year, while Alappuzha holds at ₹18 (with a minor December rise to ₹18.80). Northern districts exhibit more volatility. Kollam rises from ₹26 to ₹30 between January-November. Palakkad peaks at ₹34.75 in May before settling at ₹33.20 in December. Malappuram jumps from ₹30 to ₹34 between June-July. Kozhikode shows a dramatic 40% spike in December (₹25 to ₹35). Pathanamthitta, Idukki, and Kannur maintain ₹30 for most months, though Idukki reaches ₹34 in December. Wayanad climbs steadily from ₹25 to ₹30 by April. The state average gradually increases from ₹25.15 in January to ₹28.17 in December, driven by northern districts' year-end hikes. Three pricing tiers emerge: budget (₹18-20), mid-range (₹25-30), and premium (₹30-35), with Palakkad and Malappuram consistently at the higher end. The December spikes in multiple districts suggest year-end inventory adjustments or festive demand pressures, though most markets remain stable for 9-11 months. The absence of Kottayam's data limits complete analysis, but the available figures reveal geographical rather than temporal pricing patterns, with northern Kerala bearing higher costs.

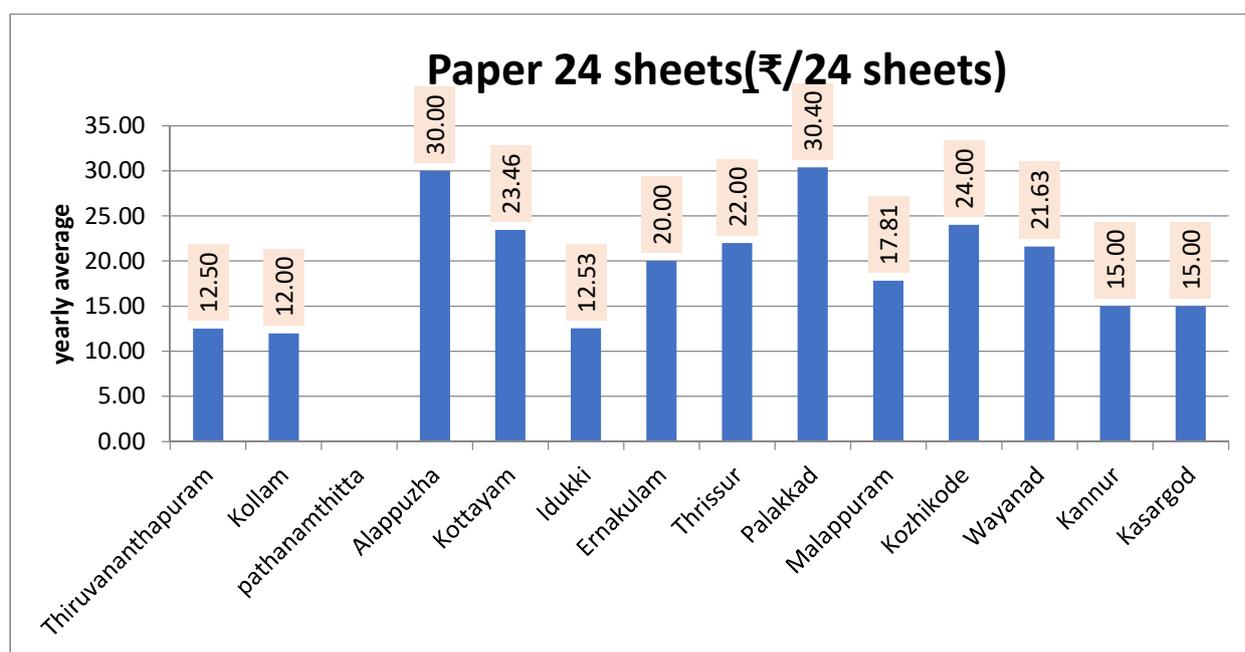

Table 21- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

paper packets(₹/24 sheets)

The price of 24-sheet paper packets in Kerala reveals sharp regional disparities with selective volatility, particularly in central districts. Thiruvananthapuram and Kollam maintain stable low prices (₹12-12.50), while Alappuzha consistently charges a premium ₹30 throughout the year - the highest recorded price. Most districts show remarkable stability, including Ernakulam (₹20), Thrissur (₹22), and Kozhikode (₹24). However, three districts exhibit significant fluctuations. Palakkad undergoes a 50% price surge from ₹24 in April to ₹36 by August, maintaining this elevated level. Wayanad shows a 33% jump between May-June (₹19.50 to ₹24). Idukki remains at ₹12 for 11 months before a sudden December spike to ₹18.40. Malappuram demonstrates gradual inflation, rising from ₹16 to ₹20 between January-November. Northern districts (Kannur and Kasargod) maintain Kerala's lowest stable price at ₹15. The state average climbs from ₹18.65 in January to ₹20.99 in December, driven largely by Palakkad's mid-year surge. The data reveals three distinct pricing tiers budget (₹12-15), standard (₹20-24), and premium (₹30), with Alappuzha standing as a conspicuous outlier. The absence of Pathanamthitta's data limits complete analysis, but available figures suggest localized supply disruptions or demand pressures in Palakkad and Wayanad rather than state-wide trends.

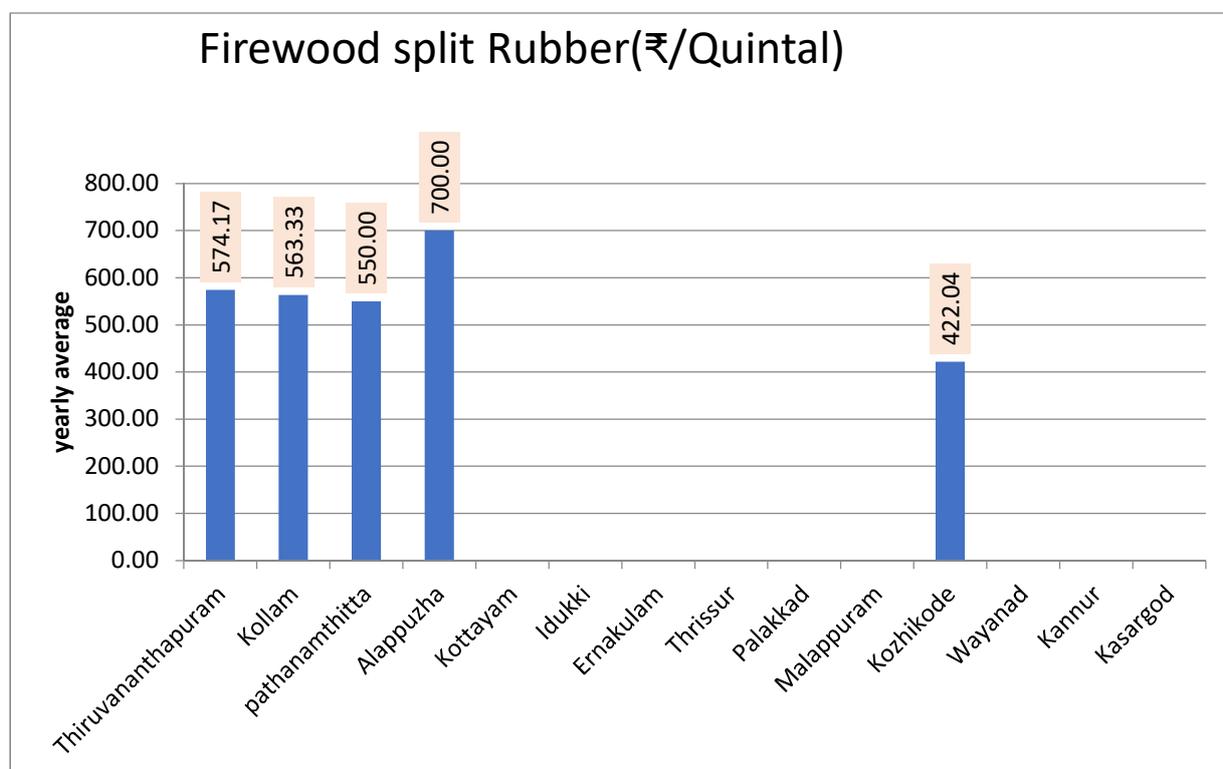

Table 22- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Firewood split Rubber (₹/Quintal)

The data shows significant variations in firewood and split rubber prices across different districts of Kerala, with some districts maintaining stable prices throughout the year while others exhibit fluctuations. Thiruvananthapuram, Pathanamthitta, and Alappuzha have relatively stable prices, with Alappuzha consistently at ₹700/month. Kollam shows a gradual increase from ₹510 in the early months to ₹650 by year-end. Kozhikode has moderate fluctuations, peaking at ₹472.50 in June and dipping to ₹380 in February. Many districts (Kottayam, Idukki, etc.) lack data, resulting in a zero average. The state average ranges between ₹538 (February) and ₹592.4 (December), with an annual average of ₹561.91. Overall, coastal and southern districts show less volatility compared to northern Kozhikode.

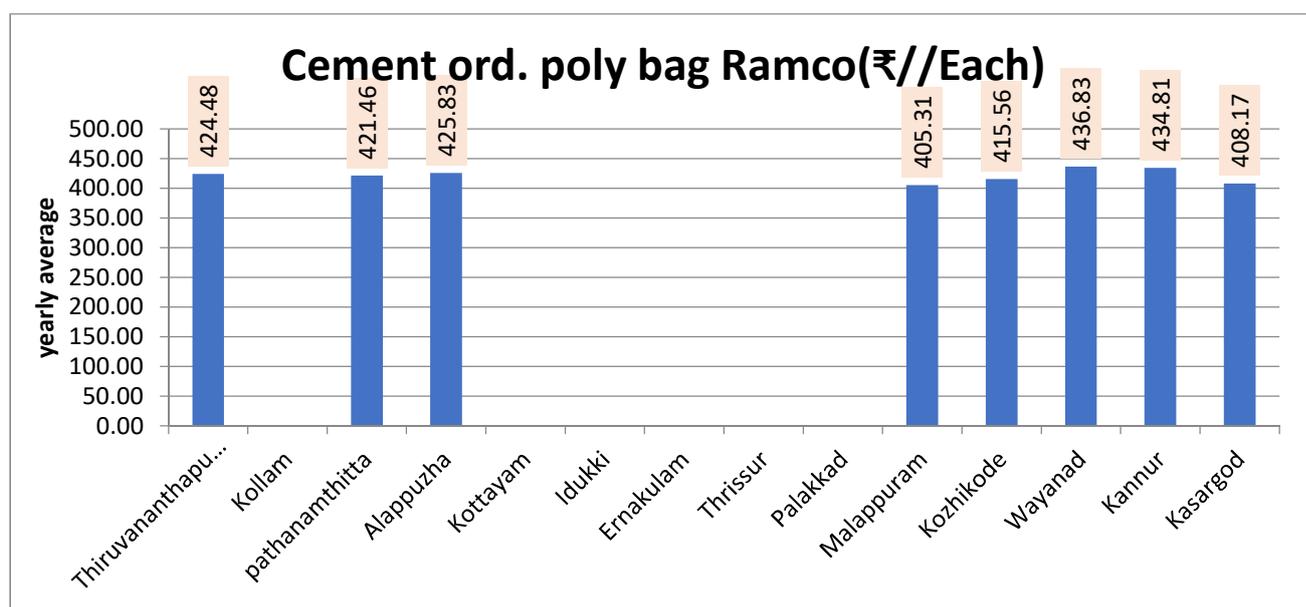

Table 23- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Cement (Ordinary Polybag - Ramco) (₹//Each)

The data reveals notable fluctuations in the price of cement (Ordinary Polybag - Ramco) across Kerala districts, with prices generally peaking towards the year-end. The highest recorded price was ₹467.50 in Alappuzha (November), while the lowest was ₹382.50 in Kasargod (January). Thiruvananthapuram, Pathanamthitta, and Alappuzha showed similar trends, with prices rising from mid-year to a peak in October-November before a slight decline in December. Malappuram and Kasargod had the most stable prices, staying below ₹440 for most months. Wayanad and Kannur maintained relatively high averages (₹436.83 and ₹434.81, respectively), with minor fluctuations. The state average ranged from ₹382.50 (January, Kasargod) to ₹467.50 (November, Alappuzha), with an annual average of ₹421.56. Overall, prices tended to rise in the latter half of the year. Districts like Kollam, Kottayam, and Ernakulam lacked data, affecting the overall state average.

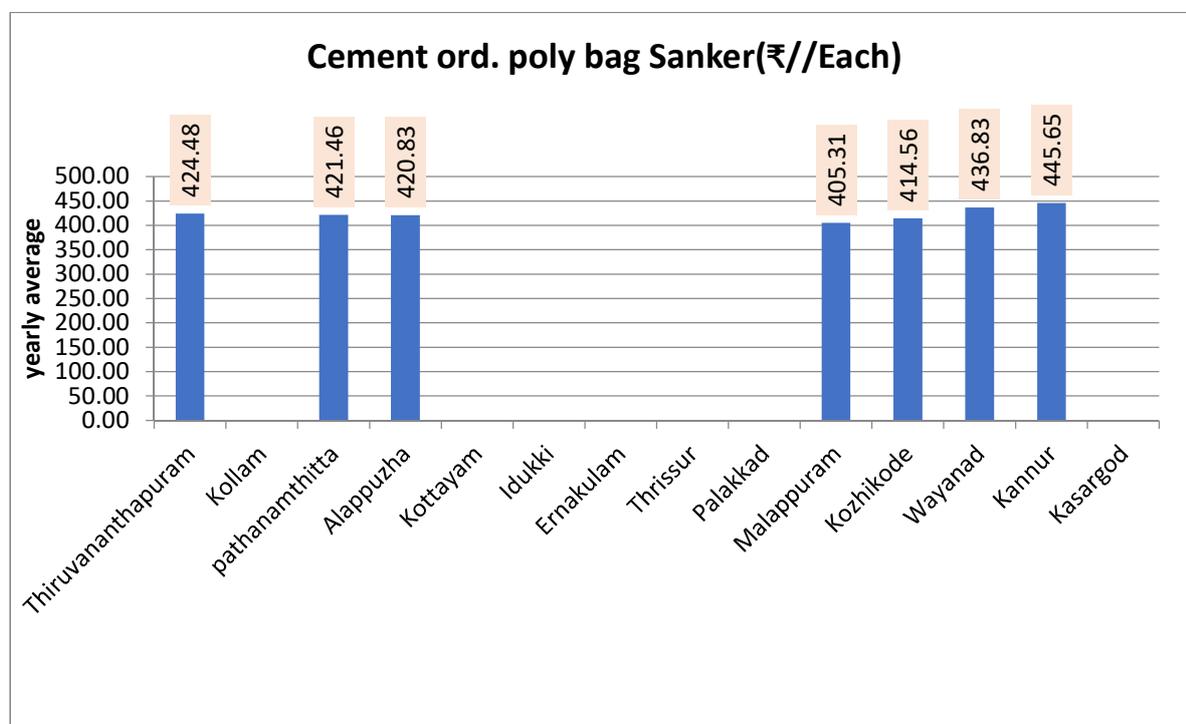

Table 24- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Cement (Ordinary Polybag - Sanker) (₹//Each)

The price of Sanker cement (ordinary polybag) in Kerala shows significant monthly variations, with the highest recorded price at ₹475.00 in Kannur (October and November) and the lowest at ₹385.00 in Kozhikode (January). Kannur consistently had the highest prices, averaging ₹445.65 annually, while Malappuram remained the most affordable, averaging ₹405.31. Prices generally followed a U-shaped trend, starting high in early months, dipping mid-year (June-July), and rising again towards October-November before a slight December decline. Thiruvananthapuram, Pathanamthitta, and Alappuzha mirrored this pattern, peaking in October-November. Wayanad maintained stable high prices, averaging ₹436.83, while Kozhikode had moderate fluctuations, staying below ₹455. Several districts (Kollam, Kottayam, Idukki, Ernakulam, Thrissur, Palakkad, Kasargod) lacked data, affecting the state average. The annual state average was ₹424.16, with monthly averages ranging from ₹405.71 (January) to ₹457.86 (November). The price surge in late 2023 suggests possible seasonal demand increases or supply chain factors.

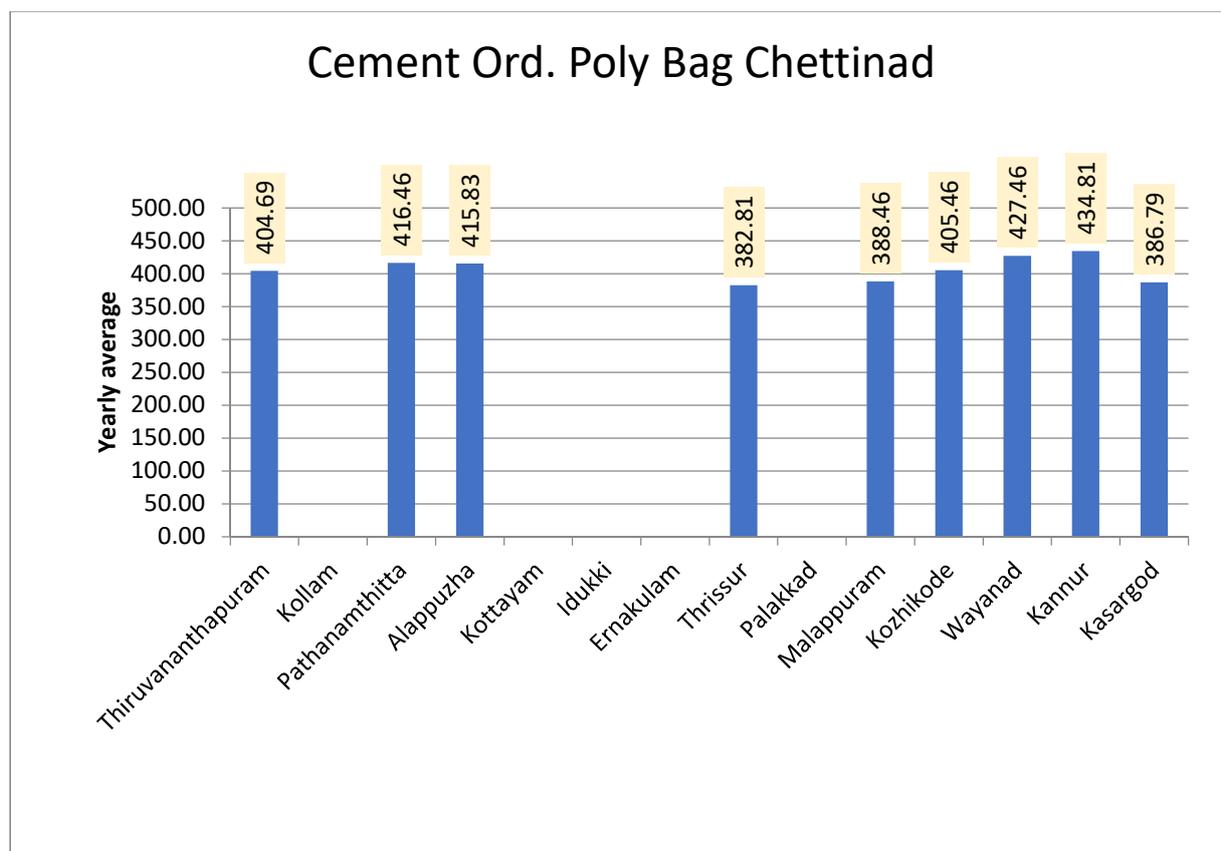

Table 25- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Chettinad cement (ordinary polybag) (₹//Each)

The price trend of Cement (Ordinary Poly Bag – Chettinad) across Kerala districts shows moderate month-to-month variation during the year. The State Average price increased from ₹390.56 in January to ₹411.94 in March, declined slightly during the mid-year period, and then rose steadily from September, reaching a peak of ₹444.38 in November before easing to ₹422.13 in December. Districts such as Kannur, Wayanad, and Pathanamthitta consistently recorded higher prices than the state average, while Malappuram and Kasargod remained comparatively lower for most months. Overall, the annual state average price **stood at ₹406.97**, indicating general price stability with a noticeable upward trend during the last quarter of the year.

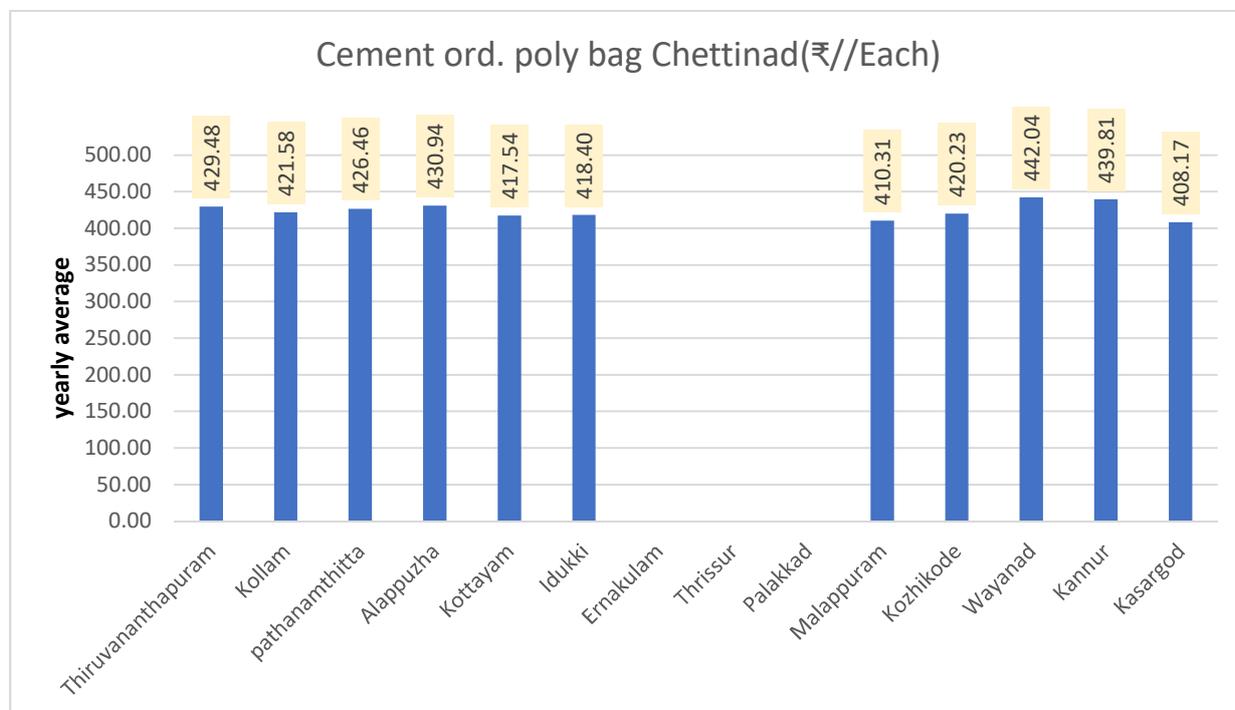

Table 26- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Sankar cement (ordinary, paper bag) (₹//Each)

The price of Sankar cement (ordinary, paper bag) in Kerala shows distinct seasonal and regional variations. Kannur recorded the highest yearly average (₹450.65), with prices peaking at ₹480 in October-November, likely due to increased post-monsoon construction demand. Wayanad also maintained high prices (₹442.04 avg.), while Malappuram remained among the lowest (₹410.31 avg.). Southern districts like Thiruvananthapuram (₹429.48 avg.) and Pathanamthitta (₹426.46 avg.) saw steady increases, with prices rising sharply in the last quarter. Prices dipped slightly during the monsoon (June-July) before climbing again, Kottayam had incomplete data but showed a late-year surge (₹454 in December). Ernakulam, Thrissur, Palakkad, Idukki, and Kasargod had missing entries, indicating potential reporting gaps. The state average (₹428.91) reflects a gradual increase, peaking in November (₹461.94). Factors like regional demand, supply chain variations, and seasonal construction activity likely influenced these trends, with northern districts consistently commanding higher prices.

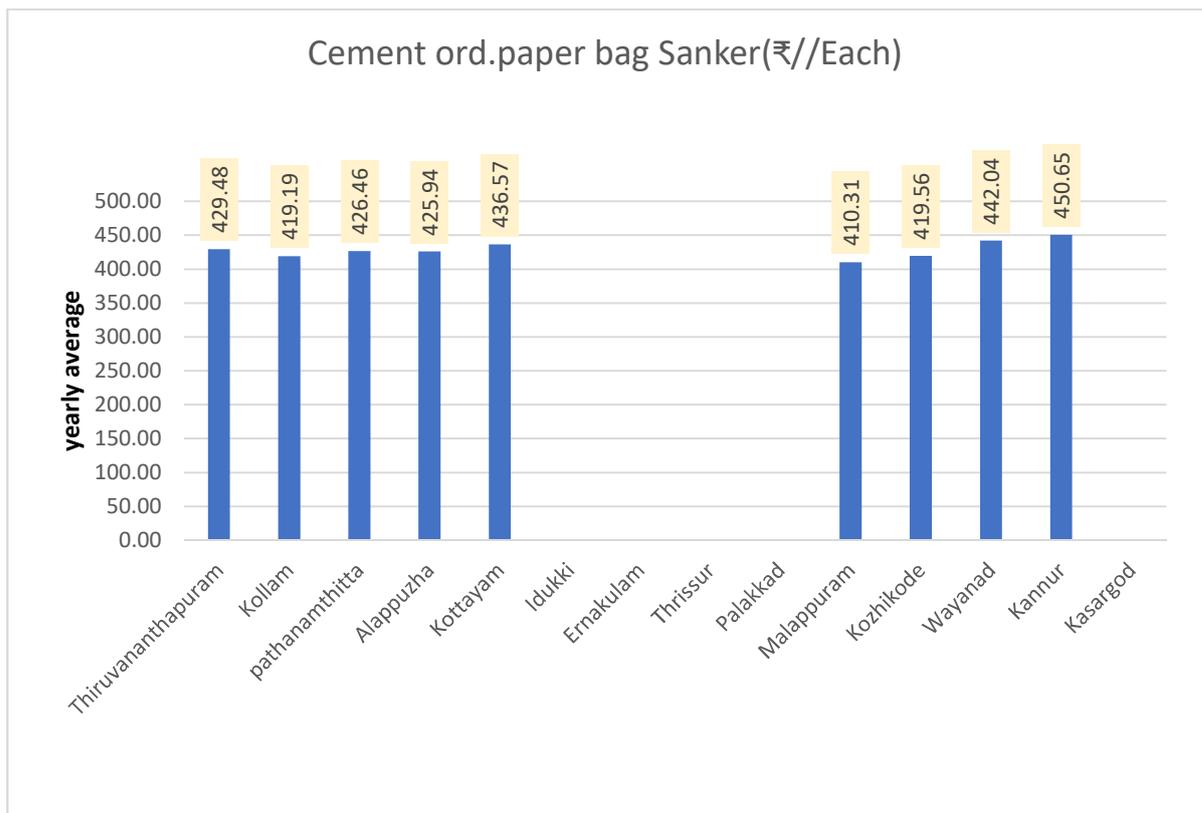

Table 27- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Chettinad cement (ordinary, paper bag) (₹//Each)

The price data for Chettinad cement (ordinary, paper bag) across Kerala districts reveals clear seasonal and regional trends. Kannur had the highest yearly average (₹439.81), with prices peaking at ₹470 in October. Wayanad followed closely (₹432.35 avg.), while Kollam recorded the lowest average (₹396.38), indicating significant regional disparities. Prices generally rose from January, peaked around October-November, and dipped slightly by December, aligning with Kerala’s construction cycle, which slows during monsoons (June-July) and surges post-rain. Districts like Thiruvananthapuram (₹409.69 avg.) and Alappuzha (₹420.94 avg.) saw steady increases, whereas Thrissur (₹397.04 avg.) and Malappuram (₹393.46 avg.) remained more stable but lower. Kottayam, Idukki, Ernakulam, Palakkad, and Kasargod had missing data, suggesting inconsistent reporting. The state average (₹412.95) reflects a gradual mid-year rise, peaking in November (₹445.83).

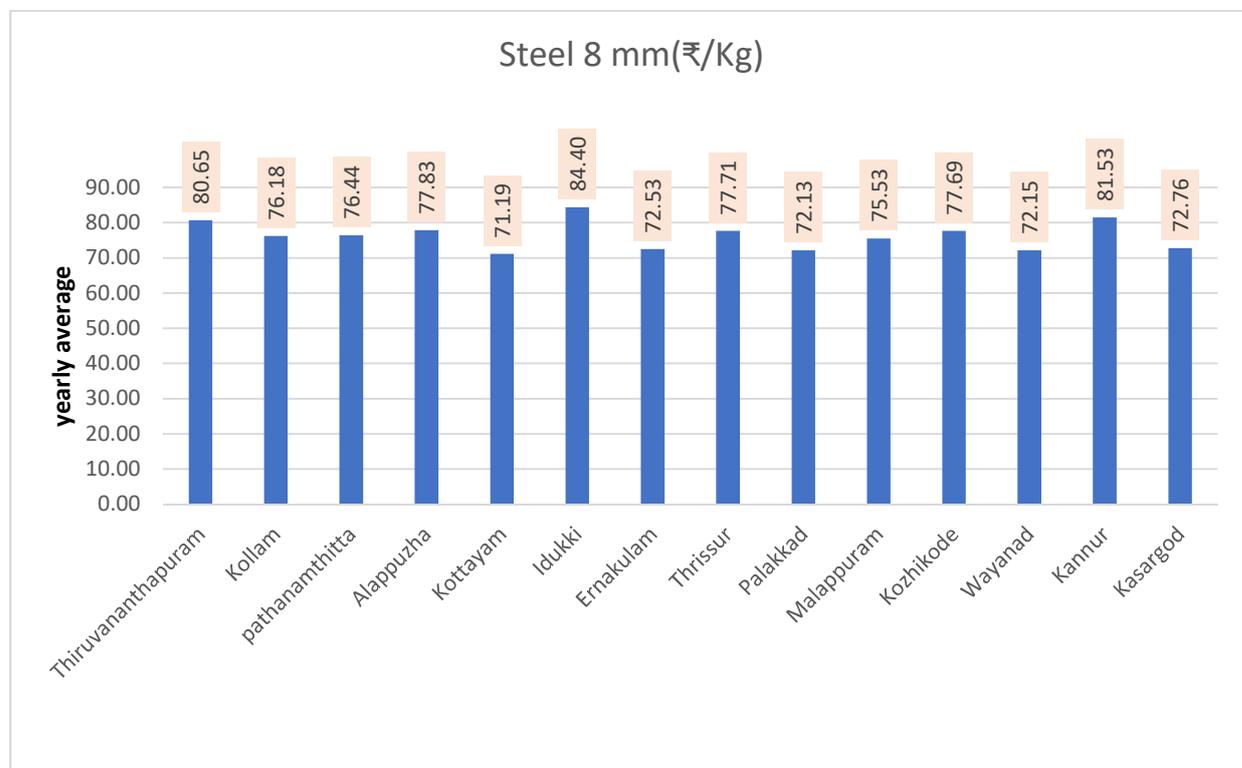

Table28- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

8 mm steel (₹/kg)

The price of 8 mm steel in Kerala shows distinct seasonal and regional variations, with prices generally peaking in April-May before declining gradually through the year. Idukki recorded the highest yearly average (₹84.40), reaching ₹96.25 in April, while Kottayam had the lowest average (₹71.19). Most districts, including Thiruvananthapuram (₹80.65 avg.) and Kannur (₹81.53 avg.), saw prices surge between March and May, likely due to increased construction activity before the monsoon. Post-monsoon (June onward), prices steadily declined, hitting their lowest in December. Northern districts like Kannur and Thrissur maintained higher prices, whereas central and southern regions like Kottayam and Palakkad were more affordable. The state average (₹76.34) indicates a mid-year peak (₹85.67 in April) followed by a gradual drop. Factors such as raw material costs. Missing data in some months suggests minor reporting inconsistencies, but the overall trend highlights a clear seasonal pattern in steel pricing across Kerala.

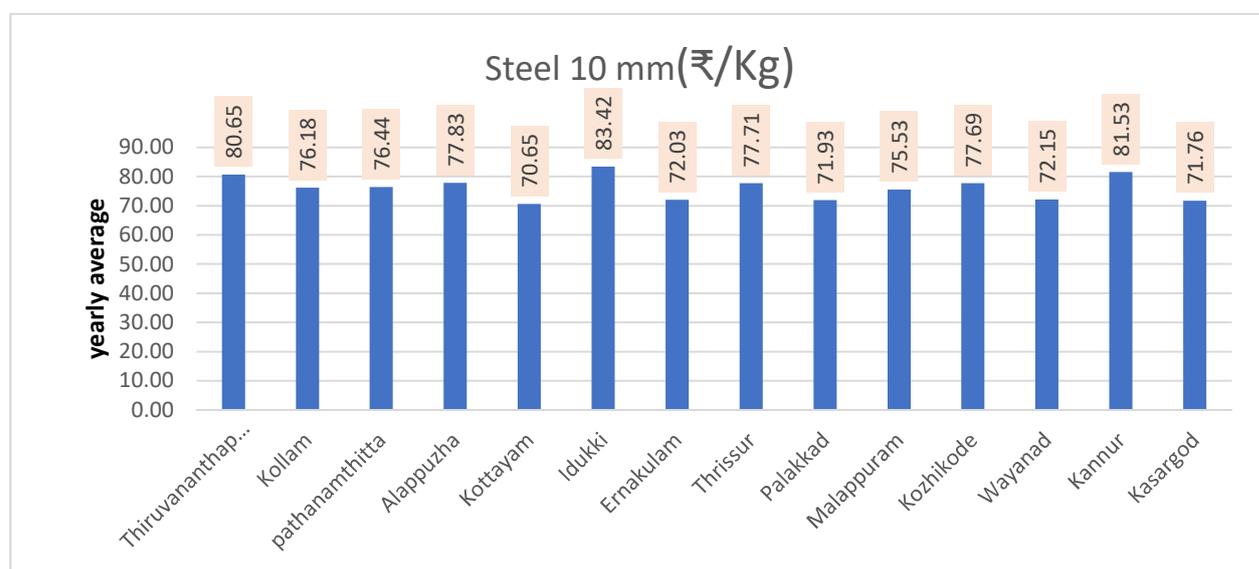

Table 29- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

10 mm steel (₹/Kg)

The price trends for 10 mm steel in Kerala exhibit a clear seasonal pattern, with prices peaking during March-May before gradually declining in the latter half of the year. Idukki recorded the highest yearly average (₹83.42), reaching ₹95.75 in April, while Kottayam had the lowest (₹70.65). Most districts, including Thiruvananthapuram (₹80.65 avg.) and Kannur (₹81.53 avg.), saw a sharp rise in prices from March to May, coinciding with pre-monsoon construction activity. Post-monsoon (June onward), prices steadily declined, hitting their lowest in December. Northern districts like Kannur and Thrissur maintained higher prices, while central and southern regions such as Kottayam and Palakkad remained more affordable. The state average (₹76.11) peaked in April (₹85.49) before tapering off, indicating a strong mid-year demand surge. Overall, the data highlights a predictable seasonal trend in steel pricing across Kerala.

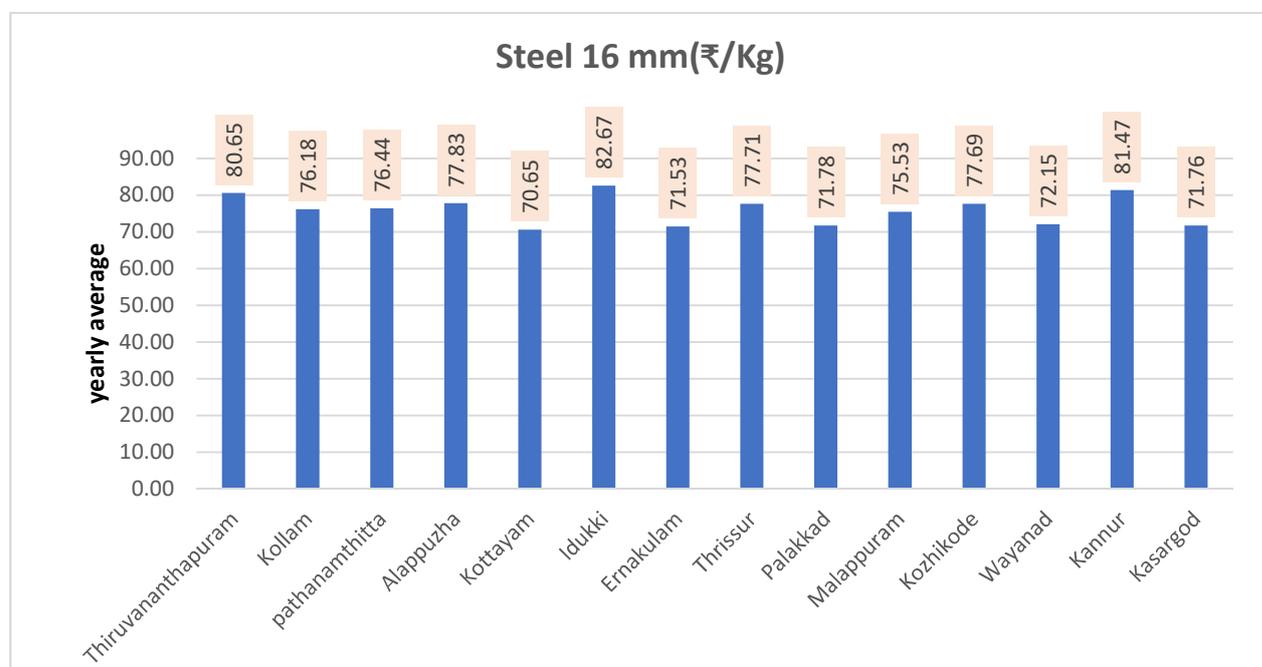

Table 30- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

16 mm steel bars(₹/Kg)

The price trends for 16 mm steel bars in Kerala follow a similar seasonal pattern to other steel variants, with prices peaking during March-May before gradually declining. Idukki maintained the highest yearly average (₹82.67), reaching ₹94.75 in April, while Kottayam remained the most affordable (₹70.65 avg.). Most districts, including Thiruvananthapuram (₹80.65 avg.) and Kannur (₹81.47 avg.), saw a sharp price surge in April-May, aligning with peak construction activity before the monsoon. Post-monsoon (June onward), prices declined steadily, hitting their lowest in December. Northern districts like Kannur and Thrissur consistently commanded higher prices, while central and southern regions such as Kottayam and Palakkad remained more economical. The state average (₹76.00) peaked in April (₹85.38) before tapering off. The data suggests a predictable pricing trend, with minor district-level variations due to local market dynamics. Overall, 16 mm steel prices mirrored broader seasonal patterns seen in Kerala's construction sector.

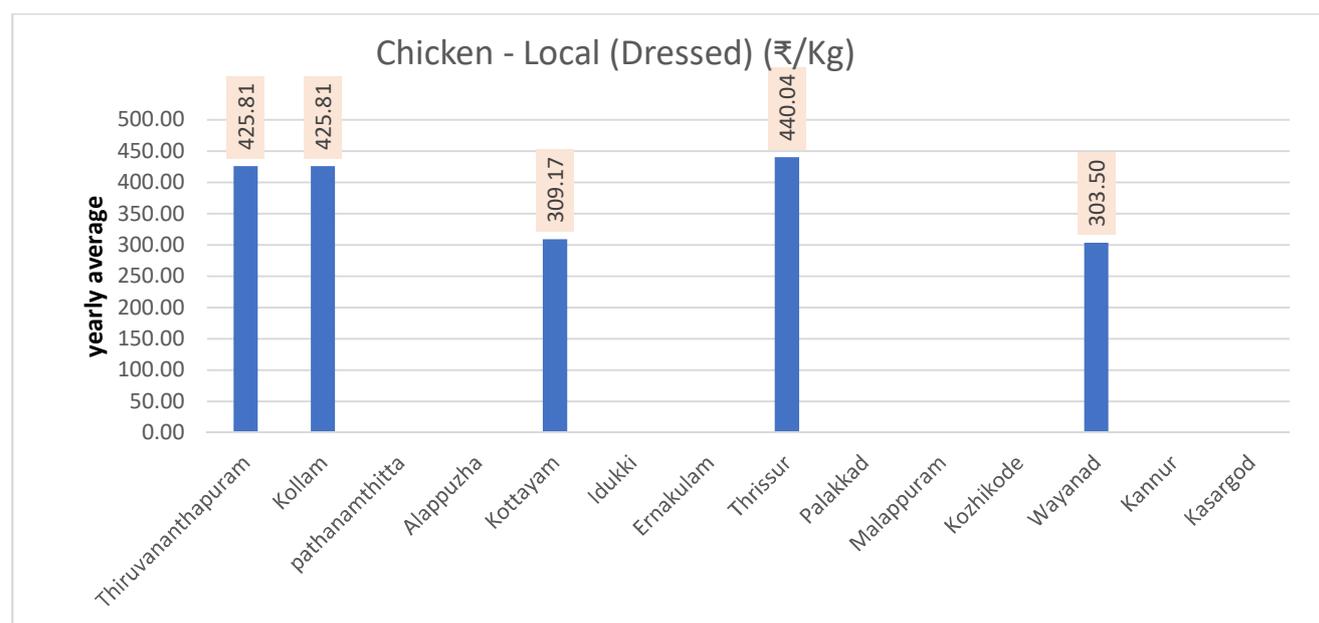

Table 31- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Local dressed chicken (₹/kg)

The price of local dressed chicken in Kerala shows significant seasonal and regional variations. Prices peaked during March-May, with Thiruvananthapuram and Kollam reaching ₹487.50 in March, before sharply declining during the monsoon months (July-August) to ₹372.50. Thrissur maintained relatively stable but higher prices throughout the year (₹440.04 avg.), while Kottayam and Wayanad had consistently lower prices (₹309.17 and ₹303.50 avg.). The state average (₹380.87) reflects a mid-year dip, with the lowest prices in August (₹357.20) before a gradual recovery toward year-end. Missing data in several districts indicates potential reporting gaps, but the overall trend highlights Kerala's cyclical poultry market dynamics.

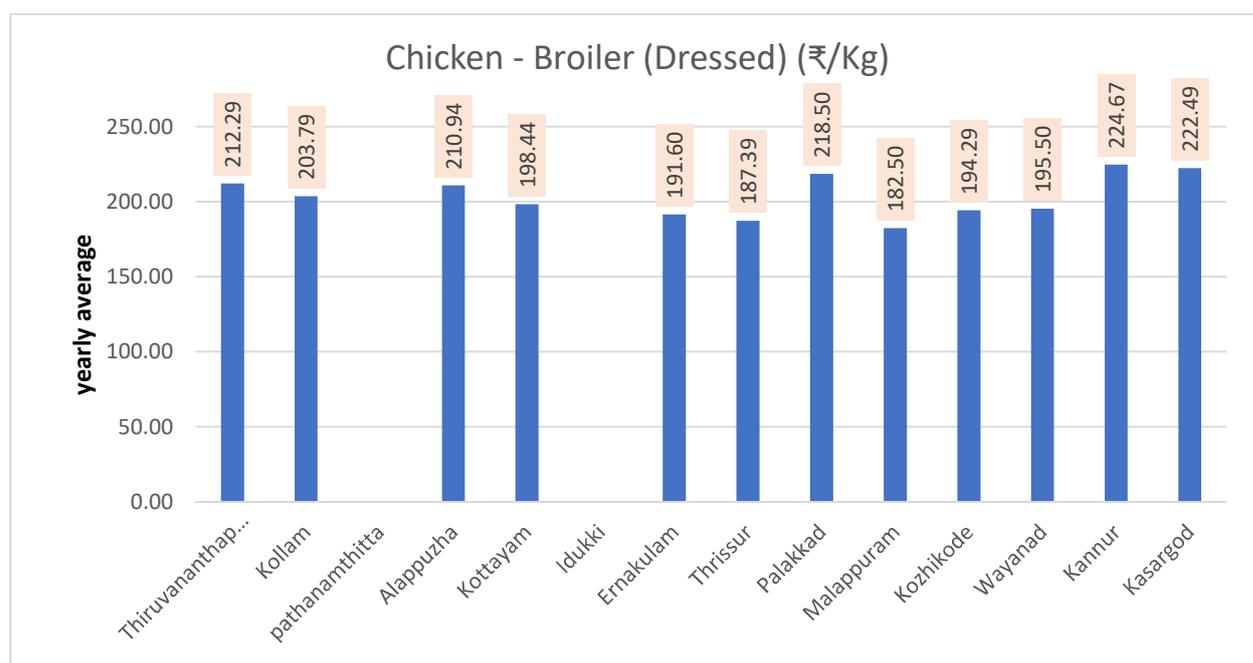

Table 32- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Broiler dressed chicken (₹/Kg)

The price of broiler dressed chicken in Kerala exhibits clear seasonal trends, peaking during March-May before declining sharply in the monsoon months. Kannur (₹224.67 avg.) and Kasargod (₹222.49 avg.) recorded the highest annual prices, reaching ₹274.25 in March, while Malappuram (₹182.50 avg.) and Thrissur (₹187.39 avg.) remained the most affordable. Prices consistently surged in March (₹245.13 state avg.), before dropping to their lowest in August (₹168.17 state avg.) post-monsoon. Most districts, including Thiruvananthapuram (₹212.29 avg.) and Palakkad (₹218.50 avg.), followed this pattern, with a gradual recovery from September onward. The data reveals northern districts generally had higher prices than central/southern regions. The state average (₹203.53) underscores this cyclical trend. Missing data in some districts suggests reporting gaps, but the overall pattern highlights Kerala's predictable broiler market dynamics.

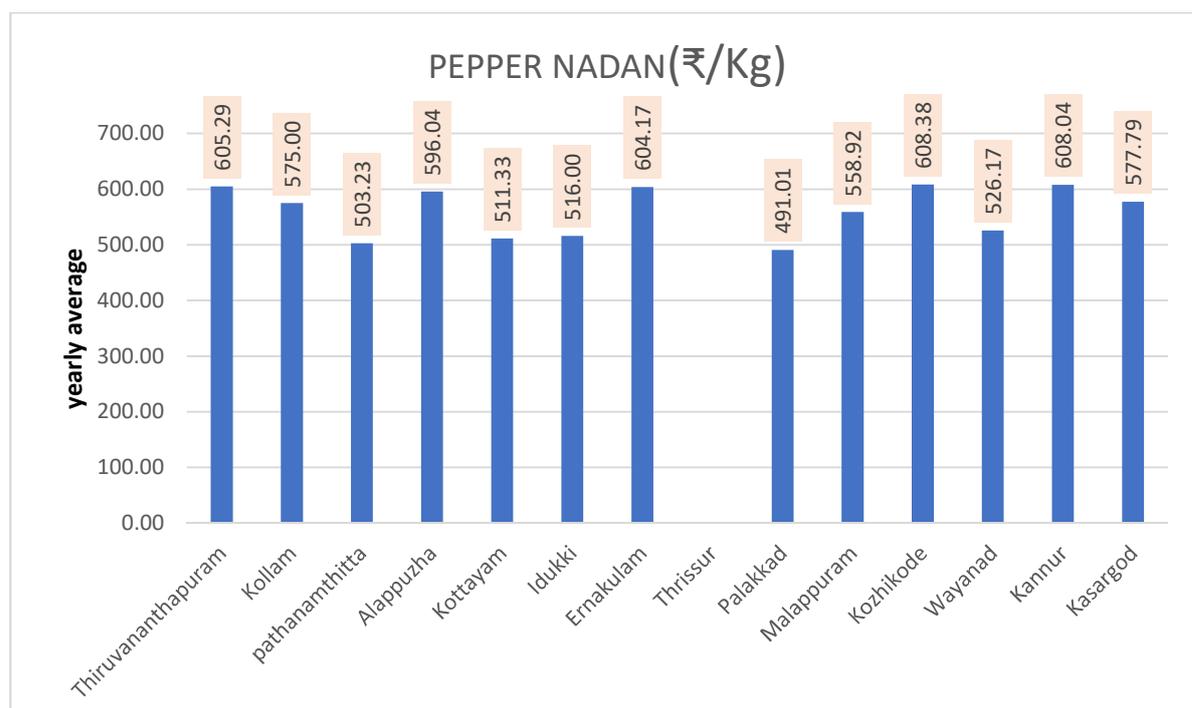

Table 33- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Nadan pepper(₹/Kg)

The price trends for Nadan pepper in Kerala show moderate fluctuations with distinct regional variations. Thiruvananthapuram (₹605.29 avg.) and Kozhikode (₹608.38 avg.) maintained the highest annual prices, while Palakkad (₹491.01 avg.) and Pathanamthitta (₹503.23 avg.) recorded the lowest. Prices generally declined from January to March/April, with the state average dropping to ₹553.79 in April, before stabilizing or slightly recovering in subsequent months. Northern districts like Kannur (₹608.04 avg.) showed more volatility, peaking at ₹672.50 in February before gradually declining, whereas central districts like Ernakulam (₹604.17 avg.) and Alappuzha (₹596.04 avg.) remained relatively stable. The state average (₹560.10) reflects this mild downward trend in early months, followed by stabilization from May onward.

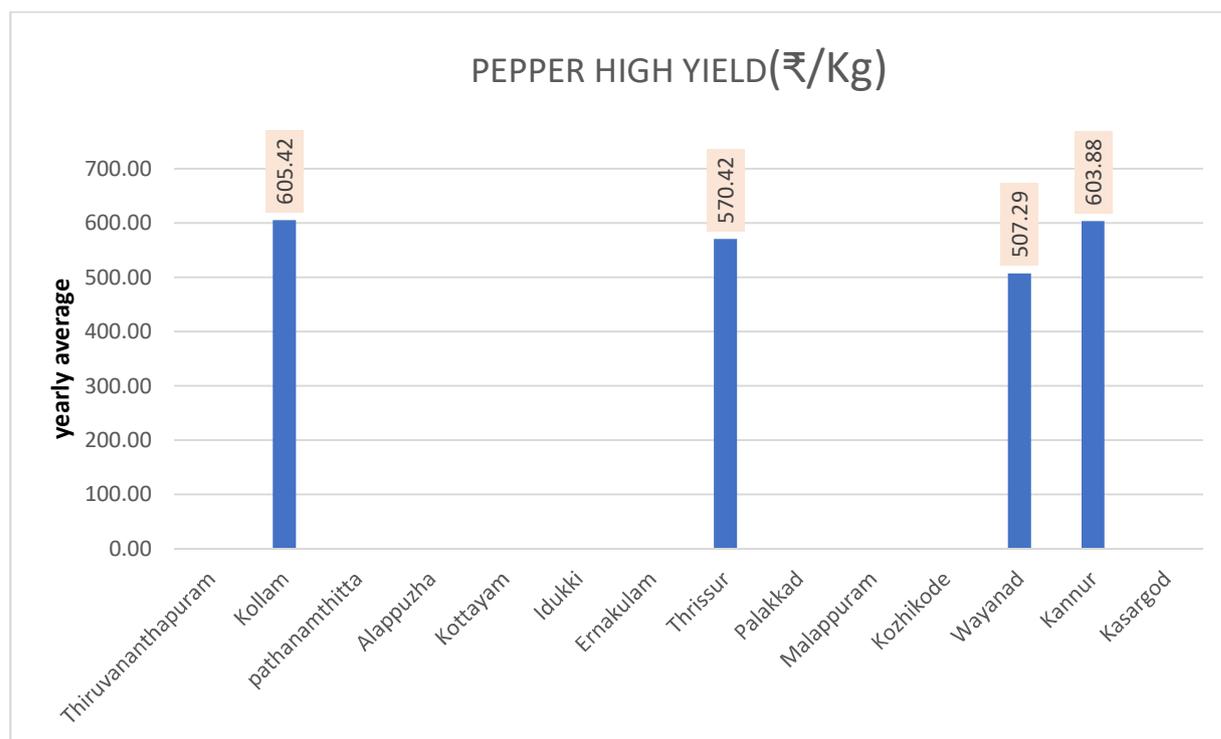

Table 34- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

High-yield pepper (₹/Kg)

The provided data illustrates the 12-month forecasted price fluctuation of high-yield pepper across various districts in Kerala. Overall, the state average price shows relative stability throughout the year, with a minor dip in May (₹562.50) and a gradual increase towards the end of the year, reaching ₹582.50 in November and December. District-wise, significant variations are observed. For instance, Kollam records the highest initial price in January (₹622.50) and also peaks at ₹650.00 in November and December, while Wayanad consistently shows the lowest prices, starting at ₹500.00 and remaining around ₹510.00 for most of the year. Thrissur and Kannur also exhibit some price movements, but generally maintain higher price levels compared to Wayanad.

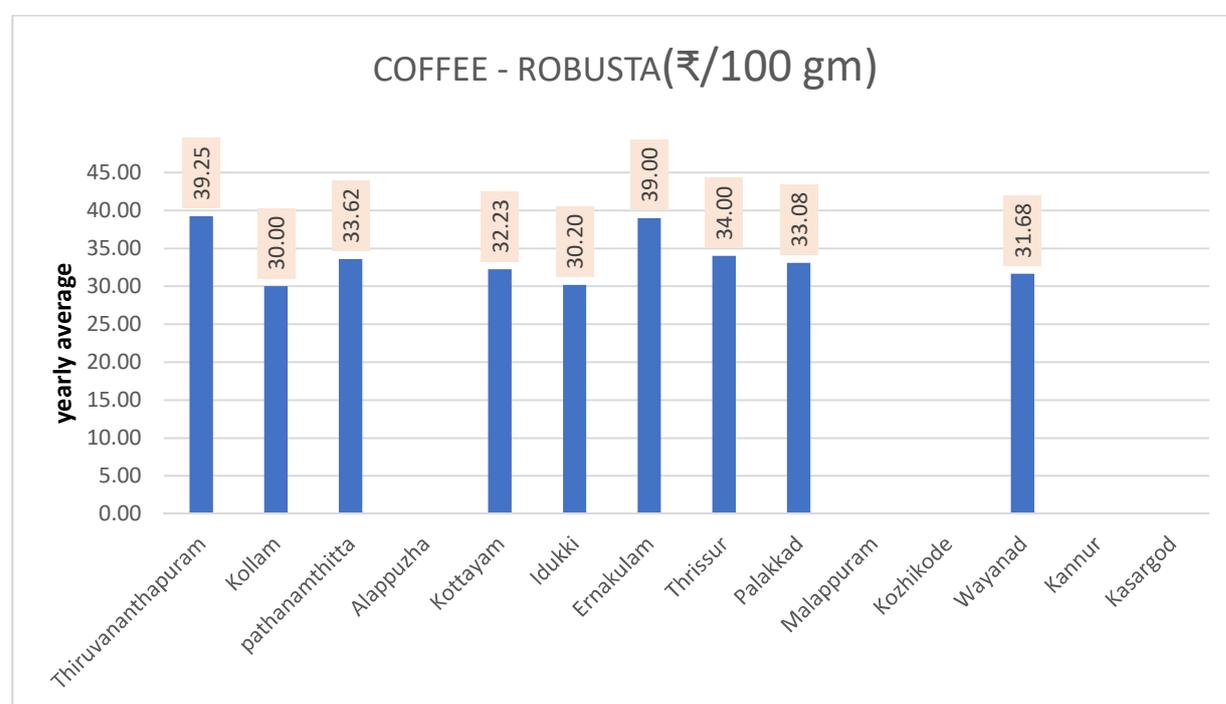

Table 35- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Robusta coffee (₹/100 gm)

The provided table illustrates the monthly price fluctuations of Robusta coffee across various districts, along with the yearly average for each. The state average price for Robusta coffee shows a relatively stable trend, beginning at ₹32.44 in January and gradually increasing to ₹35.575 by December, with a yearly average of ₹37.88. Looking at individual districts, Thiruvananthapuram consistently records the highest prices, starting at ₹36.00 and rising to ₹40.00 from April onwards, maintaining this price for the rest of the year, with a high yearly average of ₹39.25. In contrast, Kollam maintains a constant price of ₹30.00 throughout the entire year, resulting in a yearly average of ₹30.00, which is the lowest among the districts with data. Other districts like Pathanamthitta, Kottayam, Idukki, and Thrissur show minor fluctuations but generally remain within a narrower price range, with some slight increases towards the latter half of the year. Ernakulam also shows consistent high prices at ₹39.00 throughout the year. The data highlights a clear disparity in Robusta coffee prices across different regions within the state.

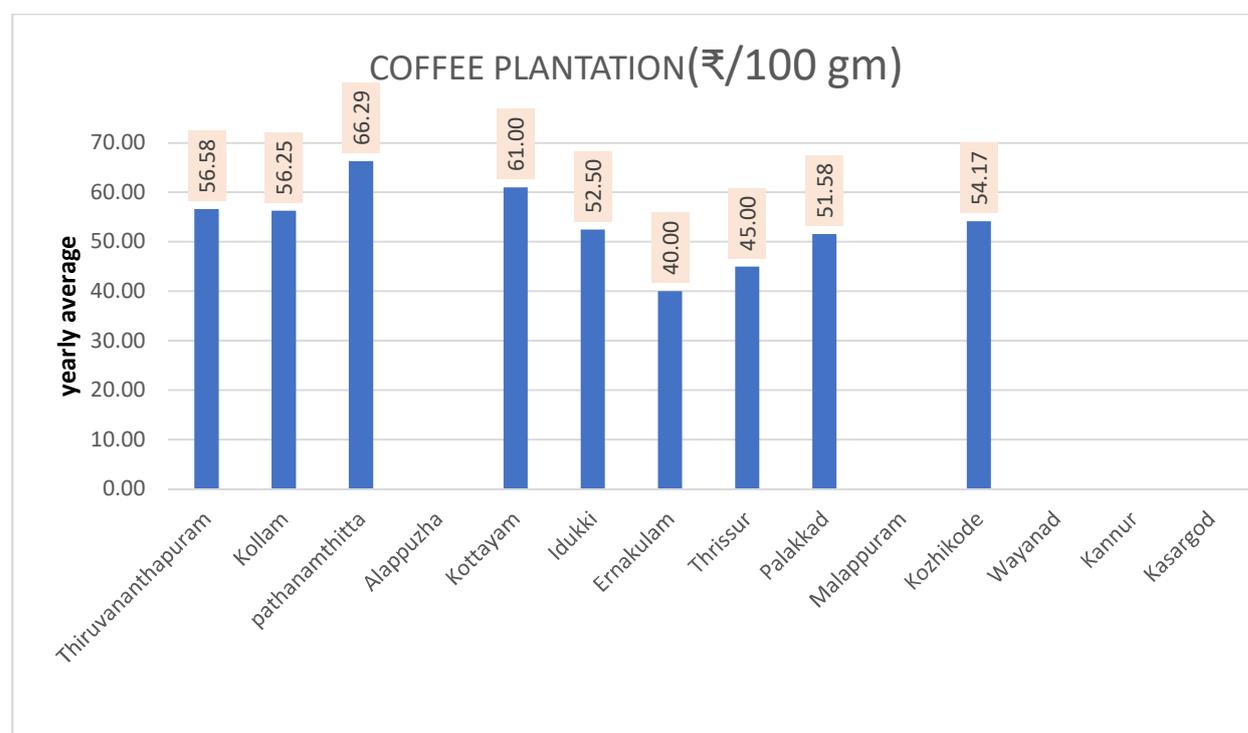

Table 36- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Coffee from plantations(₹/100 gm)

The provided table details the monthly price fluctuations of coffee from plantations across various districts, along with their yearly averages. The state average price for coffee plantations begins at ₹47.83333 in January and shows a steady increase, reaching ₹57.11111 by November and December, with a yearly average of ₹53.70787. Analyzing individual districts, Pathanamthitta exhibits the highest overall prices, starting at ₹50.00 and progressively rising to ₹75.00 from October to December, achieving the highest yearly average of ₹66.2875. Thiruvananthapuram also shows a significant upward trend, moving from ₹48.00 in January to a consistent ₹60.00 from July onwards. In contrast, Ernakulam maintains the lowest and most stable prices throughout the year, consistently at ₹40.00, resulting in a yearly average of ₹40.00. Kollam and Thrissur display relatively stable prices hovering around ₹45.00, with minor fluctuations. Kottayam experiences a notable price jump in May, from ₹55.00 to ₹64.00, which it then maintains. Palakkad and Kozhikode also show gradual price increases over the year. This data highlights considerable regional disparities and varied price trends for plantation coffee.

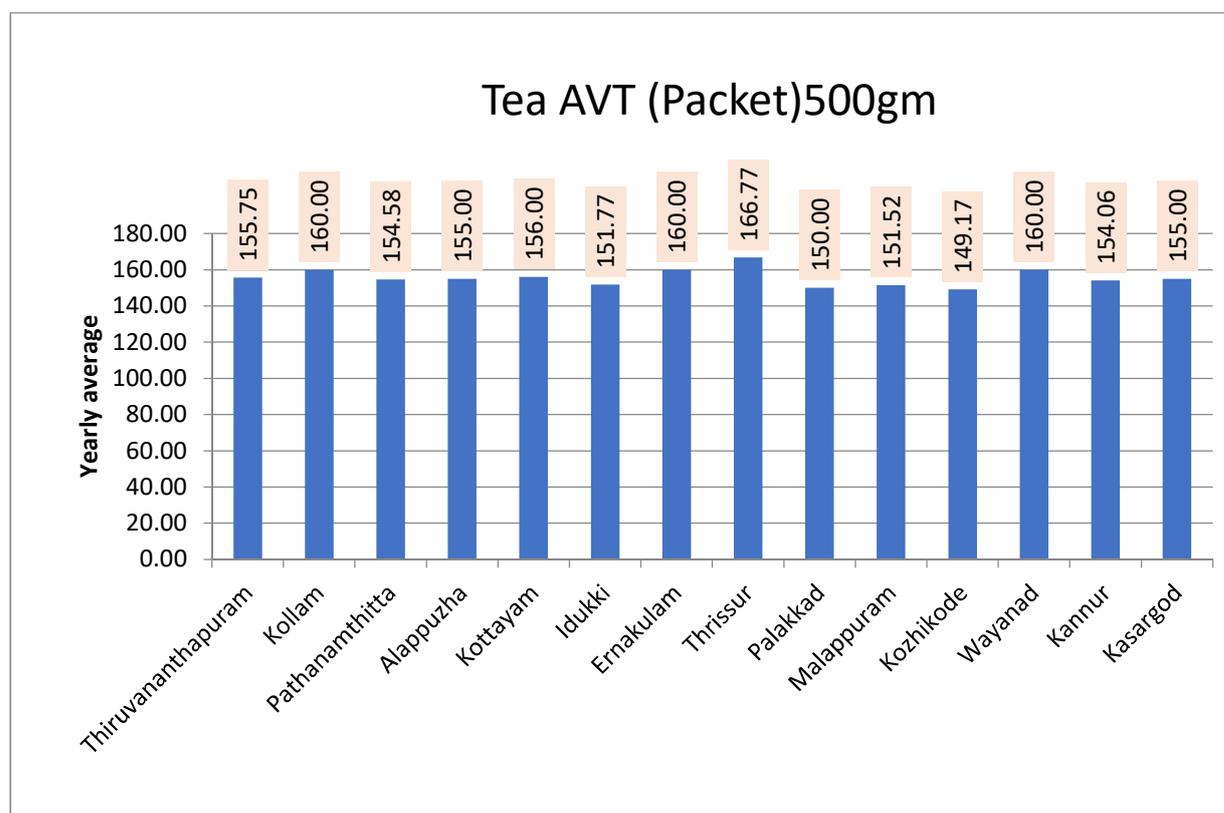

Table 37- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

AVT (Packet) Tea (₹/500 gm)

The provided data illustrates the monthly price fluctuations of AVT (Packet) tea across various districts, along with their yearly averages. The state average price for AVT (Packet) tea shows a relatively stable trend, fluctuating slightly around ₹155 to ₹156 throughout the year, with a yearly average of ₹152.1161. Ernakulam consistently records the highest prices, starting at ₹160.00 and gradually increasing to ₹170.00 from June to December, achieving the highest yearly average of ₹166.7708. In contrast, Idukki maintains a constant price of ₹150.00 throughout the entire year, resulting in a yearly average of ₹150.00, which is the lowest among the districts with complete data. Districts like Thiruvananthapuram, Thrissur, and Kannur show remarkably stable prices, often at ₹155.00 or ₹160.00 for most of the year. Alappuzha and Kottayam show slight downward fluctuations in the middle of the year before recovering. The data suggests that while the state average remains quite stable, there are notable regional differences in AVT (Packet) tea prices.

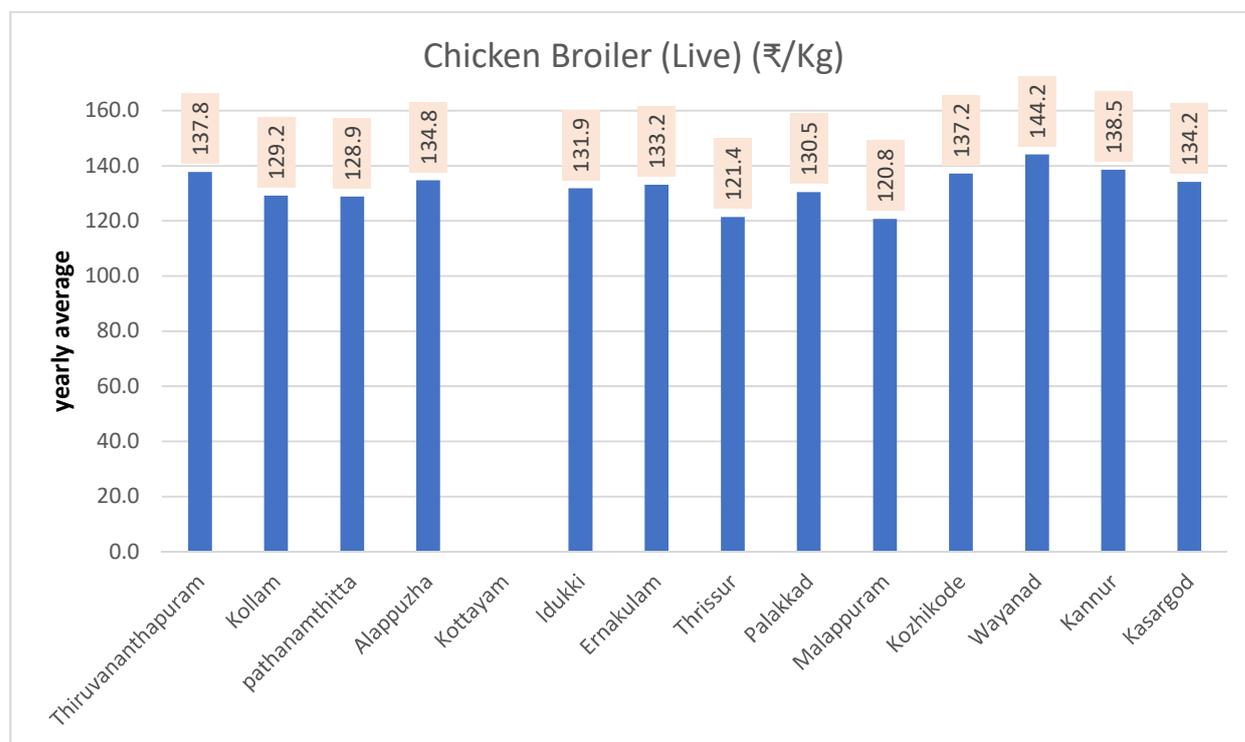

Table38- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

Chicken Broiler (Live) (₹/Kg)

The provided table illustrates the monthly price fluctuations of live broiler chickens across various districts, along with their yearly averages. The state average price for live broiler chickens shows a dynamic trend, starting at ₹114.0192 in January, peaking in March (₹161.1731), and then generally declining to a low of ₹106.3077 in August, before slightly recovering towards ₹130.4942 by December. Wayanad generally records higher prices, peaking at ₹177.50 in March and maintaining relatively strong prices throughout the year, with a high yearly average of ₹144.1667. Thiruvananthapuram and Kozhikode also show significant price increases in the first quarter. In contrast, Malappuram consistently shows the lowest prices, starting at ₹95.00 in January and dipping to ₹91.25 in August, with the lowest yearly average of ₹120.7708. Most districts exhibit a similar pattern of higher prices in the first few months, followed by a decline during the summer, and then a modest recovery towards the end of the year.

Table 39- illustrates the dataset pertaining to the REPORT OF 20 ITEMS

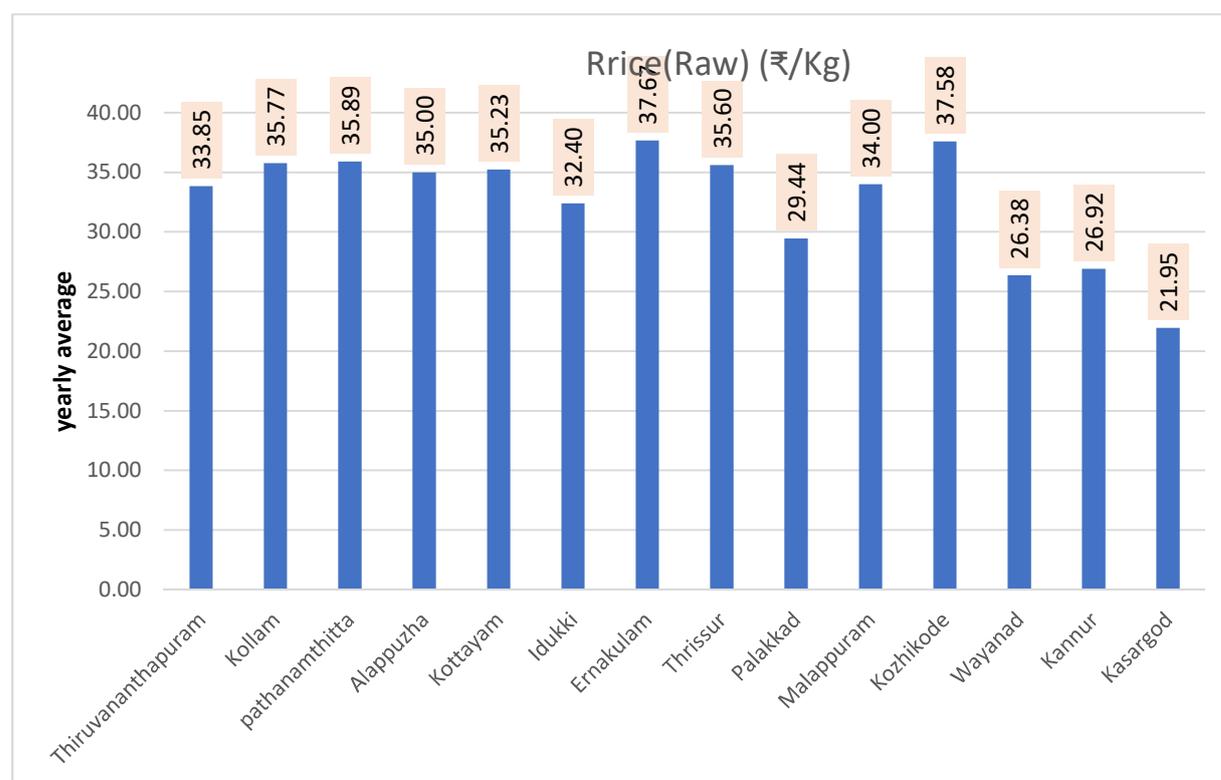

Retail Prices of Certain Essential Commodities (Additional Items)

Rice (raw) (₹/Kg)

The price of raw rice across Kerala's districts shows notable fluctuations, with the highest yearly averages in Pathanamthitta (₹35.89/kg), Kollam (₹35.77/kg), and Ernakulam (₹37.67/kg). Prices generally rise from August to December, likely due to post-monsoon supply constraints, with sharp spikes in Kollam (₹41.50 in November) and Ernakulam (₹40.00 from August onward). In contrast, Kasargod (₹21.95/kg) and Wayanad (₹26.38/kg) remain the most affordable. Some districts, like Alappuzha and Malappuram, maintain stable prices year-round, while others, such as Palakkad and Thrissur, experience moderate fluctuations. The state average peaks in November (₹33.93/kg) before a slight dip in December, reflecting broader seasonal trends in rice pricing.

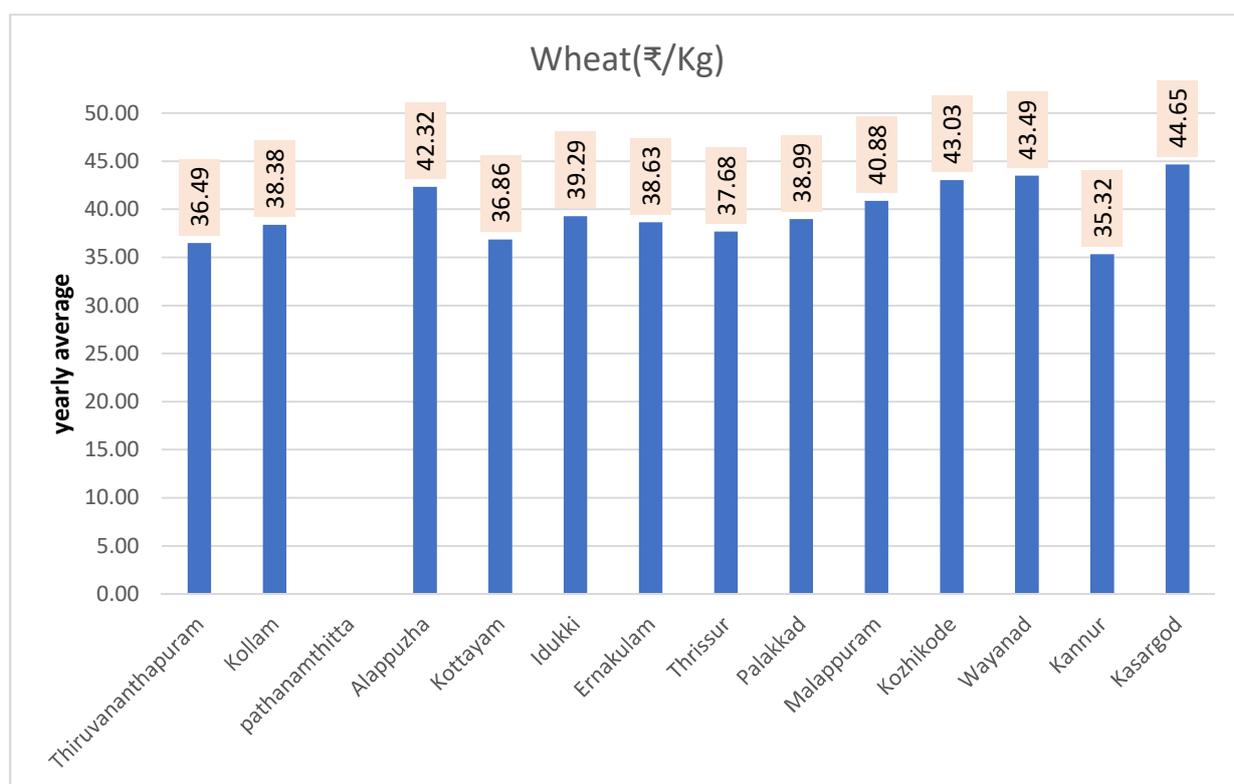

Table 40- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Wheat(₹/Kg)

The price of wheat across Kerala shows significant fluctuations, with the highest yearly averages in Kasargod (₹44.65/kg), Kozhikode (₹43.03/kg), and Wayanad (₹43.49/kg). Prices generally rise from June to December, peaking in November–December. Alappuzha (₹47.60 in December) and Kollam (₹45.75 in November) see sharp spikes, while Pathanamthitta has no recorded data. In contrast, Kannur (₹35.32/kg) remains relatively stable until a sudden jump in November–December (₹42.00–₹42.80). The state average climbs steadily from ₹37.08 in January to ₹42.94 in December. Districts like Malappuram and Palakkad also show consistent increases, suggesting higher dependency on external wheat supplies during lean periods.

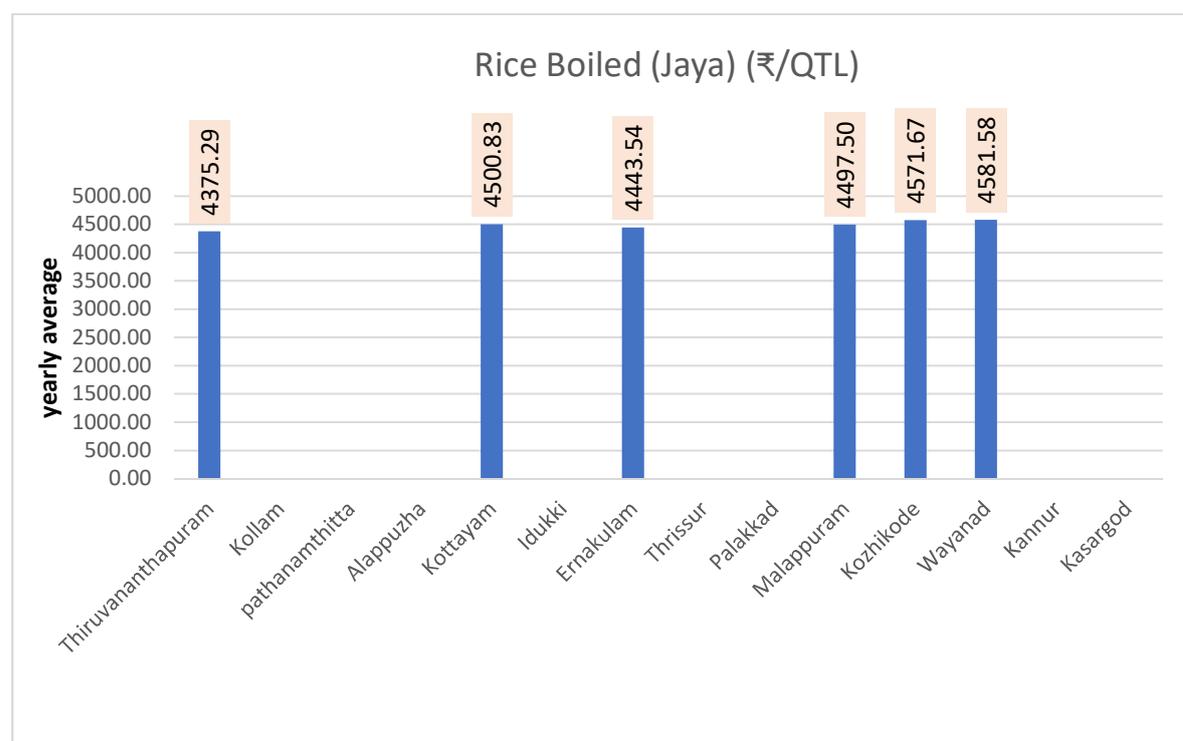

Table 41- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Boiled rice (Jaya variety) (₹/Qtl)

The price of boiled rice (Jaya variety) in Kerala shows a clear upward trend throughout the year, starting at ₹3,629 per quintal in January and peaking at ₹5,675 in November, before a slight dip in December (₹5,510). Thiruvananthapuram, Ernakulam, Kozhikode, and Wayanad exhibit the most significant increases, with Wayanad (₹4,581 yearly avg.) and Kozhikode (₹4,572) being the costliest. Prices rise sharply from June onwards. Kottayam (₹4,501 avg.) and Malappuram (₹4,498 avg.) follow similar trends, while Kollam, Pathanamthitta, Alappuzha, and Kannur show no recorded data. The state average nearly doubles from January (₹3,629) to November (₹5,675), indicating strong seasonal volatility in boiled rice prices.

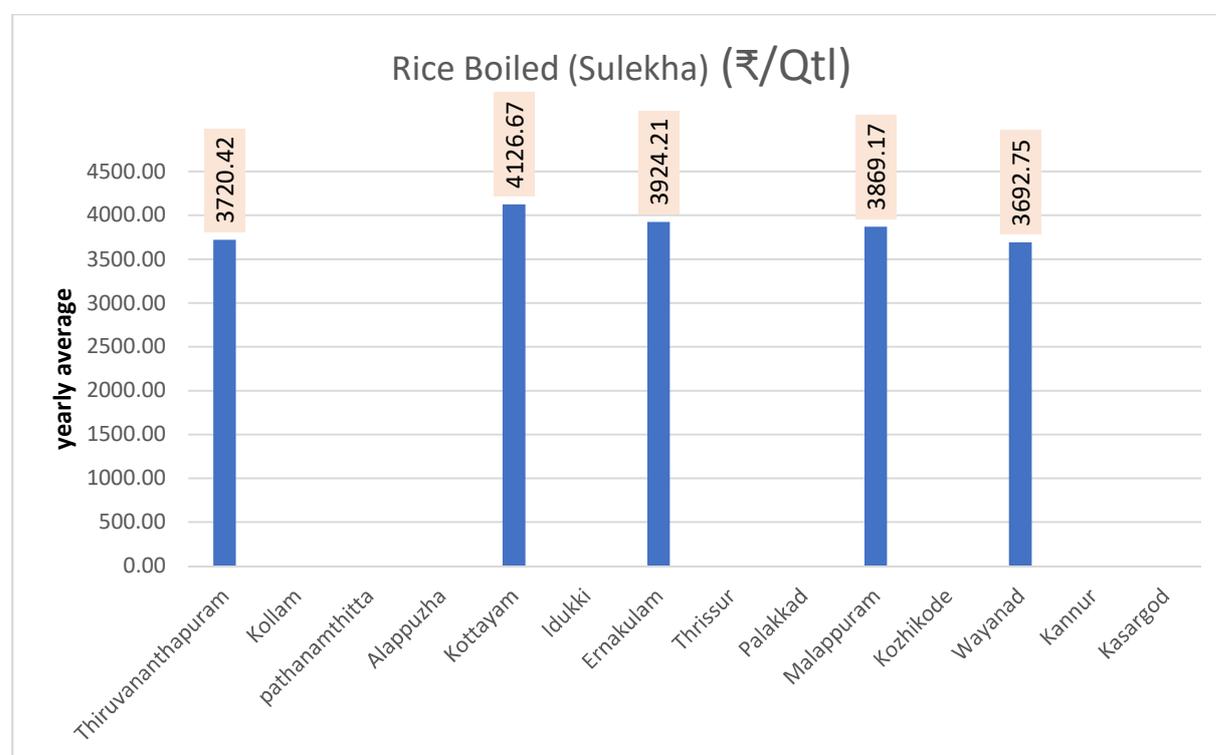

Table 42- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Boiled rice (Sulekha variety) (₹/Qtl)

The price of boiled rice (Sulekha variety) in Kerala shows moderate fluctuations, with prices generally rising from June to October before stabilizing or dipping slightly towards year-end. Thiruvananthapuram (₹3,720 yearly avg.) and Wayanad (₹3,693 avg.) have the lowest average prices, while Kottayam (₹4,127 avg.) is the costliest. Prices increase steadily from June (₹3,843 state avg.) to August (₹4,045), likely due to monsoon-related supply constraints, before peaking in October (₹4,078). Unlike the Jaya variety, Sulekha rice does not see extreme spikes, with Kottayam and Ernakulam (₹3,924 avg.) experiencing only a ₹400-500 increase from January to peak season. Malappuram (₹3,869 avg.) remains relatively stable, with minimal monthly variations. Several districts (Kollam, Pathanamthitta, Alappuzha, Kannur, etc.) show no recorded data. The state average rises by 12% from January (₹3,653) to October (₹4,078), reflecting a less volatile trend compared to other rice varieties.

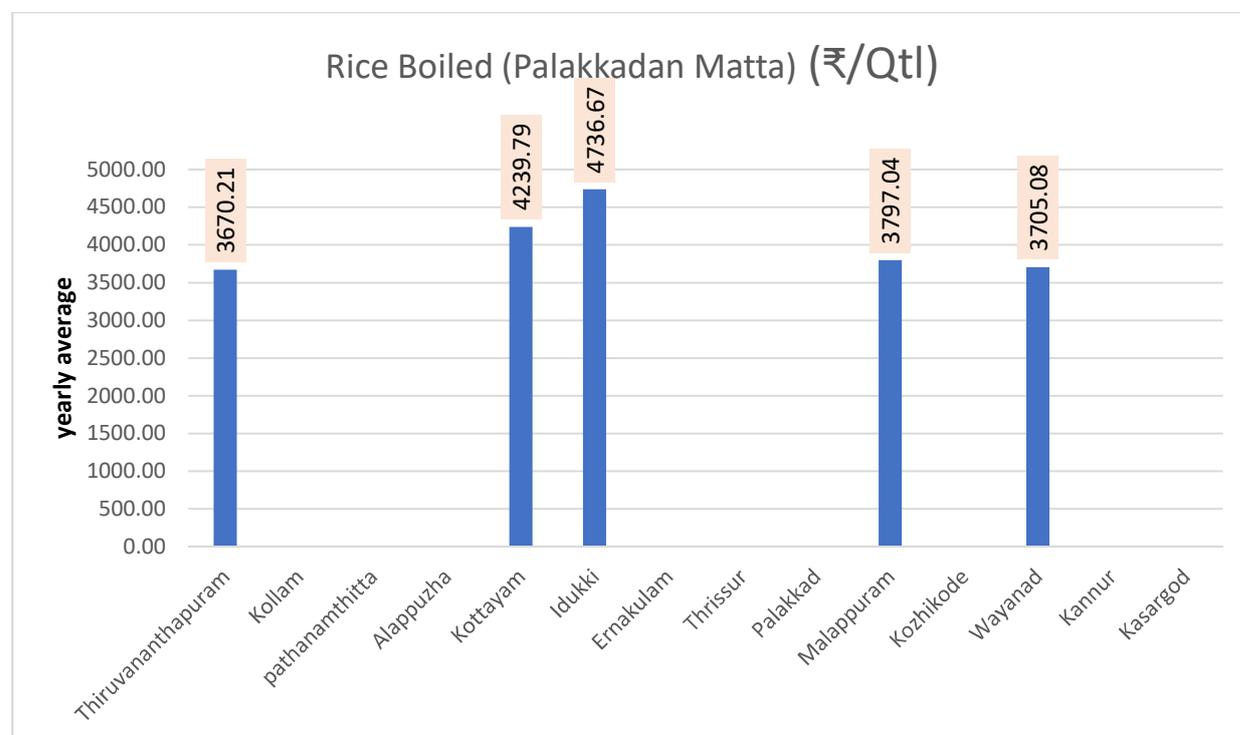

Table 43- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Boiled rice (Palakkadan)(₹/Qtl)

The price of boiled rice (Palakkadan Matta variety) in Kerala exhibits significant seasonal fluctuations, with prices rising consistently from June to November before a slight dip in December. Idukki (₹4,737 yearly avg.) stands out as the most expensive district, peaking at ₹5,650 in November, likely due to its highland geography affecting supply chains. Thiruvananthapuram (₹3,670 avg.) and Wayanad (₹3,705 avg.) are the most affordable, though they still show a 25-30% price increase from January to peak season (Nov-Dec). A sharp price jump in October-November, particularly in Kottayam (₹5,100 in Nov-Dec) and Idukki (₹5,650 in Nov). Malappuram (₹3,797 avg.) and Wayanad show steady climbs, with post-monsoon (Aug-Oct) increases of 15%. No data for major rice-producing districts like Palakkad and Thrissur. The state average surges by 25%, from ₹3,733 in January to ₹4,673 in November. Unlike Jaya or Sulekha varieties, Palakkadan Matta shows steeper late-year spikes.

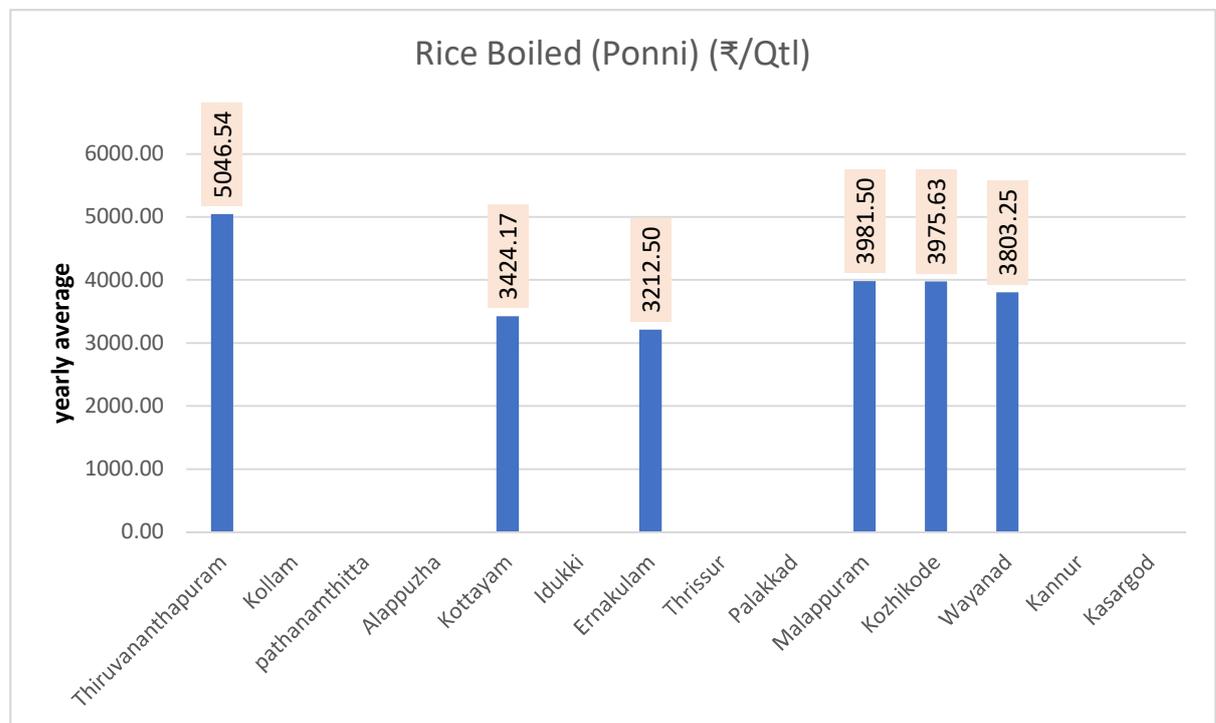

Table 44- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Rice Boiled (Ponni) (₹/Qtl)

The rice price data reveals significant regional disparities and seasonal trends across Kerala. Thiruvananthapuram consistently maintains the highest prices (₹4,930-₹5,250) throughout the year, averaging 29% above the state mean (₹3,907), while Ernakulam offers the most stable and lowest prices (₹3,200-₹3,300). Most districts show a gradual price increase from June to December, with Malappuram experiencing the steepest seasonal rise (14% from January to December). Kottayam presents an unusual case of absolute price stability at ₹3,400 for nine consecutive months. The state average demonstrates a 5.8% annual increase, peaking in December (₹4,133). The extreme price gap of over 50% between the highest and lowest districts suggests potential market inefficiencies or varying distribution costs across regions.

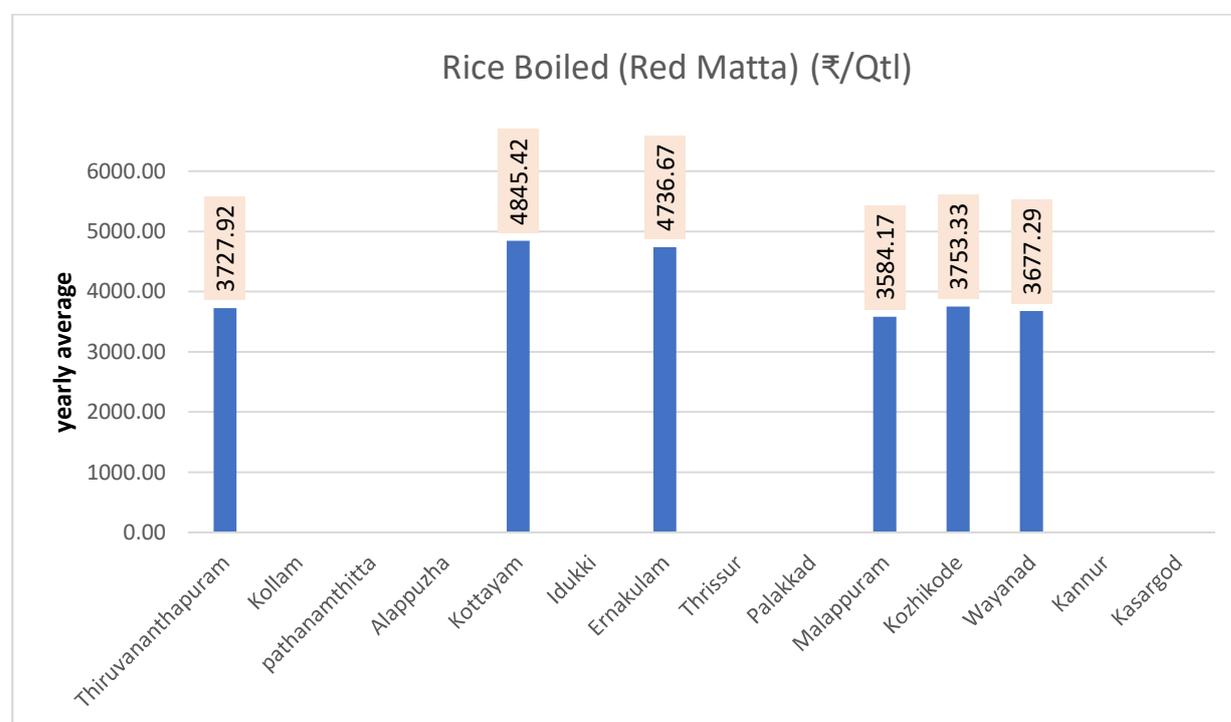

Table 45- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Boiled Red Matta rice(₹/Qtl)

The price data for boiled Red Matta rice in Kerala reveals distinct regional patterns and seasonal fluctuations. Kottayam (₹4,845 yearly average) and Ernakulam (₹4,737) emerge as the most expensive districts, with Kottayam experiencing a dramatic 32% price surge from January (₹4,400) to November (₹5,800). Thiruvananthapuram shows moderate fluctuations but maintains relatively stable prices (₹3,720 average). Most districts exhibit a consistent upward trend from August to November, with prices typically peaking in November before a slight December dip. Malappuram demonstrates the most stable pricing among reporting districts (₹3,584 average), while Wayanad shows gradual increases throughout the year. The state average rises by 24% from January (₹3,703) to November (₹4,672), reflecting significant seasonal volatility. Notably, several major rice-producing districts show no data. The price patterns indicate that Red Matta rice experiences stronger seasonal effects compared to other varieties, particularly in districts like Kottayam where November prices reach nearly ₹5,800 per quintal.

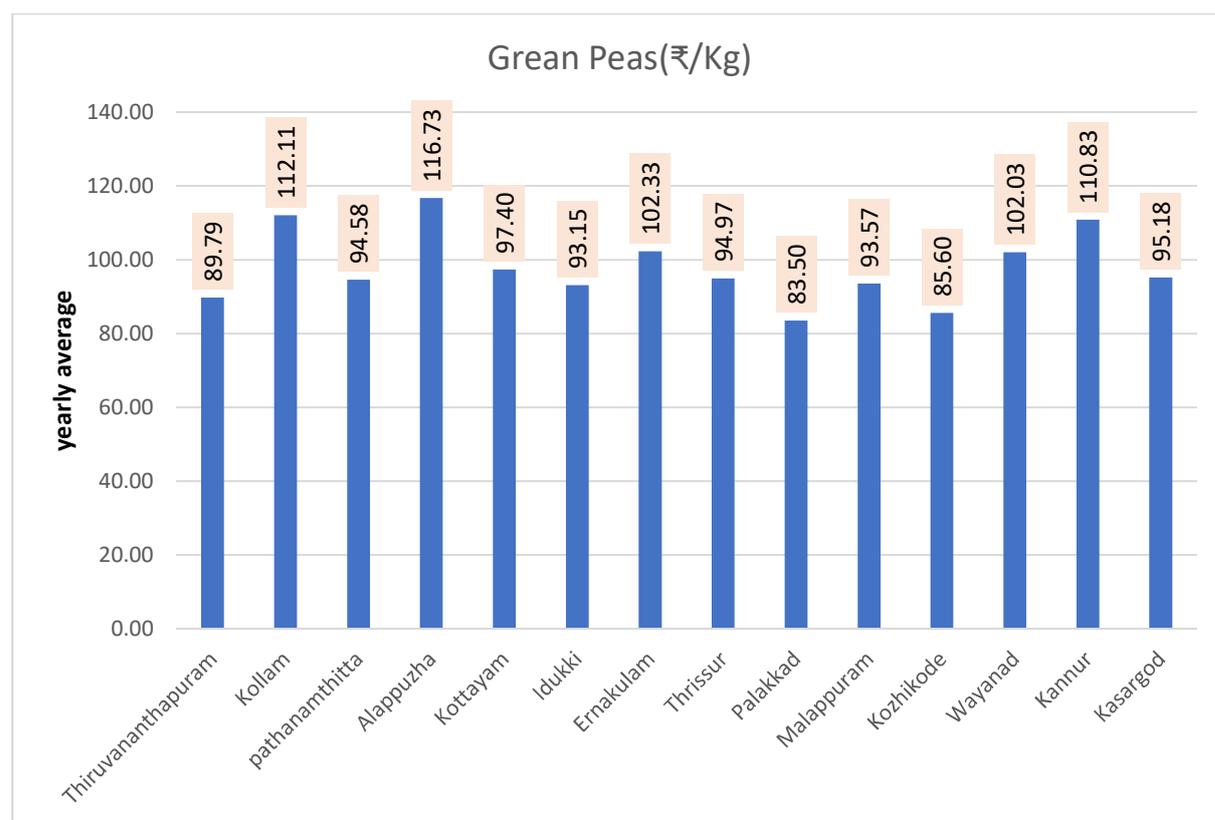

Table 46- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

GREEN PEAS (₹/Kg)

The price of green peas in Kerala shows clear seasonal trends, with prices highest in winter (Jan-Feb) and lowest during monsoon and post-monsoon months (Jul-Dec). Alappuzha has the highest yearly average (₹116.73/kg), while Palakkad is the cheapest (₹83.50/kg). Prices decline sharply from April to July. Coastal districts like Kollam, Alappuzha, and Kannur maintain relatively higher prices. Inland districts like Palakkad and Thrissur see steeper drops (over 50%). The state average falls by 45% from ₹136.93 (Jan) to ₹76.01 (Dec), with October-November showing slight fluctuations. Kannur is an outlier, with an unusual price spike in November (₹107.50). Overall, green pea prices follow typical patterns for non-perishable imported vegetables, with peak rates in winter and lowest rates during monsoon.

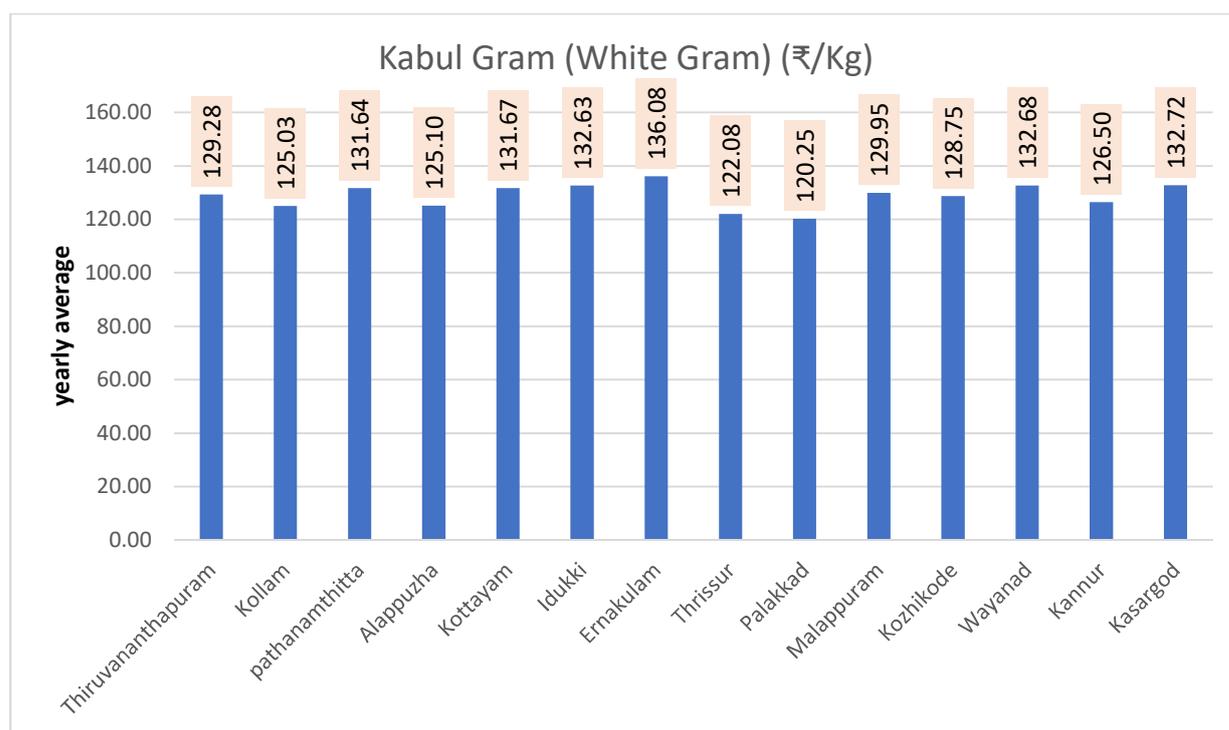

Table 47- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Kabul Gram (White Gram) (₹/Kg)

The price of Kabul Gram (White Gram) in Kerala shows a consistent upward trend throughout the year, starting low in January-February (₹121-123/kg state avg.) and peaking sharply in December (₹150.40/kg). Prices rise gradually from June-July (₹124-126) before accelerating in October-December. Kasargod (₹160 in Dec), Kozhikode (₹160 in Dec), and Idukki (₹155 in Dec). Lowest Prices: Thrissur (₹122.08 yearly avg.) remains stable, with minimal fluctuations. Kollam jumps from ₹114 (Apr-Jul) to ₹155.80 (Dec) a 37% rise. Regional Variations: Northern districts (Kozhikode, Kannur, Kasargod) see the highest year-end spikes, while central districts (Thrissur, Palakkad) remain more stable. State Average rises by 22% from January (₹123.11) to December (₹150.40), reflecting strong seasonal demand.

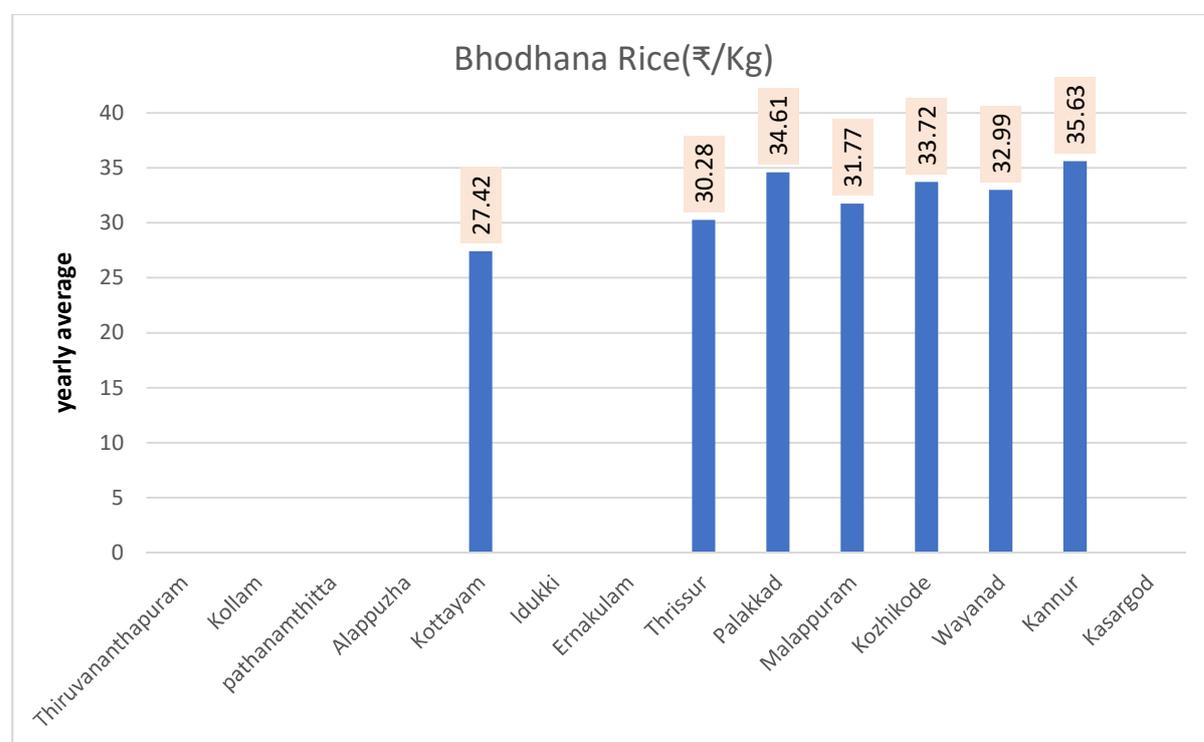

Table 48- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Bhodhana Rice(₹/Kg)

The price data for Bhodhana Rice in Kerala shows limited availability, with only five districts reporting prices (Kottayam, Thrissur, Palakkad, Malappuram, Kozhikode, Wayanad, and Kannur). Among these, Kannur has the highest yearly average (₹35.63/kg), while Thrissur remains the most stable and affordable (₹30.28/kg). Prices generally rise from August to December, with Palakkad showing the sharpest increase (from ₹32 in Jan to ₹39 in Dec – a 22% jump). Kottayam maintains unchanging prices (₹33/kg for 10 months). The state average increases by 14.5% from January (₹31.86) to December (₹36.47), indicating moderate seasonal fluctuations. Notably, major rice-producing districts like Alappuzha and Kollam show no data, implying Bhodhana Rice may be a niche or locally specific variety in Kerala's market. The post-monsoon price rise (Aug-Dec) aligns with typical rice price trends in the region.

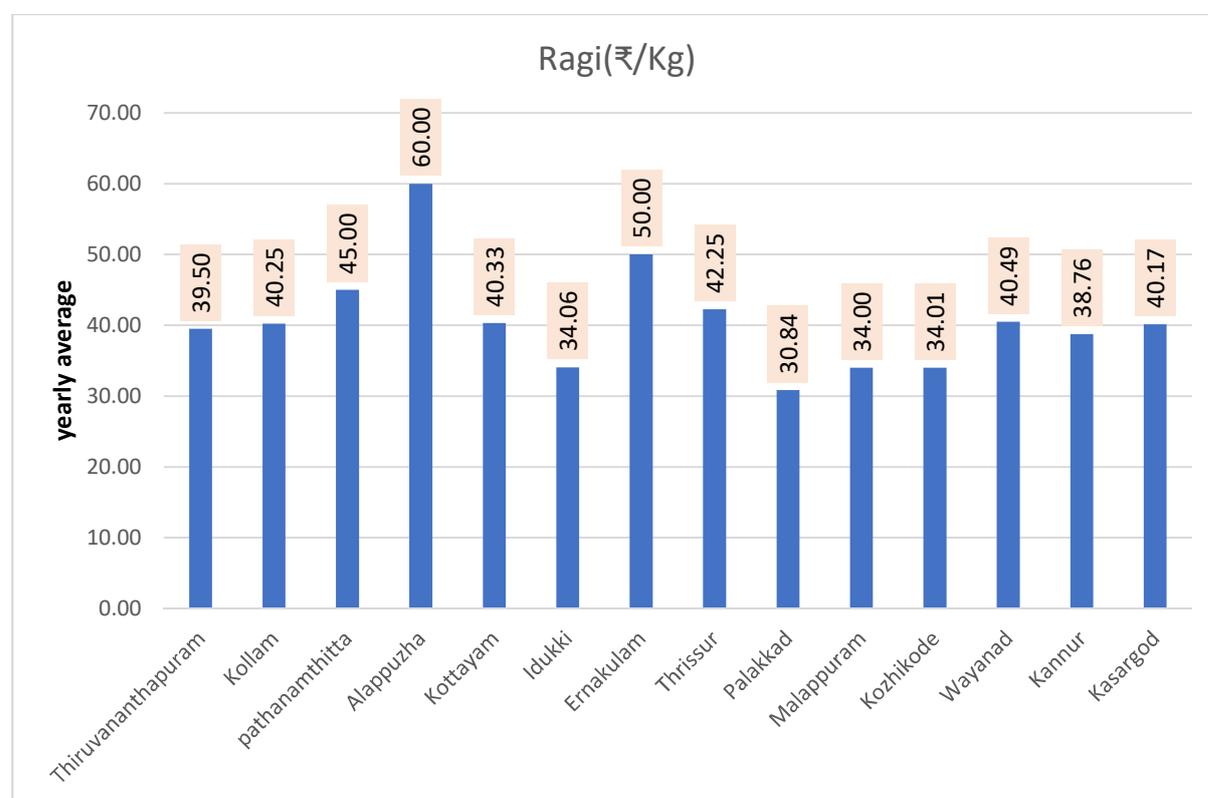

Table 49- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Ragi (Finger Millet) (₹/Kg)

The price of Ragi (Finger Millet) in Kerala shows remarkable stability across most districts, with Alappuzha (₹60/kg yearly average) and Ernakulam (₹50/kg) consistently maintaining the highest prices, while Palakkad (₹30.84/kg) remains the most affordable. Key observations include. Most districts show little to no monthly variation, with Pathanamthitta (₹45), Alappuzha (₹60), and Ernakulam (₹50) holding fixed prices year-round. Some districts (Kollam, Thrissur, Wayanad) see a slight increase (₹3-6) during Oct-Dec, likely due to festive demand. Declining Prices in Idukki & Palakkad: These districts experience a gradual dip (₹36 to ₹32 in Idukki; ₹33 to ₹30 in Palakkad) from June to October, possibly due to local harvest cycles. State Average Stability: The yearly average (₹40.69/kg) remains nearly flat, with only a ₹0.22 increase from Jan (₹40.89) to Dec (₹41.11).

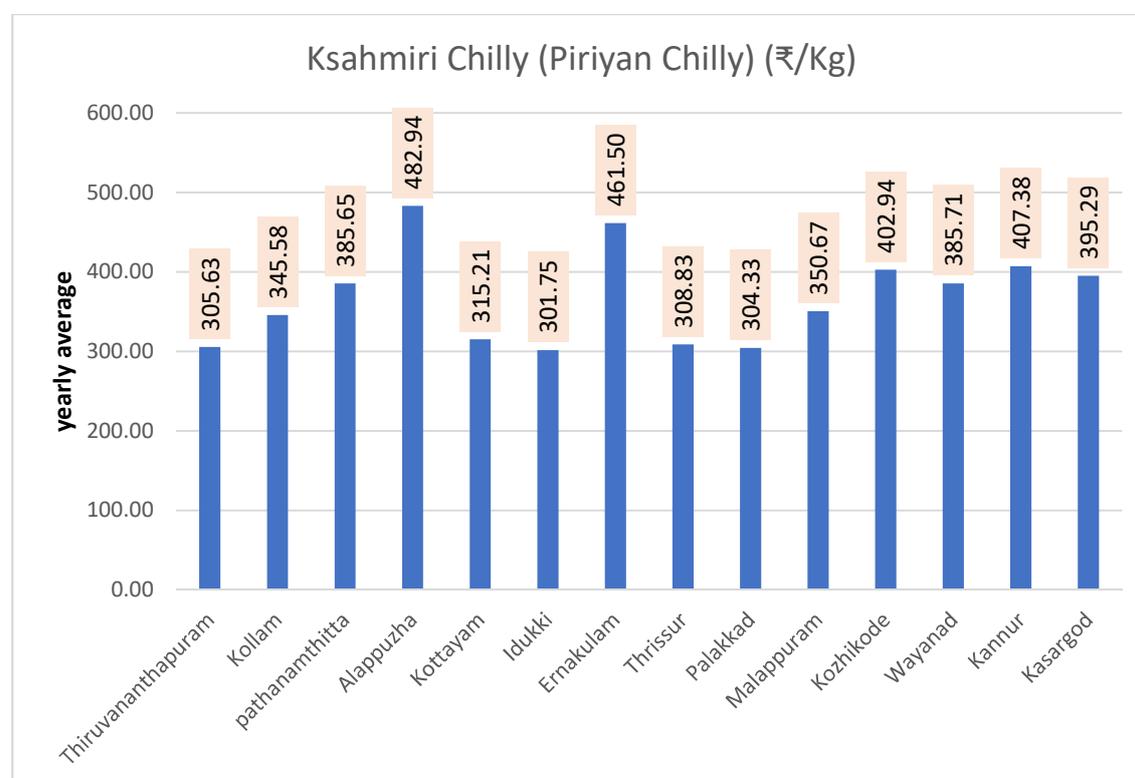

Table 50- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

Kashmiri Priyan Chilly(₹/Kg)

The provided data details the monthly price fluctuations of Kashmiri (Priyan Chilly) across various districts, along with a yearly average. A prominent trend across most districts is a significant increase in prices from the beginning to the end of the year. For instance, Thiruvananthapuram starts at ₹245.00 in January and rises to ₹378.00 by December. Kollam shows an even sharper increase, jumping from ₹255.00 to ₹574.00. Pathanamthitta exhibits one of the most dramatic rises, starting at ₹265.00 and peaking at ₹513.00 in December. While some districts like Kottayam show relatively milder increases, the general pattern is one of escalating prices, especially evident in the latter half of the year (from August to December). The state average clearly reflects this upward trajectory, starting at ₹287.32 in January and reaching ₹472.14 by December, indicating a substantial statewide increase in the price of Kashmiri (Priyan Chilly) over the year.

Table 51- illustrates the dataset pertaining to the Retail Prices of Certain Essential Commodities (Additional Items)

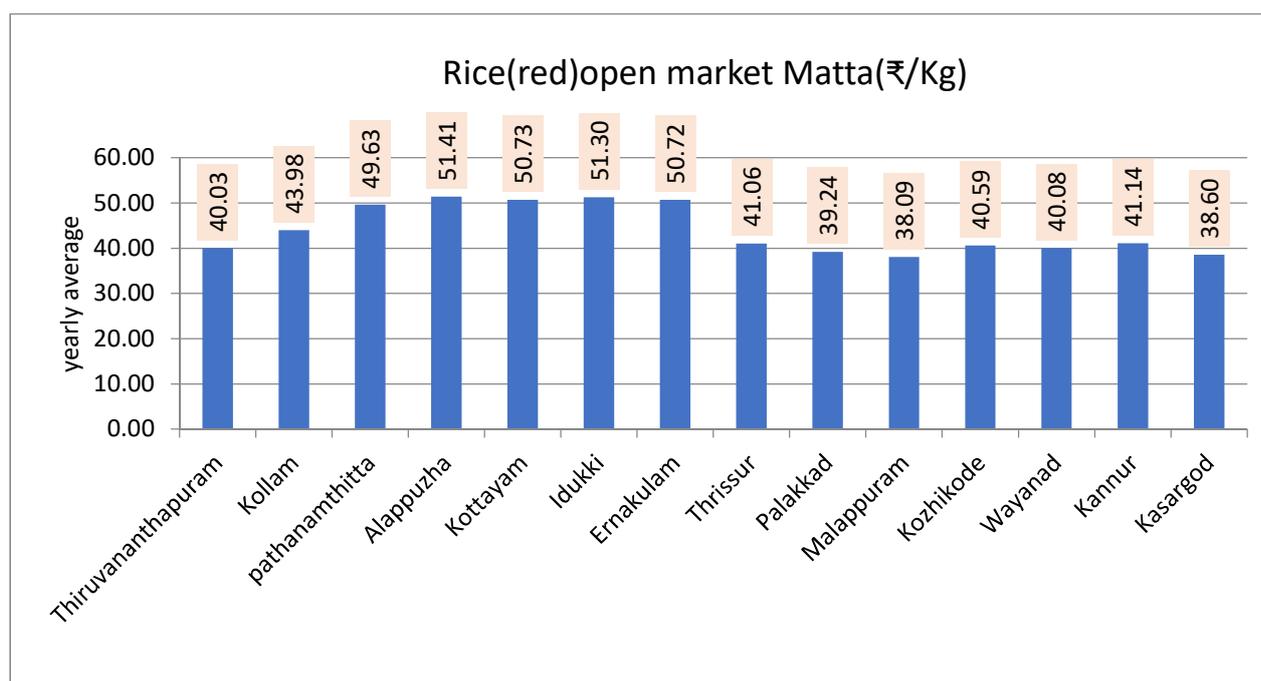

PRICES OF 50 ESSENTIAL ITEMS

Rice (red)open market Matta (₹/Kg)

The data reveals significant seasonal and regional variations in the price of red rice (Matta) across Kerala, with a clear upward trend throughout the year and a state average of ₹44.04/kg. Prices show a steady climb from January (₹40.80/kg average) to their peak in November (₹50.89/kg), representing a 24.7% annual increase statewide. Alappuzha (₹51.41/kg yearly average), Idukki (₹51.30/kg), and Pathanamthitta (₹49.63/kg) emerge as the highest-priced districts, particularly during the October-December period when Alappuzha reaches ₹60.75/kg in November. In contrast, Malappuram (₹38.09/kg) and Palakkad (₹39.24/kg) maintain the most affordable rates year-round, likely due to their status as major rice-producing regions. The most dramatic price surges occur in Kollam, where November prices (₹61.75/kg) are 58% higher than January levels. Northern districts generally show more moderate increases compared to central and southern regions, with Thrissur maintaining remarkable stability (₹40.00-44.00/kg range). The consistent October-November spikes across all districts (averaging ₹49.74/kg, 20% from January). This data highlights the need for improved storage infrastructure and distribution systems, particularly in high-inflation districts, to stabilize this dietary staple's affordability throughout the year.

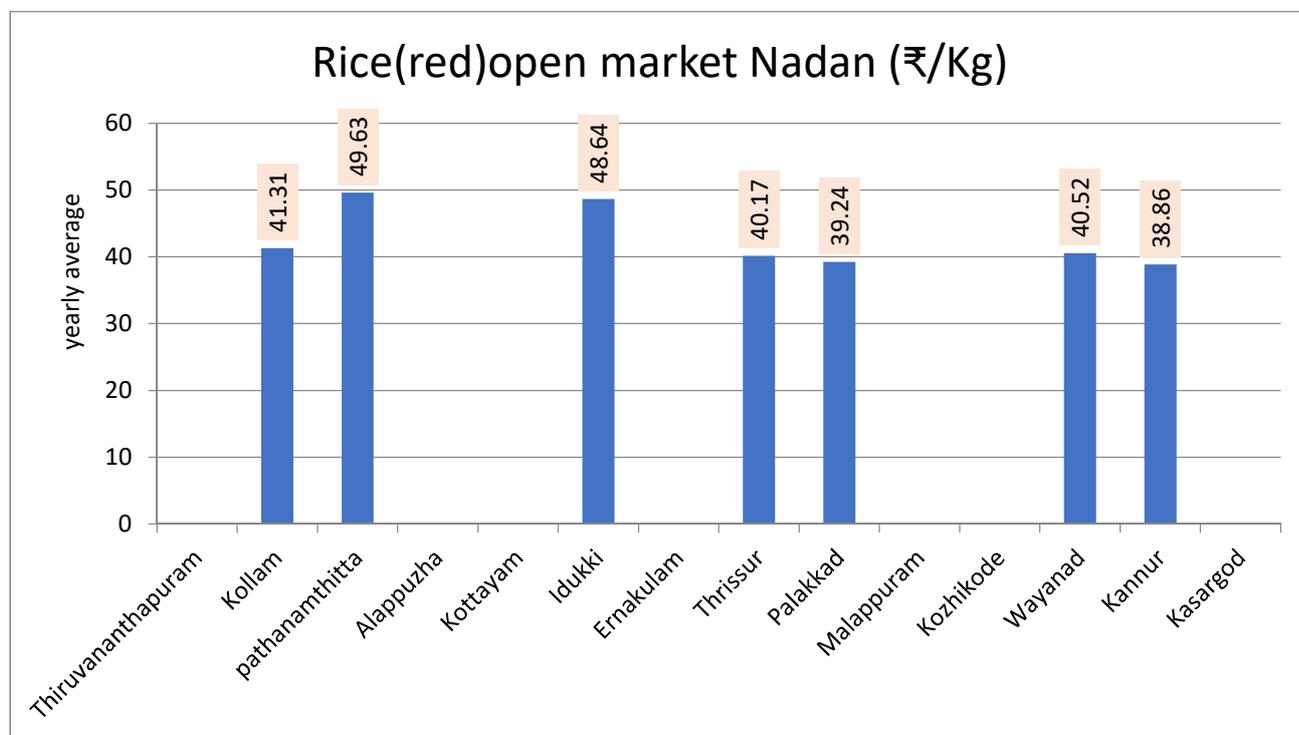

Table57- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Rice(red)open market Nadan (₹/Kg)

The data highlights significant gaps in red rice (Nadan) price reporting across Kerala, with only 6 out of 14 districts providing complete annual data. Among reporting districts, Pathanamthitta maintains the highest yearly average (₹49.63/kg), showing a pattern nearly identical to its Matta rice prices, while Palakkad remains the most affordable (₹39.24/kg). Notably, Idukki shows a sharp 26% price surge from January (₹45.50) to November (₹57.50). The limited dataset reveals similar seasonal patterns to Matta rice, with October-November peaks across all reporting districts (averaging ₹46.71/kg, +16% from January). Thrissur and Kannur demonstrate remarkable price stability compared to volatile districts like Idukki. The absence of data from key districts including Thiruvananthapuram and Ernakulam significantly impacts the state average reliability (₹42.62/kg). This fragmented data underscores the need for more comprehensive price monitoring to accurately assess affordability and availability of traditional rice varieties across Kerala.

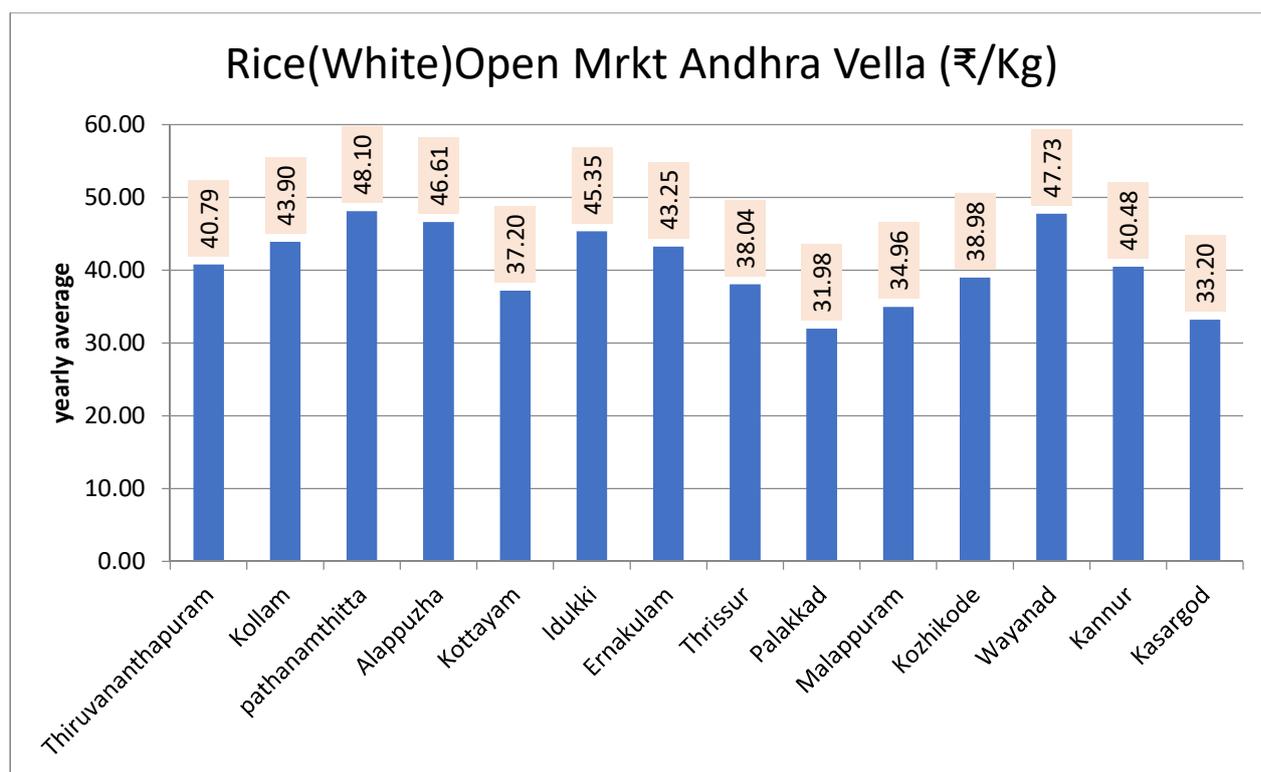

Table58- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Rice(white)open market Andhra Vella (₹/Kg)

The price of Rice (White) – Open Market Andhra **Vella** across Kerala districts showed a clear upward trend during the year. The **state average** increased steadily from ₹34.43 per kg in January to ₹40.73 in September, reaching a peak of ₹46.93 in November before slightly declining to ₹44.06 in December. Districts such as Pathanamthitta, Wayanad, and Kollam recorded sharp price increases during the latter half of the year, particularly from July onwards, reflecting strong seasonal demand and supply pressure. In contrast, Palakkad, Malappuram, and Kottayam maintained relatively lower and more stable prices throughout most of the year. Overall, the annual state average price stood at ₹38.78 per kg, indicating a significant rise in rice prices during the second half of the year compared to the initial months.

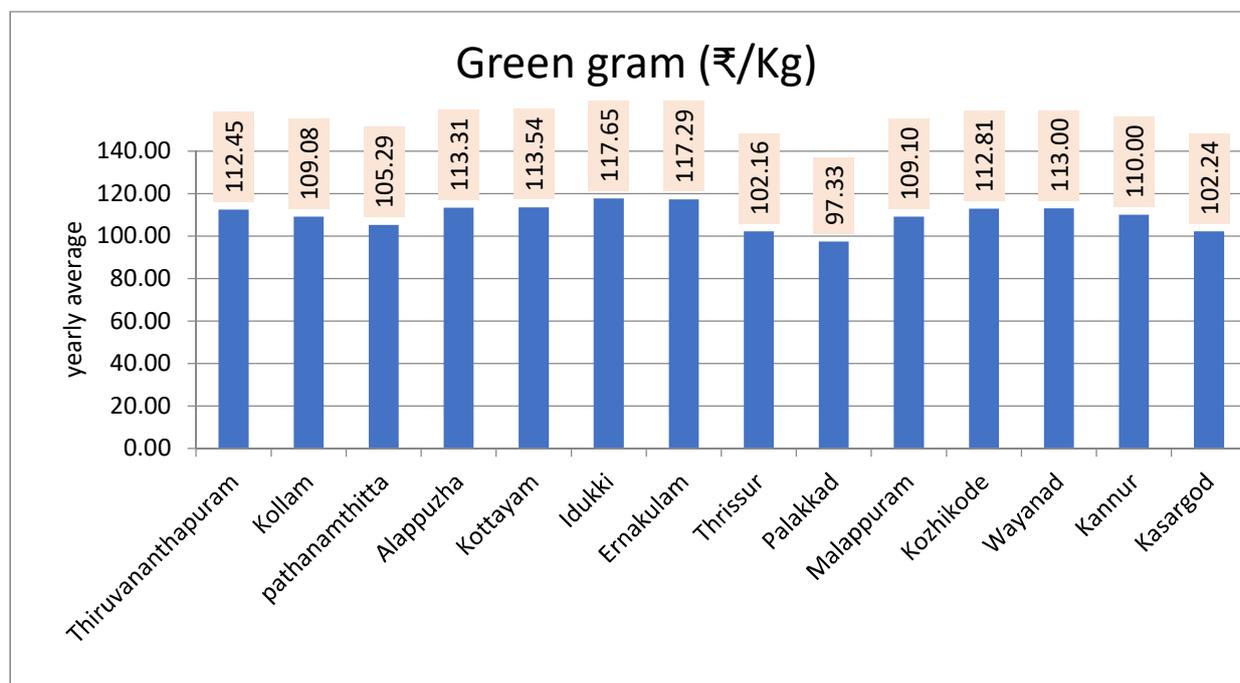

Table59- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Green gram (₹/Kg)

The data reveals significant price fluctuations in green gram (moong dal) across Kerala, with a clear upward trend from mid-year and a state average of ₹109.66/kg. Idukki (₹117.65/kg yearly average) and Ernakulam (₹117.29/kg) emerge as the highest-priced districts, both peaking between August-October (₹123-130/kg), while Palakkad (₹97.33/kg) remains the most affordable throughout the year. Prices show a consistent 15-20% surge from June onward across most districts, with the sharpest increases in Ernakulam (18% July-August spike) and Thiruvananthapuram (15% June-July hike). Notable regional patterns include stable pricing in Kannur (constant ₹110/kg) versus volatile markets like Kozhikode (₹105-120/kg range). Southern districts generally maintain higher baseline prices than northern regions, though all areas converge during the August-October peak period. Western districts (Palakkad, Thrissur) experience more moderate increases (₹5-10/kg seasonal variation), while eastern and coastal districts (Idukki, Alappuzha) see dramatic ₹20-25/kg surges. This suggests varying degrees of supply chain vulnerability across regions, with the post-monsoon period (September-November) emerging as particularly challenging for price stability, warranting targeted interventions during these months.

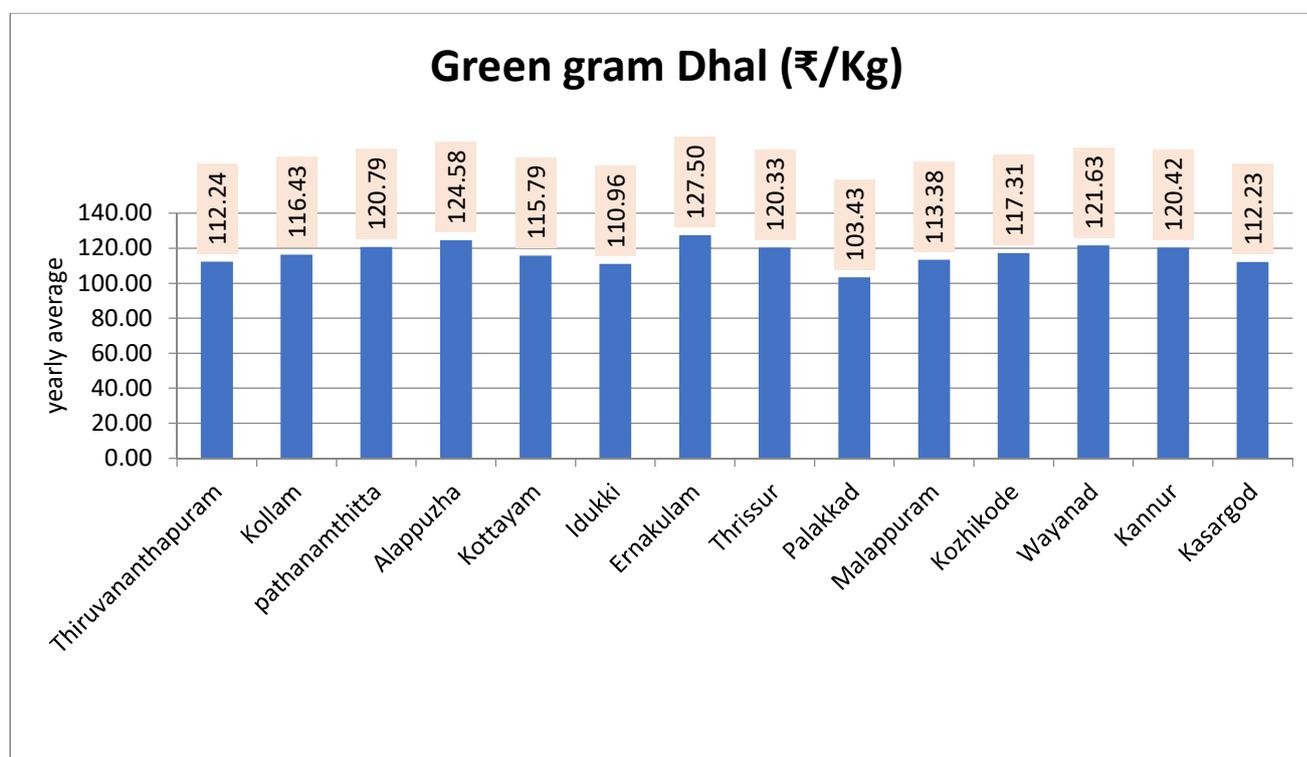

Table60- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Green gram Dhal (₹/Kg)

The data shows green gram dhal prices in Kerala maintain relatively stable but elevated levels throughout the year, with a state average of ₹116.93/kg. Ernakulam emerges as the most expensive district (₹127.50/kg yearly average), Alappuzha ₹.124.58/kg. Pathanamthitta (₹120.79/kg). In contrast, Palakkad remains the most affordable (₹103.43/kg), showing the most significant price differential of ₹24/kg compared to Ernakulam. Unlike whole green gram which showed sharp seasonal spikes, the processed dhal variant exhibits more moderate 5-8% variations across most districts. Two distinct patterns emerge geographically: central and northern districts (Ernakulam, Kozhikode, Wayanad) maintain higher baseline prices, while southern districts show more moderate rates. The December period sees a mild convergence of prices across districts, with Kollam showing an unusual 10% December spike (₹127.20) against the general trend. The data reveals processed dhal maintains a ₹5-7/kg premium over whole green gram state wide, with the price gap narrowing during August-October when whole gram prices peak.

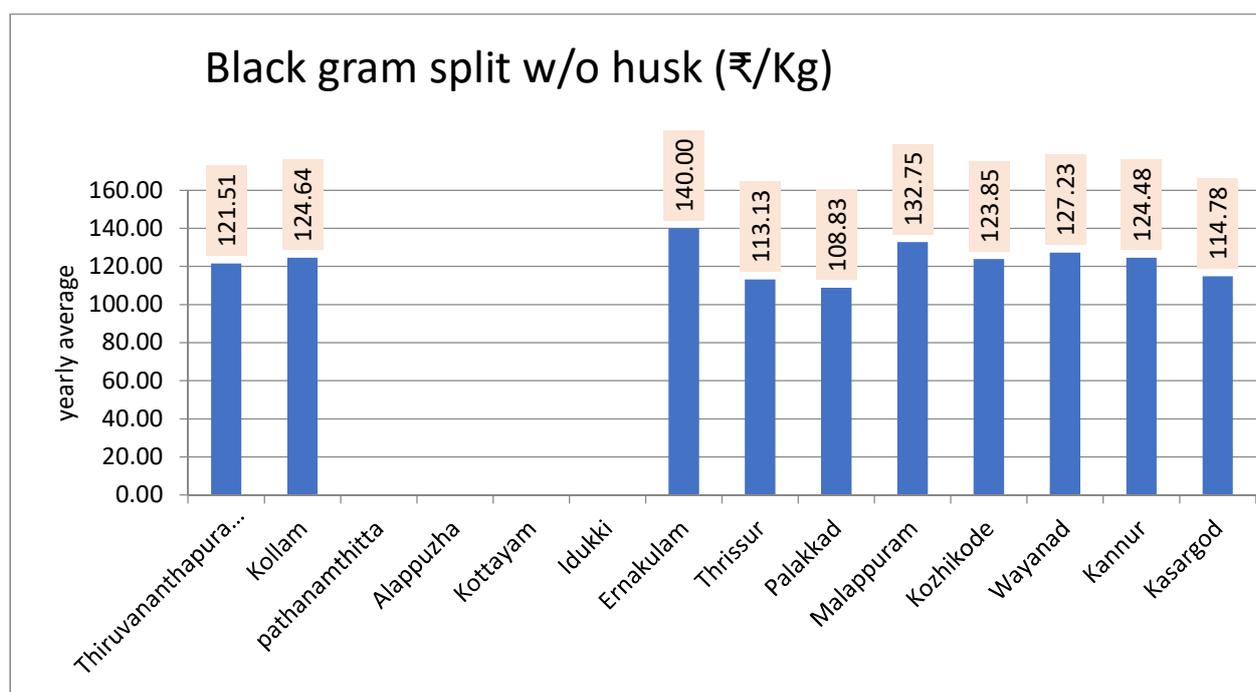

Table61- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Black gram split w/o husk (₹/Kg)

The data reveals significant price variations for black gram split (without husk) across Kerala, with a state average of ₹123.12/kg. Ernakulam maintains the highest and most stable prices at a constant ₹140/kg throughout the year, followed by Malappuram (₹132.75/kg) and Wayanad (₹127.23/kg). In contrast, Palakkad offers the most affordable rates (₹108.83/kg yearly average), showing the most volatility with a 25% price swing between May (₹98) and September (₹125). The data highlights major reporting gaps, with Pathanamthitta, Alappuzha, Kottayam and Idukki providing no data, significantly impacting the reliability of the state average. Prices generally follow an upward trend from July to December across reporting districts, with August-October emerging as the peak period. Thiruvananthapuram shows a notable 13% increase from July (₹116.60) to October (₹130), while Kasaragod experiences dramatic fluctuations with a 19% surge between July (₹113.20) and August (₹126). Northern districts like Kannur and Kozhikode maintain consistently higher prices than southern regions. The stable pricing in Ernakulam and Malappuram versus the volatility in Palakkad and Kasaragod indicates varying degrees of market regulation or local production influences across Kerala's districts.

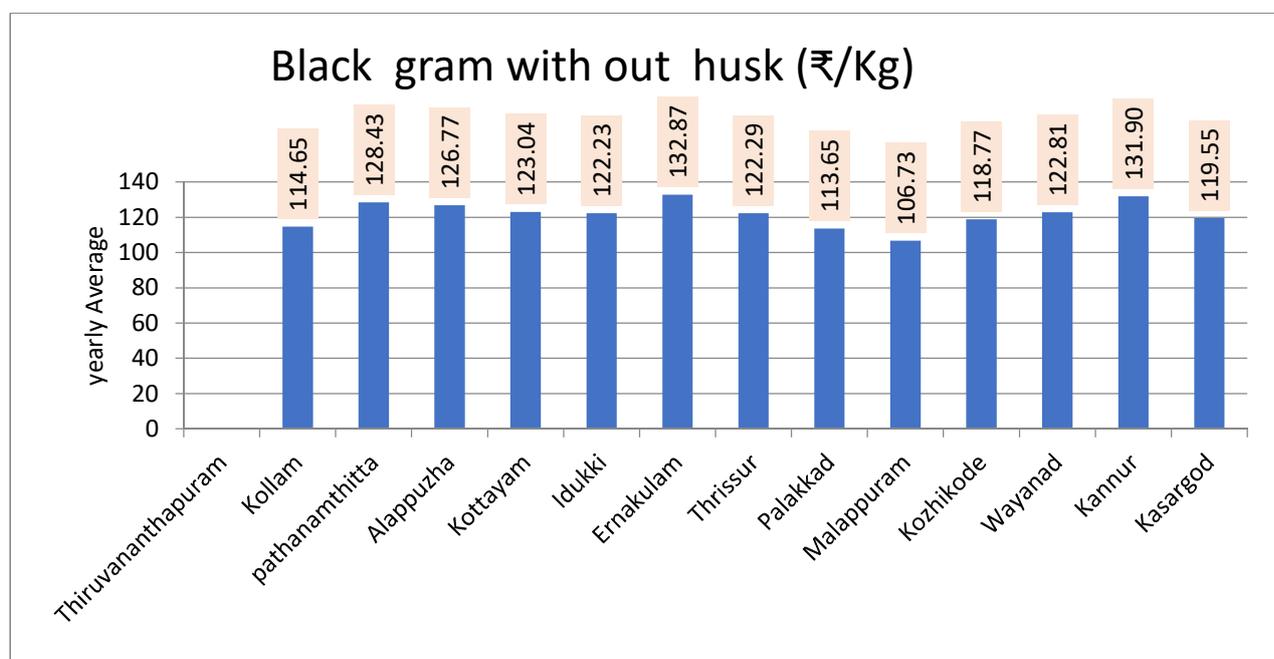

Table62- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Black gram without husk (₹/Kg)

The data reveals significant price variations for black gram (without husk) across Kerala, with a clear seasonal upward trend and a state average of ₹113.12/kg (though incomplete due to missing Thiruvananthapuram yearly data). Ernakulam (₹132.87/kg yearly average) and Kannur (₹131.90/kg) emerge as the highest-priced districts, maintaining consistently elevated levels throughout the year, while Malappuram (₹106.73/kg) and Palakkad (₹113.65/kg) remain the most affordable. Prices show a pronounced 15-25% surge from July to October across most districts, with Kollam experiencing the most dramatic increase - soaring 33% from July (₹105) to November (₹140). Geographically, northern districts generally command higher prices than southern regions, with central districts like Pathanamthitta (₹128.43/kg) and Alappuzha (₹126.77/kg) following closely behind the northern premium markets. The data shows two distinct patterns: western districts (Thrissur, Palakkad) exhibit moderate fluctuations, while eastern districts (Idukki, Wayanad) show more stable but higher pricing. Notably, Kasaragod demonstrates unusual volatility with a 14% mid-year spike (₹111.50 in June to ₹127 in August) before settling back down.

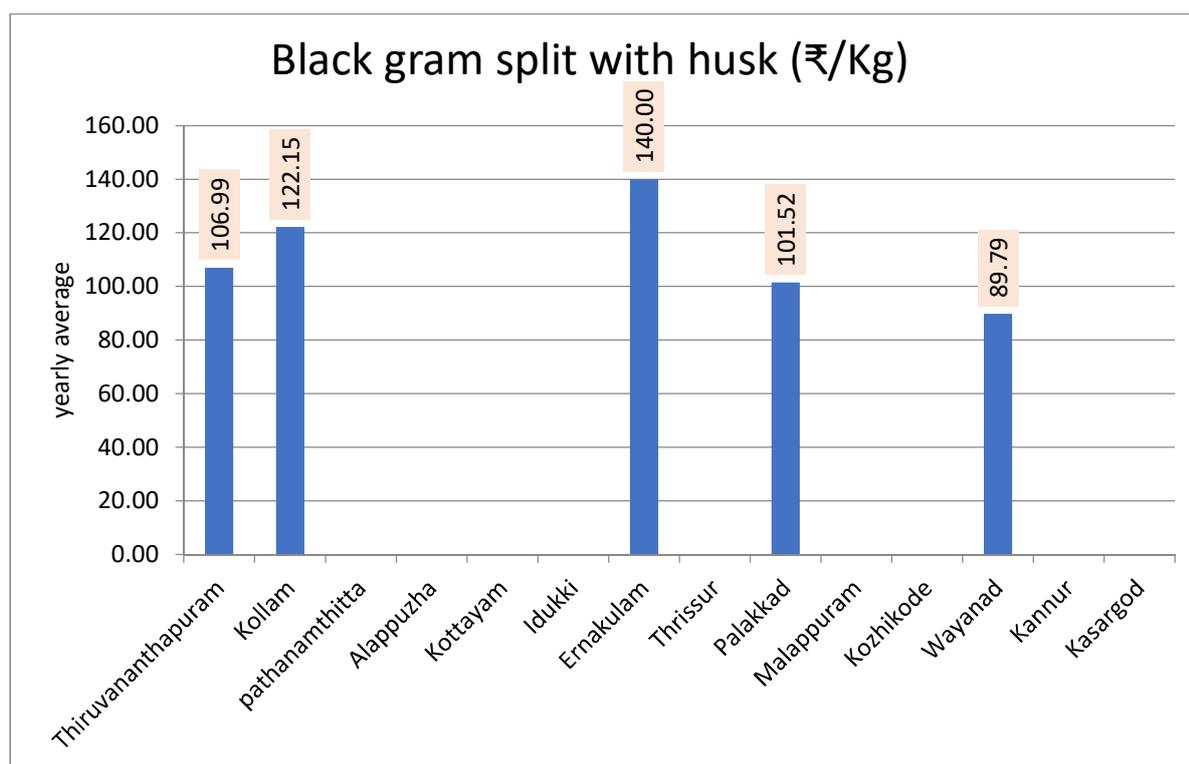

Table63- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Black gram split with husk (₹/Kg)

The prices of Black Gram Split with Husk showed noticeable variation across districts during the year, with a generally firm trend in the second half. The **state average price** declined slightly from ₹116.75 in January to ₹114.20 in April, after which it increased steadily, reaching around ₹123–125 during the August to October period and remaining at elevated levels towards the end of the year. Ernakulam recorded consistently high and stable prices at ₹140 per kg throughout the year, while Kollam also maintained relatively higher prices, especially from October onwards. In contrast, Palakkad and Thiruvananthapuram reported comparatively lower prices, though both districts experienced an increase during the later months.

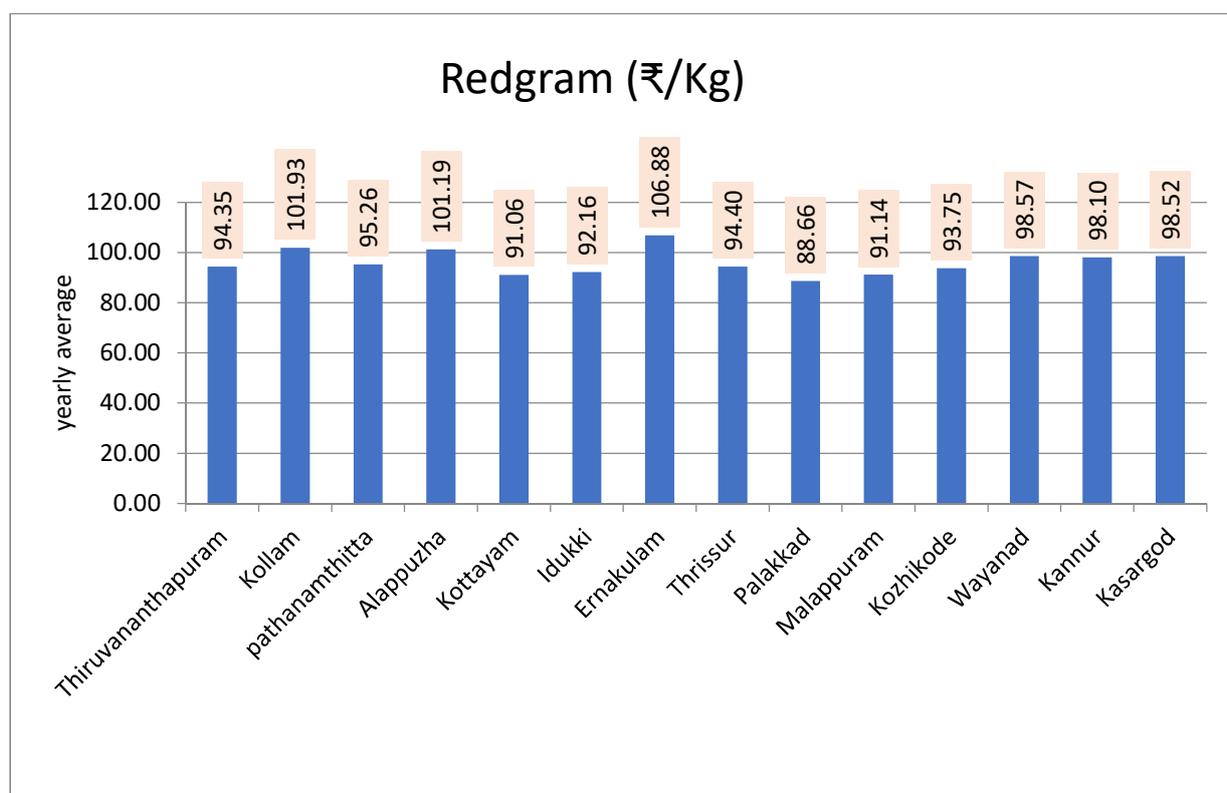

Table64- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Redgram (₹/Kg)

The 2022 yearly average open market prices for Redgram (Toor Dal) across Kerala districts show distinct regional variations, with prices ranging from ₹88.66/kg to ₹106.88/kg. Ernakulam recorded the highest price at ₹106.88/kg, maintaining its pattern of premium pricing seen across other pulses. Palakkad remained the most affordable at ₹88.66/kg. Most districts clustered in the ₹90-100 range, with northern districts like Wayanad (₹98.57), Kannur (₹98.10), and Kasaragod (₹98.52) showing slightly higher prices than southern counterparts. Central Kerala districts exhibited moderate pricing, with Alappuzha (₹101.19) and Kottayam (₹91.06) demonstrating a significant ₹10 price difference despite geographic proximity. The overall price spread of ₹18.22 between highest and lowest districts was narrower than observed in other pulses, suggesting relatively stable market conditions for Redgram across Kerala.

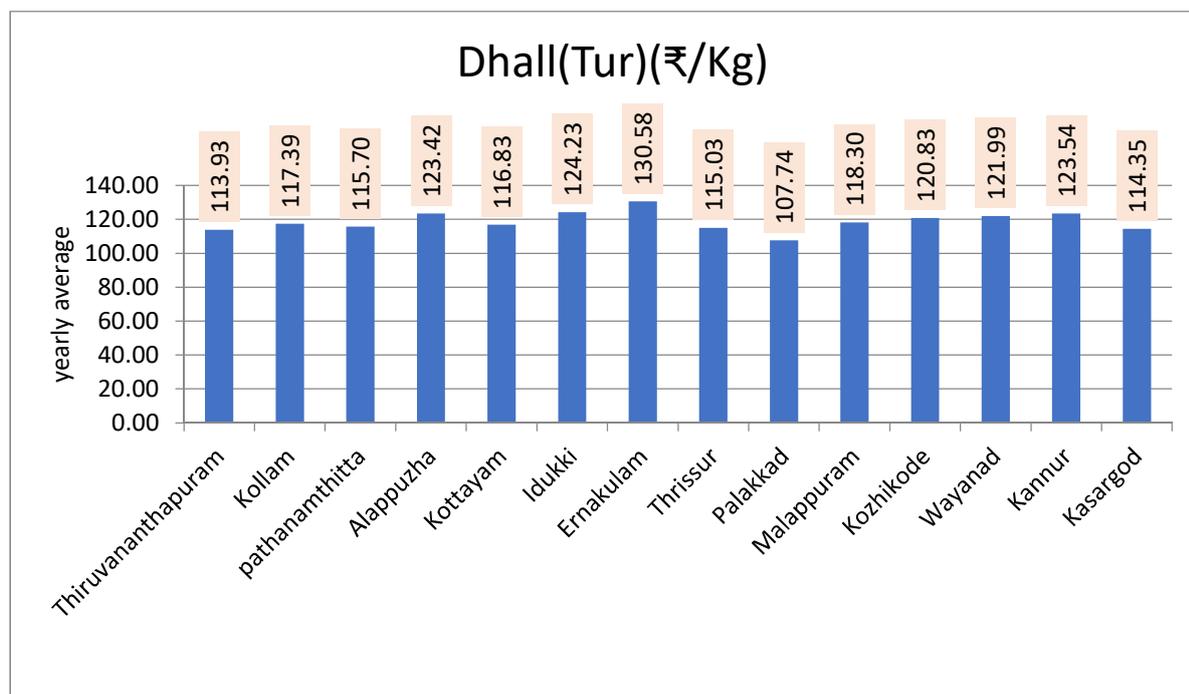

Table 65- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Dhall(Tur)(₹/Kg)

The 2022 yearly average prices for Tur Dal (Arhar/Togari) across Kerala districts reveal significant regional variations, with Ernakulam emerging as the most expensive market at ₹130.58/kg, followed closely by Idukki (₹124.23/kg) and Alappuzha (₹123.42/kg). Palakkad maintained its position as the most affordable source at ₹107.74/kg, continuing its trend as Kerala's pulse price stabilizer. Most districts exhibited prices between ₹115-124/kg, with northern Kerala (Kozhikode ₹120.83, Wayanad ₹121.99, Kannur ₹123.54) generally commanding higher prices than southern districts (Thiruvananthapuram ₹113.93, Kollam ₹117.39). The ₹22.84 price differential between highest and lowest districts was more pronounced than seen in Redgram, suggesting greater market volatility for this essential dal. Notably, hilly districts like Idukki and Wayanad showed premium pricing, likely due to logistical challenges, while Thrissur (₹115.03) and Kasaragod (₹114.35) offered relative bargains in their respective regions. The complete dataset without zero values confirms Tur Dal's pan-Kerala availability, though its steeper price gradient compared to other pulses.

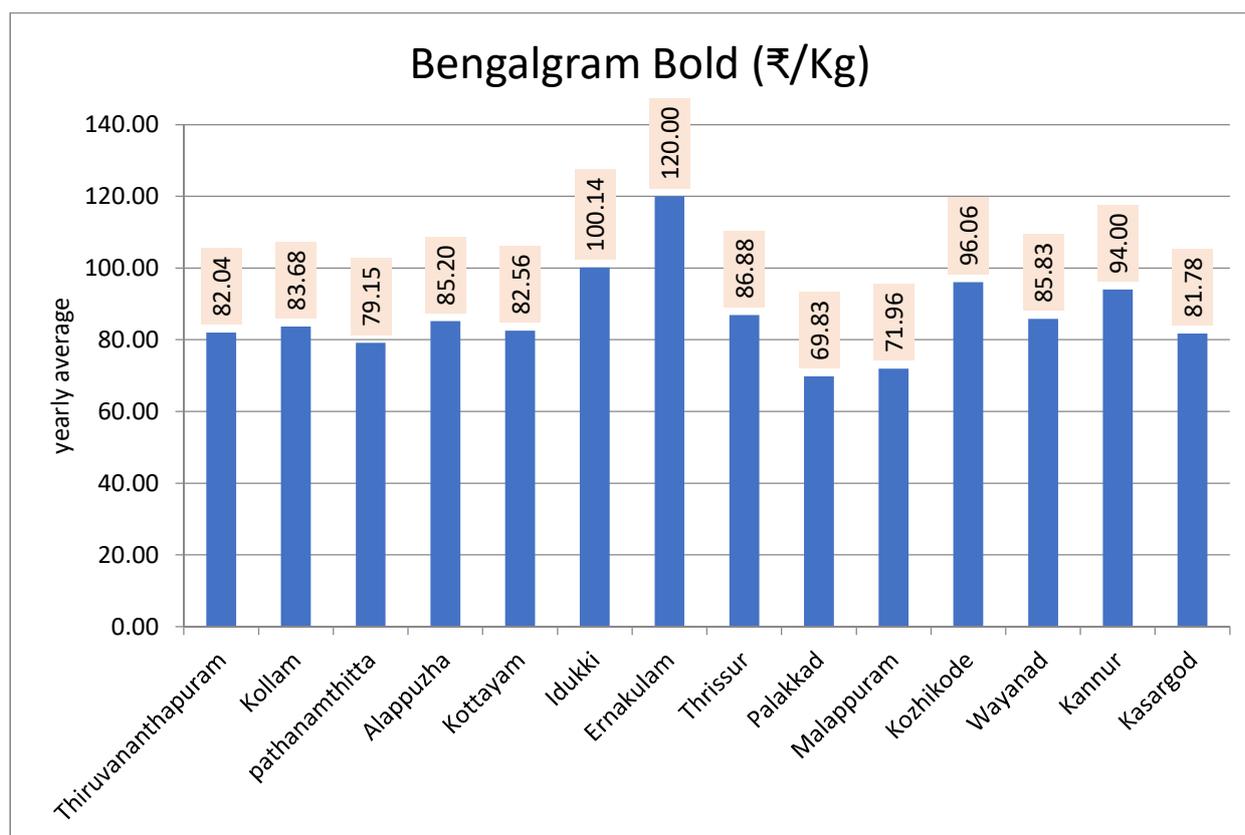

Table 66- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Bengalgram Bold (₹/Kg)

The 2022 monthly price data for Bengalgram Bold (Chana Dal) across Kerala districts reveals distinct seasonal patterns and regional variations. Ernakulam maintained the highest yearly average at ₹120/kg, remaining consistently stable throughout all twelve months, likely due to urban demand and premium retail markets. Idukki followed as the second most expensive district (₹100.14), with its hilly terrain possibly contributing to transportation challenges. Seasonal trends show a general price escalation towards year-end, with most districts experiencing a 5-15% increase from January to December. Kollam demonstrated the most dramatic seasonal swing, jumping from ₹85 in January to ₹101.6 in December (20% increase), while Kannur saw an 18% rise (₹90 to ₹107).

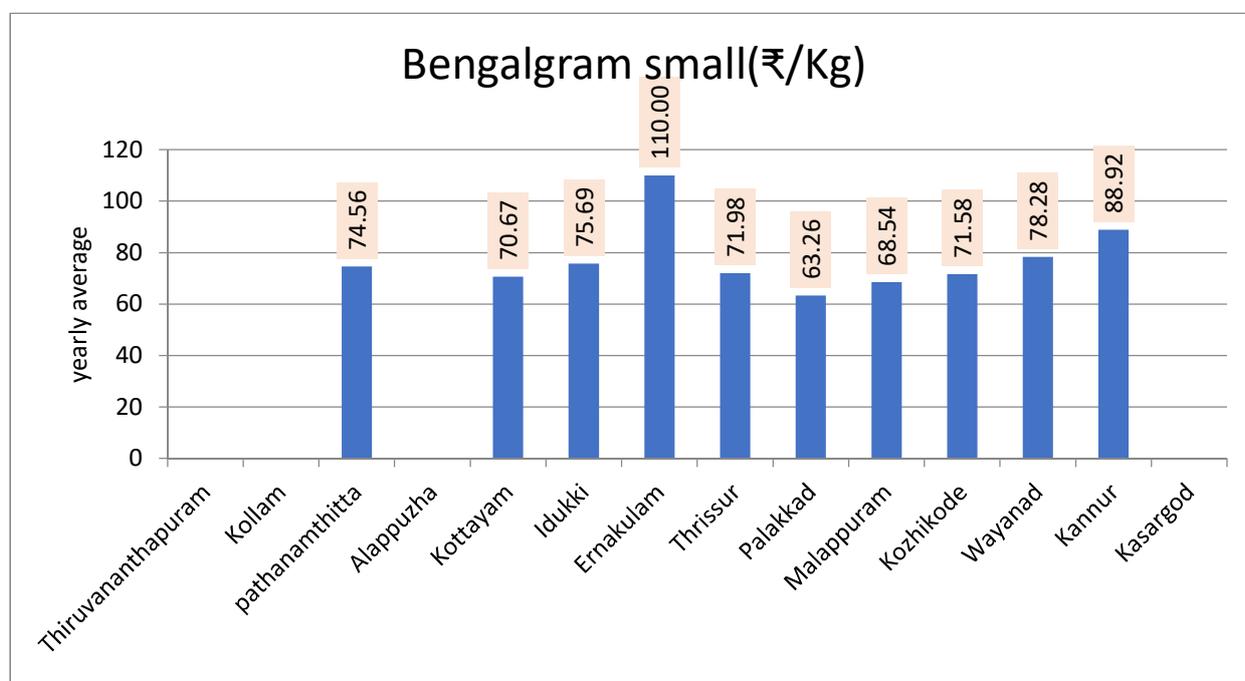

Table 67- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Bengalgram small (₹/Kg)

Bengalgram Small prices in Kerala during the year showed moderate variation across districts, with noticeable regional differences. Data availability was limited in districts such as Thiruvananthapuram, Kollam, Alappuzha, and Kasargod, where no prices were reported. Among the reporting districts, Ernakulam consistently recorded the highest and most stable price at ₹110 per kg throughout the year. Palakkad and Malappuram remained on the lower side, with yearly averages of ₹63.26 and ₹68.54 per kg respectively. Districts like Pathanamthitta, Kottayam, Thrissur, and Kozhikode exhibited mild month-to-month fluctuations but largely maintained stable price levels. Kannur showed comparatively higher volatility, with prices peaking at ₹100 per kg during September and October, resulting in a higher annual average of ₹88.92 per kg. At the state level, the average price gradually declined from ₹57.07 per kg in January to around ₹53.90 per kg in April and May, before marginally improving towards the later months, ending with a yearly average of ₹55.25 per kg, indicating an overall stable but slightly soft price trend during the year.

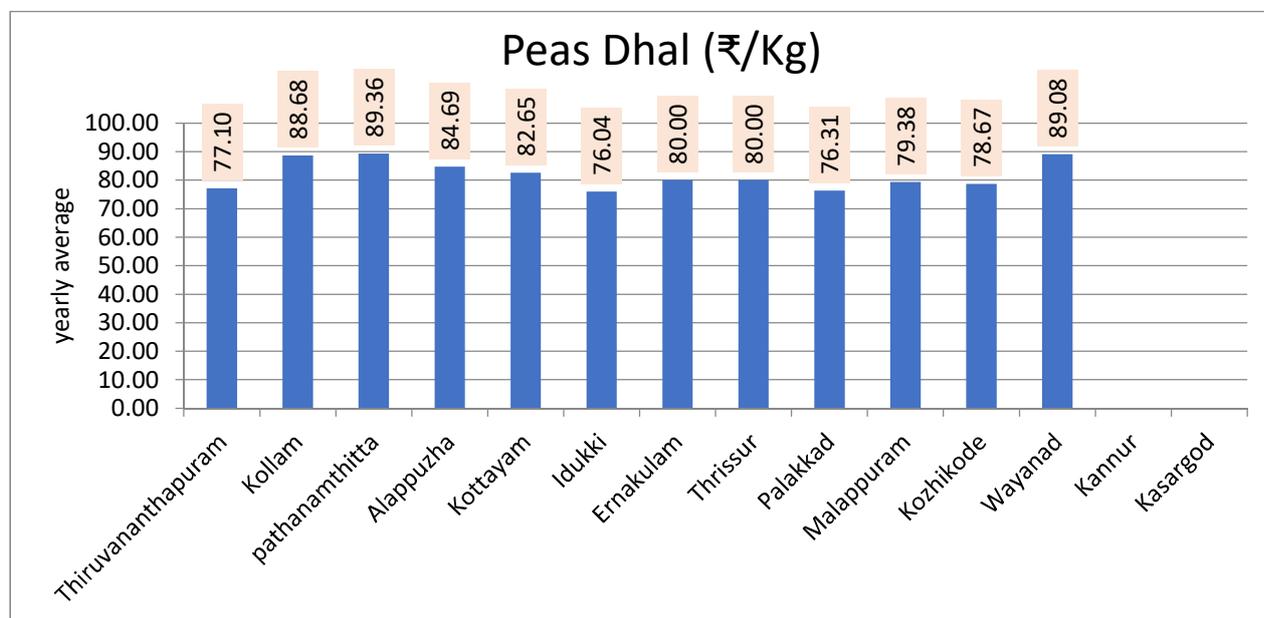

Table68- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Peas Dhal (₹/Kg)

Peas Dhal prices in Kerala during the year showed a generally stable trend with moderate fluctuations across districts. Thiruvananthapuram recorded a gradual decline from higher levels in the first half of the year, resulting in a yearly average of ₹77.10 per kg. Kollam and Pathanamthitta exhibited comparatively higher volatility, with prices peaking during the later months, leading to higher annual averages of ₹88.68 and ₹89.36 per kg respectively. Ernakulam and Thrissur remained completely stable throughout the year at ₹80 per kg, indicating steady market conditions. Idukki and Palakkad experienced a noticeable dip during the mid-year months, particularly in June and July, before showing slight recovery towards the end of the year. Wayanad consistently reported higher prices, maintaining an annual average of ₹89.08 per kg. Data was not available for Kannur and Kasargod. At the state level, the average price showed a mild downward movement from ₹70.95 per kg in January to around ₹68.55 per kg in August, before marginally improving, resulting in an overall yearly average of ₹70.14 per kg, reflecting a largely stable price pattern with slight seasonal softening.

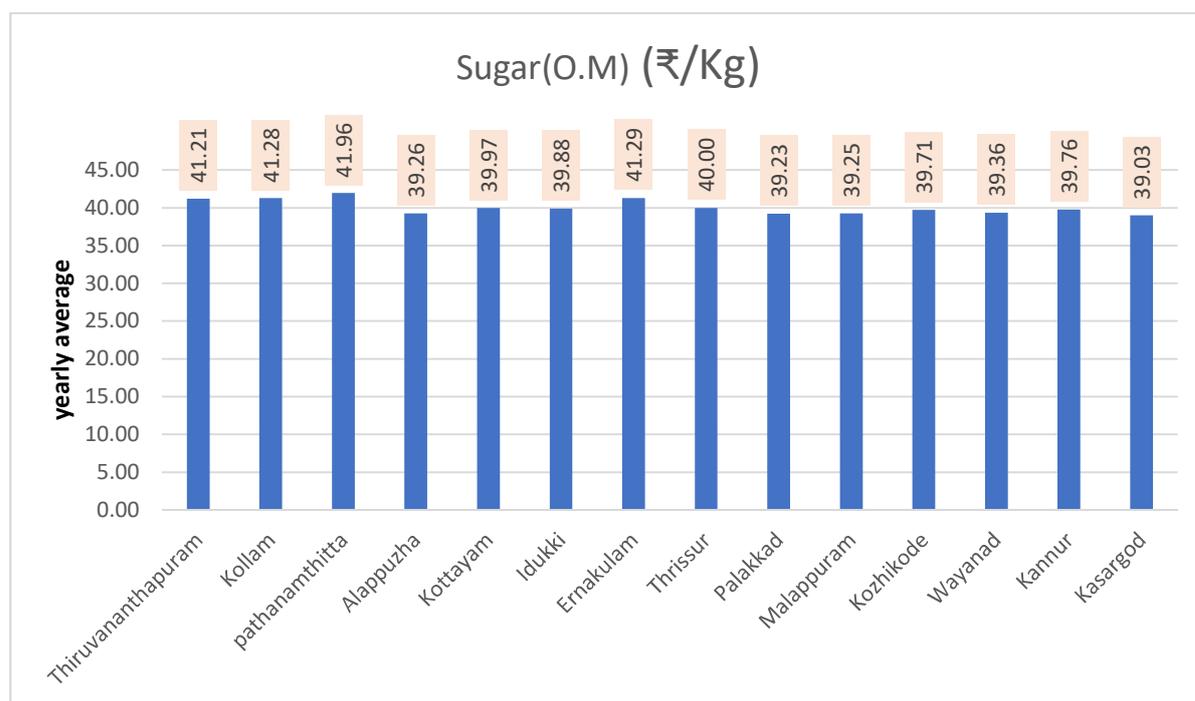

Table 69- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Sugar (O.M) (₹/Kg)

The provided data, labelled "Sugar (O.M)," illustrates the monthly price fluctuations of sugar across various districts, along with a yearly average. Overall, sugar prices exhibit remarkable stability throughout the year with only minor fluctuations. Most districts show prices hovering around ₹40.00 to ₹42.00, with very little deviation from month to month. For instance, Thiruvananthapuram's price ranges from ₹40.00 to ₹41.80, a relatively narrow band. Similarly, Thrissur and Alappuzha maintain a consistent price of ₹40.00 for most of the year. While some districts like Kollam and Kannur show slight increases (e.g., Kollam goes from ₹40.00 to ₹42.00), these are generally small. The state average column reinforces this observation, starting at ₹39.80 in January and ending at ₹40.26 in December, indicating very minimal overall price movement for sugar across the state throughout the year.

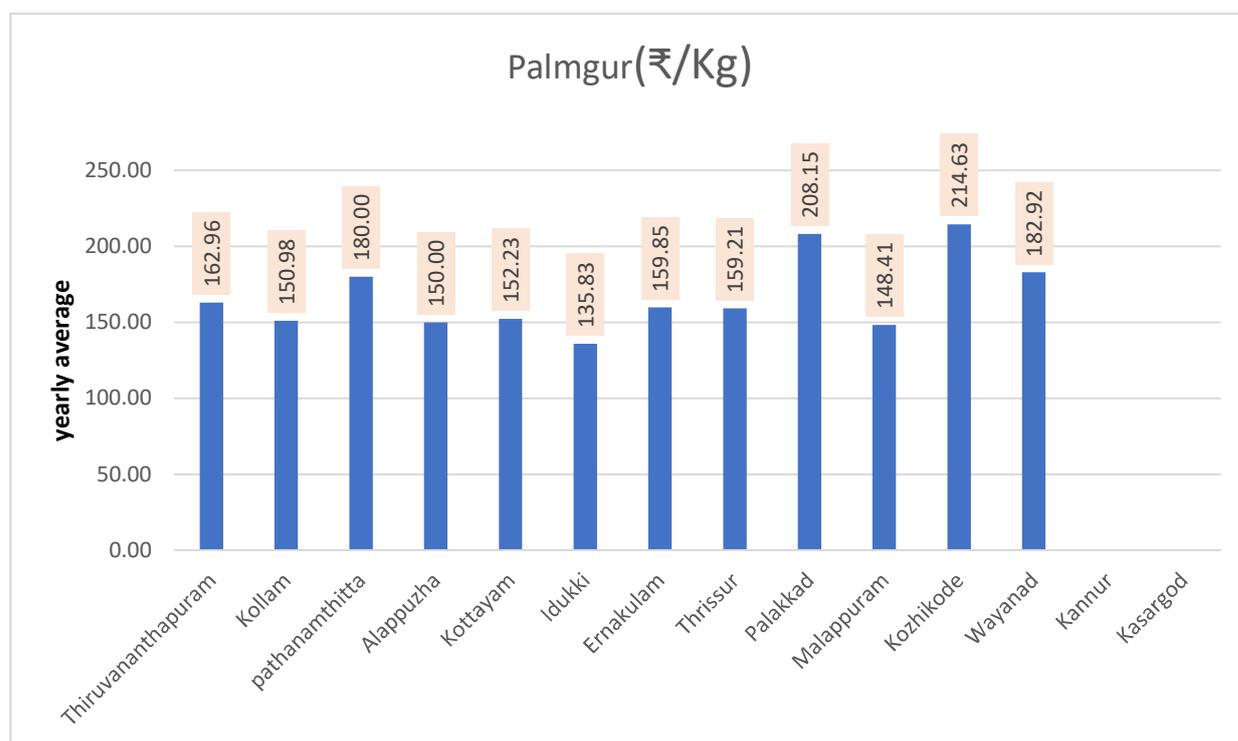

Table 52- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Palmgur (₹/Kg)

The provided data, titled "Palmgur," illustrates the monthly price fluctuations of palmgur across various districts, along with a yearly average. The prices show a mix of stability and noticeable declines in certain districts over the year. For instance, Thiruvananthapuram generally maintains prices around ₹160.00, with slight variations. Kollam and Pathanamthitta also show relatively stable prices for much of the year, although Kollam sees a dip in September and October. However, some districts experience significant price drops. Idukki's price plummets from ₹160.00 in May to ₹110.00 from August onwards. Ernakulam also shows a decrease, going from ₹180.00 in January to ₹179.00 in December, but with notable dips in between. Palakkad stands out with higher initial prices around ₹200.00, increasing to ₹226.00 in September before a slight reduction towards the end of the year. The state average reflects a slight overall decrease in prices from ₹173.08 in January to ₹166.95 in December, influenced by the declines in some districts, even as others remain relatively steady. It's also worth noting the absence of data for Kannur and Kasaragod for the entire year.

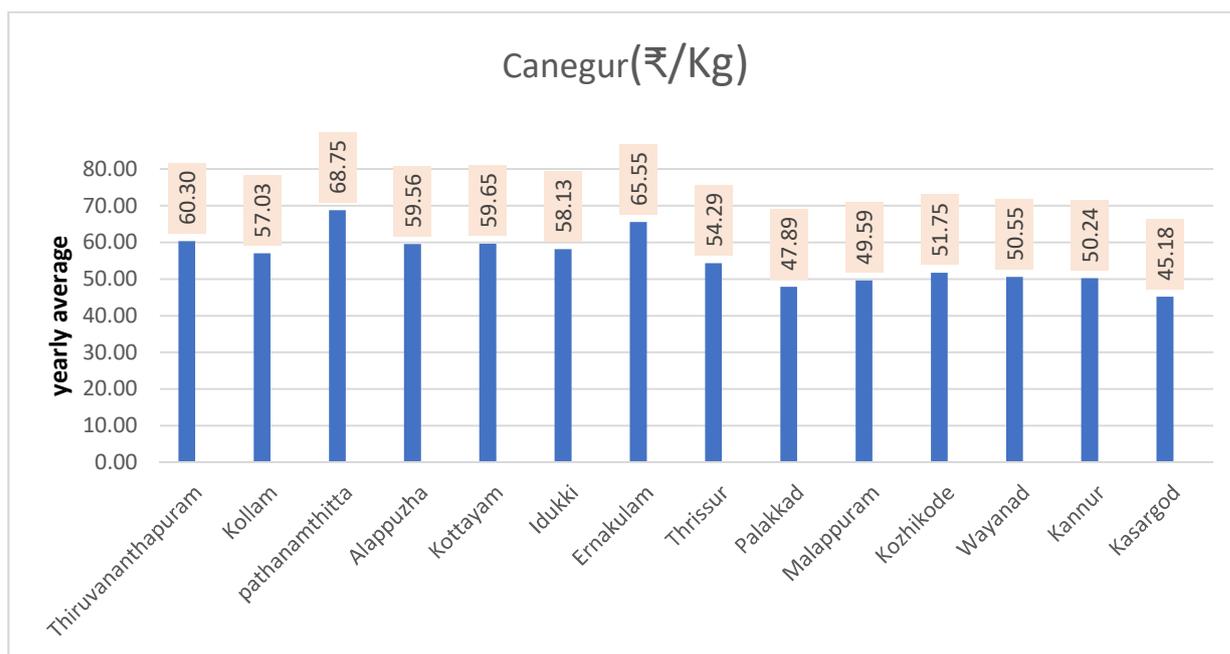

Table 53- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Canegur (₹/Kg)

The provided data details the monthly price fluctuations of "Canegur" across various districts, along with a yearly average. The overall trend reveals a mixed pattern of price changes, with some districts experiencing notable increases or decreases, while others remain relatively stable. Thiruvananthapuram, for instance, shows a clear upward trend, starting at ₹58.75 in January and reaching ₹67.00 by December, with a peak of ₹71.80 in September. Pathanamthitta also exhibits significant increases, jumping from ₹75.00 in January to ₹84.00 in September. In contrast, districts like Alappuzha, Kottayam, and Idukki demonstrate more stable pricing, largely hovering around ₹55.00 to ₹60.00 throughout the year. Some districts experience a slight dip in prices earlier in the year before recovering or increasing later. For example, Thrissur starts at ₹56.00, dips to ₹51.00 in March, and then rises to ₹55.00 by December. Palakkad and Malappuram generally maintain lower price points, with slight fluctuations. The state average reflects a slight overall increase from ₹56.21 in January to ₹56.14 in December, though this masks the more pronounced fluctuations seen in individual districts. The data indicates that while some regions maintain consistent pricing, others are subject to more dynamic changes in canegur prices over the year.

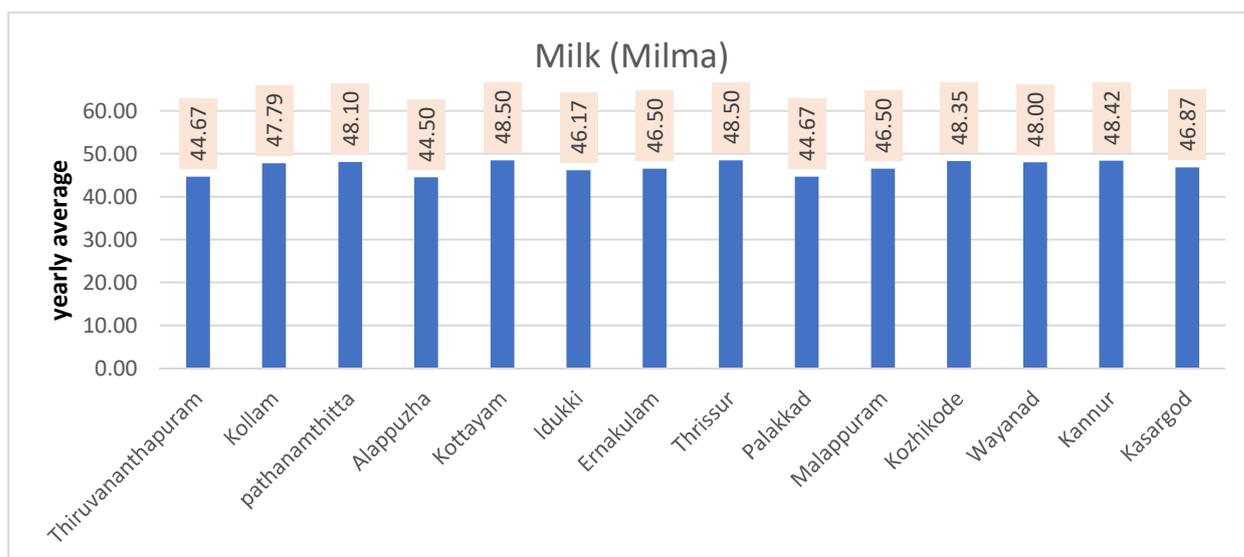

Table 54- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Milk (Milma) (₹/Ltr)

The provided data, titled "Milk (Milma)," illustrates the monthly price fluctuations of milk across various districts, along with a yearly average. A striking feature of this data is the remarkable stability of milk prices for the majority of the year, with a consistent price maintained from January to November in most districts. However, a significant and uniform price increase is observed across almost all districts in December. For instance, Thiruvananthapuram, which held steady at ₹44.00 for eleven months, jumps to ₹52.00 in December. Similarly, Kottayam's price rises from ₹48.00 to ₹54.00 and Alappuzha's from ₹44.00 to ₹50.00. While most districts show this pattern of eleven months of stability followed by a December hike, a few, like Kollam and Idukki, exhibit minor fluctuations before December. Kollam sees a slight dip in August, September, October, and November before the December increase, and Idukki experiences a rise in August that is maintained until the December hike. The state average clearly reflects this trend, remaining largely consistent around ₹46.37 to ₹46.70 for the first eleven months, and then sharply increasing to ₹52.40 in December. This indicates that while daily or monthly price changes are rare, a significant and broad-based adjustment occurs annually in December.

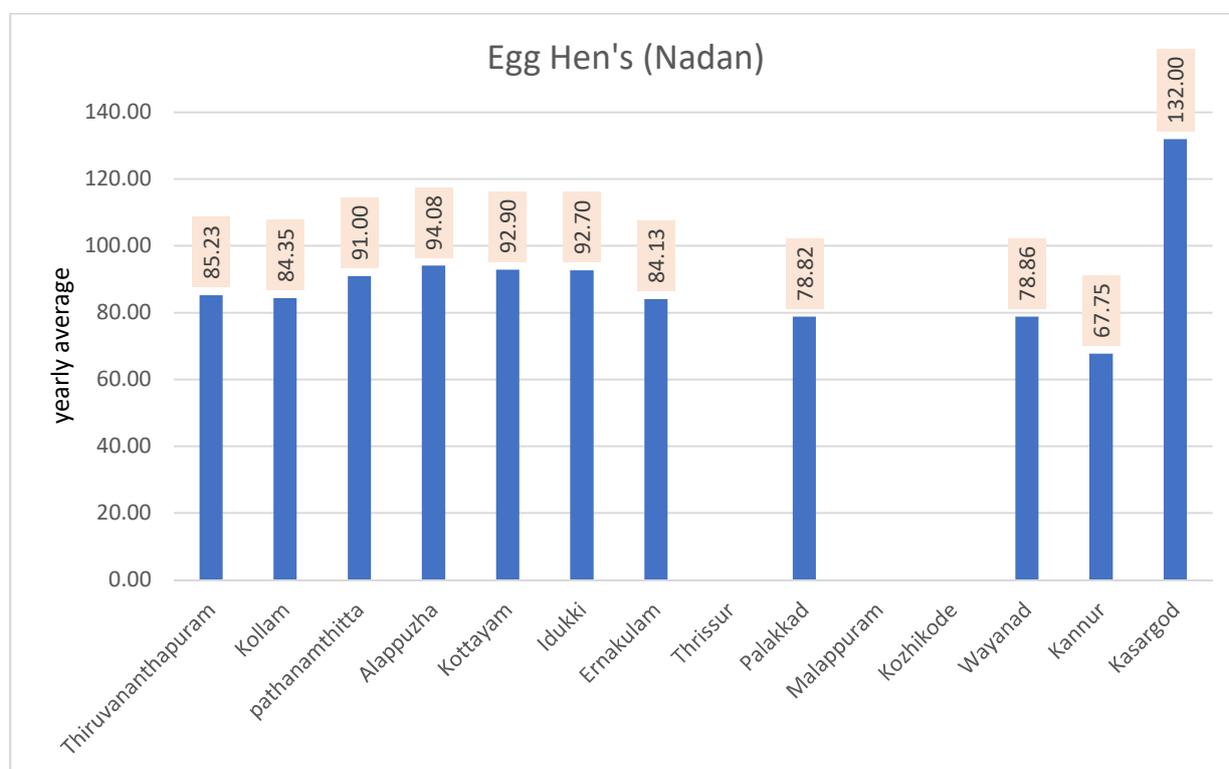

Table 55- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Egg Hen's (Nadan)

Prices of Nadan hen eggs in Kerala during the year showed notable inter-district variation with a generally stable to slightly increasing trend. Thiruvananthapuram and Kollam maintained steady prices for most of the year, with a marginal rise during the last quarter, resulting in yearly averages of ₹85.23 and ₹84.35 respectively. Higher price levels were observed in districts such as Alappuzha, Kottayam, Idukki, and Pathanamthitta, where prices remained mostly in the range of ₹90–₹96 per unit for extended periods. Kasargod recorded exceptionally high and uniform prices throughout the year at ₹132, leading to the highest annual average among all districts. In contrast, Kannur and Wayanad reported comparatively lower prices with greater fluctuations, especially during the mid-year months. Price data was not available for Thrissur, Malappuram, and Kozhikode. At the state level, the average price remained largely stable around ₹88–₹89 for most months, before rising towards the end of the year to ₹93.53 in December, resulting in an overall yearly average of ₹89.25, indicating a mild upward trend in Nadan hen egg prices.

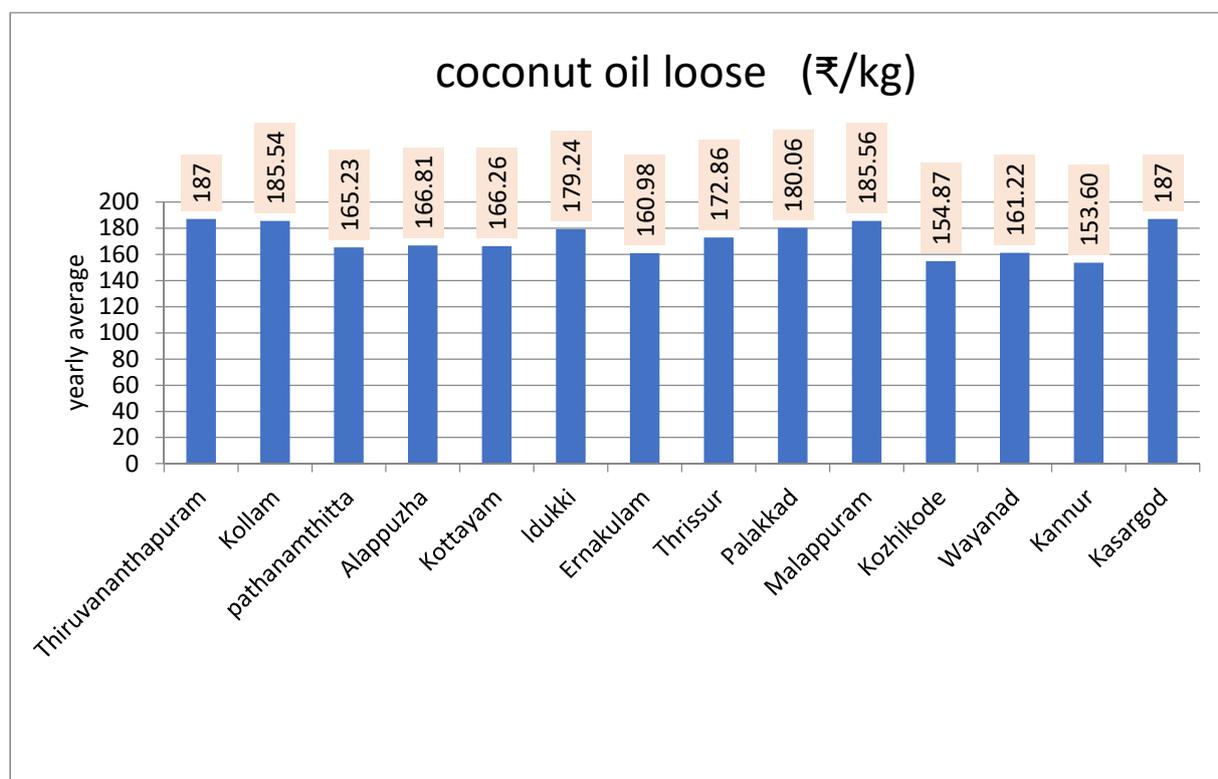

Table 56- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Coconut oil loose (₹/kg)

Loose coconut oil prices in Kerala during the year exhibited a clear declining trend from the beginning of the year to the post-monsoon period, followed by a mild recovery towards December. Most districts recorded higher prices during January to March, with Thiruvananthapuram and Kasargod consistently remaining at the upper end, maintaining prices around ₹200 per kg in the first five months. A steady fall was observed across all districts from June onwards, with prices reaching their lowest levels during September and October, particularly in districts such as Kozhikode, Kannur, and Pathanamthitta. Ernakulam and Kozhikode recorded comparatively lower yearly averages, indicating relatively softer prices in these markets. Malappuram, Kollam, and Palakkad maintained relatively higher annual averages, reflecting stronger market prices. At the state level, the average price declined from ₹186.14 per kg in January to a low of ₹159.46 per kg in October, before improving to ₹167.24 per kg in December, resulting in an overall yearly average of ₹171.87 per kg. This trend indicates seasonal price softness during the middle of the year with partial recovery towards the end.

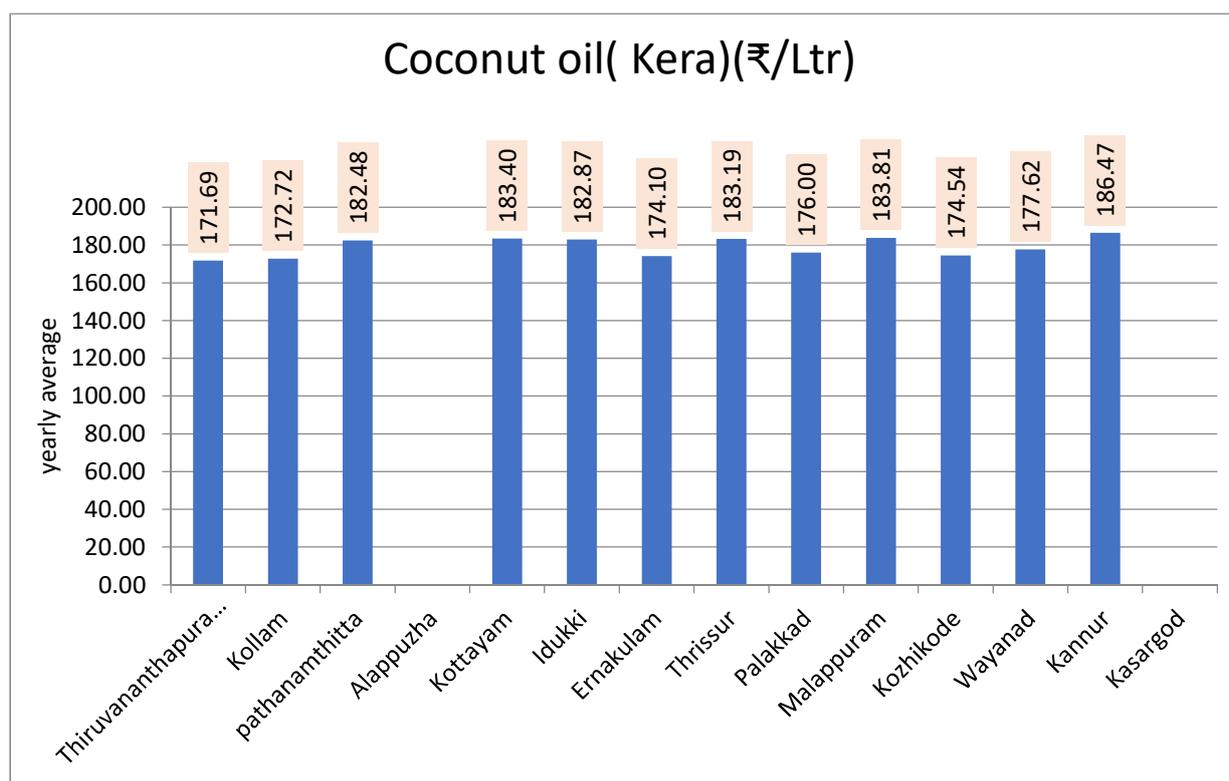

Table70- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Coconut oil(Kera)(₹/ltr)

In 2022, Kerala's coconut oil prices exhibited regional variations, with Kannur recording the highest yearly average (₹186.47/litre) and Ernakulam the lowest (₹174.10/litre). The state average stood at ₹179.07/litre, with prices peaking in January (₹201.5) and declining steadily to December (₹166.27). Northern districts (Kannur, Malappuram) consistently had higher prices, while central/southern regions (Thiruvananthapuram, Ernakulam) were more affordable. Pathanamthitta, Kottayam, and Idukki maintained mid-to-high rates, whereas Alappuzha and Kasaragod had no reported data. The trend suggests a gradual price drop post-monsoon, possibly linked to harvest cycles and market demand.

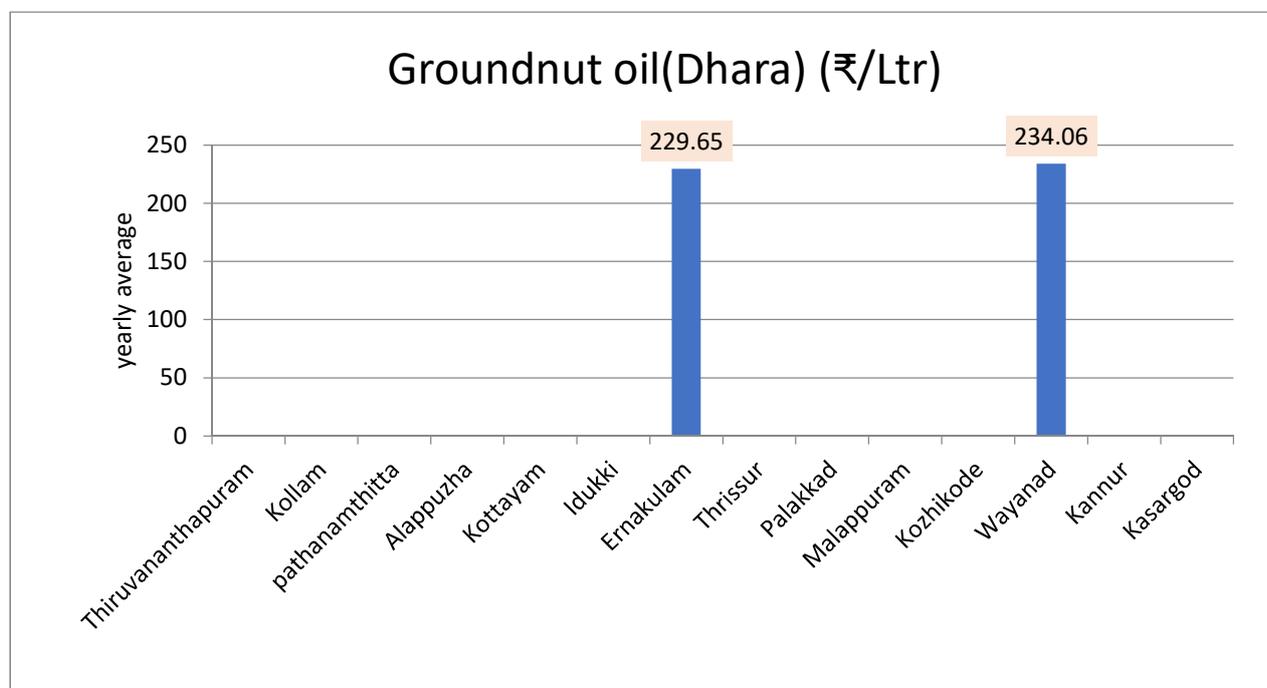

Table71- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Groundnut oil (Dhara) (₹/Ltr)

In 2022, the retail prices of Dhara groundnut oil (per litre) in Kerala showed significant variation across districts, with data available only for Ernakulam and Wayanad. Ernakulam's prices fluctuated between ₹220.00 and ₹241.00 monthly, averaging ₹229.65 annually, with the lowest prices from June to August and a peak in December. Wayanad recorded higher prices initially (₹245.00 from January to May) but saw a sharp drop to ₹220.00 from August onward, averaging ₹234.06 annually. The state average, calculated across all districts (including zeros for missing data), was significantly lower (₹31.43–₹34.64 monthly), averaging ₹33.12 annually. This discrepancy suggests that the state average was heavily skewed by districts with no reported prices (treated as ₹0), making it unreliable for comparison. Only Ernakulam and Wayanad provided consistent data, Ernakulam's moderate volatility and Wayanad's mid-year price decline. Other districts' absence of data limits broader analysis, highlighting gaps in price monitoring.

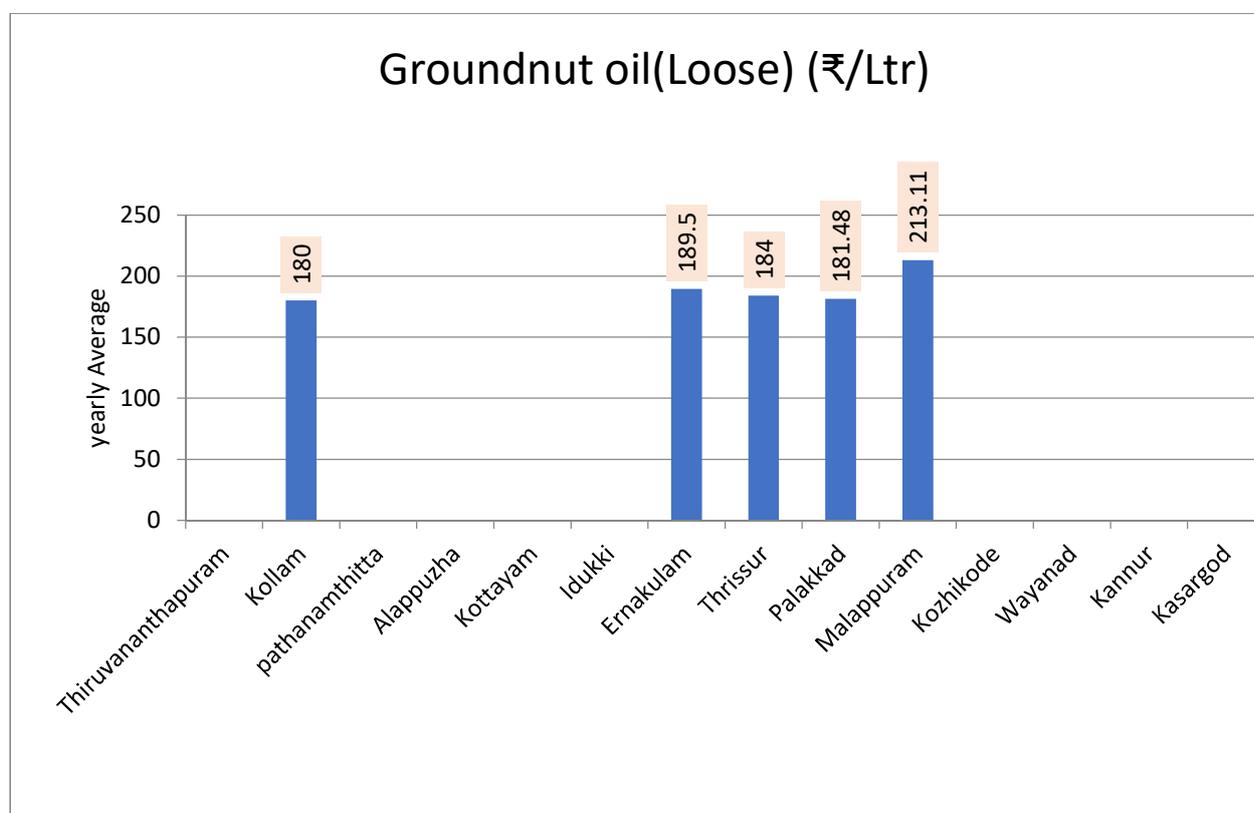

Table72- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Groundnut oil (Loose) (₹/Ltr)

The data provides the monthly and yearly average retail prices of Dhara brand groundnut oil (in INR per litre) across select districts in Kerala, with significant gaps in reporting. Only five districts—Kollam, Ernakulam, Thrissur, Palakkad, and Malappuram—have recorded prices, while the rest show no data (marked as zero). Malappuram reported the highest yearly average at INR 213.11, with prices peaking between April and October (INR 213.60–220.00). In contrast, Thrissur maintained a constant price of INR 184 throughout the year. Ernakulam and Palakkad showed moderate fluctuations, with Ernakulam averaging INR 189.50 and Palakkad INR 181.48. The state average appears unusually low (INR 67.72), which is inconsistent with district-level data, indicating possible errors in calculation or missing entries. The lack of data from most districts limits a comprehensive analysis, but available trends suggest regional price disparities. Malappuram’s consistently high prices could be due to transportation costs or local demand, while Thrissur’s stability may indicate regulated pricing. Further data collection from other districts is necessary for accurate insights into groundnut oil price trends across Kerala.

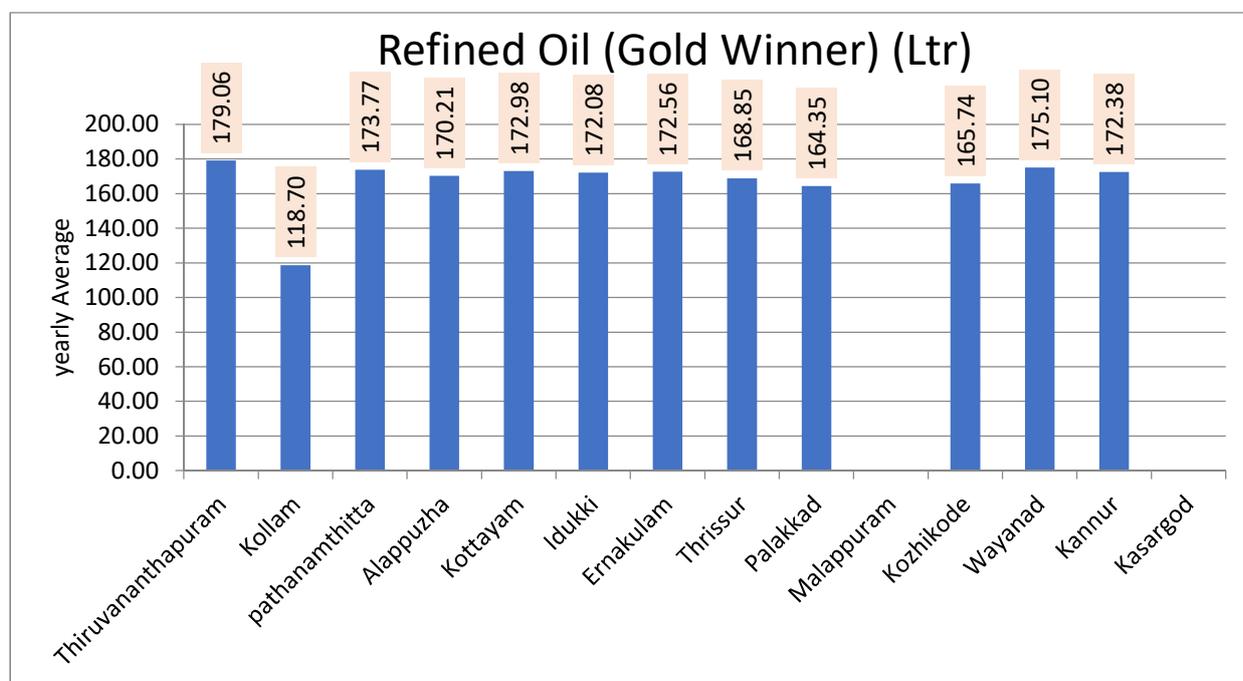

Table73- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Refined Oil (Gold Winner) (₹/Ltr)

Refined oil (Gold Winner) prices in Kerala during the year showed a pronounced upward movement from the beginning of the year, followed by a gradual softening in the later months. Most districts recorded relatively lower prices during January and February, after which prices increased sharply from March and peaked during April to June. Districts such as Pathanamthitta, Alappuzha, Kottayam, Idukki, Ernakulam, and Wayanad reported prices crossing ₹190 per kg during the mid-year period. Thiruvananthapuram showed a clear step-up from ₹165 per kg to ₹190 per kg from June onwards and remained stable at that level for the rest of the year. Towards the last quarter, prices eased across most districts, settling in the range of ₹150–₹170 per kg. Data was not available for Malappuram and Kasargod. At the state level, the average price rose from about ₹126 per kg in January to a peak of ₹162.86 per kg in May, before declining steadily to ₹127.41 per kg in October and ending at ₹140.30 per kg in December. The overall yearly average stood at ₹143.27 per kg, indicating significant mid-year volatility with partial correction towards the end of the year.

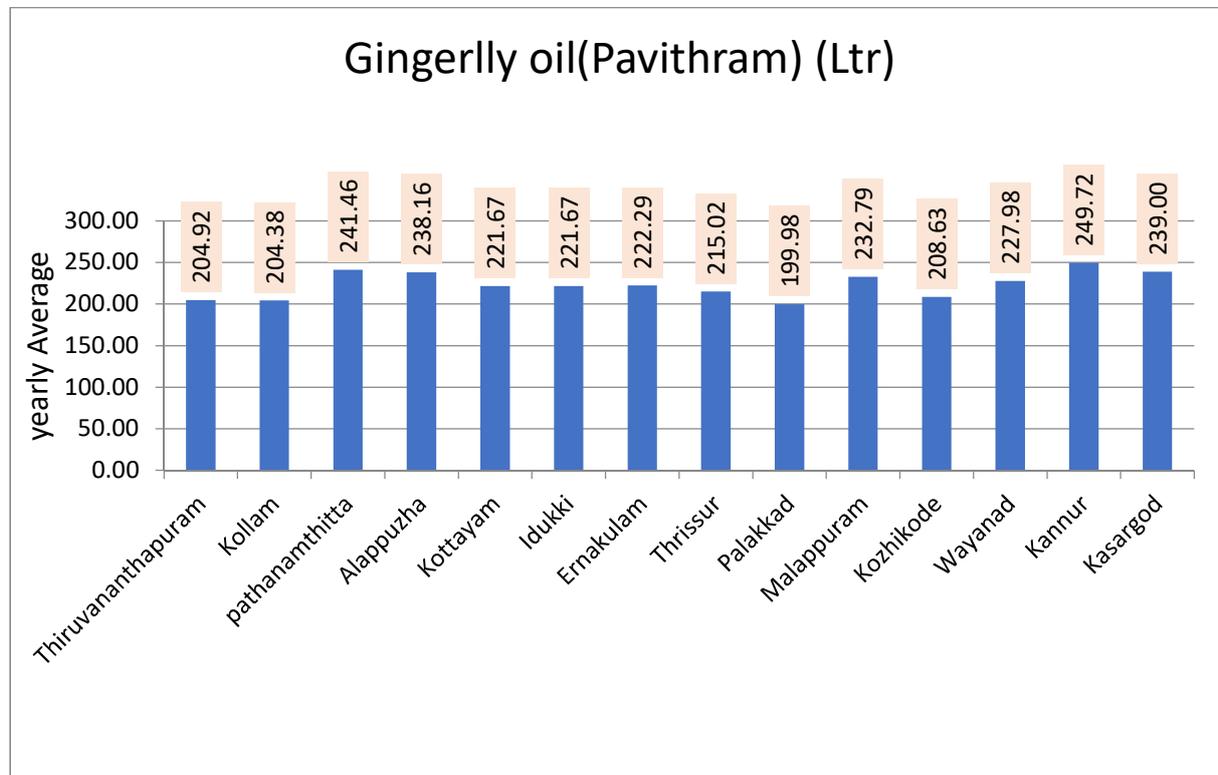

Table74- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Gingelly oil (Pavithram) (₹/Ltr)

In 2022, Pavithram gingelly oil prices in Kerala showed relative stability in most districts during the first half of the year, followed by moderate increases in the latter months. The highest annual average prices were recorded in Kannur (₹249.72) and Pathanamthitta (₹241.46), while Palakkad remained the most affordable at ₹199.98. Prices generally ranged between ₹190-250 across districts, with most areas maintaining consistent rates from January to June before gradual increases. Notable exceptions included Kollam, where prices surged sharply in November-December (reaching ₹245.60), and Ernakulam, which saw a mid-year dip before climbing to ₹240 from September onward. The state average of ₹223.40 reflects the overall stability, though regional variations were evident. Northern districts like Kannur and Wayanad tended to have higher prices compared to central regions. The data suggests gingelly oil maintained more consistent pricing compared to other edible oils, with seasonal fluctuations being less pronounced.

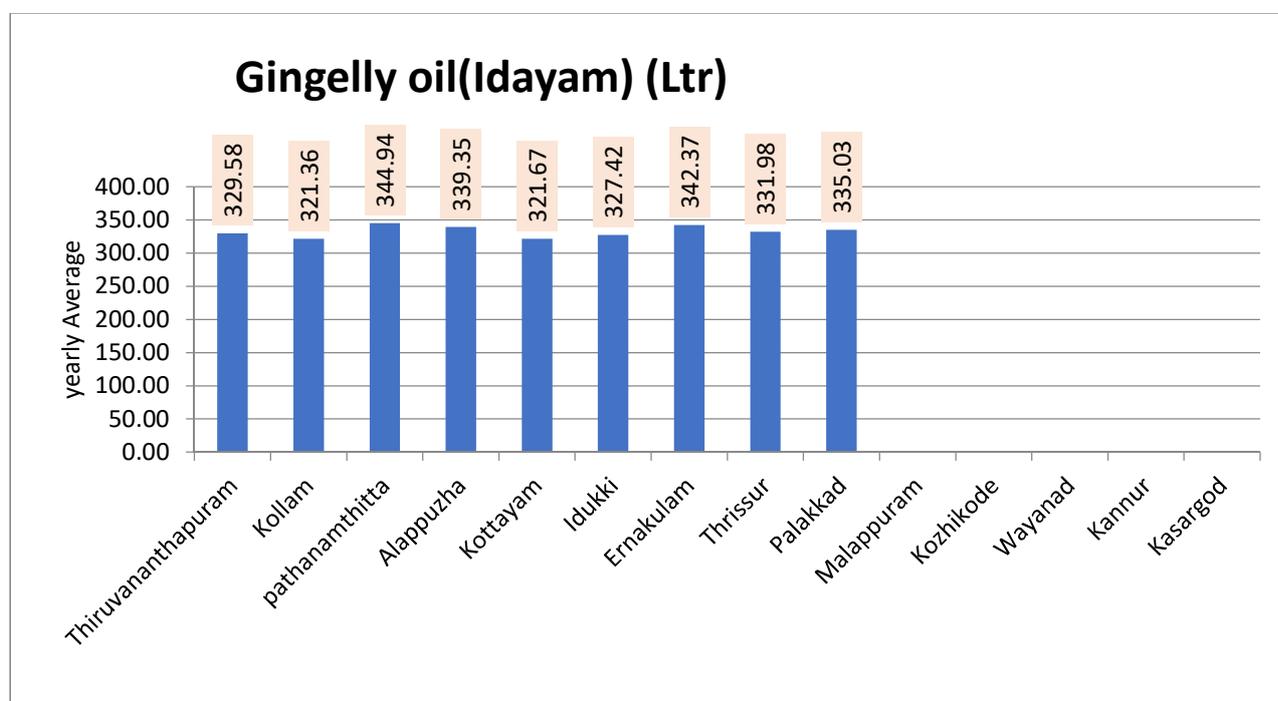

Table75- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Gingelly oil(Idayam) (₹/Ltr)

The retail prices of Idayam brand gingelly oil exhibited significant upward movement across Kerala during 2022, with most districts showing steady monthly increases throughout the year. The southern districts, particularly Thiruvananthapuram (₹329.58 average) and Kollam (₹321.36), maintained consistently high prices, while central districts like Ernakulam (₹342.37) and Thrissur (₹331.98) also saw substantial year-end increases. The state average of ₹332.63 masks considerable regional variations, with November and December showing the highest monthly averages (₹378.39 and ₹382.84 respectively). This upward trend suggests potential supply constraints or increased demand pressures affecting this premium edible oil product throughout 2022.

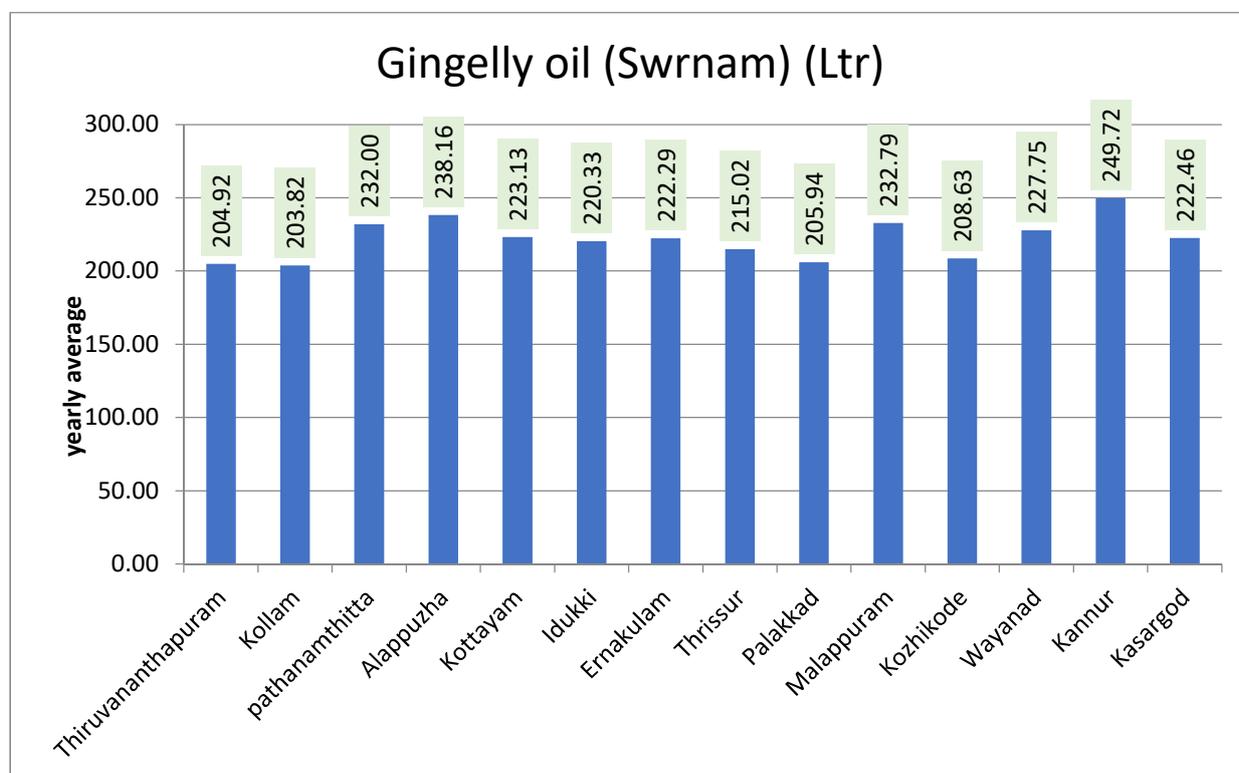

Table76- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Gingelly oil (Swrnam) (₹/Ltr)

Gingelly oil (Swarnam) prices in Kerala remained generally high and stable throughout the year, with moderate inter-district variation and a slight upward trend towards the later months. Thiruvananthapuram recorded relatively stable prices in the range of ₹200–₹210 per litre, resulting in a yearly average of ₹204.92. Pathanamthitta maintained a uniform and high price of ₹232 per litre throughout the year, while Kannur reported the highest prices among all districts, steadily rising from ₹240 per litre to around ₹259.40 by December, yielding a high annual average of ₹249.72. Districts such as Alappuzha, Malappuram, Wayanad, and Ernakulam also remained at higher price levels, particularly during the second half of the year. Kollam showed noticeable volatility, with a sharp increase during November and December. At the state level, the average price gradually increased from ₹218.13 per litre in January to ₹227.63 per litre in December, resulting in an overall yearly average of ₹221.92 per litre, indicating a firm price trend for gingelly oil during the year.

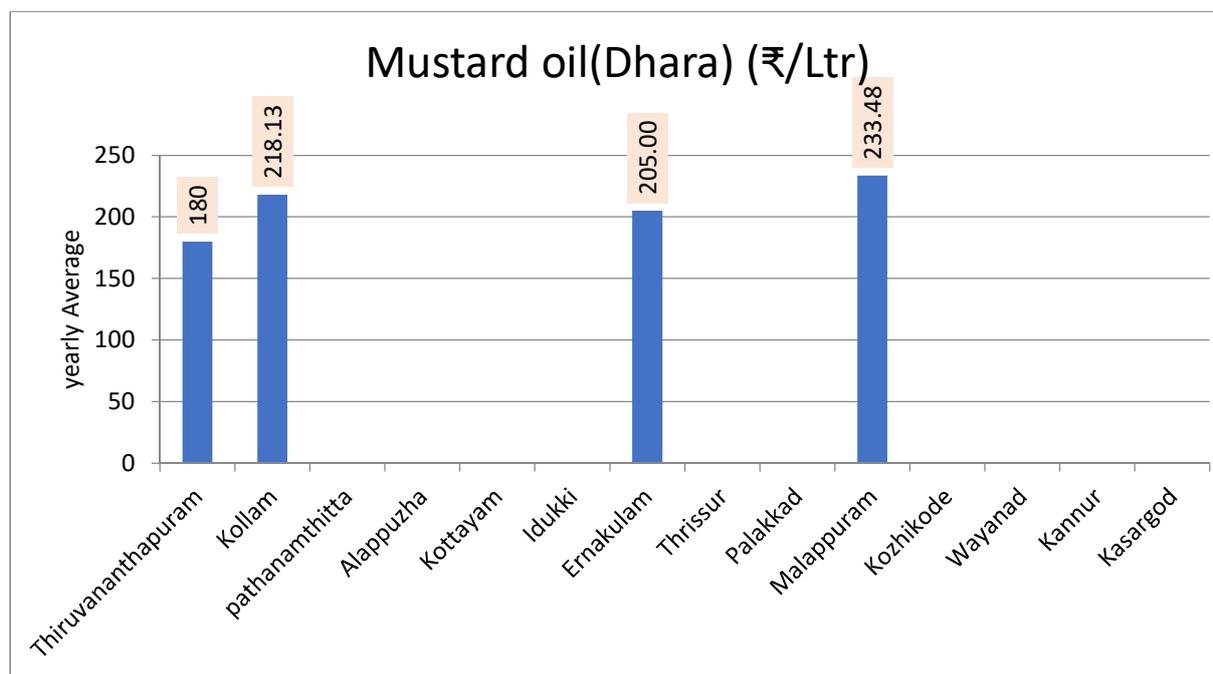

Table77- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Mustard oil (Dhara) (₹/Ltr)

The 2022 data reveals extremely limited availability of Dhara mustard oil across Kerala, with only Thiruvananthapuram, Kollam, Malappuram, and Ernakulam reporting partial data. This suggests either very low market penetration or significant underreporting in most districts. Thiruvananthapuram maintained an unchanging price of ₹180/litre throughout the year, Malappuram showed near-uniform pricing at ₹235 for 10 months, with a slight December dip to ₹223 (annual avg: ₹233.48). Kollam reported only November-December prices (₹216-220), while Ernakulam had just December data (₹205). The state average (₹209.15) is unreliable as it incorporates zeros for non-reporting districts. The complete absence of data from 10 districts suggests this product either had very limited distribution or was not commonly tracked in Kerala's edible oil market. Where available, prices remained remarkably stable, unlike the fluctuations seen in other oil categories.

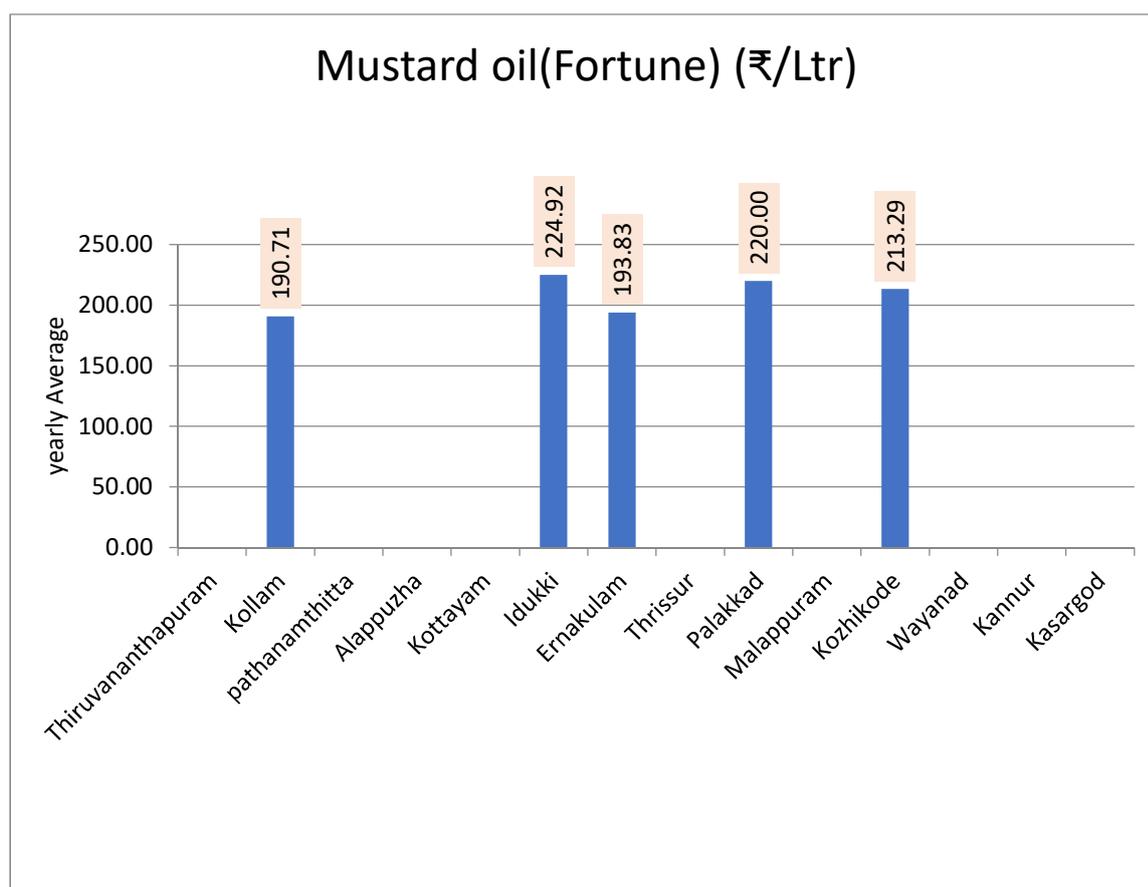

Table 78- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Mustard oil (Fortune) (₹/Ltr)

Fortune mustard oil displayed limited market presence with significant regional price variations across Kerala in 2022. The available data reveals three distinct pricing patterns. Idukki maintained the highest prices (₹225 for first half) with a notable 11% increase to ₹240 during September-October festival season, Kozhikode showed stable but elevated pricing, gradually declining from ₹227.50 to ₹210. Ernakulam experienced dramatic fluctuations, plunging 27% from ₹205 to ₹161 between January-April before recovering to ₹215 by year-end.

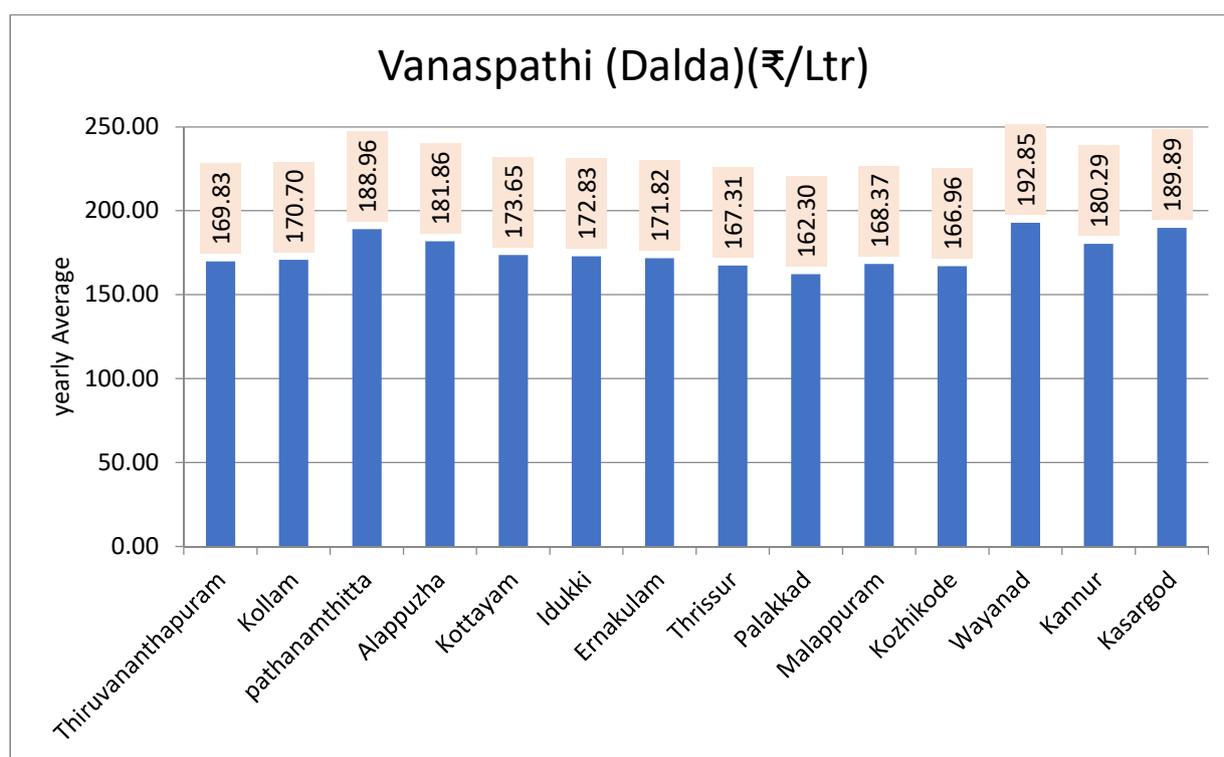

Table 79- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Vanaspathi (Dalda)(₹/ Ltr

Dalda vanaspathi exhibited consistent inflationary trends across Kerala in 2022, with all districts showing substantial price increases during the first half of the year followed by moderate corrections. The mountainous district of Wayanad recorded the highest annual average (₹192.85), while Palakkad remained the most affordable (₹162.30). Universal price increases of 15-25% between January-June. Peak prices reached in June (state average ₹194). Wayanad and Kasaragod showed most dramatic surges (24-31%). The state average of ₹175.54 reflects the overall inflationary trend, though masking significant regional disparities. The 22% difference between highest (Wayanad) and lowest (Palakkad) annual averages highlights the impact of: Transportation costs to highland areas, Regional demand variations, Local supply chain efficiencies, possible differences in distribution networks.

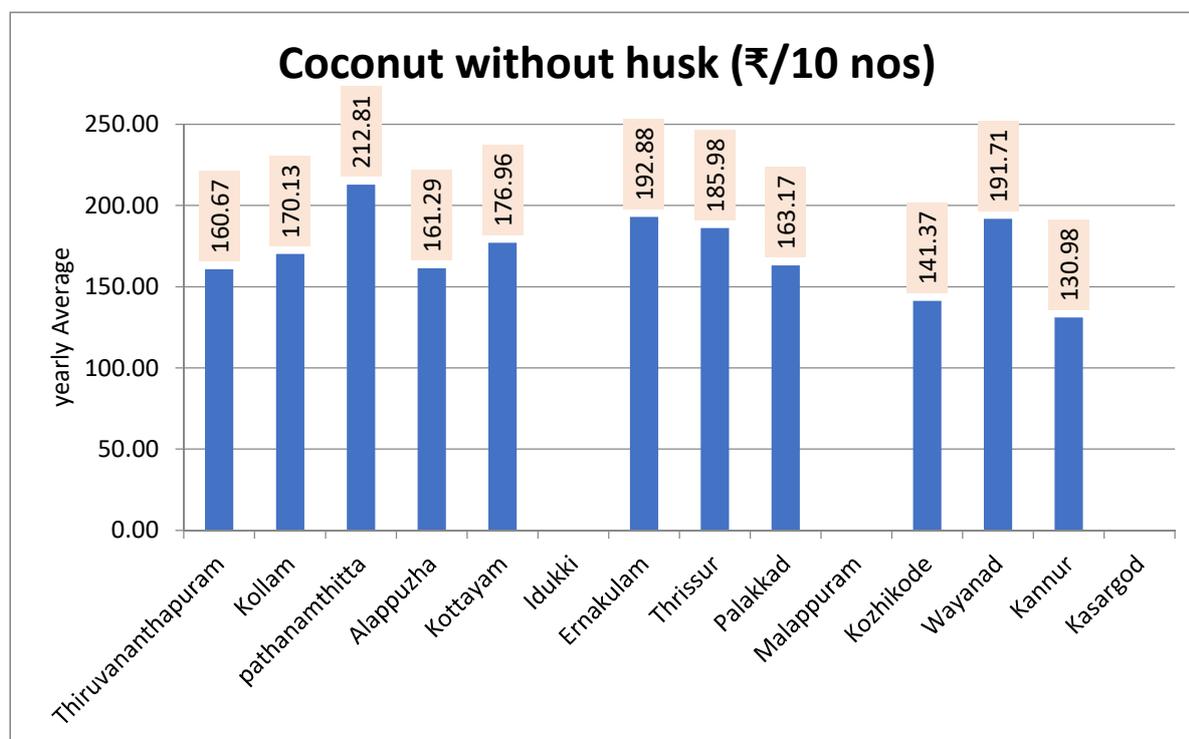

Table80- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Coconut without husk (₹/10 nos)

Prices of coconuts without husk (10 numbers) in Kerala showed noticeable seasonal variation during the year, with higher levels in the initial months, a sharp decline during the mid-year period, and a partial recovery towards the end of the year. Most districts recorded comparatively high prices from January to March, with Pathanamthitta, Ernakulam, Thrissur, and Wayanad remaining consistently above the state average. A significant fall in prices was observed from May to July across almost all reporting districts, reaching the lowest levels during July to September, particularly in Kozhikode, Kannur, and Palakkad. Prices began to recover gradually from October onwards, with Thiruvananthapuram and Kollam showing a notable rise in December. Data was not available for Idukki, Malappuram, and Kasargod. At the state level, the average price declined from ₹146.71 in January to around ₹126.61 in July, before improving to ₹135.91 in December, resulting in an overall yearly average of ₹134.85, indicating clear mid-year softness followed by year-end recovery in coconut prices.

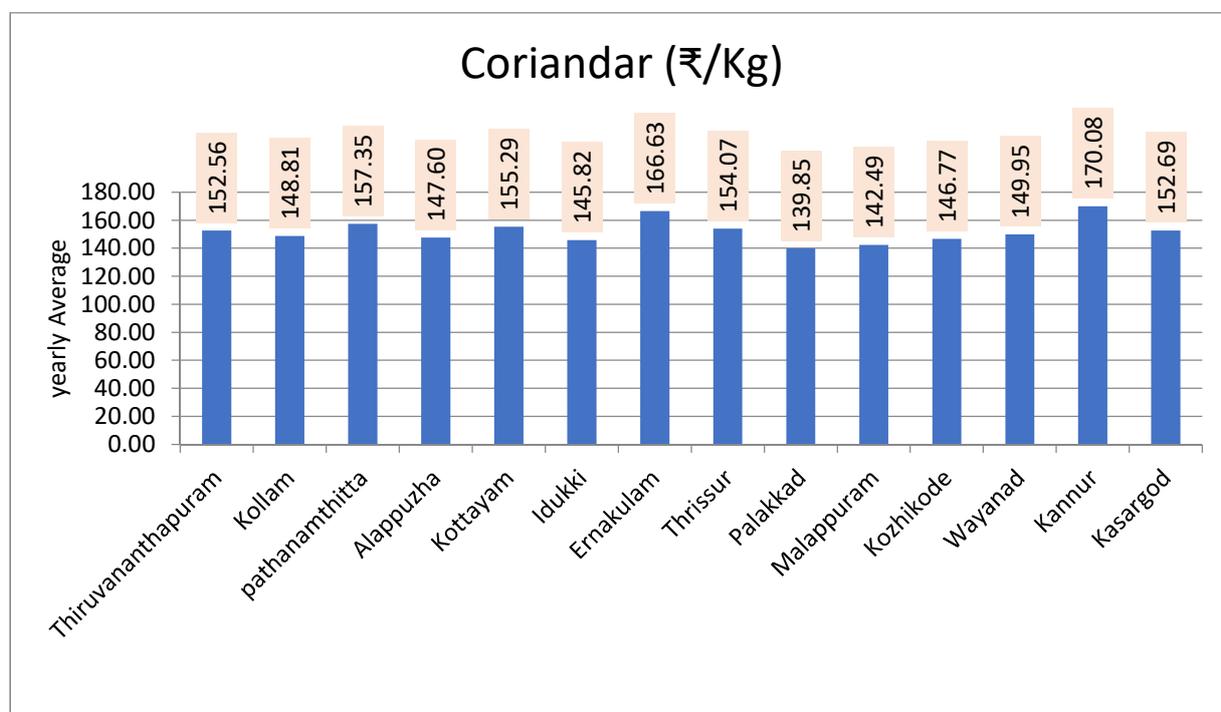

Table81- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Coriandar (₹/Kg)

Coriander prices in Kerala showed a steady upward trend from the beginning of the year, followed by relative stability and a mild easing towards the end. Most districts recorded lower prices during January and February, after which prices increased sharply from March and peaked between May and September. Ernakulam, Kannur, and Kottayam consistently reported higher price levels, with prices touching ₹180 per kg during the mid-year months. Districts such as Palakkad and Alappuzha remained comparatively lower but followed a similar rising pattern. From October onwards, a slight decline was observed across most districts, though prices largely remained above early-year levels. At the state level, the average price rose from ₹119.45 per kg in January to a peak of about ₹164.36 per kg in September, before easing to ₹156.31 per kg in December, resulting in an overall yearly average of ₹152.14 per kg. This trend indicates strong price firmness for coriander during the middle of the year with moderate softening towards the year-end.

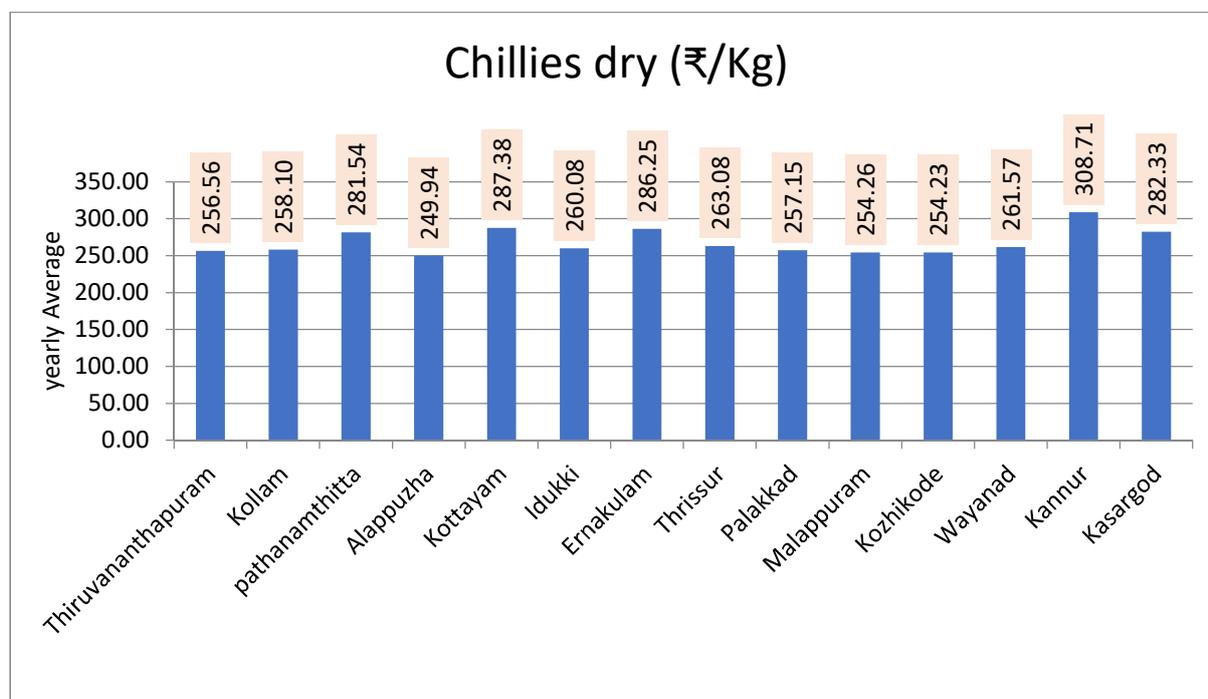

Table82- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Chillies dry (₹/Kg)

Dry chilli prices in Kerala exhibited a strong and sustained upward trend throughout the year, with sharp increases during the second half. Prices across all districts rose steadily from January to June and accelerated significantly from July onwards, reaching peak levels during September to November. Districts such as Kannur, Pathanamthitta, Ernakulam, and Kottayam recorded particularly high prices, with Kannur reaching a peak of ₹372.50 per kg in November and maintaining the highest annual average of ₹308.71 per kg. Thiruvananthapuram and Kollam also showed pronounced increases, crossing ₹300 per kg during the last quarter of the year. Although minor softening was observed in a few districts during October, prices remained well above early-year levels. At the state level, the average price increased consistently from ₹206.34 per kg in January to ₹329.05 per kg in November, before marginally easing to ₹326.69 in December. The overall yearly average stood at ₹268.66 per kg, indicating significant price pressure and strong market firmness for dry chillies during the year.

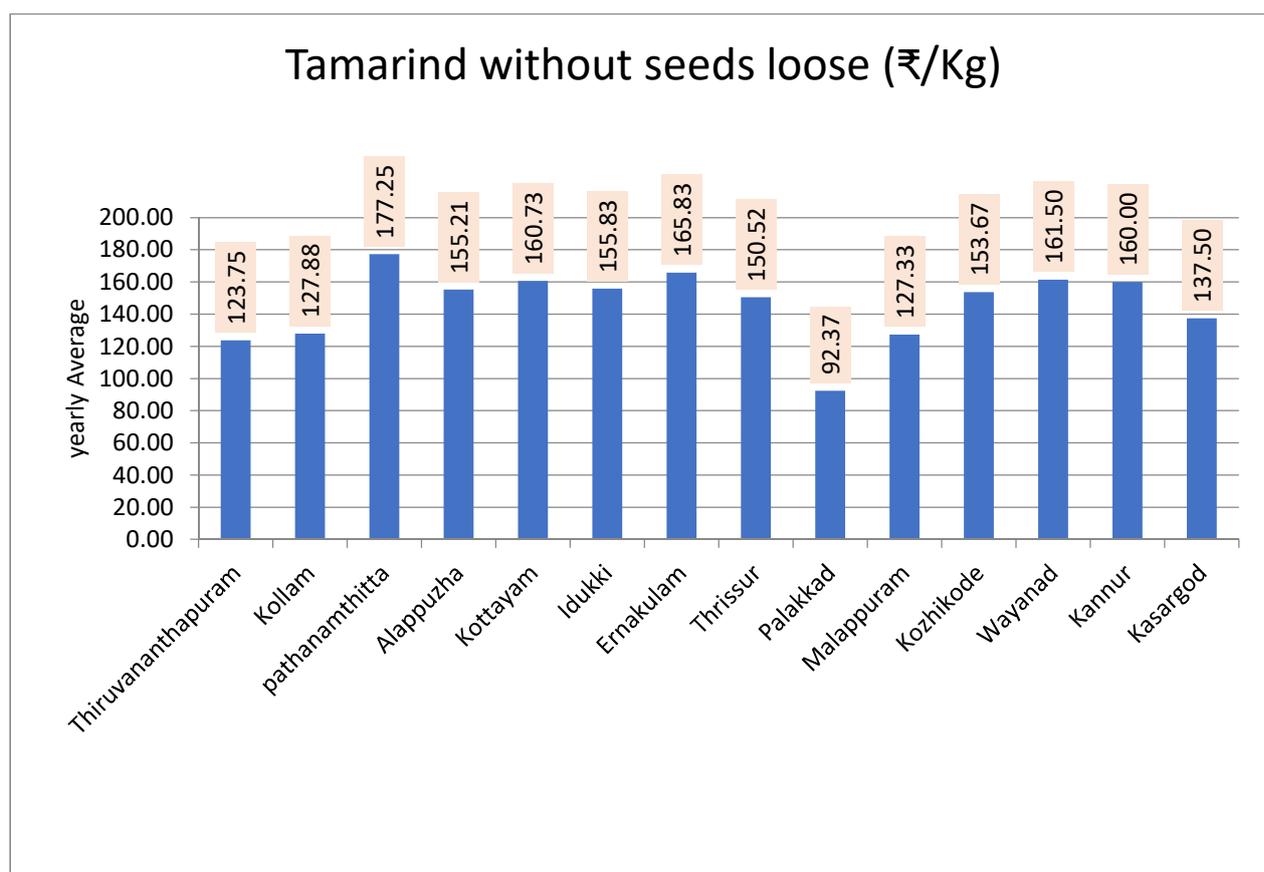

Table83- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Tamarind without seeds loose (₹/Kg)

During the year, the retail price of tamarind without seeds loose (100 g) in Kerala showed a steady upward trend. The state average price increased from ₹28.84 in January to ₹36.59 in December, with a yearly average of ₹32.81. Prices remained relatively low and stable during the first quarter, followed by a gradual increase from April onwards. A sharper rise was observed from July to November. District-wise analysis shows that Kannur recorded the highest yearly average price (₹37.33), followed by Ernakulam (₹36.21) and Pathanamthitta (₹35.34), while Palakkad (₹30.09) and Thiruvananthapuram (₹31.98) reported comparatively lower averages. Overall, the data indicates that tamarind prices strengthened consistently across the state, particularly during the second half of the year.

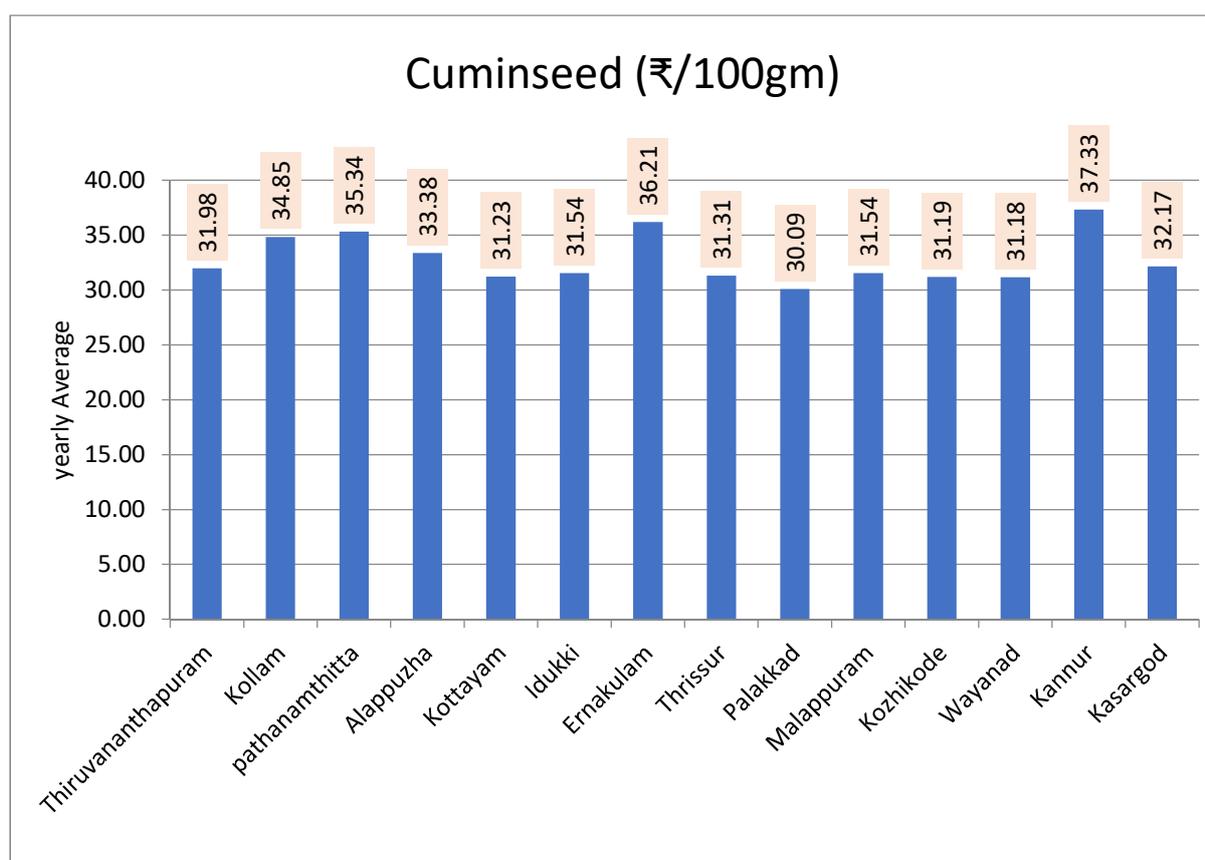

Table84- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Cuminseed (₹/100gm)

The data presents the monthly and yearly average prices of cuminseed (per 100g) across Kerala's districts, along with the state average. Prices show a gradual upward trend throughout the year, starting lower in the first half (January–June) and peaking in the latter months (October–December). Ernakulam (₹36.21), Kannur (₹37.33), and Pathanamthitta (₹35.34) record the highest yearly averages, while Palakkad (₹30.09) and Thiruvananthapuram (₹31.98) remain on the lower end. Notably, districts like Alappuzha and Ernakulam experience sharp mid-year price surges. The state average stands at ₹32.81, with northern and central districts generally maintaining higher rates compared to southern regions.

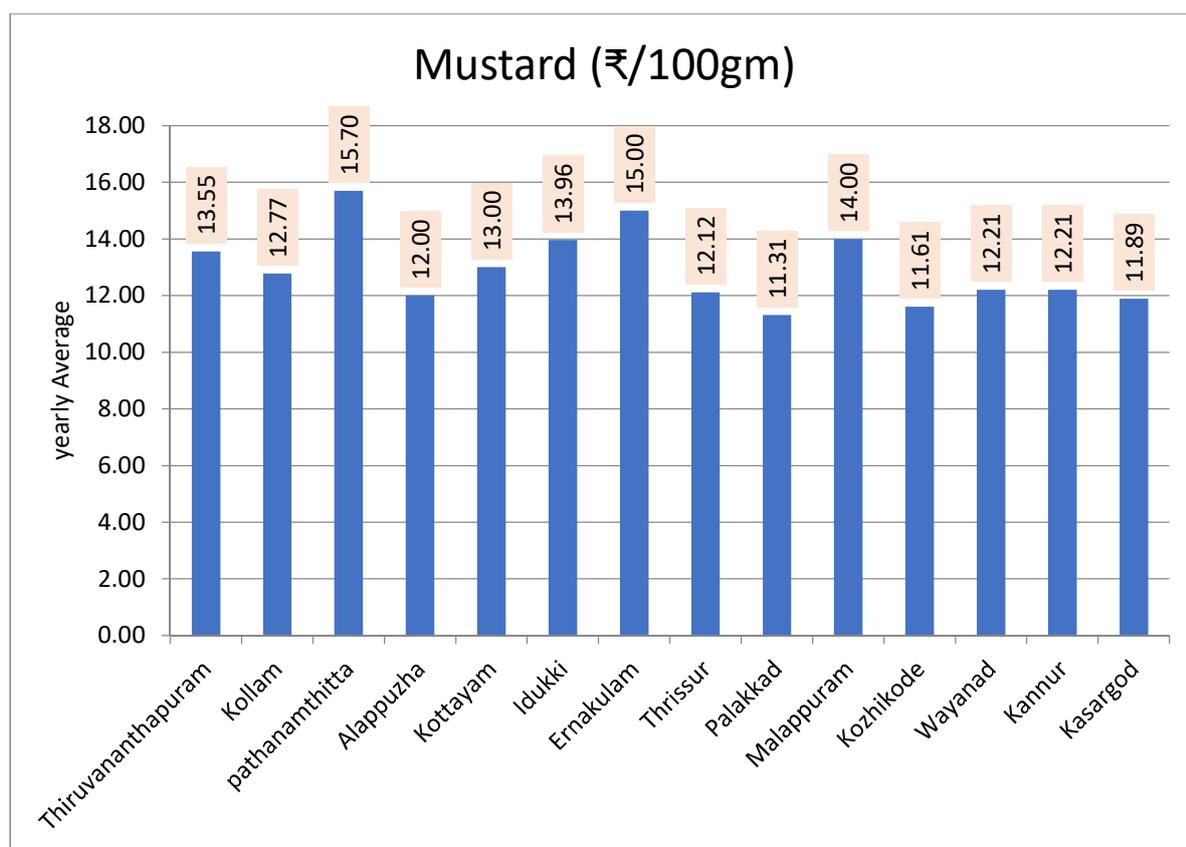

Table85- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Mustard (₹/100gm)

During the year, the retail price of methy (fenugreek) priced per 100 g in Kerala showed moderate fluctuations with an overall stable trend. The state average price ranged from ₹12.46 in February to a peak of ₹13.52 in November, with a yearly average of ₹12.89. Prices were relatively stable during the first half of the year, followed by a slight increase during the post-monsoon months, particularly from October to November. District-wise analysis reveals that Pathanamthitta recorded the highest yearly average price (₹15.72), followed by Ernakulam (₹15.00) and Malappuram (₹14.00), while Palakkad (₹11.07) and Kannur (₹11.50) reported comparatively lower averages. Overall, methy prices across the state remained largely steady with minor seasonal variations, reflecting balanced supply conditions throughout the year.

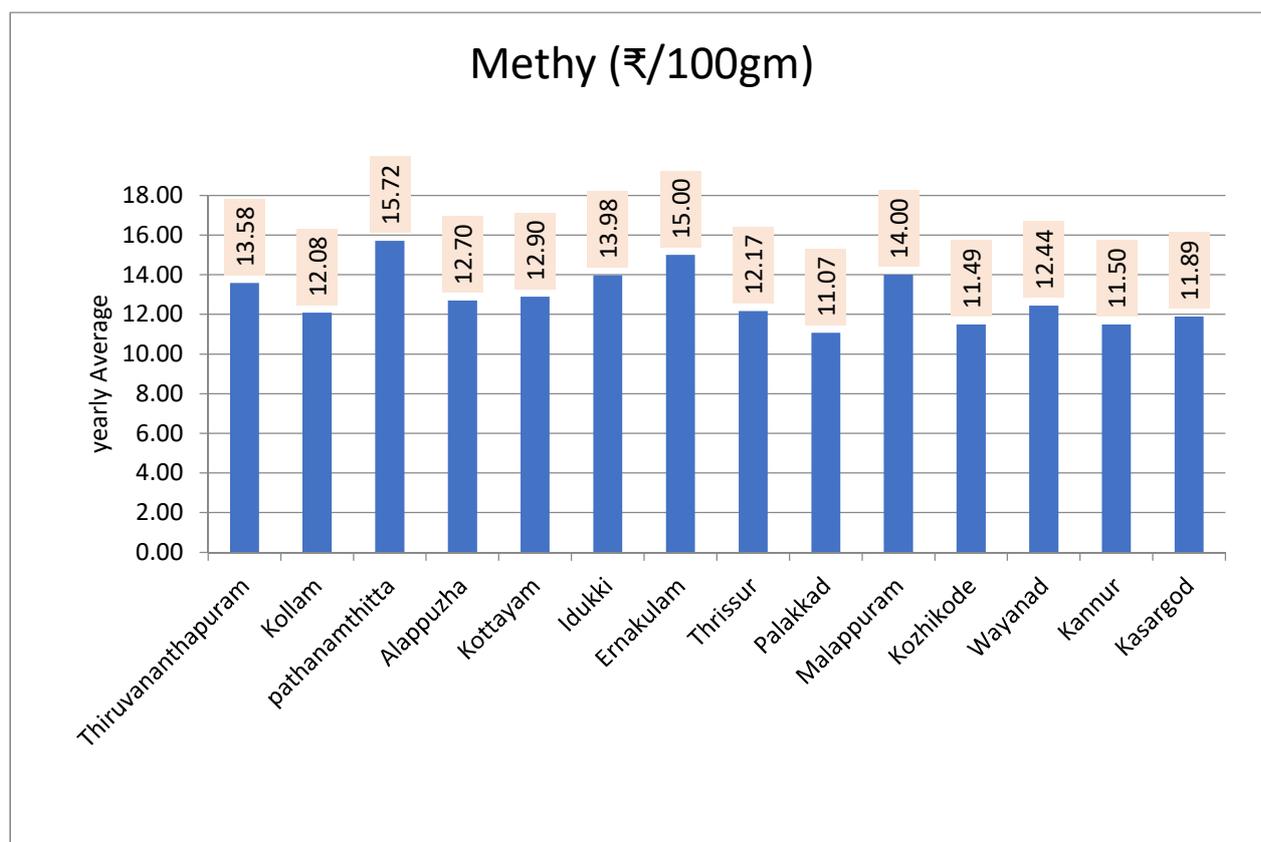

Table 86- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Methy (₹/100gm)

During the year, the retail price of methy (fenugreek) priced per 100 g in Kerala showed moderate fluctuations with an overall stable trend. The state average price ranged from ₹12.46 in February to a peak of ₹13.52 in November, with a yearly average of ₹12.89. Prices were relatively stable during the first half of the year, followed by a slight increase during the post-monsoon months, particularly from October to November. District-wise analysis reveals that Pathanamthitta recorded the highest yearly average price (₹15.72), followed by Ernakulam (₹15.00) and Malappuram (₹14.00), while Palakkad (₹11.07) and Kannur (₹11.50) reported comparatively lower averages.

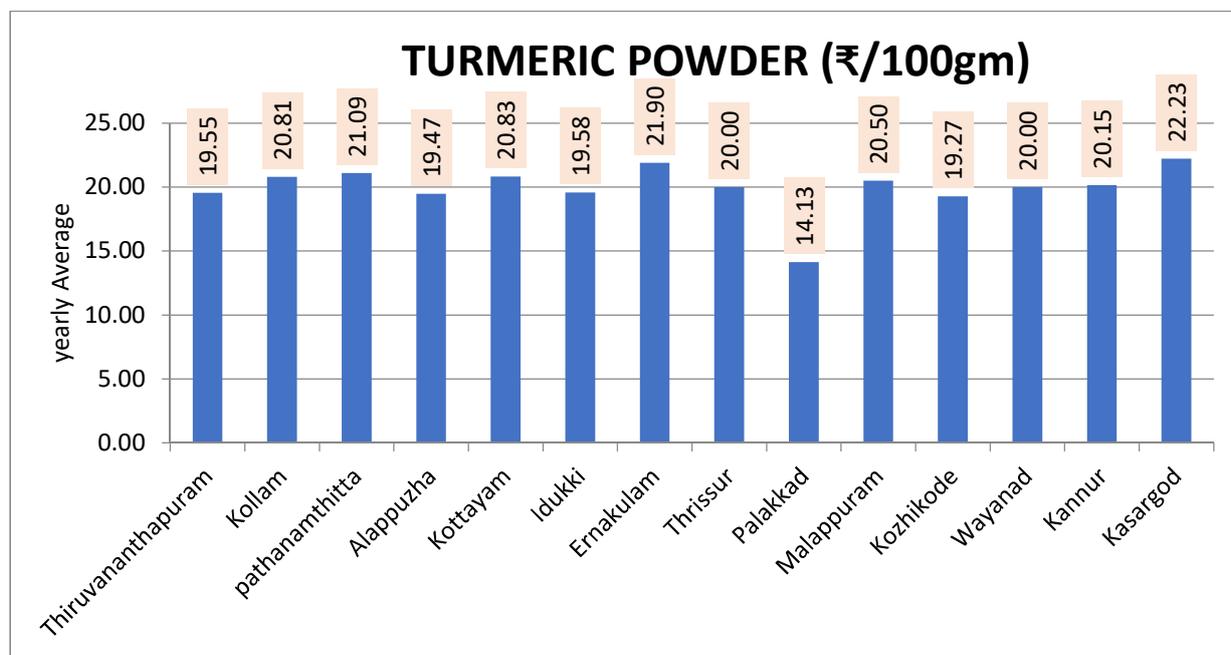

Table87- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Turmeric (Powder) (₹/100gm)

The data reveals the monthly and yearly average prices of turmeric powder across Kerala, with the state average standing at ₹19.96 per 100g. Prices show a gradual upward trend throughout the year, starting lower in the first quarter (January–March) and peaking in the latter months (August–December). Kasaragod (₹22.23), Pathanamthitta (₹21.09), and Ernakulam (₹21.90) record the highest yearly averages, while Palakkad (₹14.13) remains the most affordable district a significant ₹8.10 cheaper than Kasaragod. Notably, most districts experience price stability from mid-year onward, with only minor fluctuations. Seasonal patterns are observable, with prices rising post-monsoon (July onwards). Districts like Malappuram and Kottayam show sharper mid-year increases. In contrast, Thrissur and Wayanad maintain perfectly stable prices at ₹20.00 year-round, indicating tightly regulated markets. The data highlights how northern and central districts (e.g., Kasaragod, Ernakulam) generally sustain higher turmeric prices compared to southern regions, useful for traders optimizing procurement strategies. Policymakers could use this information to address regional price gaps through improved distribution networks or storage facilities in high-cost areas.

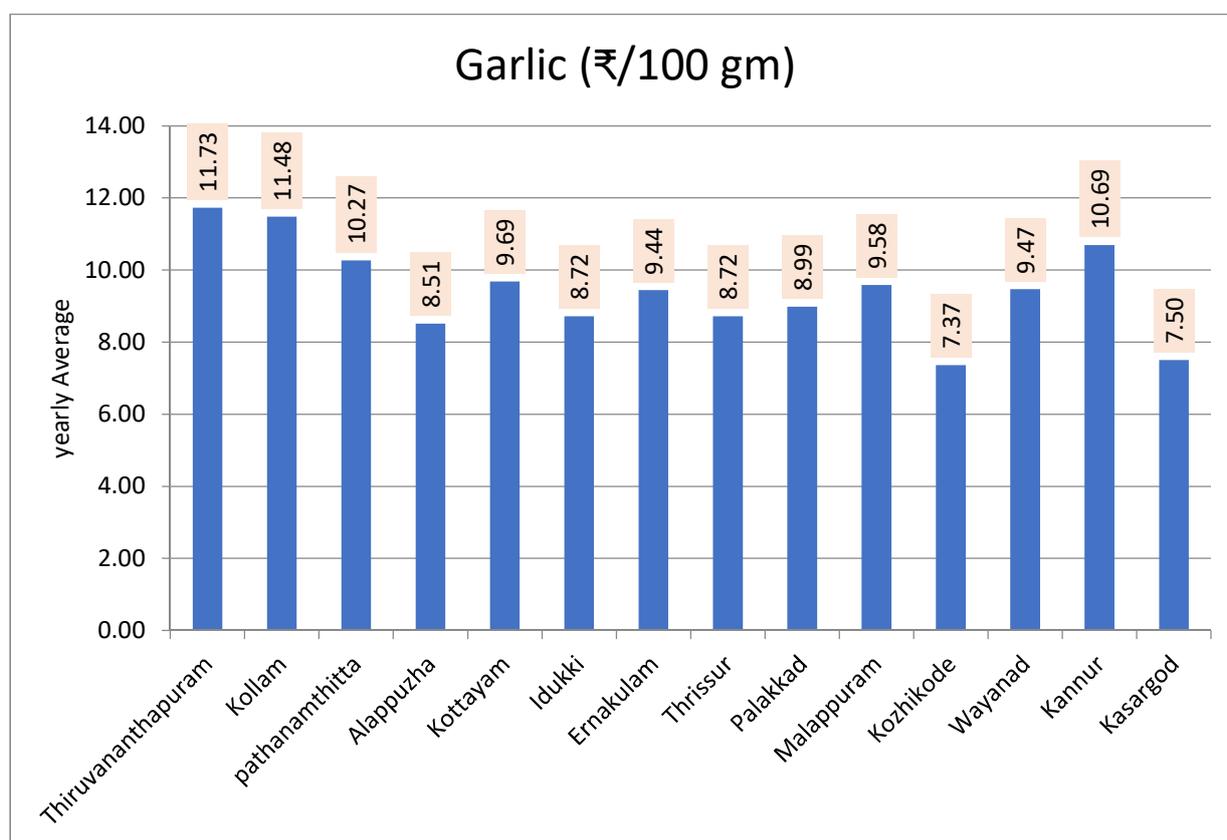

Table88- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Garlic (₹/100 gm)

Garlic prices (100 gm) in Kerala exhibited noticeable variation across districts during the year, with the state average price recorded at ₹9.44. Prices were relatively high in the first quarter, reaching a peak in March (₹10.68), and then showed a gradual decline from April onwards, touching the lowest level in October (₹8.13). Among the districts, Thiruvananthapuram, Kollam, and Kannur reported higher average prices, while Kozhikode, Kasargod, and Alappuzha recorded comparatively lower rates throughout the year. A mild recovery in prices was observed during November and December. Overall, garlic prices remained fairly stable with moderate fluctuations, reflecting balanced supply conditions across the state.

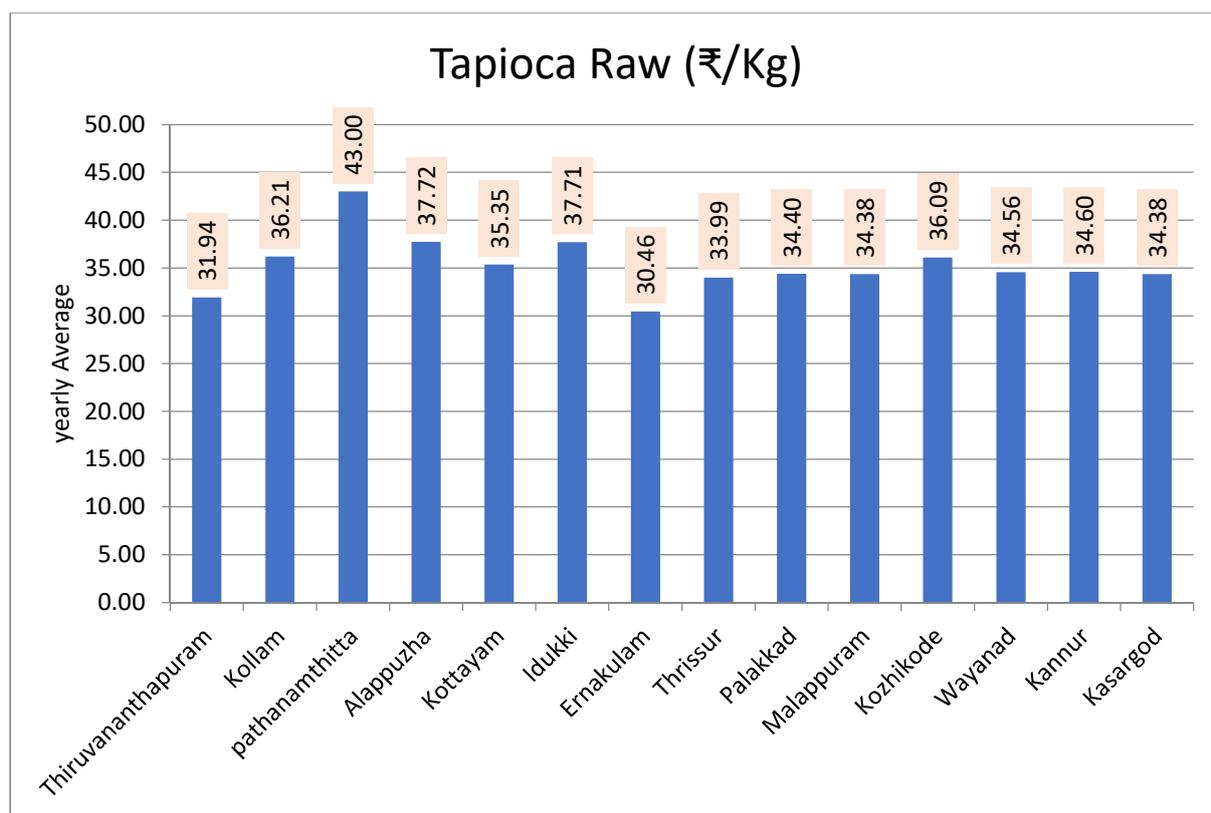

Table89- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Tapioca Raw (₹/Kg)

Tapioca (raw) prices per kilogram in Kerala showed a strong upward trend during the year, with the state average price recorded at ₹35.34. Prices were relatively low during the first quarter, averaging ₹23.64 in January, and then increased steadily from April onwards, reaching a peak in September (₹45.24) before showing a slight decline in the last quarter. District-wise, Pathanamthitta, Alappuzha, and Idukki recorded comparatively higher annual average prices, while Thiruvananthapuram and Ernakulam reported lower averages. Overall, tapioca prices remained elevated in the second half of the year despite a modest softening towards December.

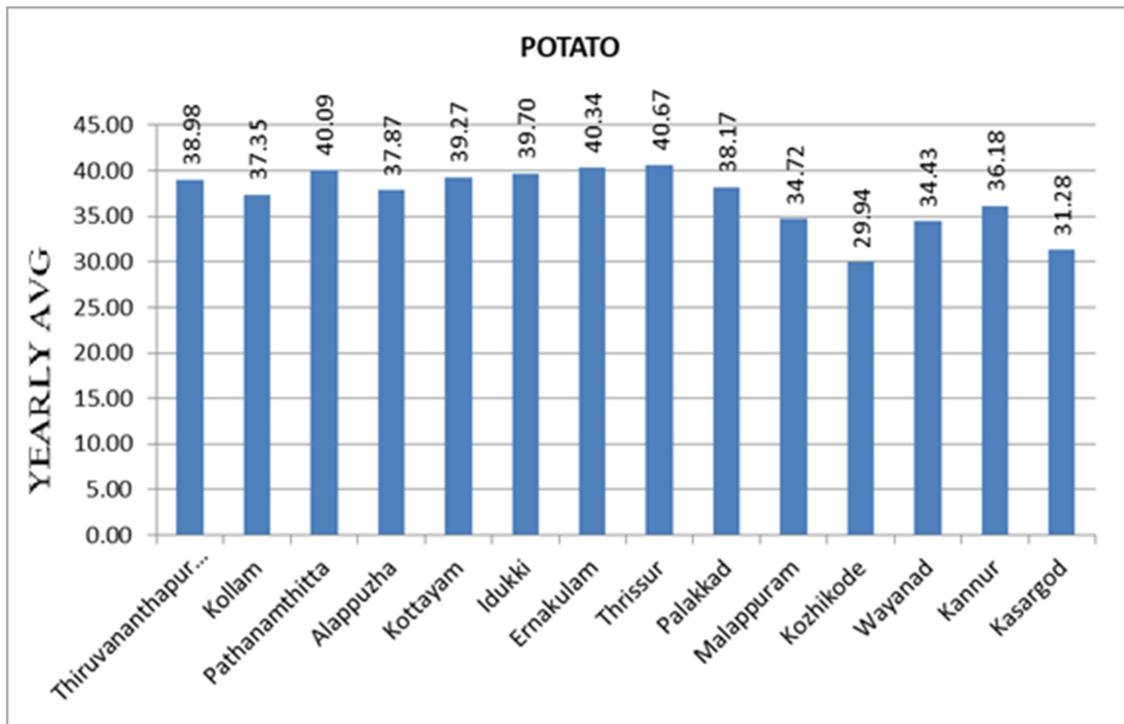

Table 90- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

POTATO(₹/Kg)

The price analysis of potatoes across Kerala districts shows moderate fluctuations, with prices ranging from ₹29.94/kg in Kozhikode (lowest) to ₹40.67/kg in Thrissur (highest). Central and southern districts like Thrissur (₹40.67), Ernakulam (₹40.34), and Pathanamthitta (₹40.09) show consistently higher prices, likely due to transportation costs or strong urban demand. In contrast, northern districts such as Kozhikode (₹29.94), Kasaragod (₹31.28), and Malappuram (₹34.72) have lower averages. The ₹10.73/kg price gap suggests regional disparities, though most districts fall within a narrow band of ₹34-40/kg, indicating relatively stable potato prices state wide. The significantly lower prices in Kozhikode (26% cheaper than Thrissur) warrant further study into local market dynamics. Overall, potato prices in Kerala remain fairly consistent, with minor fluctuations reflecting logistical and demand-based differences across regions.

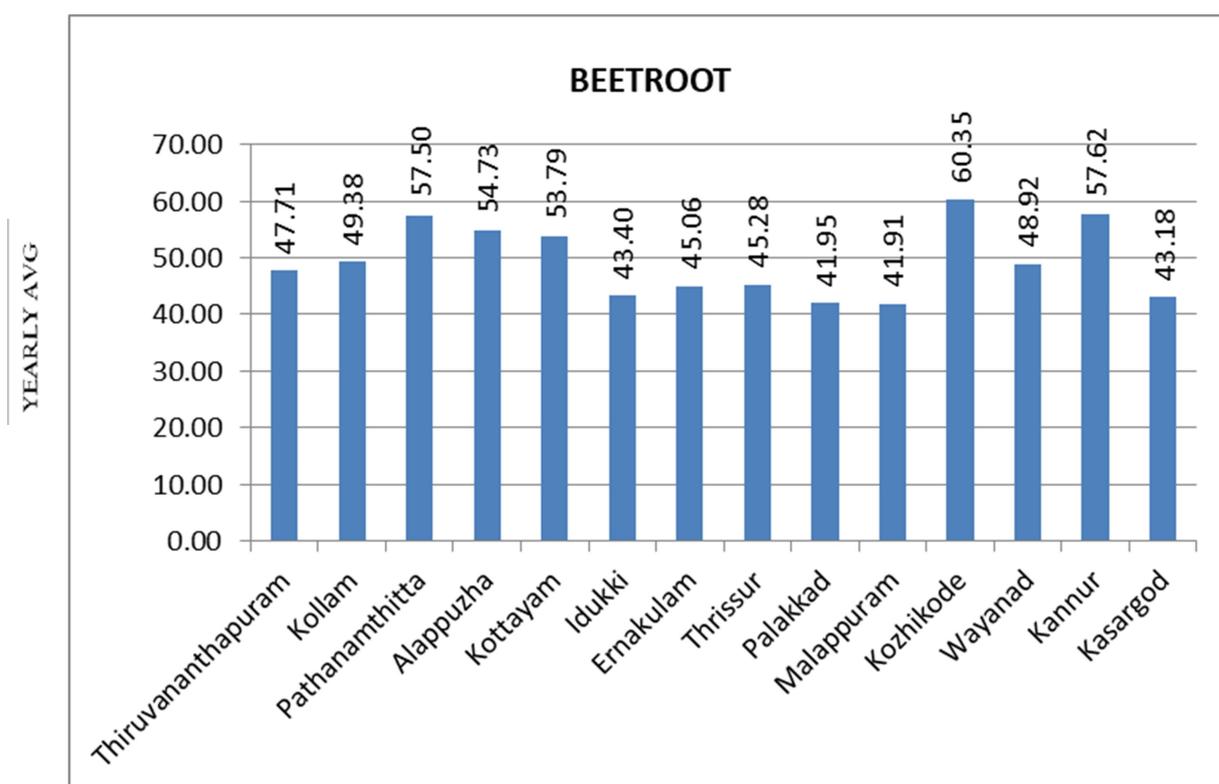

Table92- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

BEETROOT(₹/Kg)

The price analysis of beetroot across Kerala districts reveals significant fluctuations, with Kozhikode recording the highest yearly average at ₹60.35/kg, followed by Pathanamthitta (₹57.50/kg) and Kannur (₹57.62/kg). In contrast, Malappuram has the lowest price at ₹41.91/kg, with nearby districts like Idukki (₹43.40/kg) and Kasaragod (₹43.18/kg) also at the lower end. The ₹18.44/kg price gap between the highest and lowest districts suggests notable regional disparities; Kozhikode's unusually high price (43% higher than Malappuram) stands out compared to other northern districts. Central and southern regions like Alappuzha (₹54.73/kg) and Kottayam (₹53.79/kg) maintain mid-range prices. The variation highlights the need for further study into cultivation patterns, market accessibility, and seasonal factors affecting beetroot pricing across Kerala.

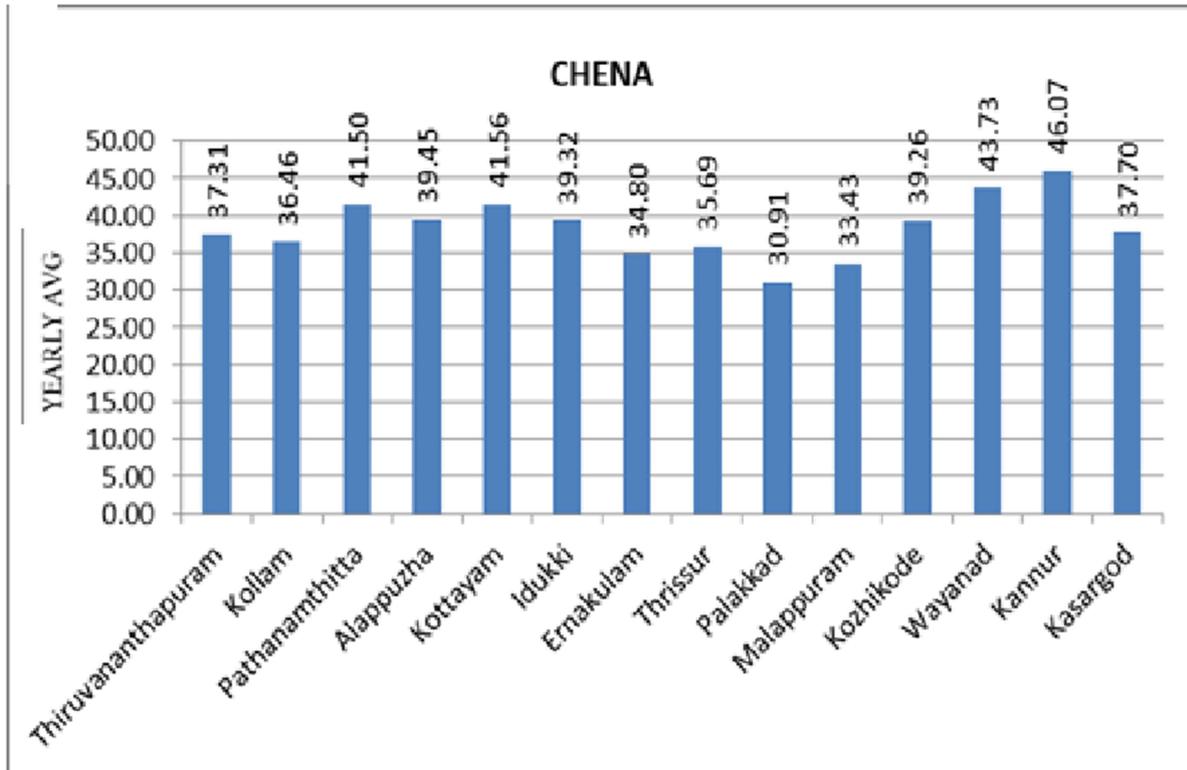

Table93- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

CHENA(₹/Kg)

The price analysis of Chena (Yam) across Kerala districts reveals significant regional variations, with Kannur recording the highest yearly average price at ₹46.07/kg, followed by Wayanad (₹43.73/kg) and Kottayam (₹41.56/kg). In contrast, District (unspecified) shows the lowest price at ₹30.91/kg, with Ernakulam (₹34.80/kg) and Malappuram (₹33.43/kg) also among the most affordable markets. The ₹15.16/kg difference between the highest and lowest prices suggests notable fluctuations influenced by factors like transportation costs, local demand, and supply availability. Northern districts (Kannur, Wayanad, Kasaragod) generally exhibit higher prices, while central and southern regions (Ernakulam, Thrissur, Thiruvananthapuram) maintain moderate rates. The particularly low price in District (₹30.91/kg). These variations highlight the impact of regional agricultural patterns and market accessibility on yam pricing across Kerala. Further analysis of seasonal trends and cultivation data could provide deeper insights into these fluctuations.

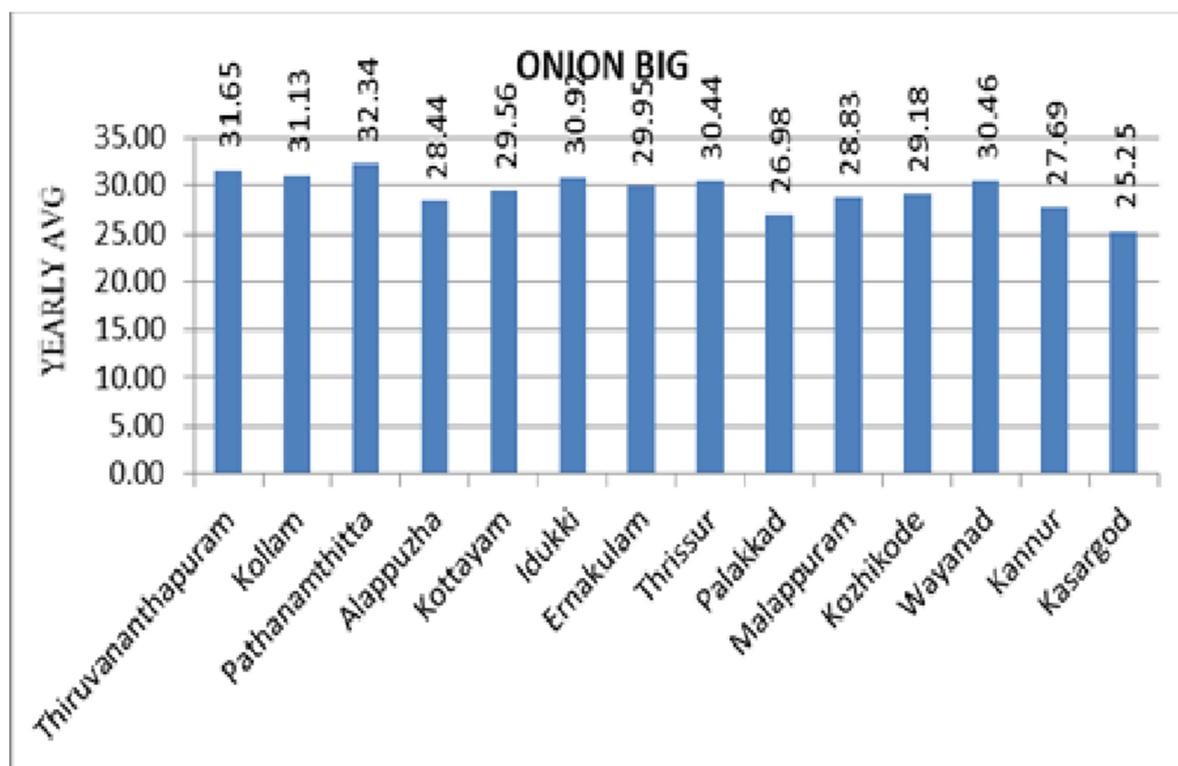

Table94- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

BIG ONION(₹/Kg)

The yearly average price of big onions across Kerala districts shows moderate variation, ranging from ₹25.25/kg (Kasaragod) to ₹32.34/kg (Pathanamthitta)—a difference of ₹7.09/kg (22% variance). Northern districts (Kasaragod, Kannur, Malappuram) have the lowest prices (₹25.25–28.83/kg). Southern/Central districts (Pathanamthitta, Thiruvananthapuram, Kollam) show marginally higher prices (₹31.13–32.34/kg), possibly reflecting transport costs or urban demand. Most districts hover near ₹29–31/kg, indicating stable market conditions. While regional disparities exist, big onion prices remain relatively consistent across Kerala, with no extreme spikes.

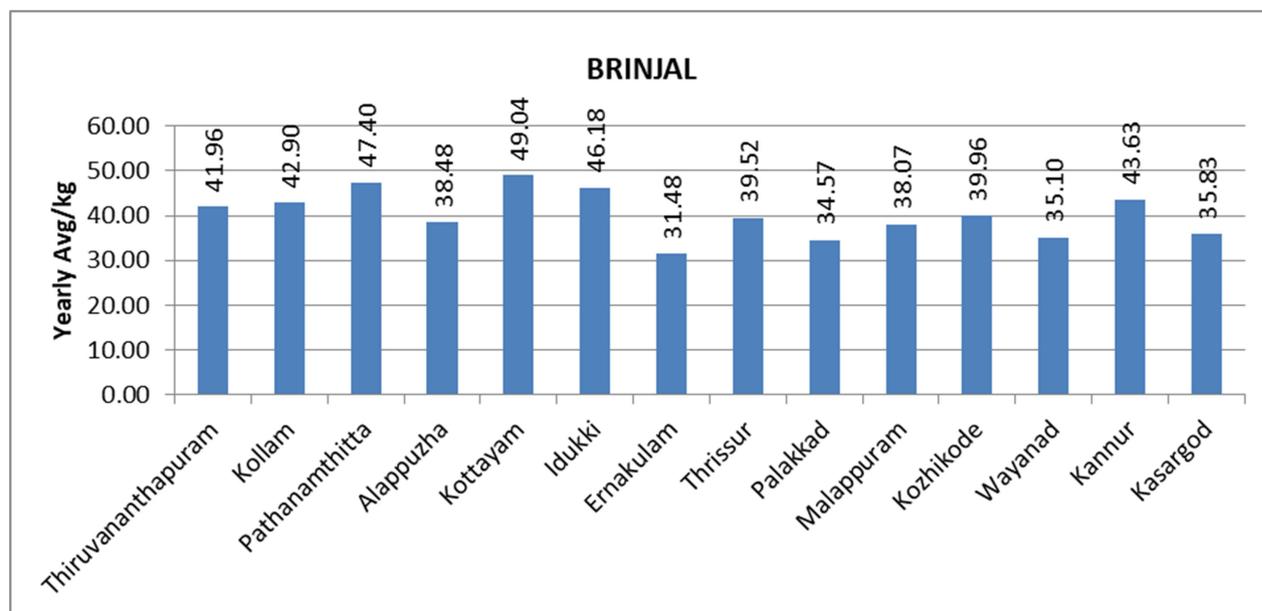

Table95- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

BRINJAL (₹/Kg)

The price analysis of brinjal across Kerala districts reveals significant regional variations, with Kottayam recording the highest average price at ₹49.04/kg and Ernakulam the lowest at ₹31.48/kg - a substantial difference of ₹17.56/kg (55.8% variation). Central districts like Kottayam, Pathanamthitta (₹47.40), and Idukki (₹46.18) consistently show higher prices, likely due to transportation challenges in hilly areas or limited local production. In contrast, urban centers including Ernakulam and Thrissur (₹39.52) benefit from lower prices, possibly due to better supply chain efficiency or proximity to wholesale markets. Northern districts display moderate pricing, with Kannur at ₹43.63/kg and Kasaragod at ₹35.83/kg. The wide price gap suggests potential inefficiencies in distribution networks and highlights opportunities for improving market integration across regions. These fluctuations may significantly impact both farmers' incomes and consumer affordability in different parts of the state.

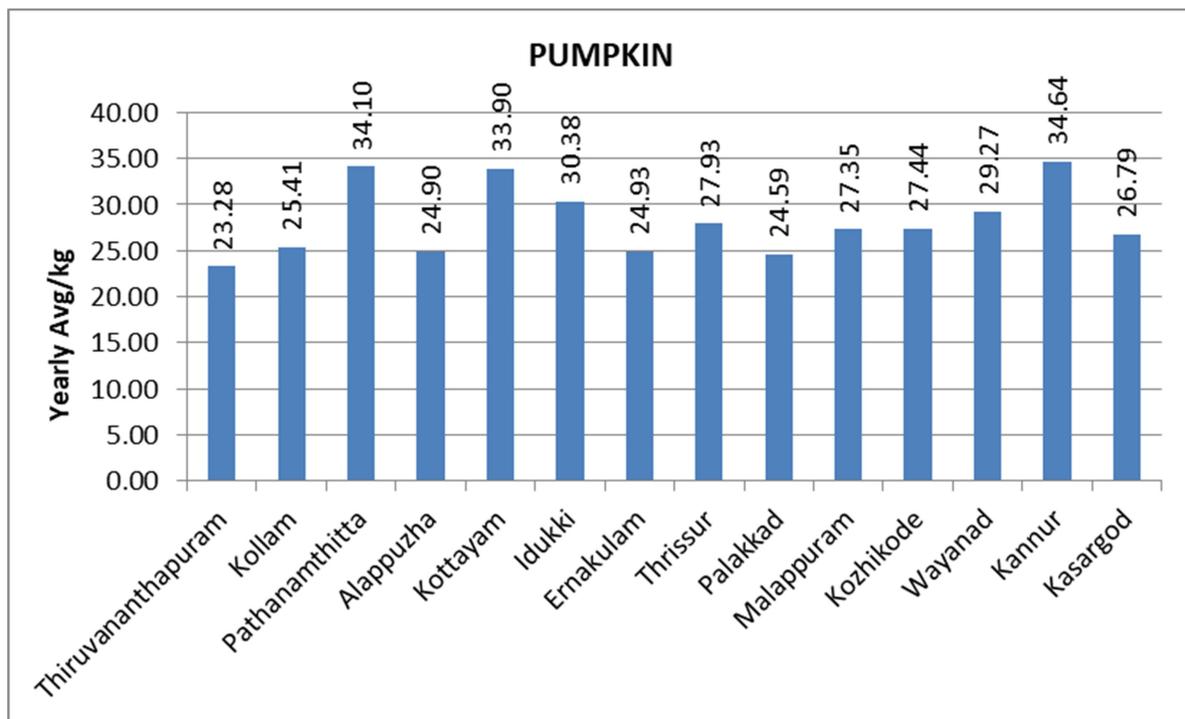

Table 96- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

PUMPKIN(₹/Kg)

The price analysis of pumpkin across Kerala districts shows notable regional variations, with Kannur recording the highest average price at ₹34.64/kg and Thiruvananthapuram the lowest at ₹23.28/kg a significant difference of ₹11.36/kg (48.8% variation). Northern districts like Kannur and central regions including Pathanamthitta (₹34.10) and Kottayam (₹33.90) command premium prices. In contrast, southern districts such as Thiruvananthapuram and Kollam (₹25.41) show more affordable rates, possibly benefiting from better supply chain access. The price pattern reveals a general north-south divide, with mid-range prices in central districts (₹27-30/kg). This substantial price disparity suggests potential opportunities to optimize distribution networks, particularly to high-price areas, which could help stabilize prices across the state and benefit both producers and consumers.

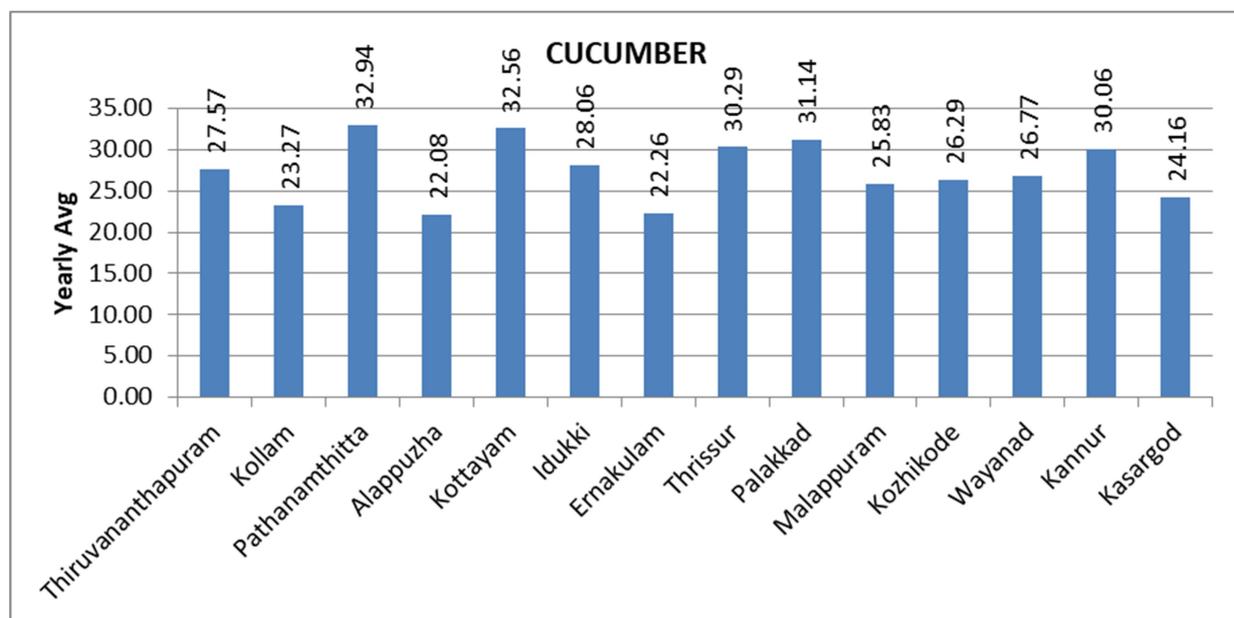

Table 97- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

CUCUMBER (₹/Kg)

The price analysis of cucumbers across Kerala districts reveals significant regional variations, with Pathanamthitta recording the highest average price at ₹32.94/kg and Alappuzha the lowest at ₹22.08/kg - a notable difference of ₹10.86/kg (49.2% variation). Central districts including Pathanamthitta, Kottayam (₹32.56), and Palakkad (₹31.14) show consistently higher prices. In contrast, coastal regions like Alappuzha and Ernakulam (₹22.26) benefit from lower prices. The data shows a clear geographical pattern where central highland districts command premium prices while southern and northern coastal areas maintain more moderate rates (₹22-27/kg). This substantial price disparity suggests potential opportunities to improve distribution networks and market integration, particularly to balance supply and demand across different regions of the state.

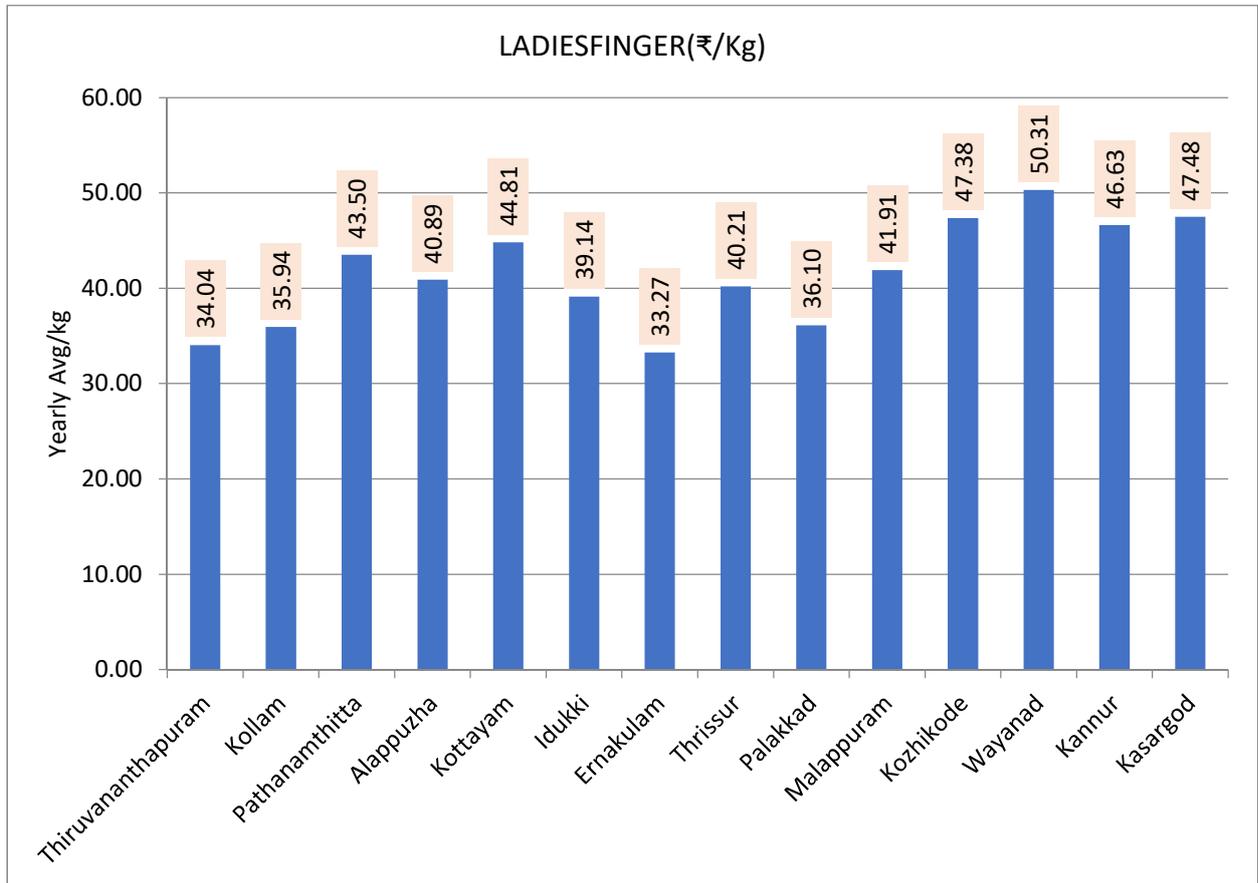

Table 98- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

LADIES FINGER (₹/Kg)

The price analysis of ladies finger (okra) across Kerala districts shows significant regional variations, with Wayanad recording the highest average price at ₹50.31/kg and Ernakulam the lowest at ₹33.27/kg - a substantial difference of ₹17.04/kg (51.2% variation). The data reveals a clear geographical pattern where highland districts (Wayanad, Idukki) and northern regions (Kozhikode, Kannur, Kasaragod) command premium prices above ₹45/kg. In contrast, urban centers like Ernakulam and southern districts (Thiruvananthapuram, Kollam) show more moderate prices (₹33-36/kg). Central districts including Kottayam (₹44.81) and Pathanamthitta (₹43.50) also show relatively high prices.

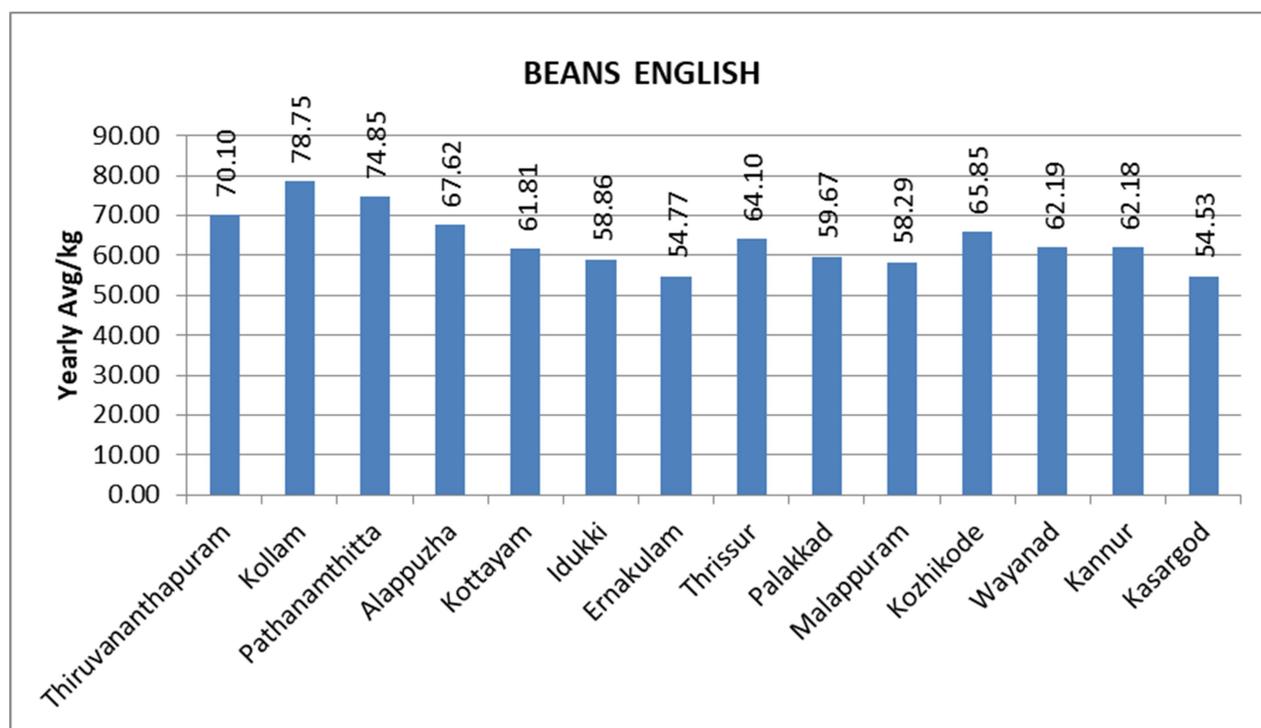

Table 99- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

Beans english(₹/Kg)

The price analysis of English beans across Kerala districts reveals notable regional variations, with Kollam recording the highest average price at ₹78.75/kg and Ernakulam the lowest at ₹54.77/kg - a significant difference of ₹23.98/kg (43.8% variation). Southern districts (Kollam, Thiruvananthapuram, Pathanamthitta) consistently show higher prices (₹70-79/kg), likely due to transportation costs or strong local demand. In contrast, central and northern regions, particularly Ernakulam (₹54.77), Kasaragod (₹54.53), and Idukki (₹58.86), benefit from more moderate prices. The data shows a gradual northward price decline, with most districts clustering in the ₹58-66/kg range. This 24/kg price gap suggests potential opportunities to optimize distribution networks between high-price southern markets and more affordable northern regions, which could help stabilize prices across the state while benefiting both producers and consumers.

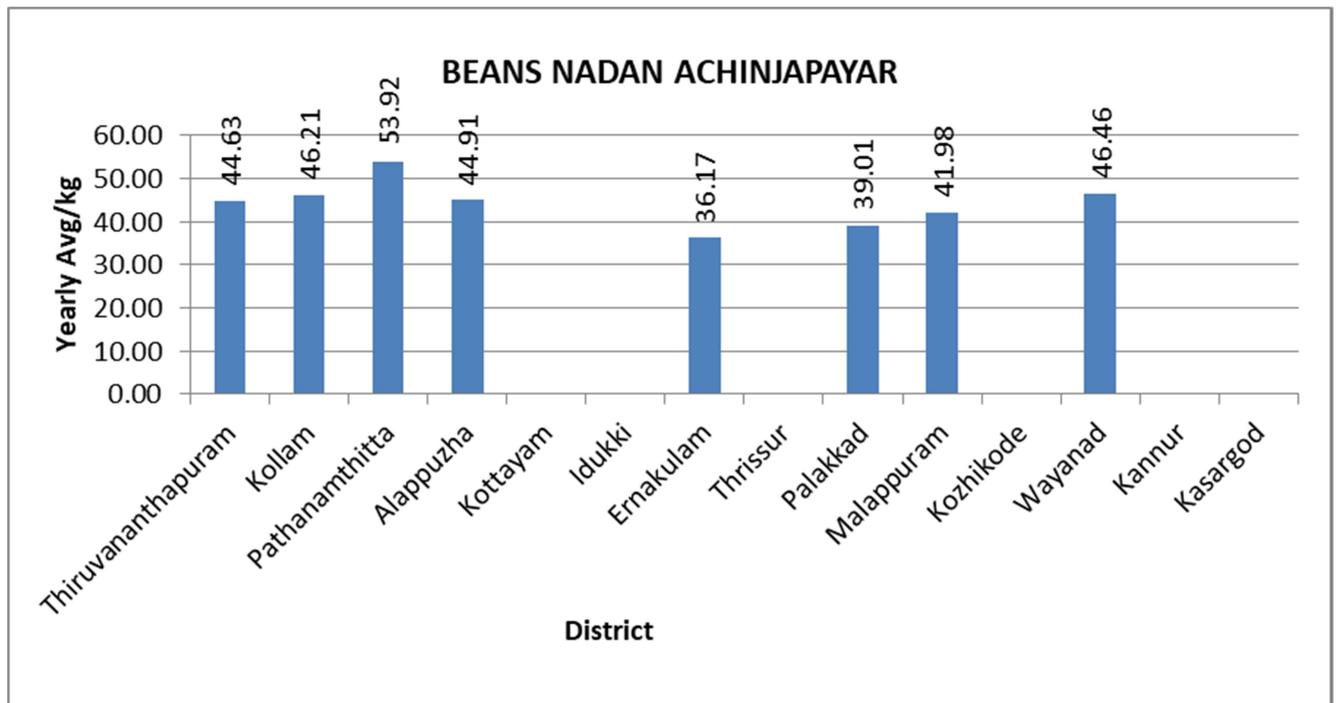

Table100- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

BEANS NADAN ACHINJAPAYAR (₹/Kg)

The price analysis of Nadan Achinjapayar (local beans) across Kerala districts reveals significant regional variations, with Pathanamthitta recording the highest yearly average price at ₹53.92/kg, while Ernakulam has the lowest at ₹36.17/kg—a ₹17.75/kg (49%) difference. Prices in southern districts (Kollam, Thiruvananthapuram, Alappuzha) remain moderately high (₹44–46/kg). In contrast, central and northern districts (Ernakulam, Palakkad, Malappuram) show lower prices (₹36–42/kg). Missing data from key districts like Kottayam and Kannur limits a complete assessment. The nearly 50% price gap between the highest and lowest districts highlights potential opportunities to optimize distribution and improve market integration across Kerala.

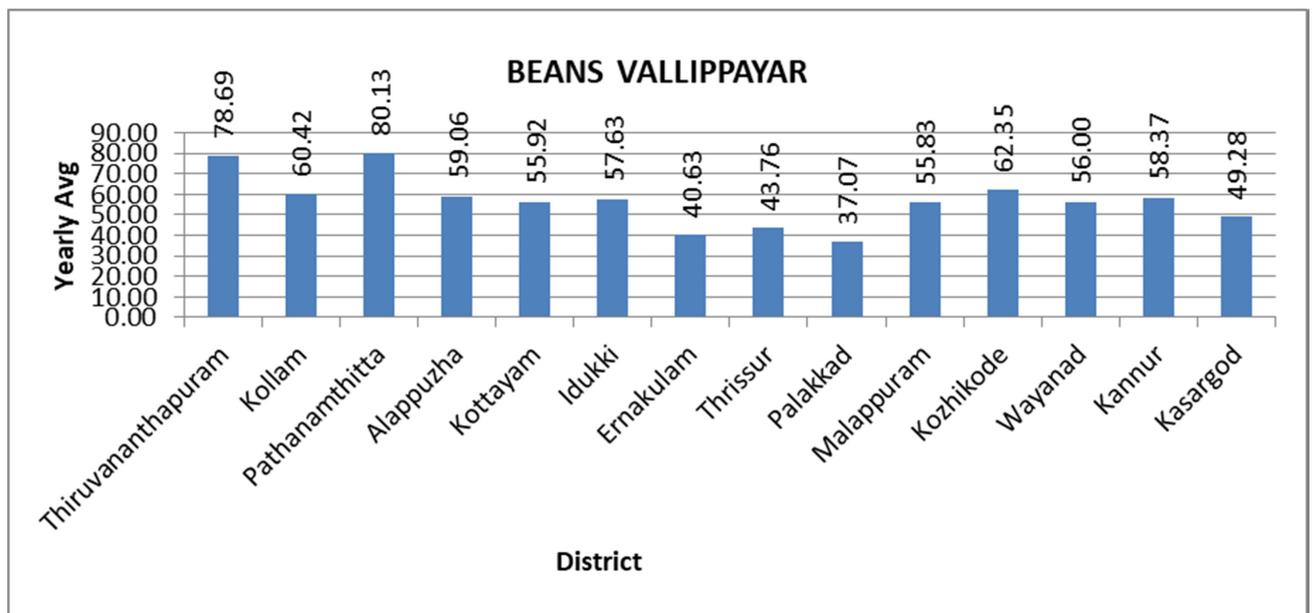

Table101- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

BEANS VALLIPPAYAR(₹/Kg)

The price analysis of Vallippayar across Kerala districts reveals substantial price variations, with Pathanamthitta recording the highest yearly average at ₹80.13/kg, while Palakkad has the lowest at ₹37.07/kg—a striking ₹43.06/kg (116%) difference. Prices are significantly higher in southern districts like Thiruvananthapuram (₹78.69) and Pathanamthitta. In contrast, central and northern regions, particularly Ernakulam (₹40.63), Thrissur (₹43.76), and Palakkad (₹37.07), show much lower prices. The wide price gap suggests inefficient inter-district distribution, with potential for improved market integration to stabilize prices. The northern coastal districts (Kozhikode, Kannur, Kasaragod) show moderate pricing (₹49–62/kg). Further study is needed to assess seasonal trends and cultivation patterns influencing these fluctuations.

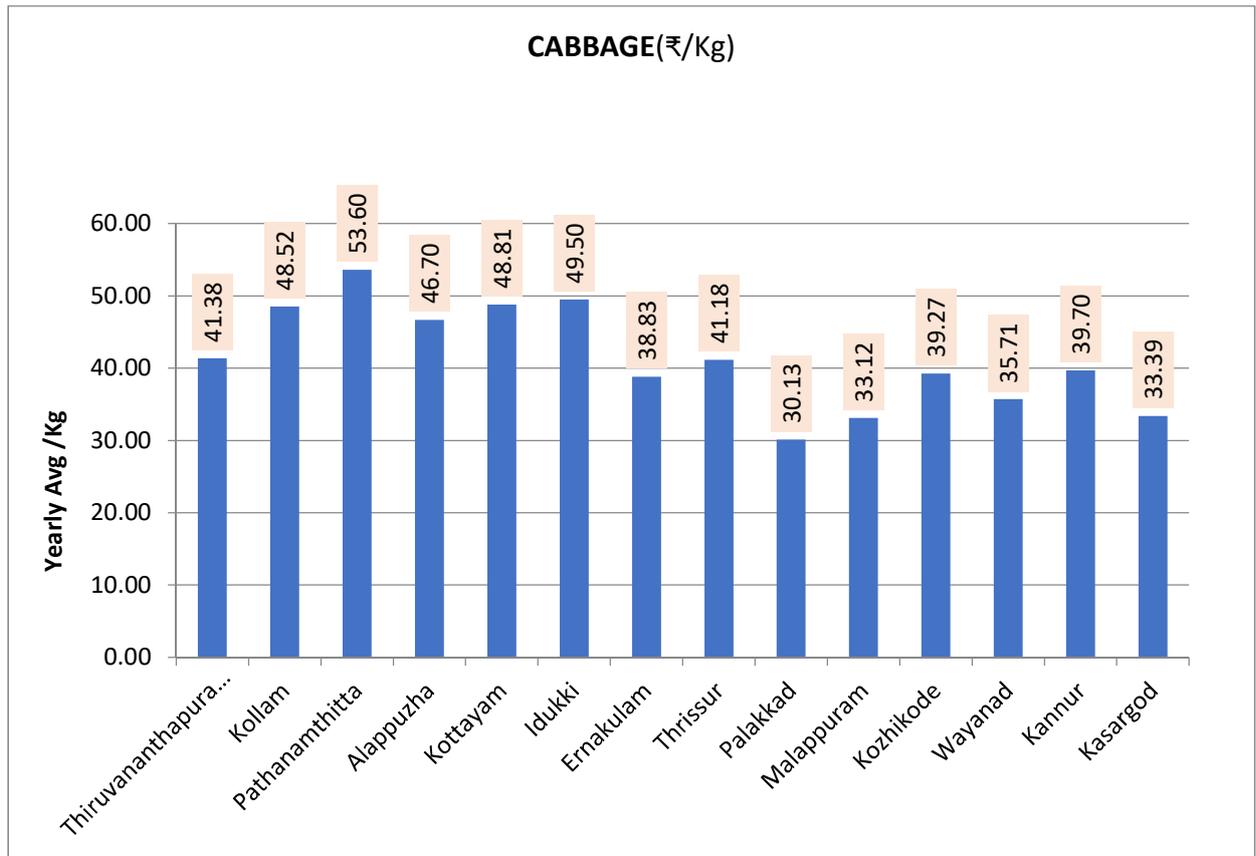

Table102- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

CABBAGE(₹/Kg)

Cabbage prices in Kerala show notable regional variations, with Pathanamthitta recording the highest average price at ₹53.60/kg and Palakkad the lowest at ₹30.13/kg - a significant 78% difference. The southern and central districts (Pathanamthitta, Idukki, Kottayam) maintain consistently higher prices (₹46-54/kg), while northern regions (Palakkad, Malappuram, Kasaragod) benefit from lower prices (₹30-35/kg). Urban centers like Ernakulam (₹38.83) and Thiruvananthapuram (₹41.38) show moderate pricing. This substantial price gap highlights potential inefficiencies in distribution networks and opportunities for improving market integration to stabilize prices across Kerala's districts.

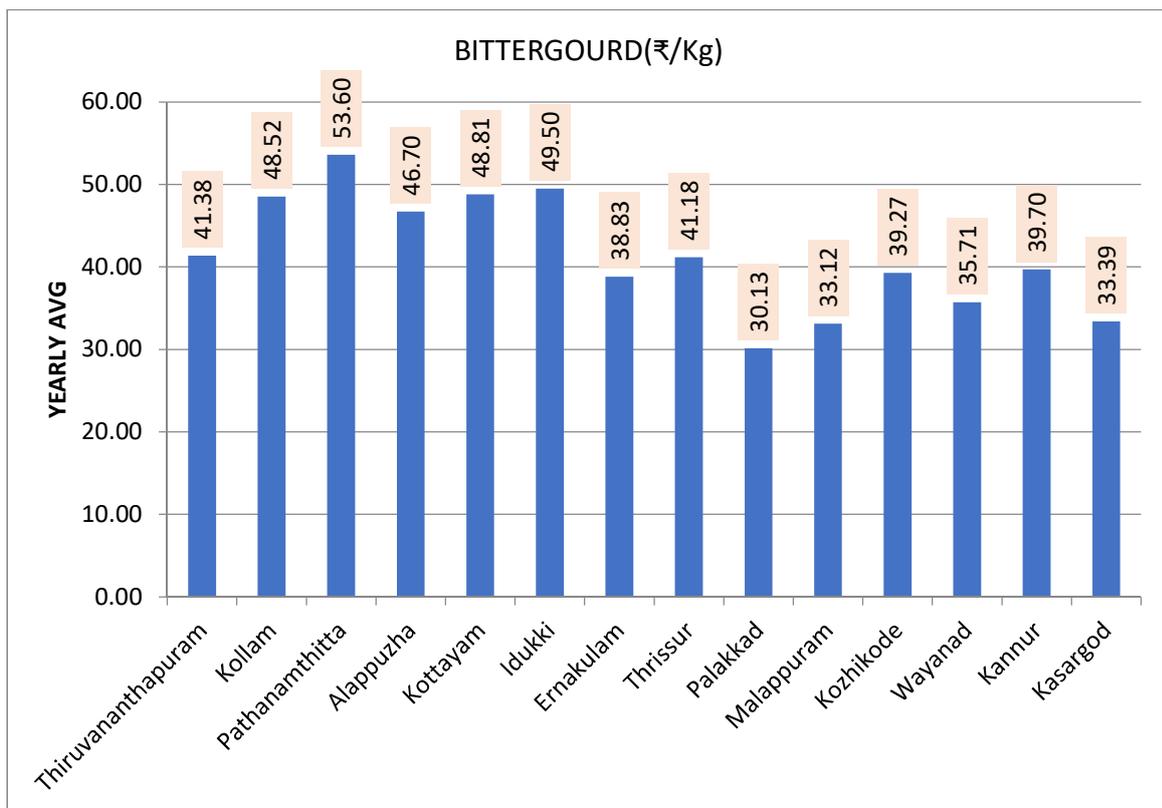

Table103- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

BITTER GOURD (₹/Kg)

The price analysis of bitter gourd across Kerala districts shows significant fluctuations, ranging from ₹30.13/kg in Palakkad to ₹53.60/kg in Pathanamthitta - a striking 78% price difference. Central and southern districts (Pathanamthitta, Idukki, Kottayam) maintain consistently higher prices (₹46-54/kg), likely due to transportation challenges and strong demand, while northern regions (Palakkad, Malappuram, Kasaragod) show substantially lower prices (₹30-35/kg), possibly benefiting from better local production. Urban centers like Ernakulam (₹38.83) and Thiruvananthapuram (₹41.38) exhibit moderate pricing. The pattern indicates geographical factors significantly influence bitter gourd affordability in Kerala.

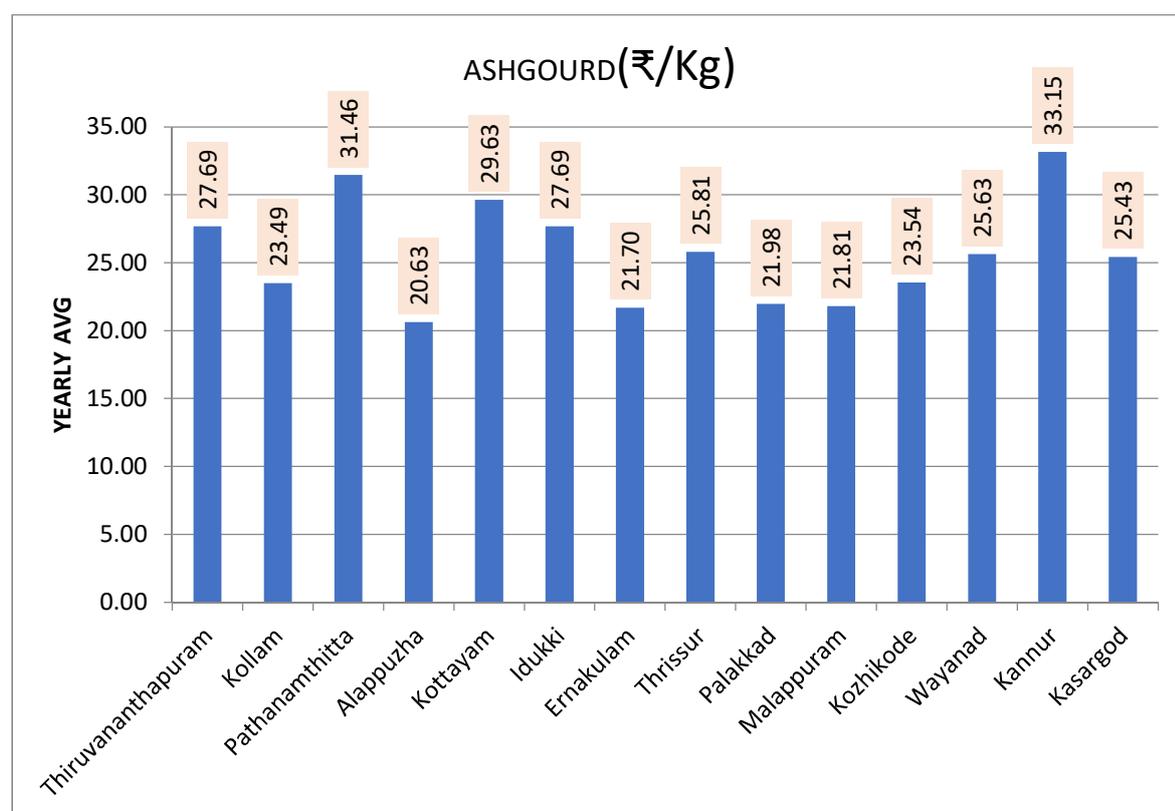

Table104- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

ASH GOURD (₹/Kg)

The price analysis of ash gourd across Kerala districts reveals moderate fluctuations, with Kannur recording the highest average price at ₹33.15/kg and Alappuzha the lowest at ₹20.63/kg - a 60% price difference. Northern districts like Kannur and central regions including Pathanamthitta (₹31.46) and Kottayam (₹29.63) show relatively higher prices, likely due to transportation costs or limited local production. In contrast, coastal districts such as Alappuzha, Ernakulam (₹21.70), and Malappuram (₹21.81) benefit from lower prices. Most districts maintain prices in the ₹21-27 range, indicating generally stable market conditions.

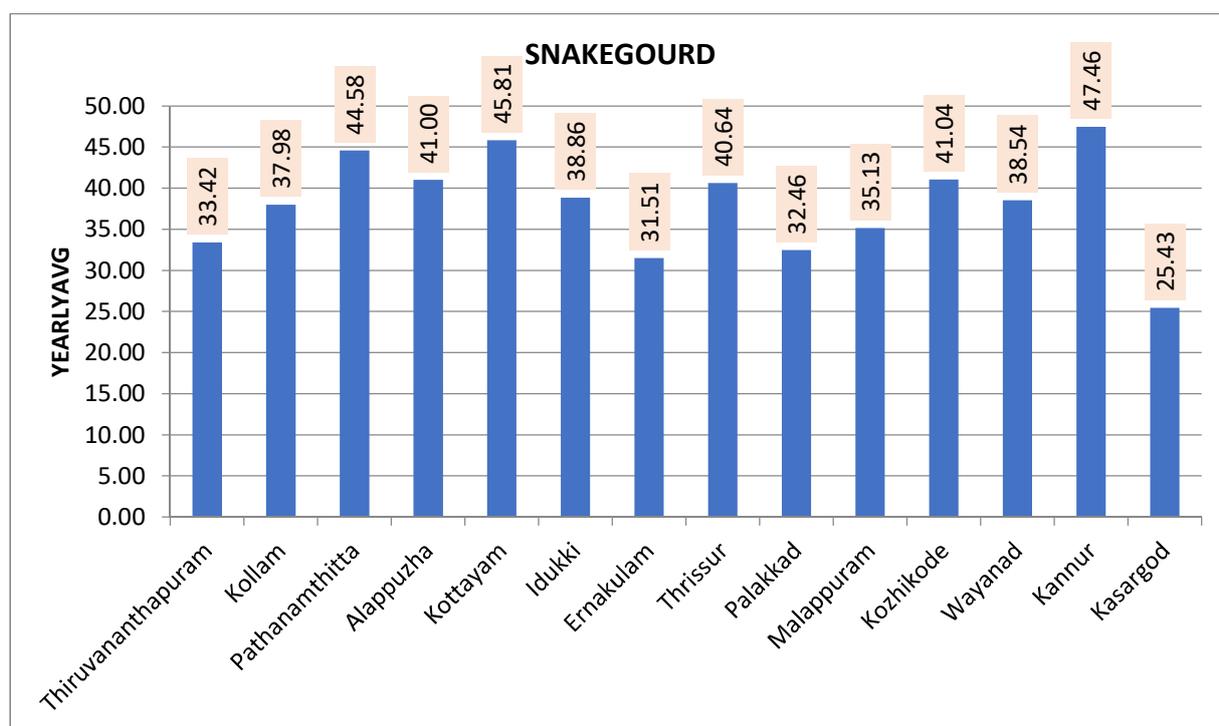

Table105- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

SNAKE GOURD (₹/Kg)

The price analysis of snake gourd across Kerala reveals significant regional variations, with prices ranging from ₹25.43/kg in Kasaragod to ₹47.46/kg in Kannur - an 86.6% difference. Northern districts (Kannur, Kasaragod) show extreme price contrasts, while central regions (Kottayam ₹45.81, Pathanamthitta ₹44.58) maintain consistently high prices. Coastal and urban areas like Ernakulam (₹31.51) and Thiruvananthapuram (₹33.42) benefit from relatively lower prices, possibly due to better supply chain efficiency. Most districts cluster in the ₹35-42/kg range, indicating generally stable market conditions. The substantial price gap between highest and lowest districts highlights potential supply chain inefficiencies and opportunities for improved distribution networks to balance prices across regions.

Table106- illustrates the dataset pertaining to the REPORT OF 50 ITEMS

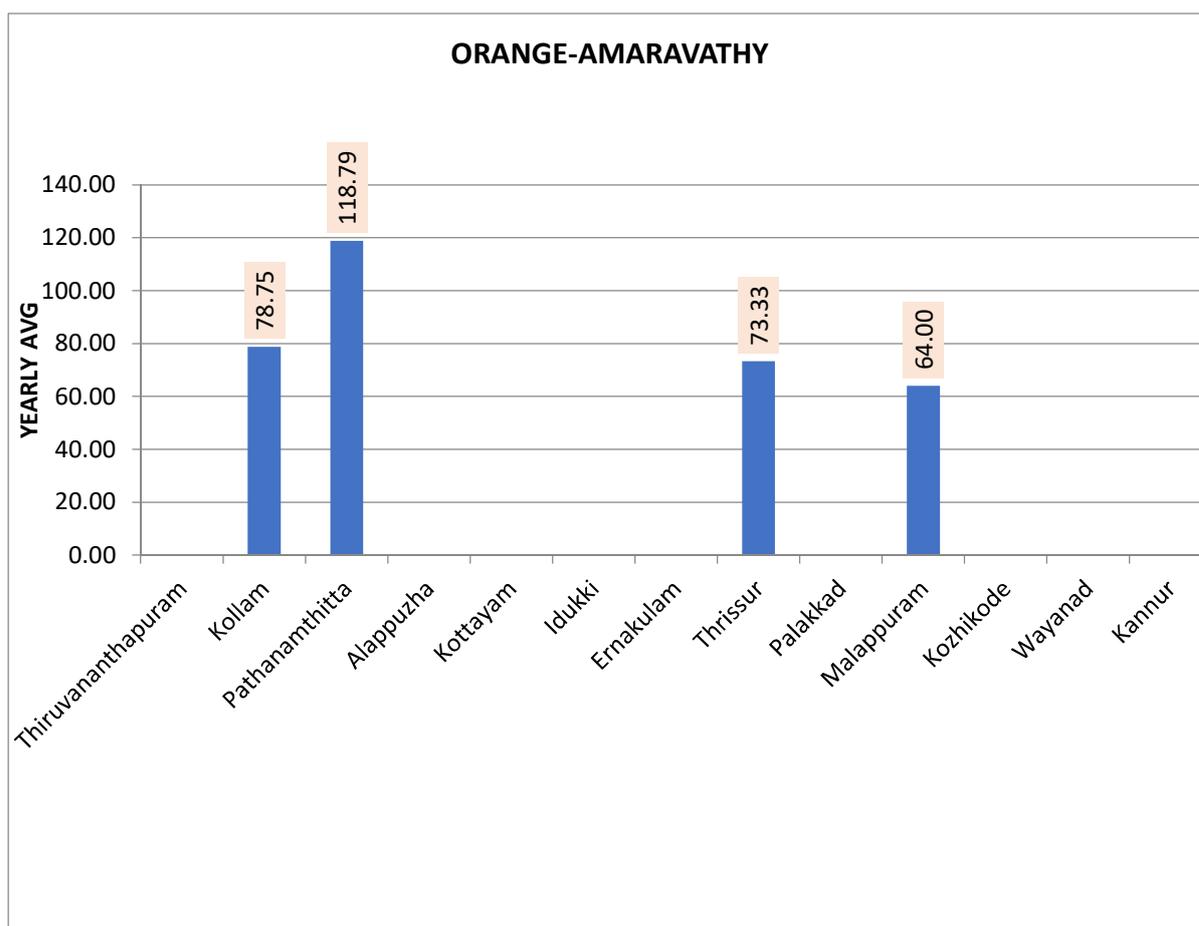

RETAIL FRUITS

AMARAVATHY ORANGE

The price fluctuation analysis of Amaravathy oranges shows significant regional variations across Kerala, with Pathanamthitta recording the highest yearly average price at ₹118.79/kg, followed by Kollam (₹78.75/kg). In contrast, Malappuram has the lowest price at ₹64.00/kg, with Thrissur (₹73.33/kg) also on the lower end. The absence of data from major districts like Thiruvananthapuram, Ernakulam, and Kozhikode limits a complete assessment. The higher price in Pathanamthitta could indicate lower local production or higher demand, while lower prices in Malappuram and Thrissur may reflect better supply or accessibility..

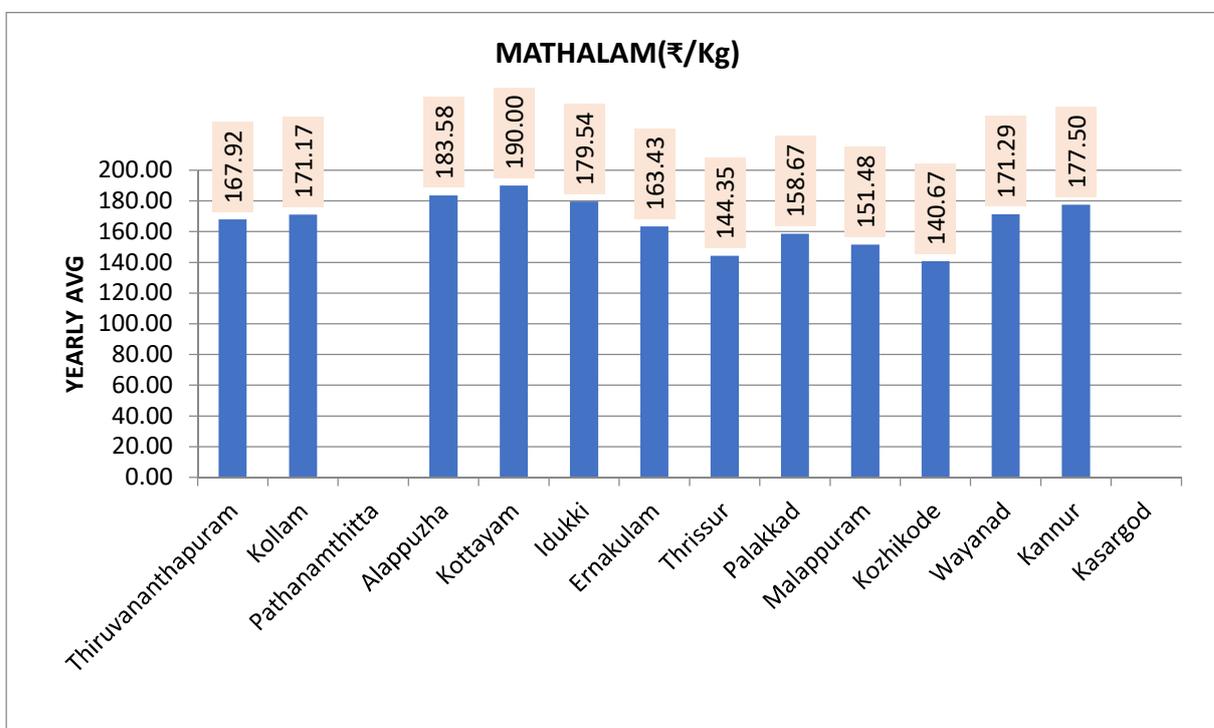

Table107- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS

MATHALAM (₹/Kg)

During the year, Mathalam (pomegranate) prices in Kerala remained relatively high with moderate seasonal fluctuations across districts. Thiruvananthapuram recorded prices ranging from ₹142.50 in January to ₹195.00 in May, with a yearly average of ₹167.92, showing stronger prices during the summer months. Kollam followed a similar pattern, peaking at ₹220.00 in May and averaging ₹171.17 annually. Higher price levels were observed in Alappuzha, Kottayam, Idukki, and Wayanad, where prices frequently exceeded ₹190.00 during May and June, with yearly averages of ₹183.58, ₹190.00, ₹179.54, and ₹171.29 respectively. In Kannur, prices remained consistently firm throughout the year, averaging ₹177.50. Comparatively lower prices were seen in Thrissur, Malappuram, Kozhikode, and Palakkad, particularly during the early months, though rates strengthened towards the end of the year. Overall, Mathalam prices in Kerala tended to rise during late summer and early monsoon months and softened slightly thereafter, influenced by seasonal arrivals, market availability, and consumer demand across regions.

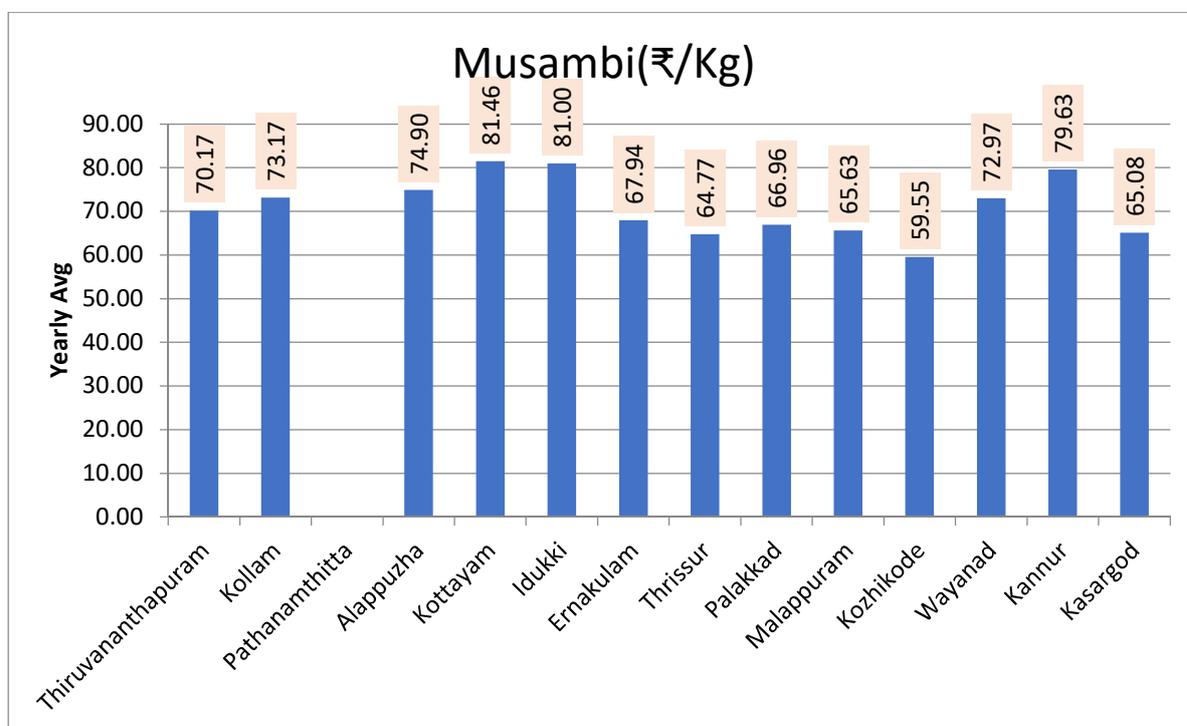

Table108 - illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS

MUSAMBI (₹/Kg)

During the year, Musambi (sweet lime) prices in Kerala showed moderate seasonal fluctuations, with noticeable differences across districts. In Thiruvananthapuram, prices increased from ₹65.00 in January to a peak of ₹84.00 in December, resulting in a yearly average of ₹70.17. Kollam followed a similar pattern, with prices remaining mostly between ₹70.00 and ₹80.00 and rising towards the end of the year, averaging ₹73.17 annually. Higher price levels were observed in Kottayam and Idukki, where prices peaked at ₹95.00 and ₹88.00 respectively, and annual averages remained above ₹81.00. Kannur also recorded consistently higher prices, especially during the post-monsoon months, with a yearly average of ₹79.63. In contrast, comparatively lower prices were seen in Kozhikode, Thrissur, Palakkad, Malappuram, and Kasargod, particularly during August to October, when prices dropped below ₹55.00 in several markets. Overall, Musambi prices in Kerala tended to soften during the monsoon months and strengthened towards the end of the year.

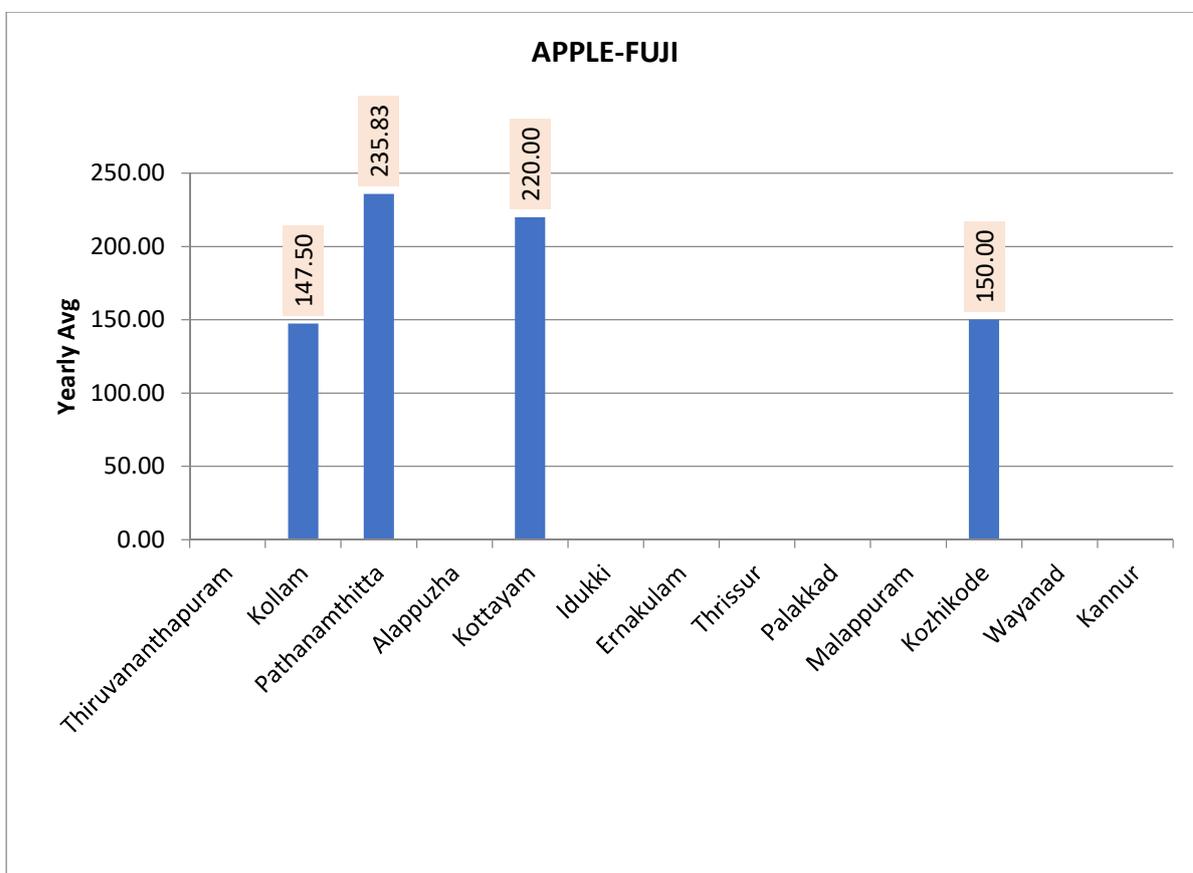

Table109 - illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS

Fuji apples (₹/Kg)

The price fluctuation analysis of Fuji apples across Kerala's districts reveals significant variations, with Pathanamthitta recording the highest yearly average price at ₹235.83/kg, followed by Kottayam (₹220/kg) and Kollam (₹147.50/kg). Kozhikode shows a moderate average of ₹150/kg, while Thiruvananthapuram reports no data (₹0.00). Notably, seven districts—including Alappuzha, Idukki, and Ernakulam—lack data, indicating potential gaps in market tracking or supply. The stark price differences suggest regional disparities in demand, transportation costs, or local market dynamics.

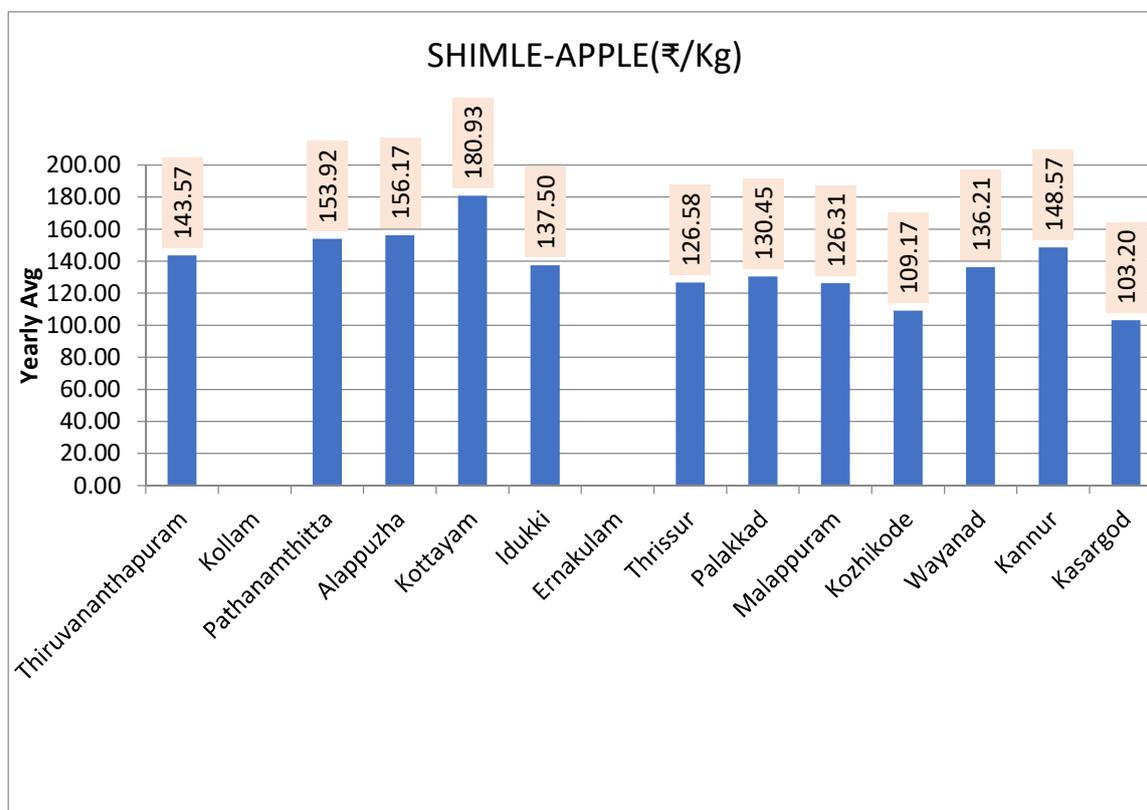

Table110 - illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS

Apple Shimla (₹/Kg)

During the year, Shimla Apple prices in Kerala showed clear seasonal and district-wise variations, with a general declining trend towards the latter part of the year. Pathanamthitta recorded relatively stable prices for most months, remaining around ₹160.00 from February to August before easing to ₹140.00 during October and November, resulting in a yearly average of ₹153.92. Kottayam reported comparatively higher prices in the first half of the year, peaking at ₹212.00 in April, and then gradually declining during the post-monsoon months, with an annual average of ₹180.93. In Thiruvananthapuram, prices declined steadily from ₹180.00 in January to ₹120.00 during October and November, before a slight increase in December, yielding a yearly average of ₹143.57. Alappuzha and Wayanad showed moderate fluctuations, averaging ₹156.17 and ₹136.21 respectively. Lower price levels were observed in Thrissur, Palakkad, Malappuram, Kozhikode, and Kasargod, particularly during September to November, when prices dropped below ₹120.00 in several markets. Overall, Shimla Apple prices in Kerala were higher during the early and mid-year months and softened significantly during the later part of the year.

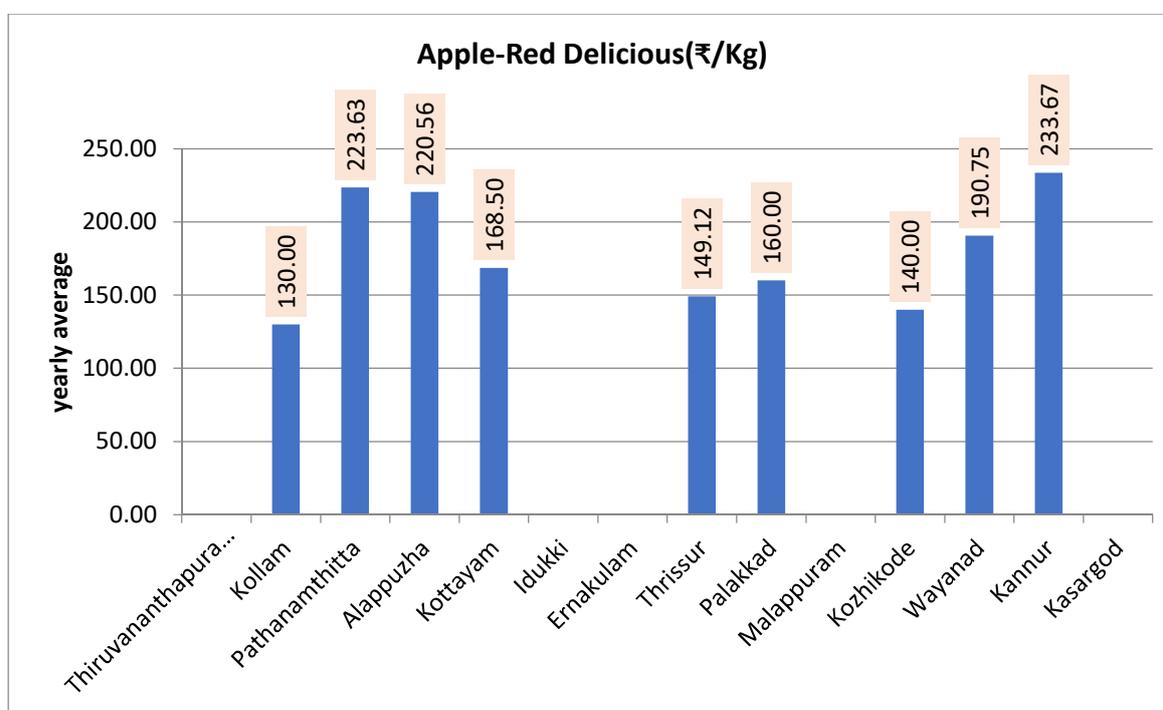

Table111 - illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

Red Delicious Apple(₹/Kg)

During the year, Apple (Red Delicious variety) prices in Kerala displayed wide district-wise variations, with limited availability in several districts. Pathanamthitta recorded steady and relatively high prices throughout the year, mostly ranging between ₹215.00 and ₹240.00, and achieved a yearly average of ₹223.63. Kannur reported the highest and most uniform prices, maintaining ₹240.00 per kg for most months before a slight decline towards the end of the year, resulting in a high annual average of ₹233.67. In Alappuzha, prices remained stable around ₹220.00 during most observed months but rose sharply to ₹260.00 in November, yielding a yearly average of ₹220.56. Kottayam experienced significant fluctuations, with prices falling to as low as ₹120.00 in November, leading to a lower annual average of ₹168.50. Thrissur showed comparatively moderate prices, generally ranging from ₹144.00 to ₹163.33 and averaged ₹149.12 annually. Palakkad, Kozhikode, and Wayanad recorded prices only during selected months, with mixed trends and moderate annual averages. Overall, Red Delicious apple prices in Kerala remained higher in northern districts and in markets with regular supply, while greater volatility was observed in districts with sporadic availability, influenced by import volumes and seasonal demand.

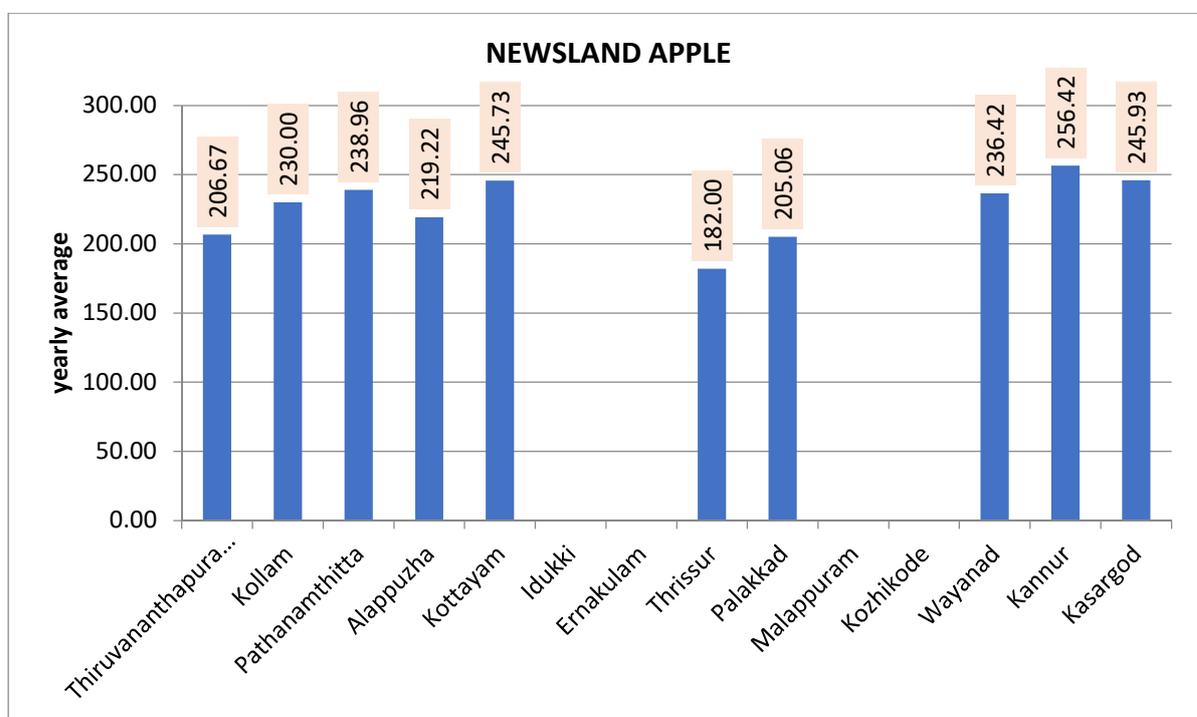

Table 112- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS

Newsland apple (₹/Kg)

During the year, New Zealand Apple prices in Kerala showed considerable district-wise variation, with generally firm price levels across markets. Pathanamthitta recorded consistently high prices throughout the year, ranging between ₹232.50 and ₹240.00, and registered a yearly average of ₹238.96. Kottayam also witnessed strong prices, with values mostly around ₹240.00 and occasional peaks up to ₹260.00, resulting in a higher annual average of ₹245.73. In Wayanad, prices fluctuated more noticeably, declining from ₹265.00 in January to ₹200.00 in April before rising again towards the end of the year, averaging ₹236.42 annually. Kannur maintained some of the highest rates in the state, frequently touching ₹260.00 per kg, with a yearly average of ₹256.42, reflecting premium market conditions. Kasargod showed sharp volatility, with prices rising to as high as ₹300.00 in September, and settled at a yearly average of ₹245.93. In contrast, Thrissur and Palakkad recorded relatively moderate and stable prices, averaging ₹182.00 and ₹205.06 respectively. Overall, New Zealand Apple prices in Kerala remained high throughout the year, with premium pricing in northern districts and comparatively moderate rates in central regions,

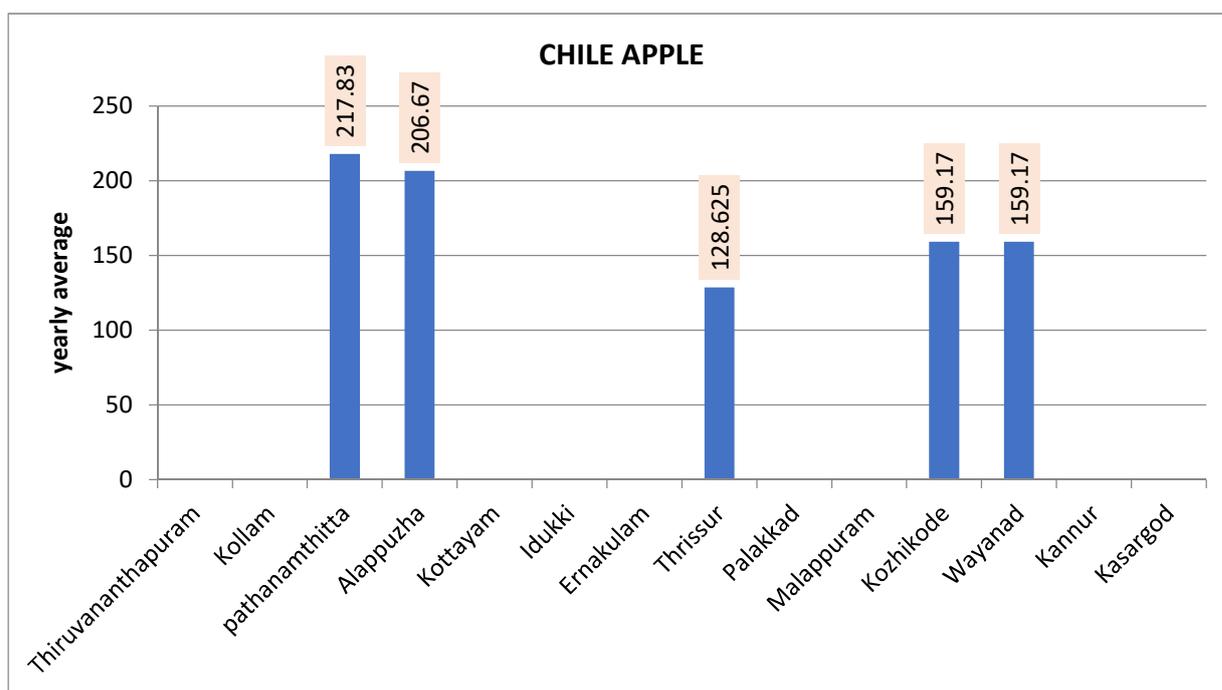

Table113 - illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

APPLE CHILE (₹/Kg)

During the year, Chile Apple prices in Kerala showed marked variation across districts and months, with an overall state yearly average of ₹174.29 per kg. Pathanamthitta recorded the highest and most consistent prices, rising from ₹220.00 in February to ₹240.00 from April onwards, and further increasing to ₹244.00 in December, resulting in a high yearly average of ₹217.83. Thrissur experienced comparatively lower prices, fluctuating between ₹150.00 and ₹160.00 for most of the year, before easing slightly towards the end, with an annual average of ₹128.63. In Alappuzha, prices were observed only for limited months, ranging from ₹213.33 to ₹200.00, yielding a yearly average of ₹206.67. Kozhikode and Wayanad showed similar price behaviour, with mid-year prices stabilising around ₹156.67–₹160.00 and identical yearly averages of ₹159.17. At the state level, prices increased from ₹185.00 in February to ₹197.50 in August and remained around ₹195.00 during October and November, before declining to ₹148.00 in December. Overall, Chile Apple prices in Kerala remained relatively firm during the middle of the year, while lower averages in some districts and limited market arrivals influenced the moderate state-wide annual average.

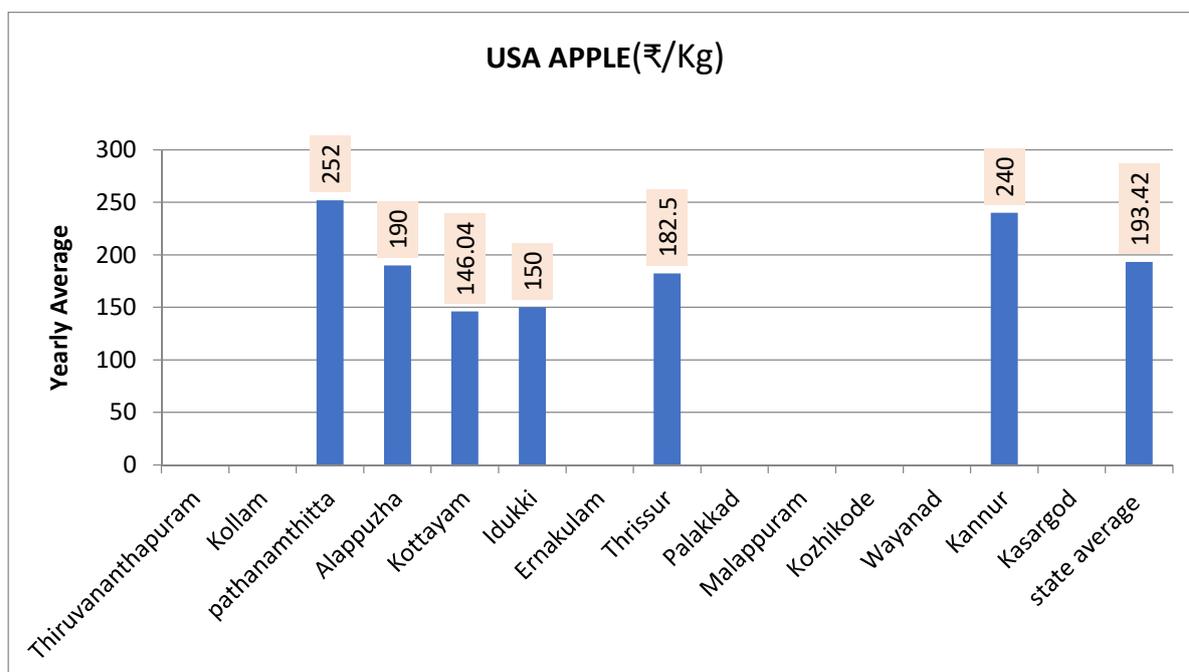

Table114- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

USA APPLE(₹/Kg)

During the year, USA Apple prices in Kerala exhibited clear seasonal and district-wise variations, with an overall state yearly average of ₹193.42 per kg. Prices remained relatively high and stable in Kannur, where a uniform rate of ₹240.00 per kg was recorded throughout the year. Pathanamthitta showed higher price levels with noticeable fluctuations, rising from ₹230–240 during the early months to ₹260 per kg during April, May, and again from July to December, resulting in a high yearly average of ₹252.00. In Alappuzha, prices increased moderately from ₹180.00 in the first quarter to ₹200.00 during April to June, with a yearly average of ₹190.00. Kottayam and Idukki recorded comparatively lower and more variable prices, particularly during the later months, which pulled their annual averages down to ₹146.04 and ₹150.00 respectively. Thrissur reported limited data, with prices ranging between ₹180.00 and ₹190.00 and a yearly average of ₹182.50. At the state level, prices declined slightly during March (₹214.17) but increased steadily towards the last quarter, peaking at ₹250.00 from October to December. Overall, USA Apple prices in Kerala remained firm during most of the year, with higher rates observed in the post-monsoon and winter months, influenced by import supply patterns and seasonal consumer demand.

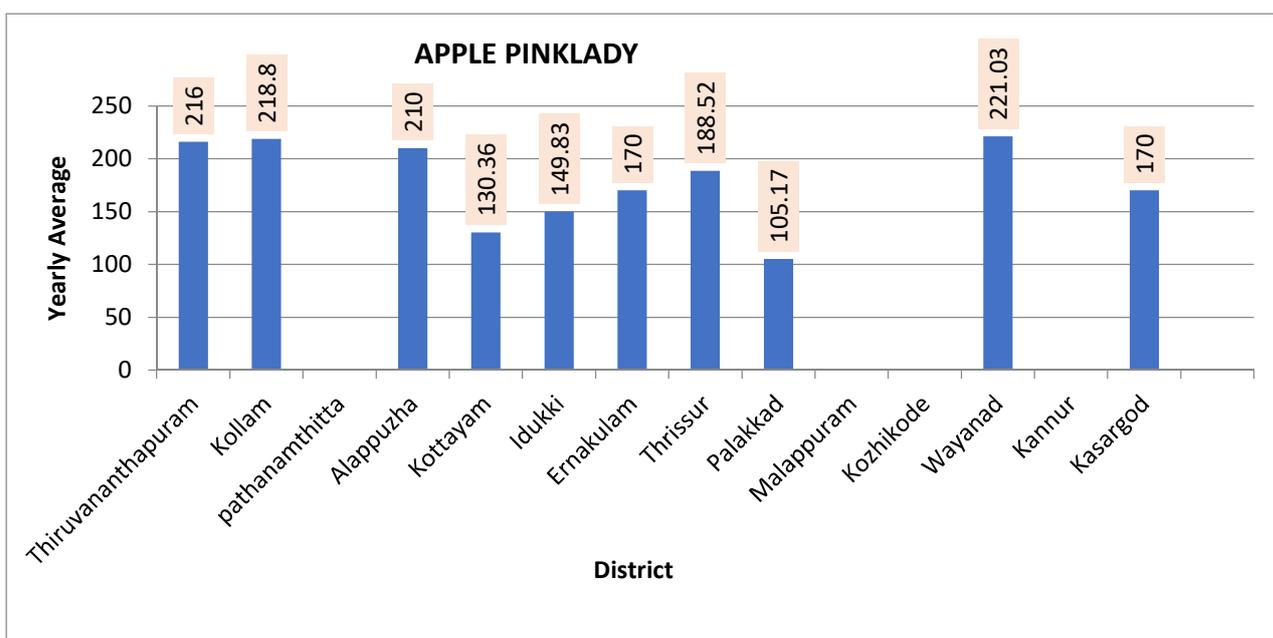

Table115- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

Apple Pink Lady (₹/Kg)

During the year, Apple (Pink Lady variety) prices in Kerala showed noticeable seasonal and district-wise variations, with an overall state yearly average of ₹177.97 per kg. Prices were relatively high during the beginning of the year, with the state average at ₹209.50 in January, and gradually declined to the lowest level in August (₹175.00), before rising sharply again in October (₹223.50). Wayanad recorded consistently higher prices throughout the year, ranging from ₹197.50 to ₹250.00, and registered the highest yearly average of ₹221.03. Thrissur also showed stable and comparatively high prices, fluctuating narrowly between ₹182.50 and ₹196.00, with a yearly average of ₹188.52. In Thiruvananthapuram, prices remained steady from March to July around ₹220.00, followed by a decline in August, resulting in a yearly average of ₹216.00. Kollam experienced higher prices towards the end of the year, peaking at ₹250.00 in November, with an annual average of ₹218.80. In contrast, Kottayam and Idukki showed wider fluctuations, with Kottayam recording a sharp mid-year decline to around ₹110–120, while Idukki prices increased again towards the last quarter, averaging ₹149.83 annually. Overall, the data indicates that Apple Pink Lady prices in Kerala were lowest during the monsoon months and higher during the early and late parts of the year.

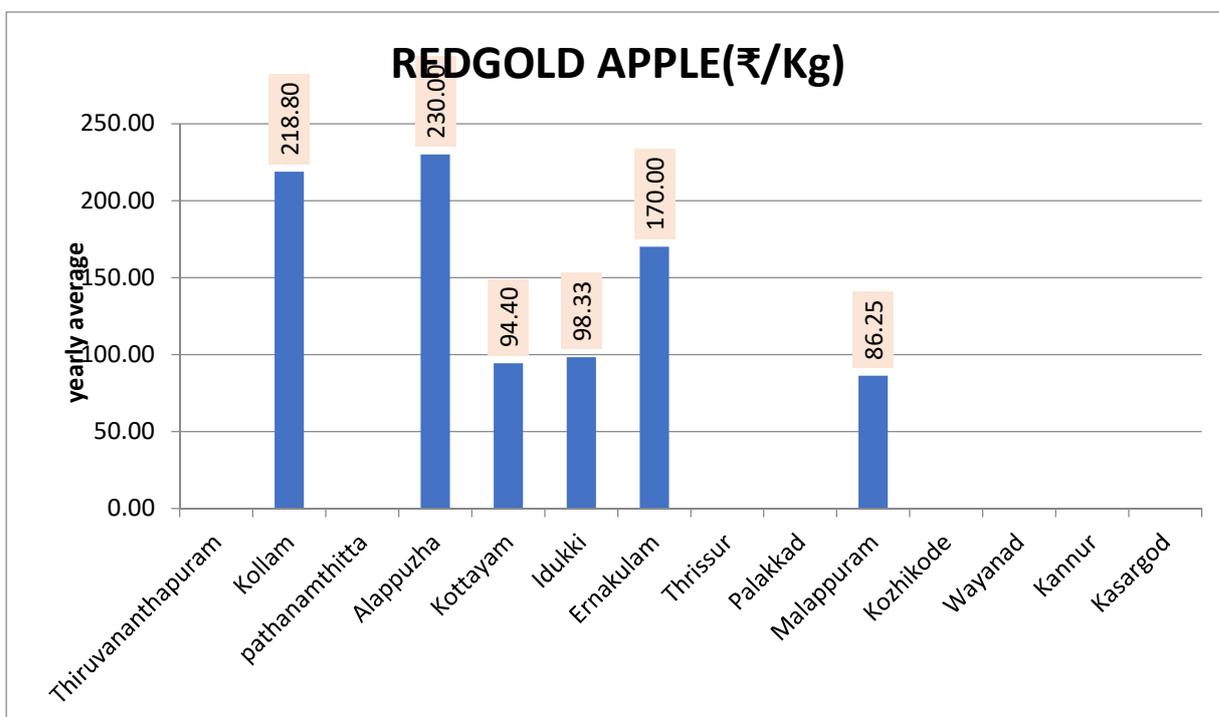

Table116- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

REDGOLD APPLE(₹/Kg)

The prices of Apple (Red Gold variety) in Kerala during the year showed significant district-wise and seasonal variations, with an overall state average of ₹149.63 per kg. Early in the year, prices remained high, especially in Kollam, where rates were steady at ₹200 per kg from February to April and rose sharply to ₹250 in October, resulting in a high yearly average of ₹218.80. Ernakulam displayed wide fluctuations, starting from ₹167.50 in March, peaking at ₹192.00 in July, and then gradually declining towards the end of the year, with a comparatively higher annual average of ₹170.00. In contrast, Kottayam and Idukki recorded lower and more stable prices, mostly ranging between ₹87.50 and ₹100.00, with yearly averages of ₹94.40 and ₹98.33 respectively. Malappuram showed a declining trend during mid-year, falling to ₹80.00 in July and September, and averaged ₹86.25 annually. Alappuzha recorded prices only during limited months, with rates increasing from ₹200.00 to ₹260.00, resulting in a yearly average of ₹230.00. Overall, Apple Red Gold prices in Kerala were higher during the beginning and end of the year, while comparatively lower prices were observed during the mid-year months.

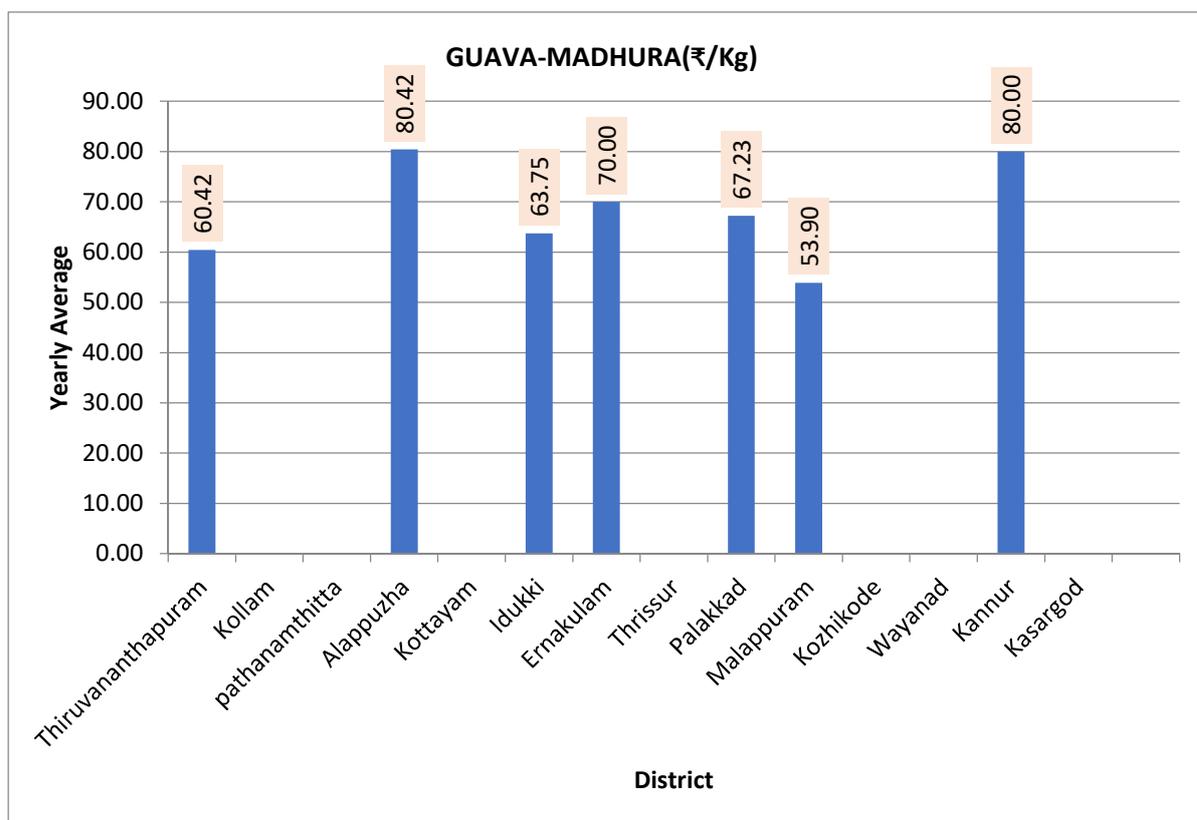

Table117- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

Guava- MADHURA(₹/Kg)

During the year, the price of Guava (Madhura variety) in Kerala showed moderate fluctuations with an overall state yearly average of ₹67.96 per kg. In Thiruvananthapuram, prices ranged from a low of ₹52.50 in March to a peak of ₹69.00 in April, with a yearly average of ₹60.42, indicating relatively stable and affordable rates compared to other districts. Alappuzha and Kannur recorded consistently higher prices throughout the year, each maintaining around ₹80 per kg. Idukki experienced mild variations, with prices increasing towards the end of the year and averaging ₹63.75 annually. Palakkad showed moderate fluctuations between ₹62.00 and ₹70.00, resulting in a yearly average of ₹67.23, closely aligning with the state trend. In contrast, Malappuram reported comparatively lower prices, declining to around ₹50.00 during August to October, with a yearly average of ₹53.90. Overall, the data indicates that Guava prices in Kerala remained largely stable across the year.

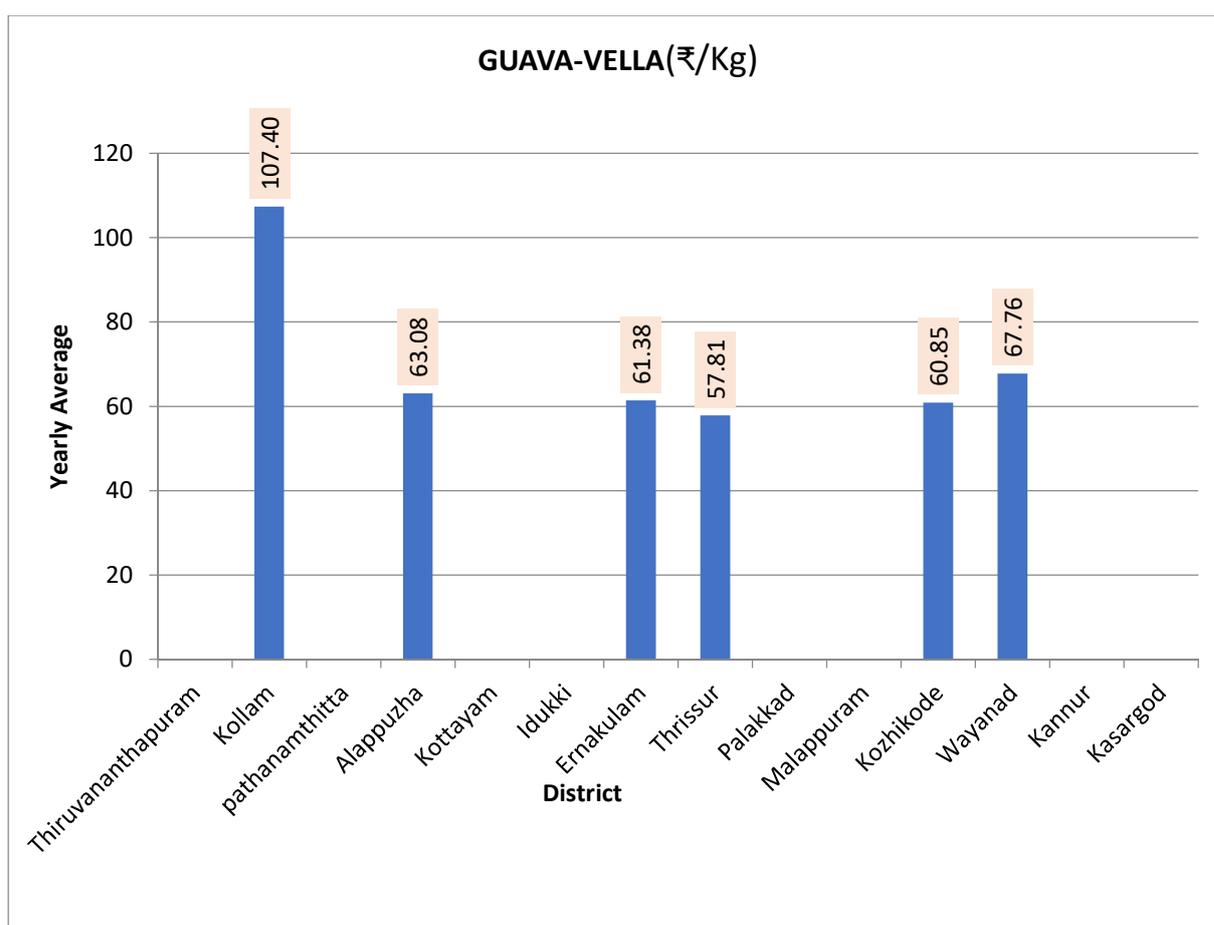

Table 118- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

VELLA-GUAVA(₹/Kg)

The price of Guava Vella in Kerala exhibits notable fluctuations, with Kollam recording the highest yearly average at 107.40, significantly above other districts. Mid-range prices are observed in Wayanad (67.76), Alappuzha (63.08), Ernakulam (61.38), Kozhikode (60.85), and Thrissur (57.81). However, Thiruvananthapuram, Pathanamthitta, Kottayam, Idukki, Palakkad, Malappuram, Kannur, and Kasaragod report zero yearly averages. The stark price differences highlight regional disparities in distribution and consumer preference. Strengthening supply chains and promoting awareness in underserved districts could help balance prices and expand the market for Guava Vella across Kerala.

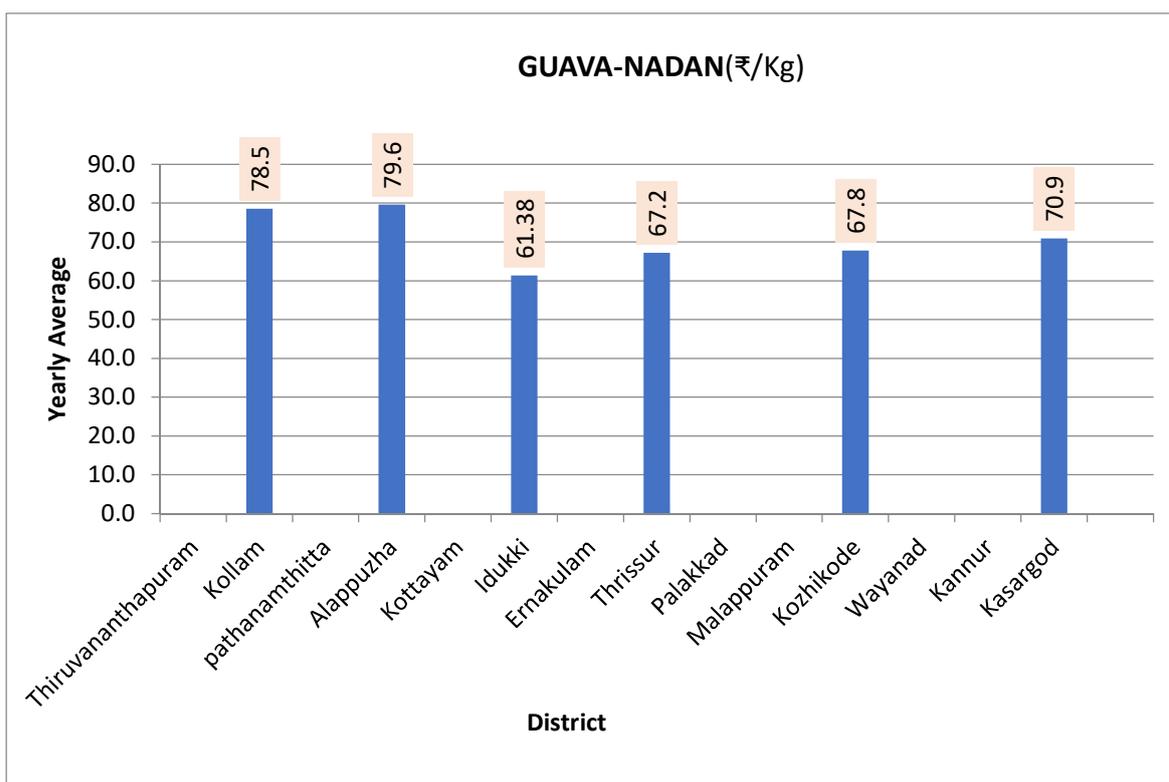

Table119- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

NADAN-GUAVA(₹/Kg)

The price distribution of Guava Nadan across Kerala shows significant regional variations, with Kollam (78.5), Alappuzha (79.6), and Kasaragod (70.9) emerging as the highest-priced markets. Mid-range prices are observed in Kozhikode (67.8), Thrissur (67.2), and Idukki (61.38), indicating steady but lower demand. Notably, Thiruvananthapuram, Pathanamthitta, Ernakulam, Palakkad, Malappuram, Wayanad, and Kannur report zero yearly averages. The absence of data for Kottayam further highlights gaps in market coverage. These fluctuations underscore the need for improved distribution networks and targeted marketing strategies to stabilize prices and expand the presence of Guava Nadan in underserved districts, ensuring more uniform accessibility and affordability across Kerala.

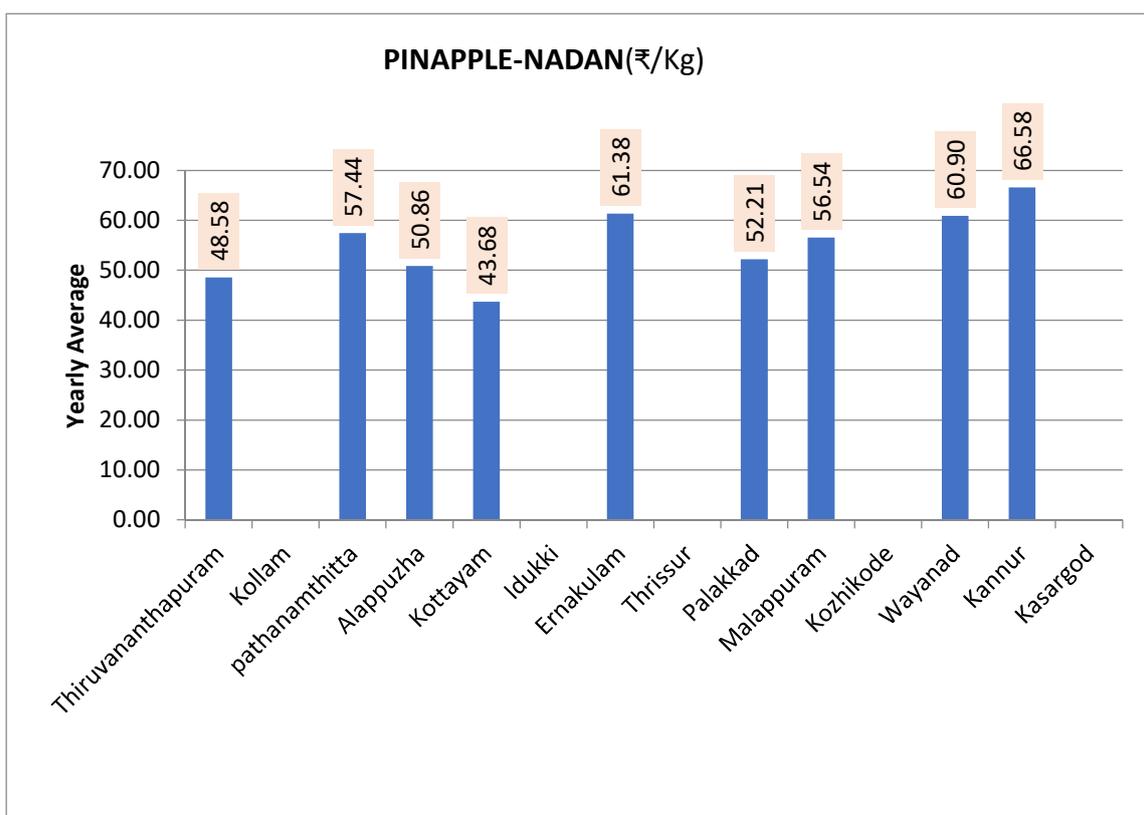

Table120- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

NADAN-PINEAPPLE(₹/Kg)

The price of Pineapple-Nadan in Kerala exhibits notable regional variations, with Kannur recording the highest yearly average at 66.58, followed by Ernakulam (61.38) and Wayanad (60.90), Central and southern regions show moderate pricing, including Pathanamthitta (57.44), Malappuram (56.54), Palakkad (52.21), Alappuzha (50.86), Thiruvananthapuram (48.58), and Kottayam (43.68). However, Kollam, Thrissur, Kozhikode, and Kasaragod report zero averages, indicating either no market activity or data gaps, while Idukki lacks recorded data entirely. These fluctuations likely reflect disparities in local production, distribution efficiency, and consumer preferences. Improving supply chain connectivity to underserved districts could help stabilize prices and ensure more equitable market access across Kerala.

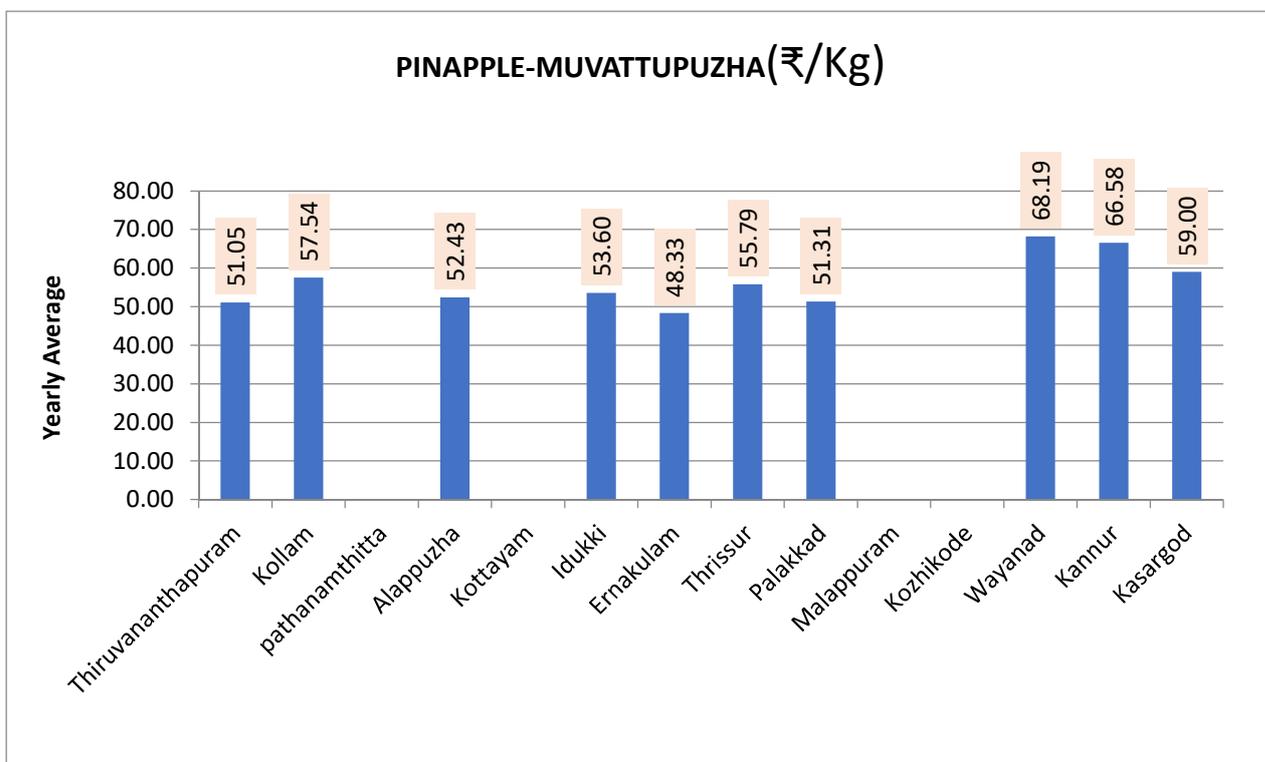

Table121- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

Pineapple-Muvattupuzha (₹/Kg)

Prices of Pineapple (Muvattupuzha variety) in Kerala showed marked seasonal variation during the year, with the state average price recorded at ₹55.35. Prices were moderate in the early months, increased sharply by March and April (₹62.92 and ₹62.11), and declined during May, reflecting higher arrivals. A strong rise was again observed in the monsoon and post-monsoon months, with prices peaking in September at ₹75.34, before easing towards the end of the year. District-wise, Kannur, Kasargod, and Thrissur recorded higher annual average prices, while comparatively lower rates were observed in Ernakulam, Alappuzha, and Thiruvananthapuram. Overall, pineapple prices remained volatile, largely influenced by seasonal supply patterns and market demand.

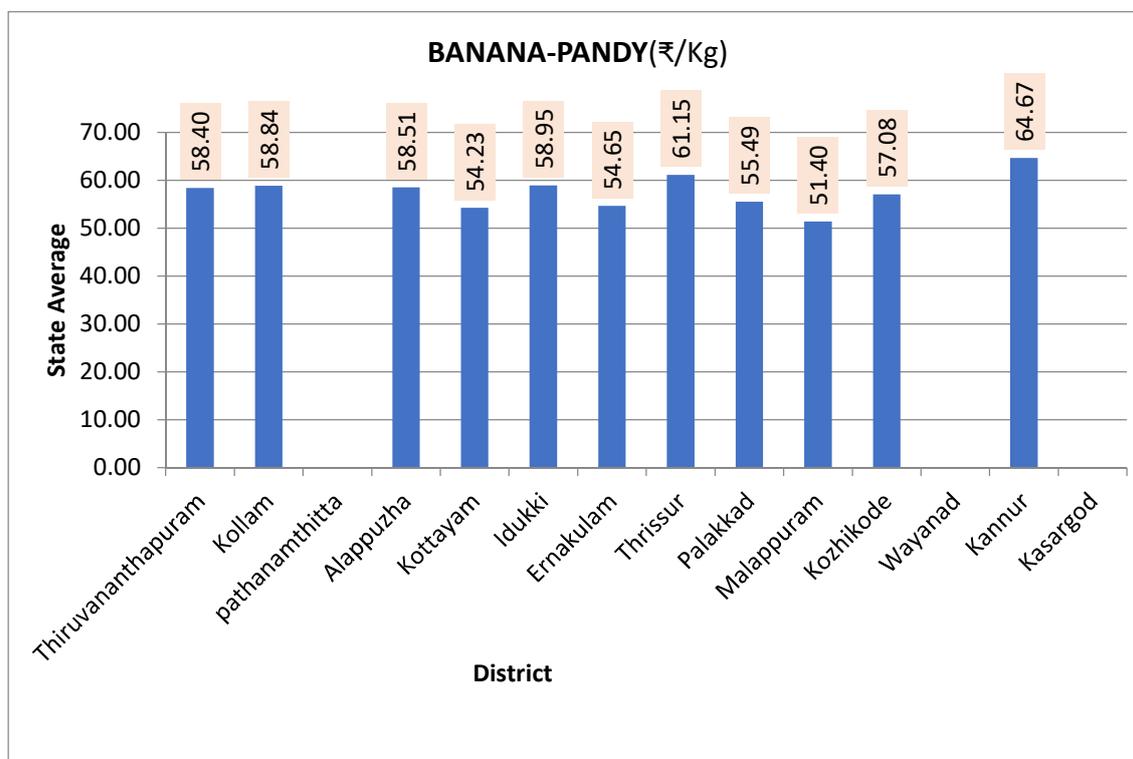

Table122- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

BANANA PANDY(₹/Kg)

The price of Banana-Pandy in Kerala shows moderate fluctuations across districts, with Thrissur (61.15) and Kannur (64.67) recording the highest yearly averages. Most other districts, including Thiruvananthapuram (58.40), Kollam (58.84), Alappuzha (58.51), Idukki (58.95), and Kozhikode (57.08), exhibit stable mid-range prices. Lower prices are observed in Kottayam (54.23), Ernakulam (54.65), Palakkad (55.49), and Malappuram (51.40). Notably, Pathanamthitta, Wayanad, and Kasargod lack data, indicating potential market gaps or negligible sales. These variations reflect regional differences in production, distribution, and consumer preferences. Improving supply chain connectivity in underserved areas could help stabilize prices and ensure broader market access for Banana-Pandy across Kerala.

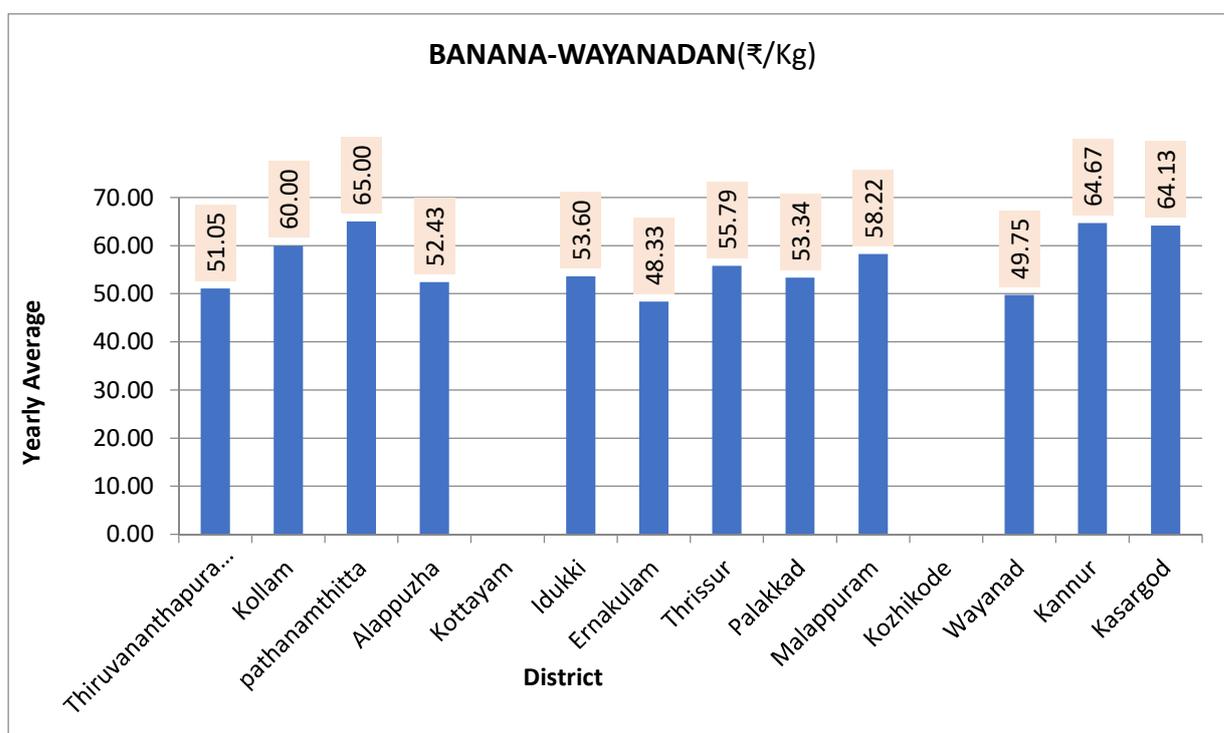

Table123- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

WAYANADAN-BANANA(₹/Kg)

The price analysis of Banana-Wayanadan reveals distinct regional patterns across Kerala. Pathanamthitta records the highest yearly average at 65.00, followed closely by Kannur (64.67) and Kasaragod (64.13). Mid-range prices dominate in Kollam (60.00), Malappuram (58.22), Thrissur (55.79), Palakkad (53.34), Idukki (53.60), Alappuzha (52.43), and Thiruvananthapuram (51.05), indicating stable market penetration. Notably, Wayanad (49.75) and Ernakulam (48.33) report the lowest prices, likely due to higher local production or efficient distribution. Kottayam and Kozhikode lack data, pointing to potential supply gaps or negligible market activity. The price disparities highlight the influence of regional production capacities, transportation costs, and consumer preferences. Strategic interventions in supply chain logistics and market expansion could help stabilize prices and improve accessibility in underserved areas.

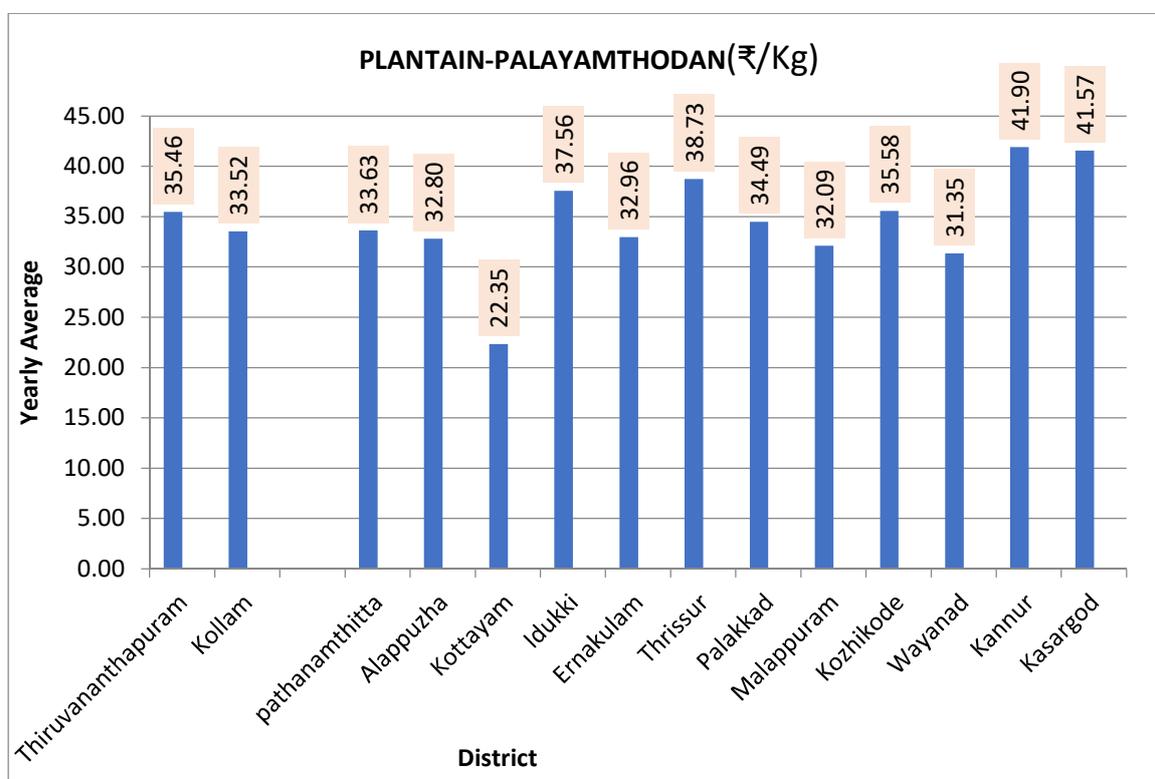

Table124- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

PLANTAIN-PALAYAMTHODAN (₹/Kg)

The price analysis of Plantain-Palayamthodan reveals a clear north-south divide in Kerala's markets. Kannur (41.90) and Kasaragod (41.57) in the north command the highest prices, likely due to transport costs from southern growing regions or stronger demand. Central districts like Thrissur (38.73) and Idukki (37.56) also show elevated prices, while southern districts (Thiruvananthapuram 35.46, Kollam 33.52, Pathanamthitta 33.63) maintain mid-range values. Notably, Kottayam (22.35) emerges as the lowest-priced market, potentially due to local oversupply or efficient distribution. The narrow price band (22.35-41.90) compared to other fruits suggests relatively stable market dynamics, though the 87% premium between highest and lowest prices still indicates significant regional disparities. The consistency in mid-range prices across most districts (32-36) points to established trade routes, while the northern premium may reflect the additional costs of transporting perishable plantains over longer distances.

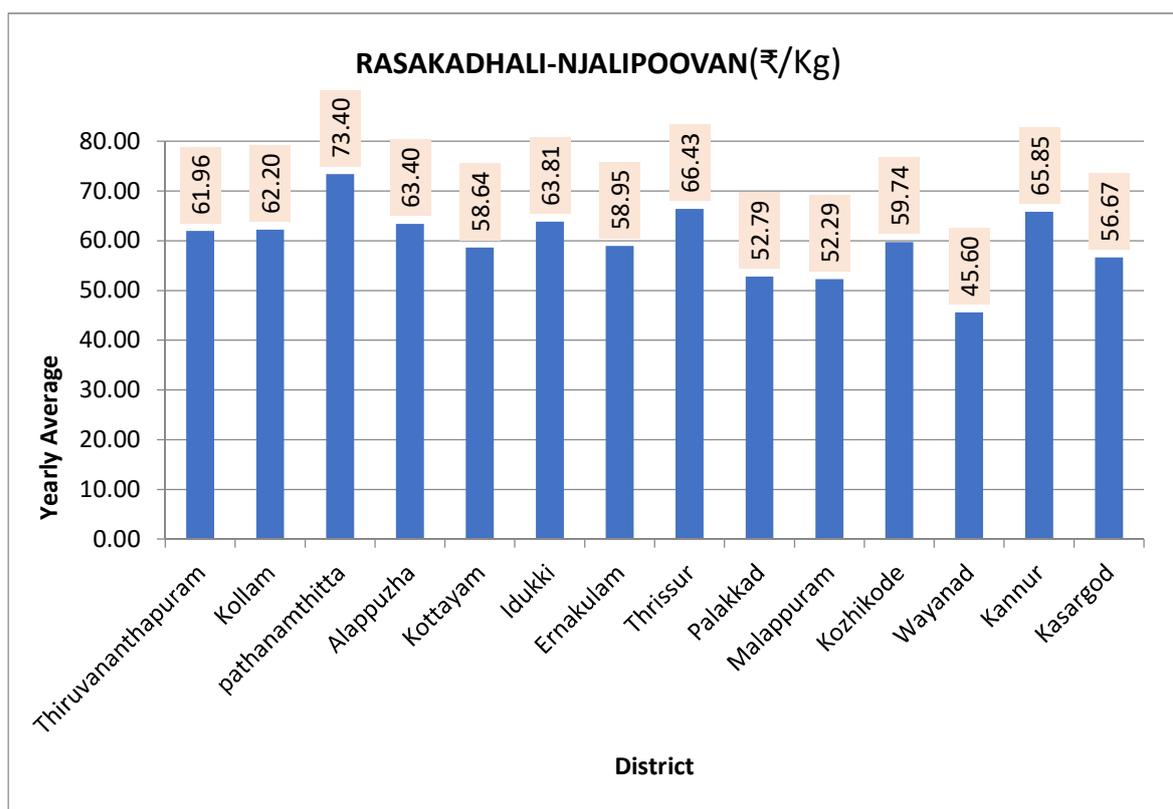

Table125- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

Rasakadhali-Njalipoovan (₹/Kg)

The price trend of Rasakadhali–Njalipoovan across Kerala shows a clear seasonal pattern during the year. At the state level, the average price increased steadily from ₹44.48 per kg in January to ₹59.36 in April, followed by a slight moderation in May. Prices then rose sharply during the monsoon months, reaching a peak of ₹72.99 in September, before gradually declining towards ₹59.64 in December. District-wise, Pathanamthitta recorded the highest annual average price (₹73.40), followed by Thrissur (₹66.43) and Kannur (₹65.85). In contrast, Wayanad reported the lowest yearly average price (₹45.60), reflecting relatively stable availability. Overall, the annual state average price stood at ₹60.12 per kg, highlighting higher prices during the mid-year months and comparatively lower rates during the beginning and end of the year.

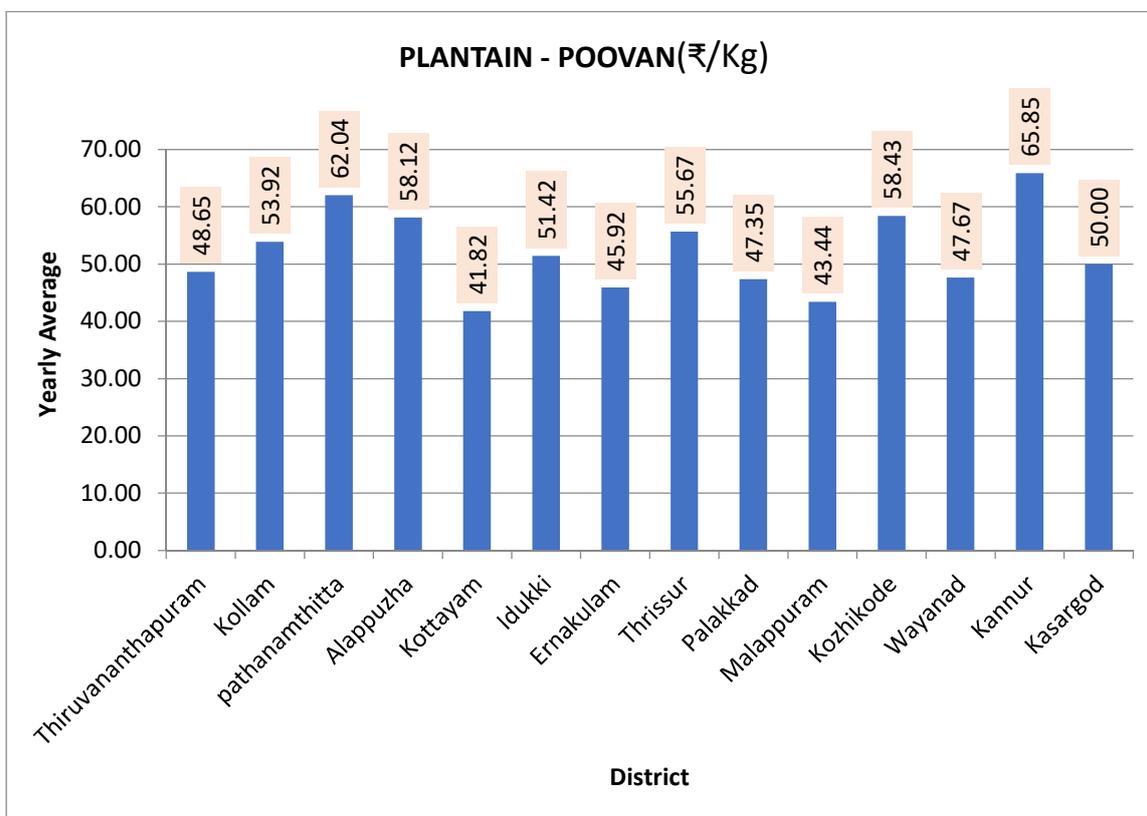

Table126- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

PLANTAIN-POOVAN (₹/Kg)

The price analysis of Plantain-Poovan in Kerala reveals significant regional disparities, with Kannur (65.85) and Pathanamthitta (62.04) emerging as premium markets. Other districts with above-average prices include Alappuzha (58.12), Kozhikode (58.43), and Thrissur (55.67). Mid-range prices are observed in Kollam (53.92), Idukki (51.42), Kasaragod (50.00), Thiruvananthapuram (48.65), Palakkad (47.35), and Wayanad (47.67). Notably, Kottayam (41.82), Ernakulam (45.92), and Malappuram (43.44) report the lowest prices, potentially due to higher local production or efficient distribution networks. The price range (41.82 to 65.85) highlights a 57% premium for the highest-priced districts. Strategic interventions to improve supply efficiency in high-demand areas like Kannur and Pathanamthitta could help stabilize prices and ensure equitable market access across Kerala.

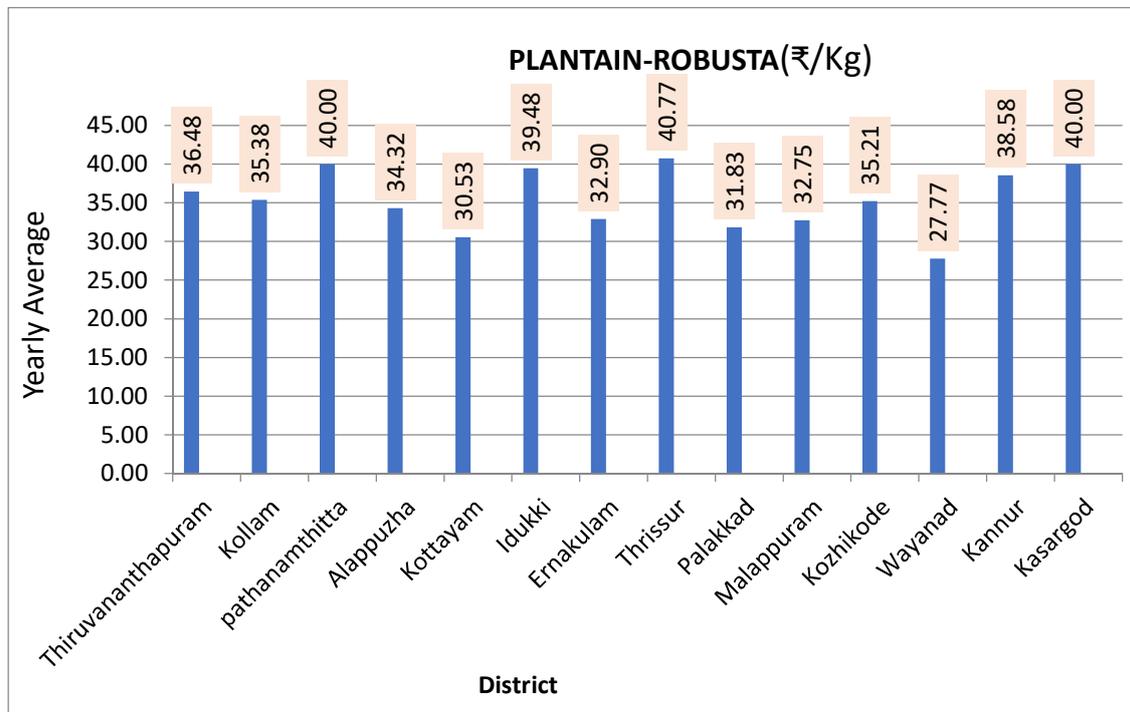

Table127- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

ROBUSTA-PLANTAIN(₹/Kg)

Prices of Plantain (Robusta variety) in Kerala showed a clear seasonal pattern during the year, with the state average price recorded at ₹35.07. Prices remained relatively stable during the first quarter, averaging below ₹32, and began to rise from June onwards, reflecting increased demand and seasonal factors. The highest prices were observed during August (₹44.62), after which rates gradually declined in the post-monsoon and winter months. District-wise, Thrissur, Pathanamthitta, and Idukki recorded higher annual average prices, while Wayanad and Palakkad reported comparatively lower averages. Overall, plantain prices exhibited moderate volatility, with a pronounced mid-year peak followed by stabilization towards the end of the year.

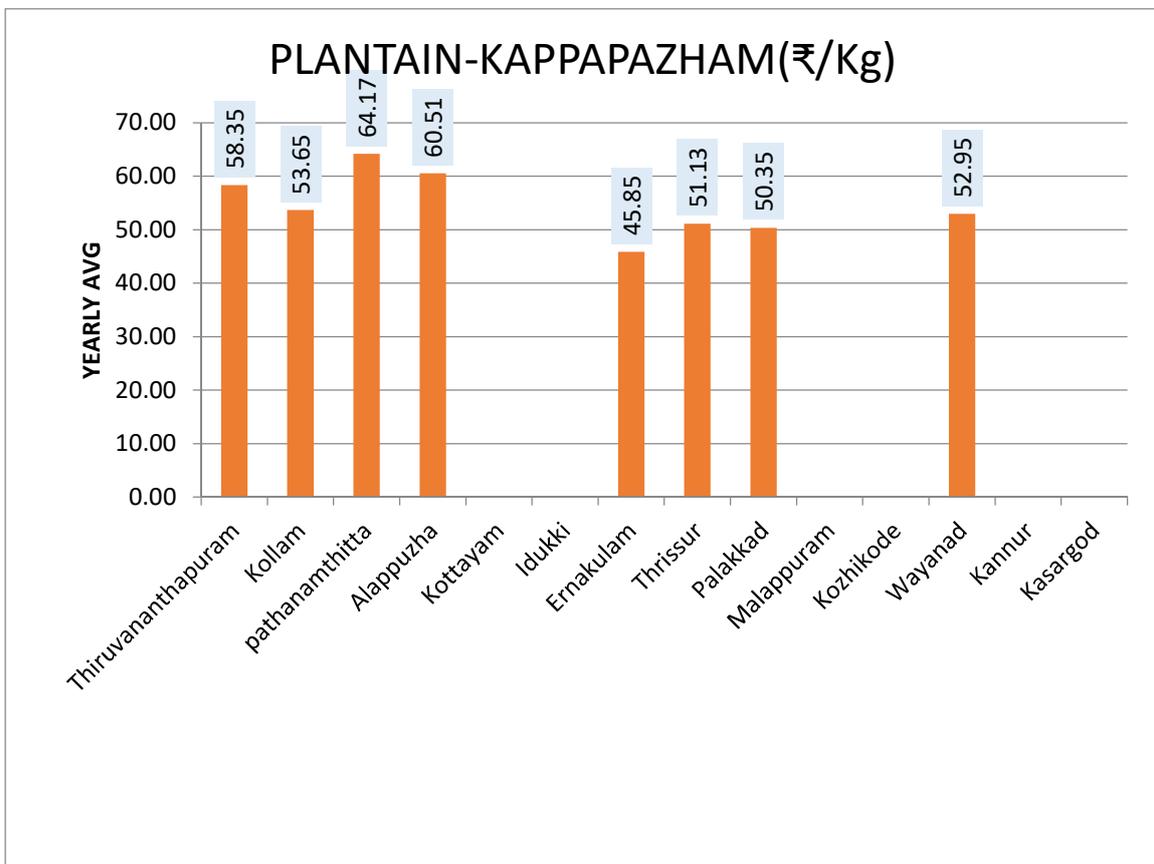

Table 128- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

PLANTAIN-KAPPAPAZHAM (₹/Kg)

The price analysis of Plantain-Kappapazham reveals stark regional disparities, with Pathanamthitta (64.17) and Alappuzha (60.51) emerging as premium markets, likely due to strong demand or limited supply. Thiruvananthapuram (58.35) and Wayanad (52.95) also show relatively high prices, while Thrissur (51.13), Palakkad (50.35), Kollam (53.65), and Ernakulam (45.85) fall within a moderate range. Notably, Kottayam, Idukki, Malappuram, Kozhikode, Kannur, and Kasaragod report zero yearly averages, indicating either no market presence or negligible sales. The significant price gap between active markets (45.85 to 64.17) and inactive zones highlights uneven distribution networks and varying consumer preferences. Strategic interventions to improve supply chain efficiency in underserved districts could help stabilize prices and expand market access for Plantain-Kappapazham across Kerala.

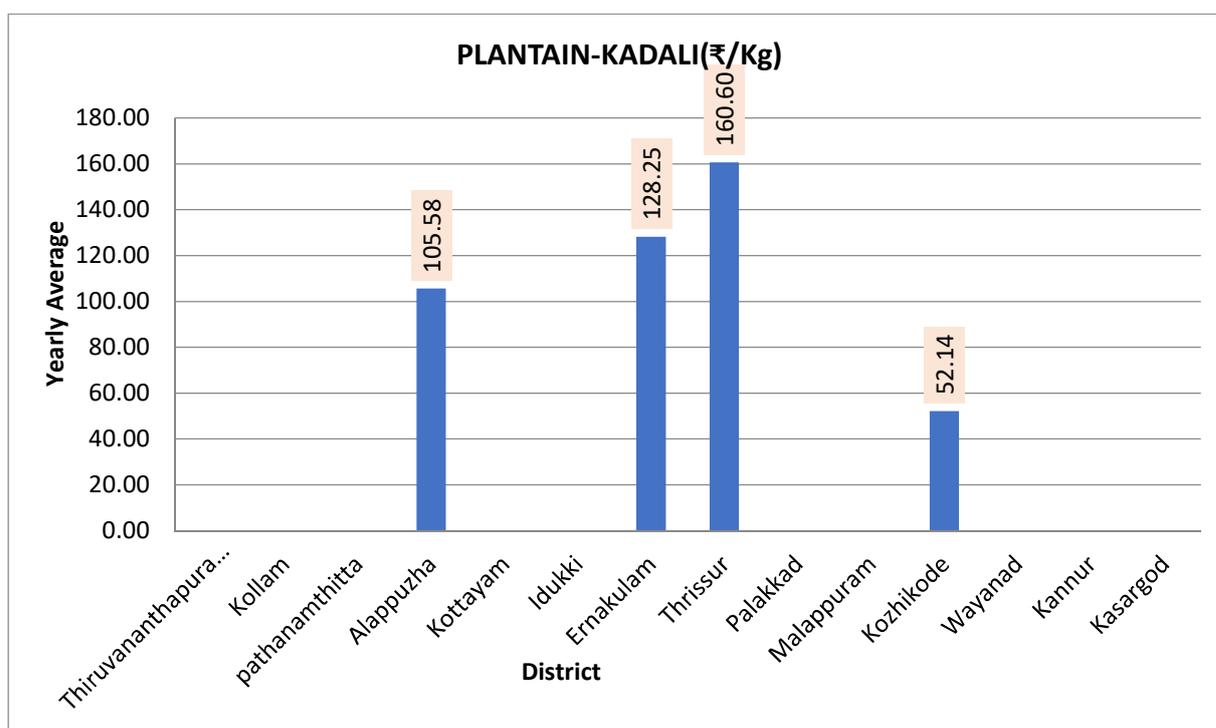

Table 129- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

Plantain-Kadali (₹/Kg)

The price trend of Plantain–Kadali in Kerala shows noticeable variation across districts and months, with data availability limited to a few regions. At the state level, the average price remained relatively high throughout the year, increasing from ₹112.50 per kg in January to a peak of ₹133.33 in May, followed by moderate fluctuations during the remaining months and closing at ₹116.75 in December. Among the reporting districts, Thrissur recorded the highest annual average price at ₹160.60 per kg, with prices rising sharply during the mid-year months and peaking in August. Ernakulam also showed consistently high prices with a yearly average of ₹128.25, while Alappuzha maintained comparatively moderate but stable prices, averaging ₹105.58 over the year. In contrast, Kozhikode reported significantly lower prices from June onwards, with an annual average of ₹52.14 per kg. Overall, the annual state average price stood at ₹118.72 per kg, reflecting higher prices during the summer and early monsoon months and moderate easing towards the end of the year

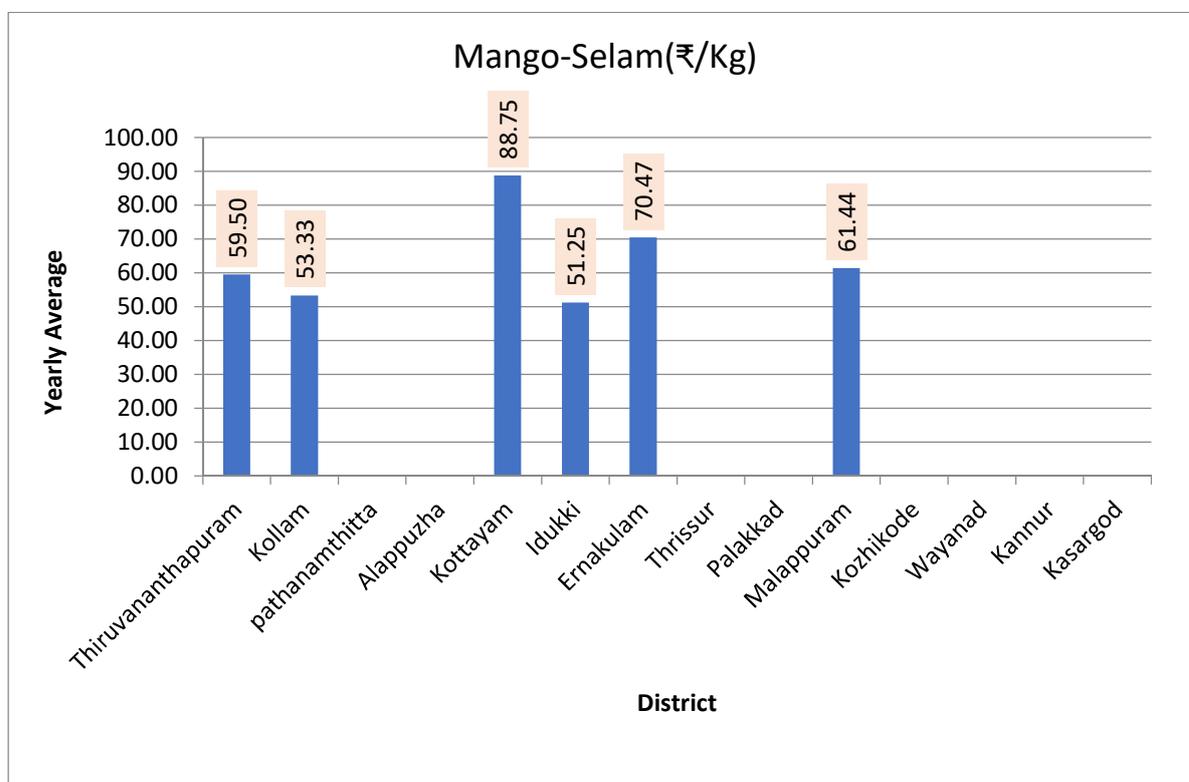

Table130- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

SALEM-MANGO(₹/Kg)

The price analysis of Mango Selam reveals significant regional variations, with Kottayam (88.75) emerging as the highest-priced market—surpassing even the state average (77.85). Ernakulam (70.47) and Malappuram (61.44) also command premium prices, while Thiruvananthapuram(59.50) and Kollam (53.33) show moderate pricing. Notably, Idukki (51.25) reports the lowest price among active markets, possibly due to proximity to growing areas. Half of the districts (Pathanamthitta, Alappuzha, Thrissur, Palakkad, Kozhikode, Wayanad, Kannur, Kasaragod) lack data entirely, indicating either negligible trade or complete market absence—a surprising gap for a popular fruit. The 72% price difference between Kottayam and Idukki highlights inefficiencies in distribution, with some markets potentially underserved while others face oversupply. Strategic expansion of supply chains to data-deficient regions could help balance prices and unlock this variety's full market potential across Kerala.

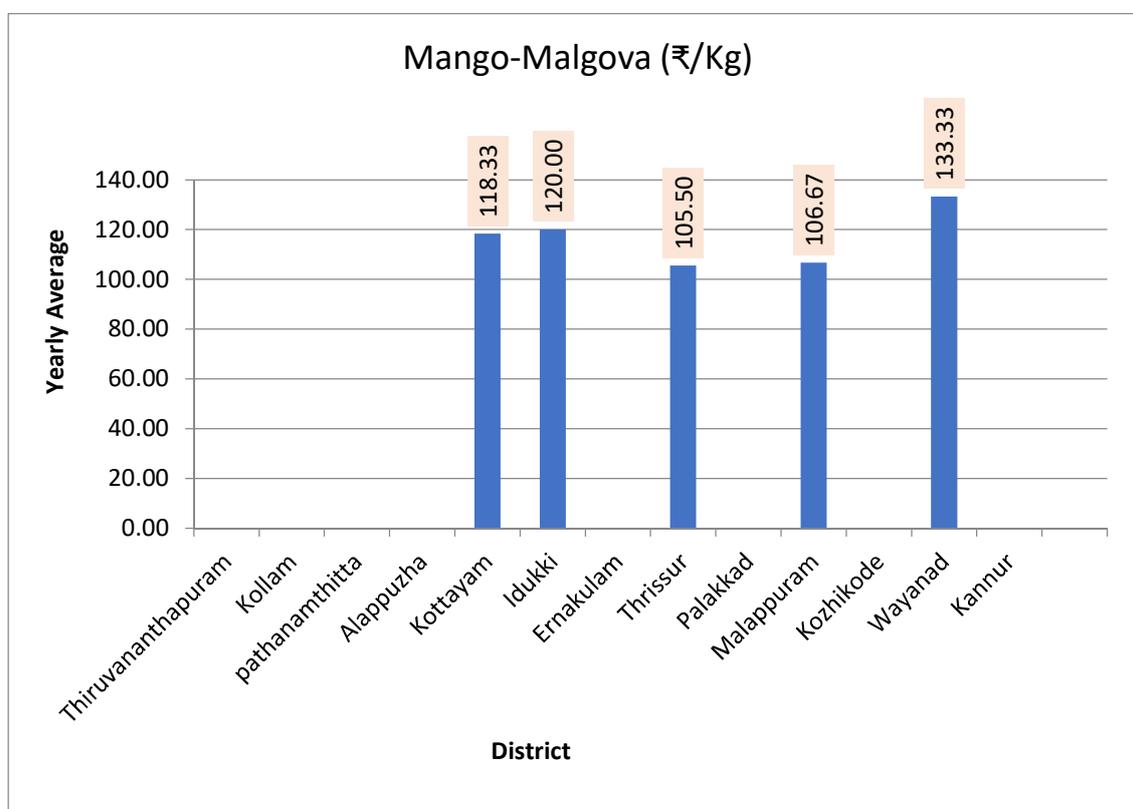

Table131- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

MALGOVA-MANGO(₹/Kg)

The price analysis of Mango Malgova reveals a highly concentrated market presence, with only five districts reporting data. Wayanad (133.33) commands the highest price, likely due to its premium quality produce or limited supply in high-altitude regions, followed by Idukki (120.00) and Kottayam (118.33). Malappuram (106.67) and Thrissur (105.50) show relatively stable but lower prices, possibly due to better local availability. Strikingly, nine districts lack data entirely, indicating either negligible trade or complete absence of this variety in major markets like Thiruvananthapuram, Ernakulam, and Kozhikode. The 26% price gap between Wayanad and Thrissur reflects regional disparities in supply chain efficiency or quality differences. Given Malgova's premium status, targeted efforts to expand cultivation and distribution to untapped districts could help stabilize prices and meet latent demand across Kerala. The current fragmentation suggests this variety remains underutilized despite its high-value potential.

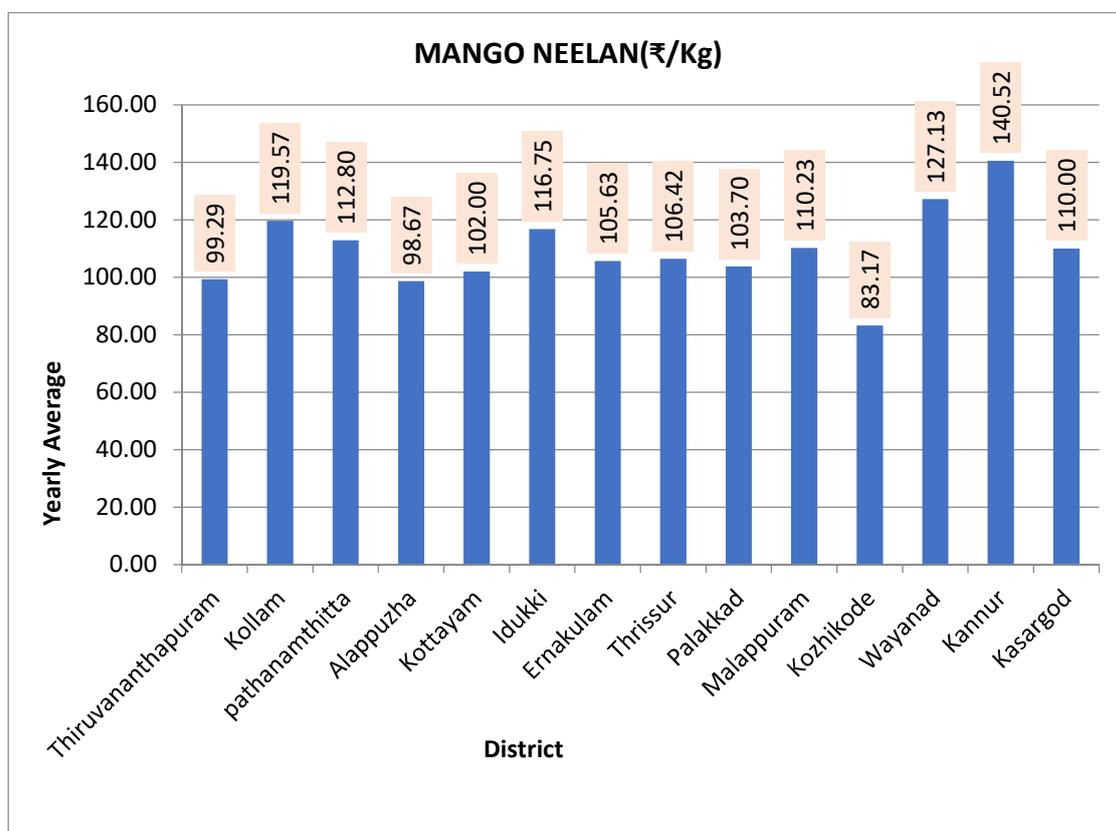

Table132- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

NEELAN-MANGO(₹/Kg)

The price trend of **Mango (Neelan variety)** in Kerala exhibited strong seasonal fluctuations during the year. At the state level, the average price declined from ₹122.71 per kg in January to a low of ₹75.09 in June. Thereafter, prices rose sharply during the post-harvest and lean months, reaching ₹130.61 in August and peaking at ₹143.13 in November before easing slightly to ₹131.06 in December. District-wise, Kannur recorded the highest annual average price at ₹140.52 per kg, followed by Wayanad (₹127.13) and Kollam (₹119.57). In contrast, relatively lower annual averages were observed in Kozhikode (₹83.17) and Alappuzha (₹98.67), reflecting better local availability during the season. Overall, the annual state average price stood at ₹115.45 per kg, highlighting a clear pattern of lower prices during the peak production months and higher prices during the off-season.

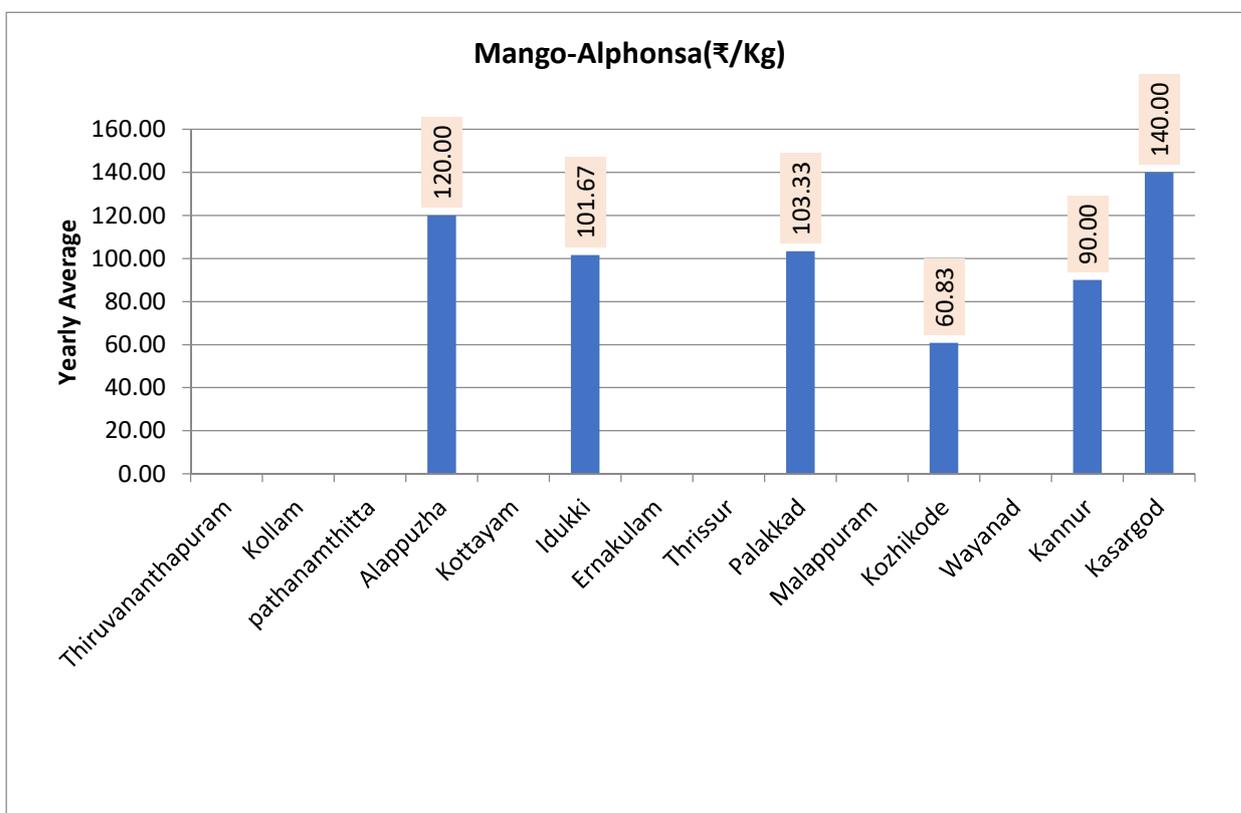

Table133- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

Mango Alphonso (₹/Kg)

The price trend of Mango (Alphonso variety) in Kerala was observed only during a limited seasonal window, reflecting its restricted availability in the markets. At the state level, prices were highest in March at ₹160.00 per kg and declined steadily to ₹126.25 in April, ₹93.33 in May, and ₹83.00 in June, before easing further to ₹80.00 in July, indicating increased arrivals during the peak harvest period. District-wise, Alappuzha recorded a stable price of ₹120.00 per kg during March–May, while Idukki showed a declining trend from ₹120.00 in April to ₹80.00 in June, with an annual average of ₹101.67. Palakkad exhibited price fluctuations during April–June, averaging ₹103.33 per kg, whereas Kozhikode reported comparatively lower prices, averaging ₹60.83. Kasargod recorded the highest district-level price at ₹200.00 per kg in March, reflecting early-season scarcity. Overall, the annual state average price stood at ₹108.52 per kg, highlighting a clear seasonal decline in prices as market arrivals increased.

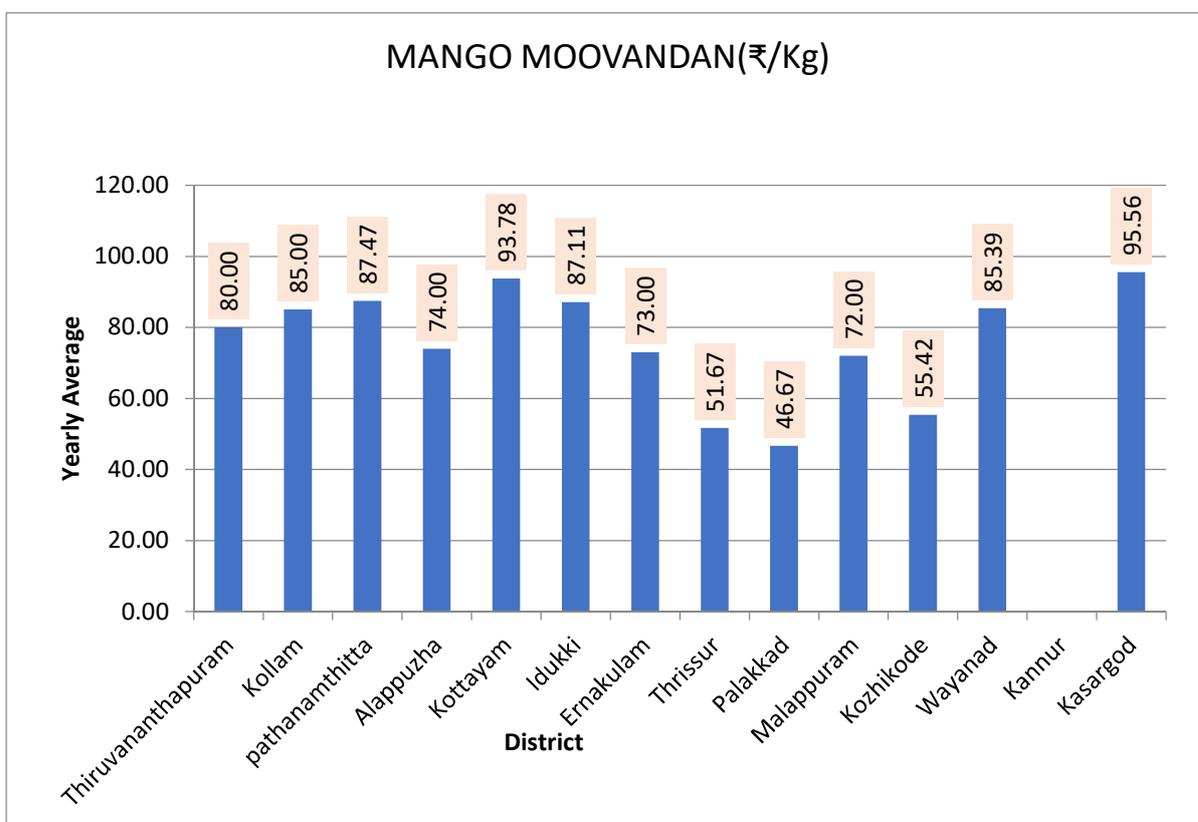

Table 134- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

MOOVANDAN -Mango (₹/Kg)

The price trend of Mango (Moovandan variety) in Kerala was observed mainly during the summer harvest months. At the state level, prices were relatively high in March at ₹101.90 per kg and declined steadily to ₹77.24 in April and further to ₹62.29 in May, indicating increased market arrivals. The lowest state average price was recorded in June at ₹60.00 per kg, after which prices showed a limited rebound in July. District-wise, Kasargod recorded the highest annual average price at ₹95.56 per kg, followed by Kottayam (₹93.78) and Pathanamthitta (₹87.47). In contrast, Palakkad (₹46.67) and Thrissur (₹51.67) reported lower annual average prices, reflecting better availability during the season. Overall, the annual state average price stood at ₹76.29 per kg, clearly indicating a downward price trend as the harvest progressed and supply increased.

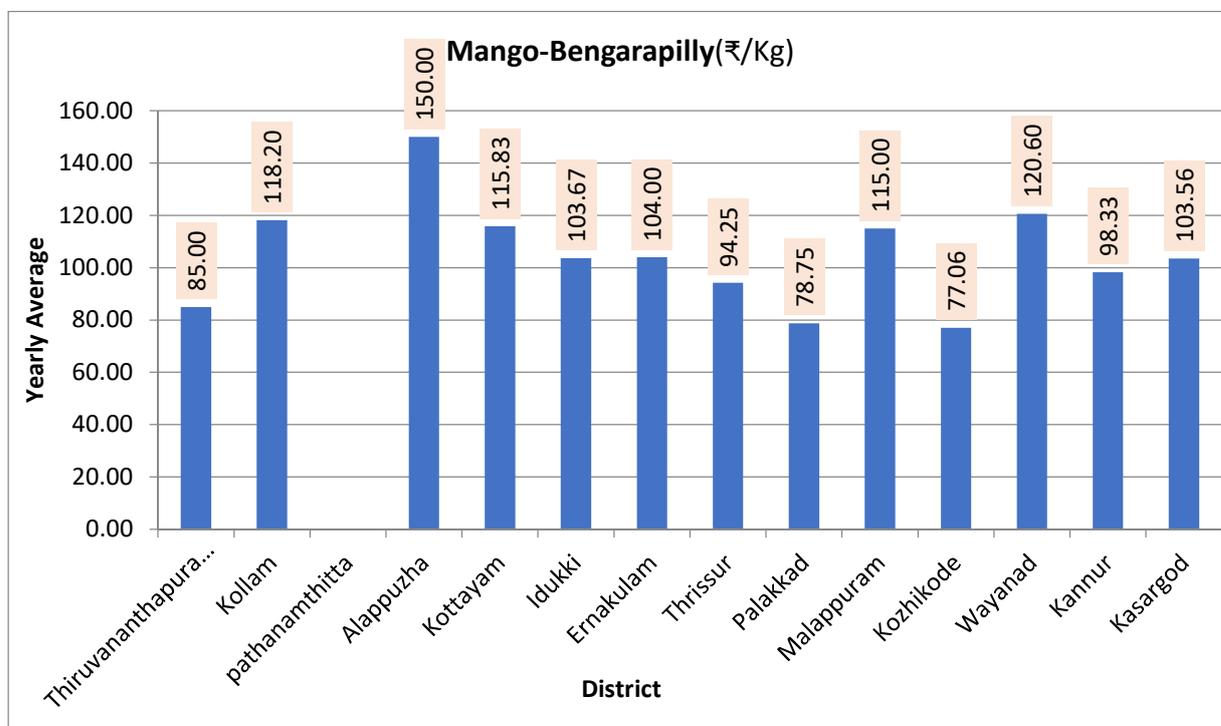

Table135- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

BANGARAPILLY (₹/Kg)

The price analysis of Mango Bangarapally reveals striking regional disparities, with Alappuzha (150.00) emerging as the highest-priced market. Other premium markets include Wayanad (120.60), Kollam (118.20), Malappuram (115.00), and Kottayam (115.83). Mid-range prices are observed in Idukki (103.67), Kasaragod (103.56), Ernakulam (104.00), Kannur (98.33), and Thrissur (94.25), while Thiruvananthapuram (85.00) and Palakkad (78.75) show more moderate pricing. Notably, Kozhikode (77.06) reports the lowest price—less than half of Alappuzha’s—potentially due to local oversupply or weaker demand. Pathanamthitta lacks data entirely, indicating negligible market presence. The 94% price gap between Alappuzha and Kozhikode highlights significant inefficiencies in distribution and regional demand-supply imbalances. Strategic interventions to improve supply chains in high-demand zones and stabilize production in low-price districts could help optimize market potential for this variety across Kerala.

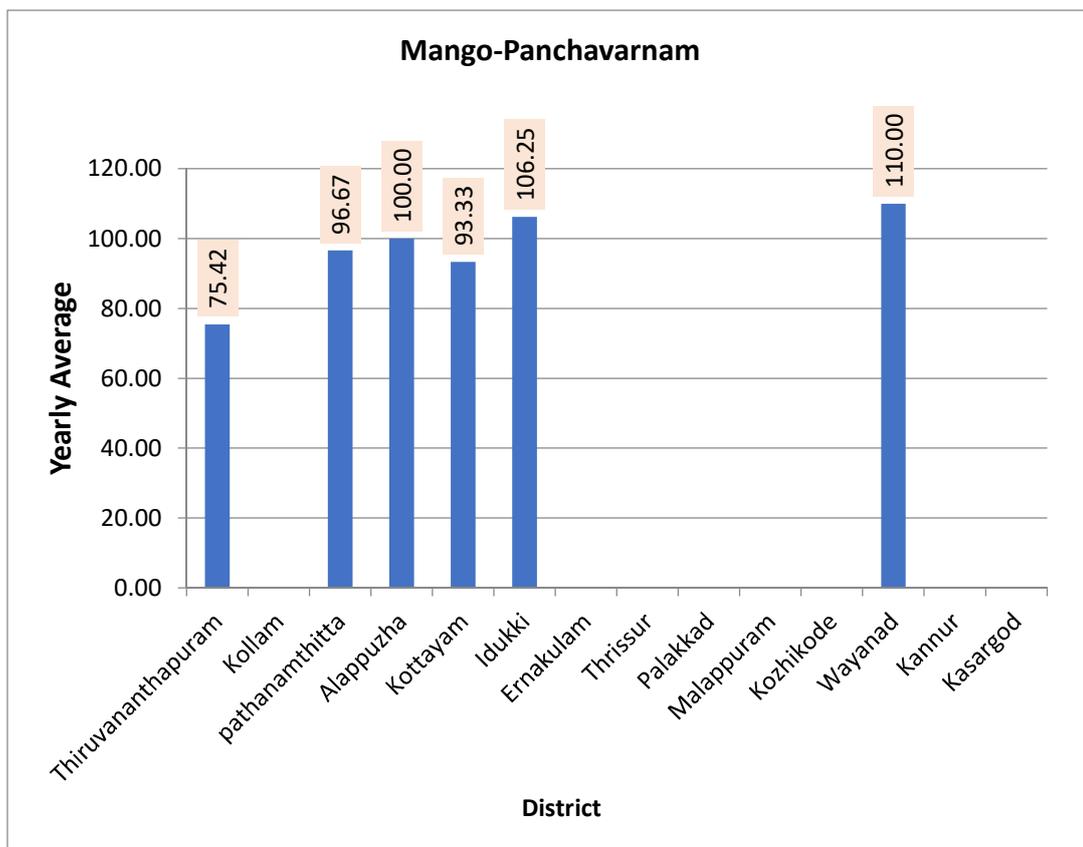

Table 136- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

PANCHAVARNAM(₹/Kg)

The price analysis of Mango Panchavarnam reveals significant regional variations with limited market penetration, as seven districts show no recorded data. Idukki (106.25) and Wayanad (110.00) command the highest prices, likely due to their high-altitude cultivation advantages or niche demand. Alappuzha (100.00) and Pathanamthitta (96.67) also show strong pricing, followed by Kottayam (93.33) and Thiruvananthapuram (75.42). The absence of data in major markets like Ernakulam, Thrissur, and Kozhikode suggests this variety may be under-commercialized or restricted to specific growing regions. The 46% price difference between Wayanad and Thiruvananthapuram indicates supply chain inefficiencies, with highland areas potentially benefiting from quality premiums while coastal markets face price depreciation. This fragmented distribution pattern highlights untapped potential for expanding cultivation and improving market access for this specialty mango across Kerala.

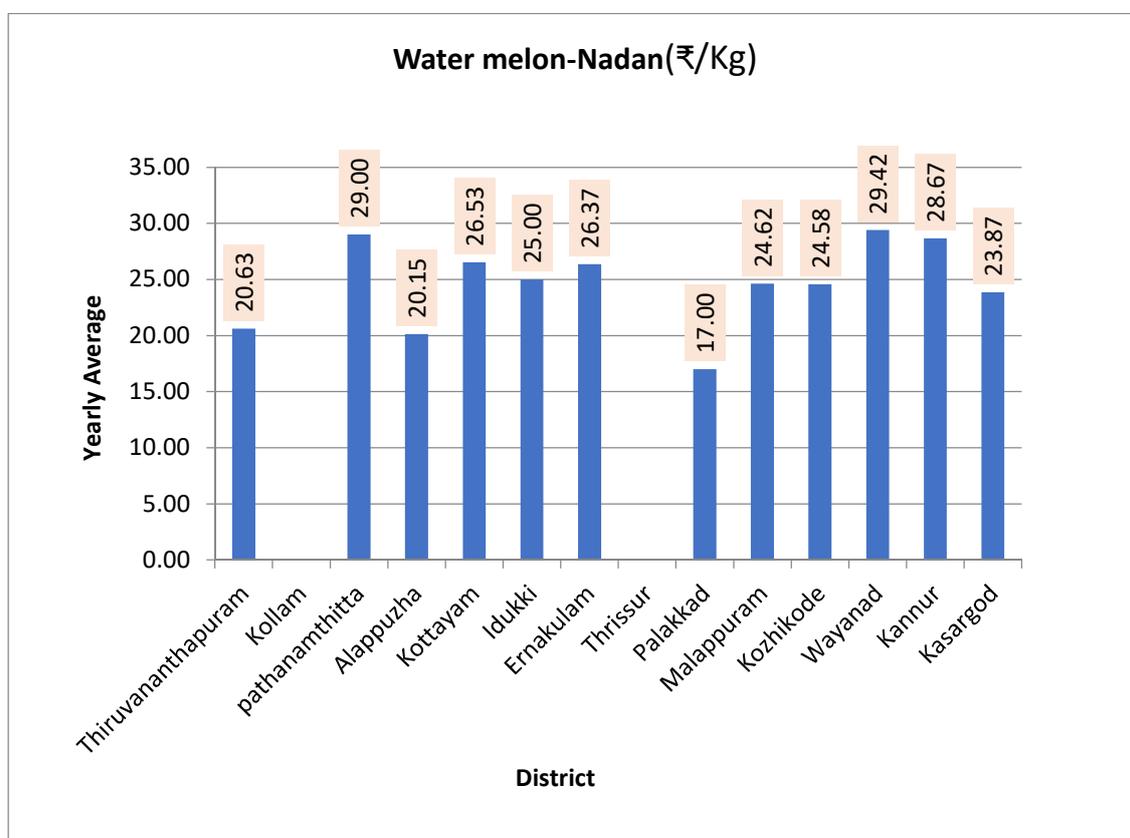

Table137- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

NADAN-WATERMELON(₹/Kg)

The price analysis of Watermelon-Nadan shows moderate fluctuations across Kerala, with Wayanad (29.42) and Pathanamthitta (29.00) emerging as the highest-priced markets. Northern districts like Kannur (28.67) and central areas such as Kottayam (26.53), Ernakulam (26.37), and Idukki (25.00) maintain stable mid-range prices, while coastal districts Alappuzha (20.15) and Thiruvananthapuram (20.63) report lower averages, possibly due to better local supply. Palakkad (17.00) stands out as the lowest-priced market, potentially benefiting from proximity to major growing areas. Notably, Kollam and Thrissur lack data, suggesting gaps in market coverage. The 73% price variation between Wayanad and Palakkad reflects the impact of geography on distribution costs, with inland/highland districts generally bearing higher prices. More consistent supply chain investments could help stabilize prices, especially in peak seasons.

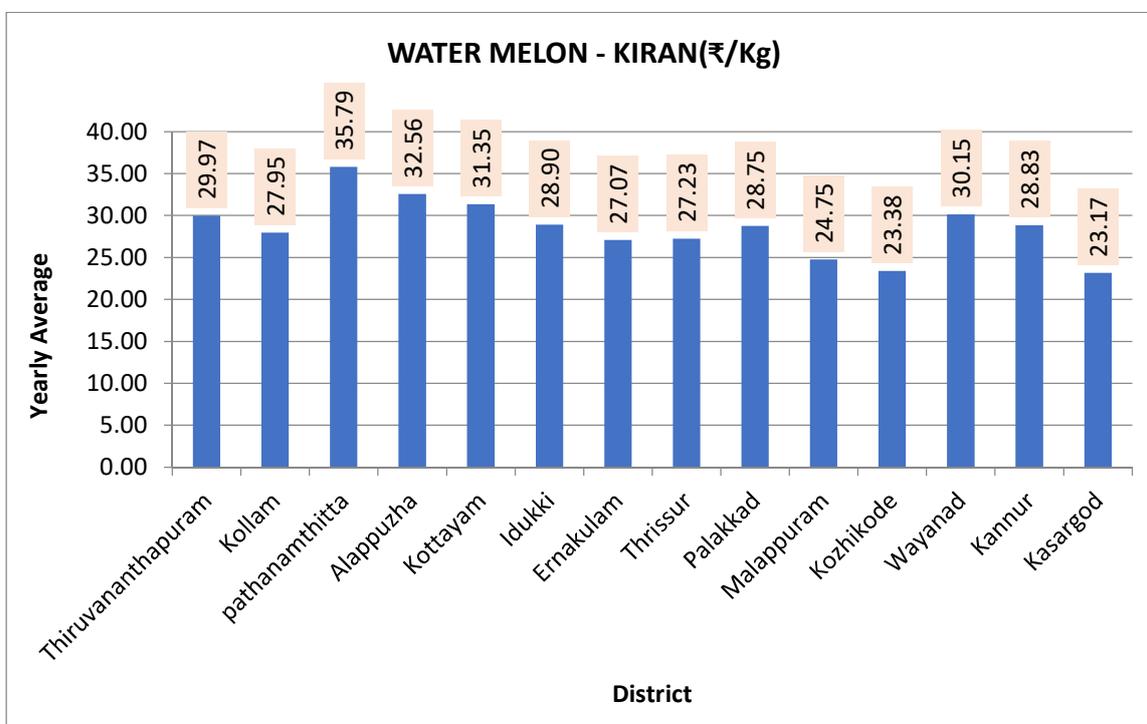

Table138- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

KIRAN-WATERMELON (₹/Kg)

The price analysis of Watermelon-Kiran reveals distinct regional patterns, with Pathanamthitta (35.79) emerging as the highest-priced market, likely due to transportation costs or strong local demand. Other districts with above-average prices include Alappuzha (32.56), Kottayam (31.35), and Wayanad (30.15). Southern and central districts like Thiruvananthapuram (29.97), Idukki (28.90), Palakkad (28.75), Kannur (28.83), Kollam (27.95), Thrissur (27.23), and Ernakulam (27.07) show moderate pricing. Notably, Malappuram (24.75), Kozhikode (23.38), and Kasargod (23.17) report the lowest prices, potentially due to higher local production or more efficient distribution networks. The 55% price difference between Pathanamthitta and Kasargod highlights the impact of regional supply chains and transportation costs. Targeted improvements in logistics, especially to highland and inland districts, could help stabilize prices and ensure more equitable market access for Watermelon-Kiran across Kerala.

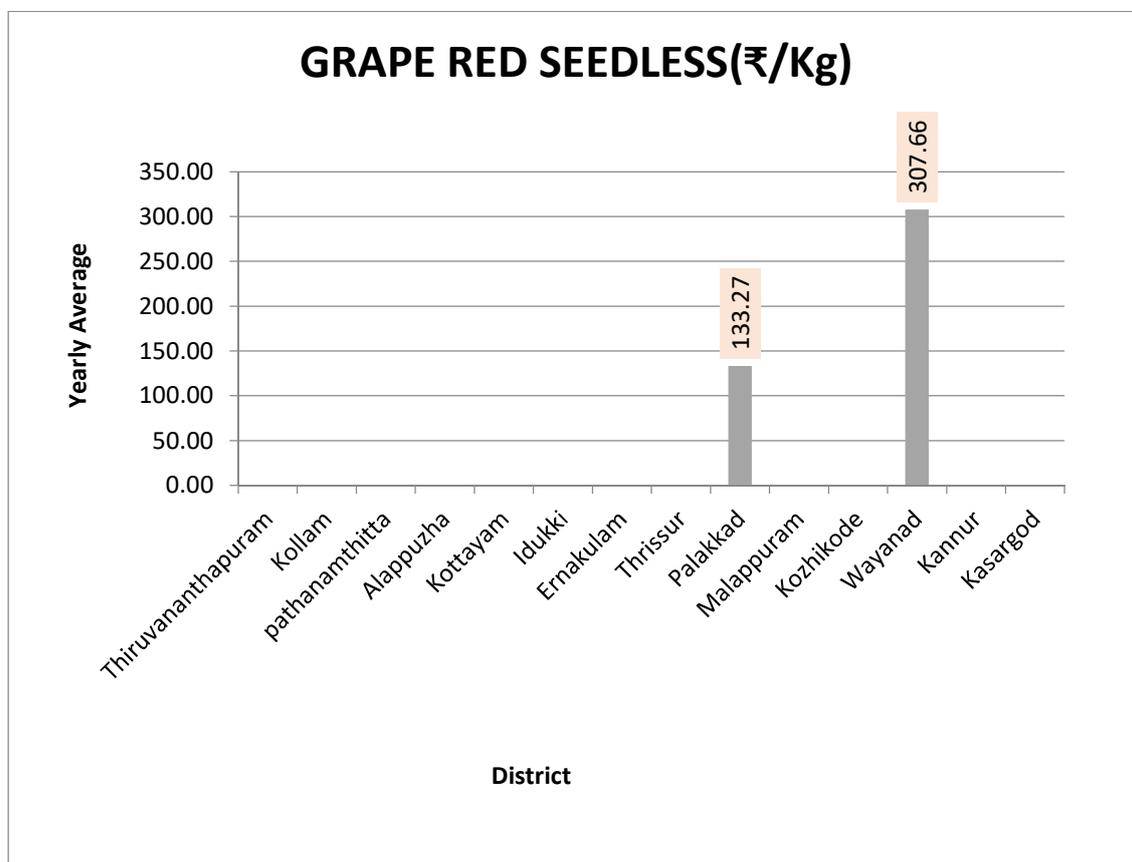

Table 139- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

Grapes-Red Seedless (₹/Kg)

The monthly price analysis of Grapes – Red Seedless in Kerala indicates limited availability across districts, with reported prices mainly from Palakkad and Wayanad. In Palakkad, prices were recorded from January to May, ranging between ₹120.00 and ₹150.00, with a yearly average of ₹133.27, reflecting relatively stable and moderate pricing during the availability period. In contrast, Wayanad exhibited significantly higher prices with wide fluctuations throughout the year. Prices peaked at ₹450.00 in January, declined steadily to ₹145.00 in June, and rose again during the later months, reaching ₹400.00–₹390.00 between September and December, resulting in a high yearly average of ₹307.66. Most other districts did not report prices, indicating either non-availability or insufficient market arrivals. The state average price shows considerable month-to-month variation, ranging from ₹125.00 in March to ₹400.00 in September and November, with a yearly average of ₹261.89, highlighting seasonal supply constraints and strong price volatility for red seedless grapes in the state.

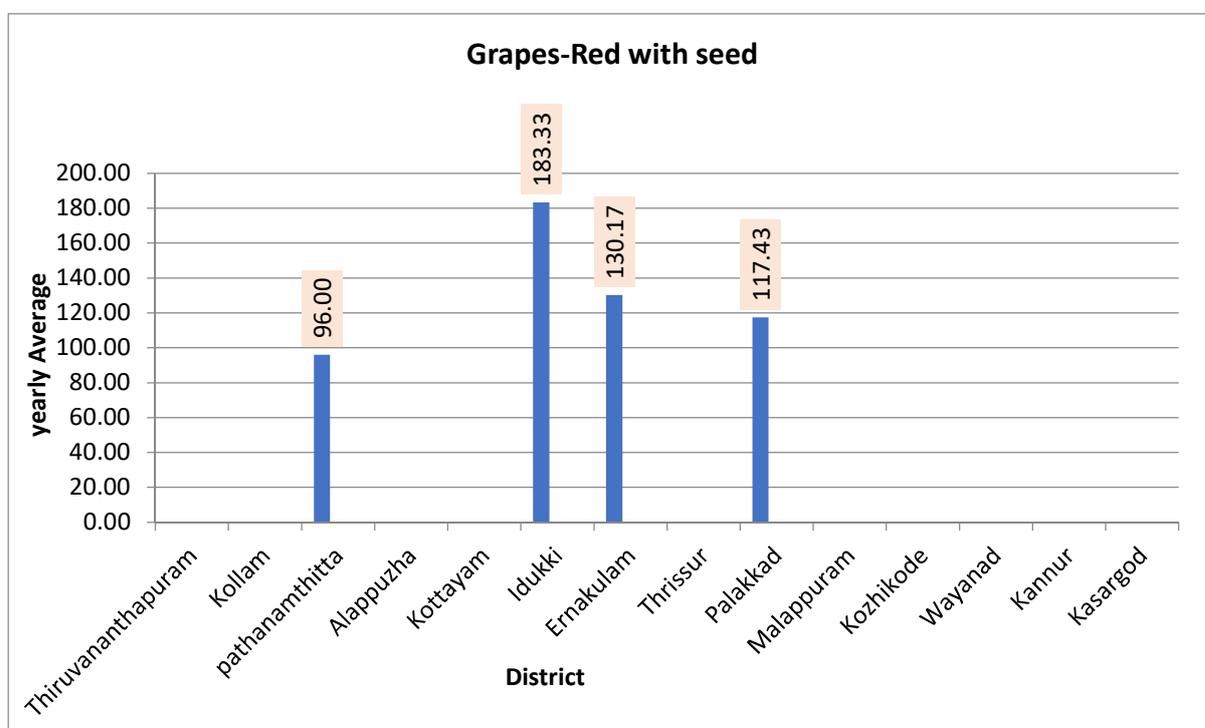

Table 140- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

Grapes-Red with Seed (₹/Kg)

The price analysis of Grapes-Red with Seed reveals a highly fragmented market, with only four districts reporting data—highlighting limited availability across Kerala. Idukki (183.33) emerges as the highest-priced market, likely due to transportation costs to this highland region or premium demand from tourist-centric areas like Munnar. Ernakulam (130.17) and Palakkad (117.43) show mid-range prices, possibly reflecting urban demand and transit hub dynamics, while Pathanamthitta (96.00) records the lowest price, potentially due to proximity to supply routes. The 91% price gap between Idukki and Pathanamthitta underscores significant regional disparities, while the absence of data in 11 districts—including major cities like Thiruvananthapuram and Kozhikode. For this non-native fruit, improving cold storage and distribution networks could help expand market reach and stabilize prices, especially in underserved urban centers. The current scarcity indicates both challenges and opportunities for growers and distributors.

Table 141- illustrates the dataset pertaining to the REPORT OF RETAIL FRUITS.

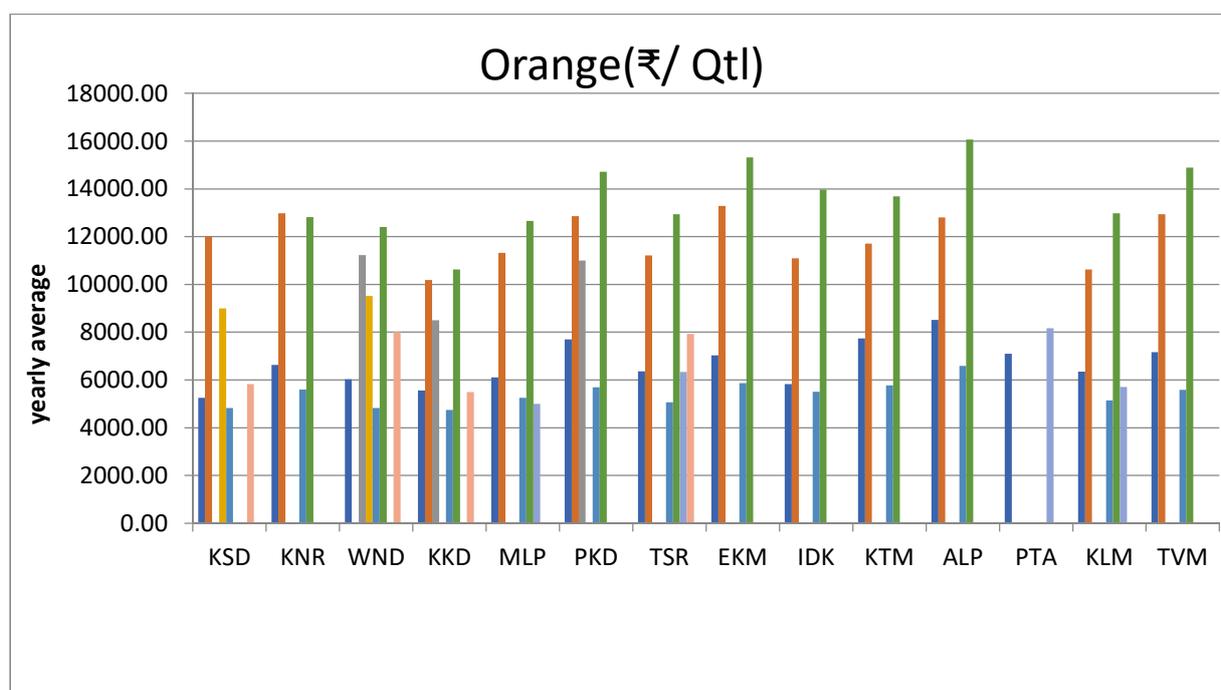

Wholesale Prices of Fruits

Orange (₹/ Qtl)

The wholesale prices of oranges in Kerala show wide variation across varieties and districts, reflecting differences in quality, source, and market demand. Among the varieties, Mathalam recorded the highest state average price at ₹13,590.45 per quintal, followed by Citrus oranges with a state average of ₹11,940.14 per quintal. Egyptian oranges also commanded a relatively high average price of ₹10,878.33 per quintal, though availability was limited to a few markets. Australian oranges were traded in very few districts, with a state average price of ₹9,470.00 per quintal. Nagpur oranges, which are more widely available, showed moderate pricing with a state average of ₹7,070.77 per quintal, while Musambi remained comparatively affordable at ₹5,414.81 per quintal. Limited-market varieties such as Amaravathy and Coorg oranges recorded state averages of ₹8,044.95 and ₹7,423.75 per quintal, respectively, with prices fluctuating due to restricted arrivals. Overall, the data indicate that imported and premium orange varieties fetch significantly higher prices in Kerala's wholesale markets, while commonly available domestic varieties ensure relative price stability across districts.

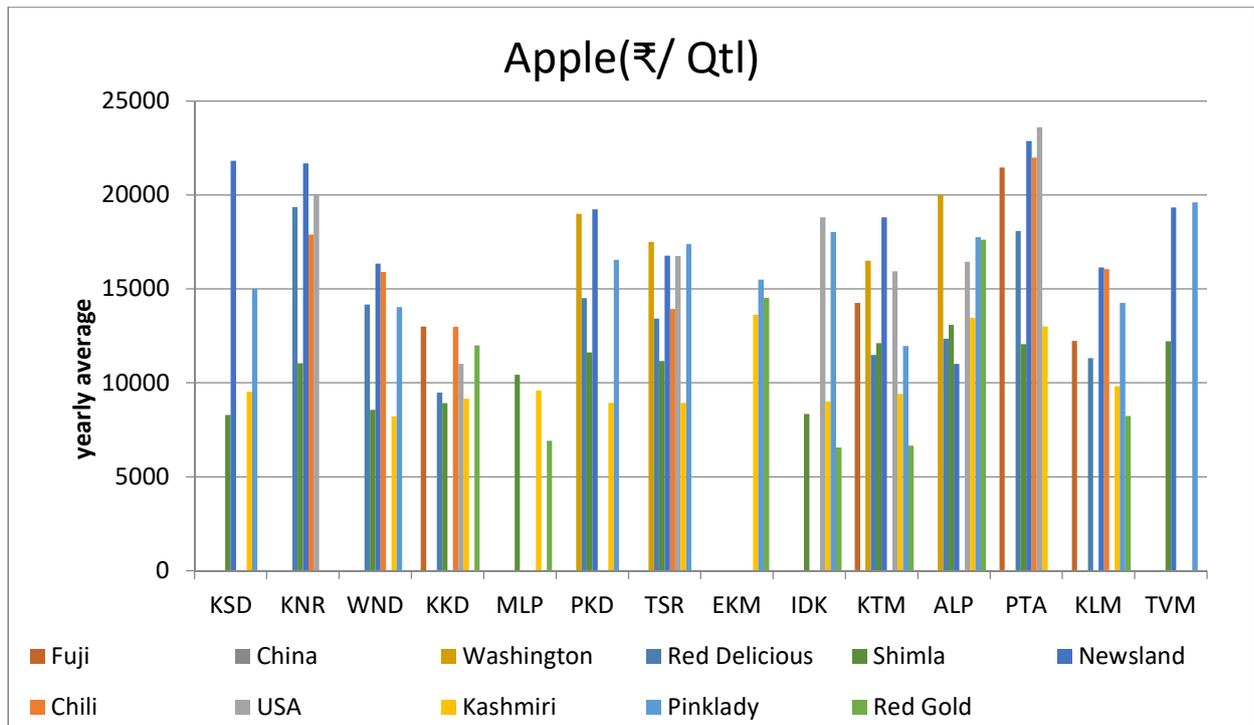

Table142- illustrates the dataset pertaining to the REPORT OF Wholesale Prices of Fruits

Apple(₹/ Qtl)

The wholesale prices of apples in Kerala exhibit significant variation across varieties and districts, reflecting differences in origin, quality, and market preference. Among the varieties, Newsland apples recorded the highest state average price at ₹19,719.14 per quintal, followed closely by USA apples with ₹19,811.76 per quintal. Fuji apples also commanded a high state average price of ₹19,612.08 per quintal. Washington apples, traded in fewer districts, showed a relatively high state average of ₹17,600.00 per quintal, while Chili apples recorded a state average of ₹17,814.58 per quintal. Among commonly available varieties, Red Delicious apples had a moderate state average price of ₹14,907.99 per quintal, whereas Shimla apples, which are more widely supplied across districts, remained comparatively affordable with a state average of ₹11,537.84 per quintal. Kashmiri apples showed stable pricing with a state average of ₹10,497.30 per quintal. Premium niche varieties such as Pink Lady and Red Gold recorded state average prices of ₹16,123.97 and ₹12,630.88 per quintal, respectively. Overall, the data indicate that imported and specialty apple varieties fetch higher prices in Kerala’s wholesale markets, while domestically sourced apples ensure relatively stable and moderate price levels across districts.

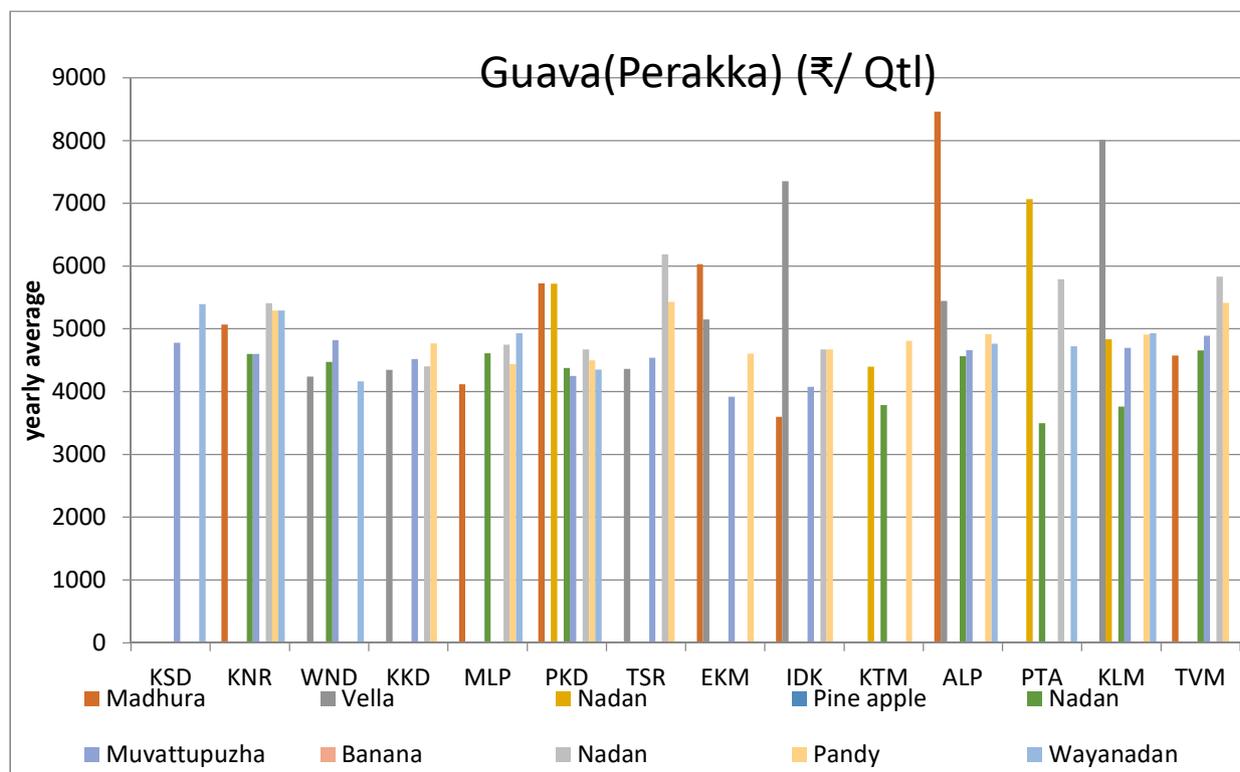

Table142- illustrates the dataset pertaining to the REPORT OF Wholesale Prices of Fruits

Guava (Parka) (₹/ Qtl)

Wholesale prices of Guava (Perakka) showed noticeable variation across markets in the state. The Madhura variety recorded prices ranging from ₹3,596.82 per quintal in Idukki to a high of ₹8,458.33 per quintal in Alappuzha, with relatively moderate prices observed in Malappuram (₹4,115.42), Palakkad (₹5,722.92), Ernakulam (₹6,028.57), and Thiruvananthapuram (₹4,575.00). The Vella variety was traded at prices between ₹4,237.08 per quintal in Wayanad and ₹8,013.48 per quintal in Kollam, indicating higher price realization in southern markets, while Kannur and Ernakulam markets showed mid-range prices of ₹4,344.58 and ₹5,147.50 respectively. The Nadan variety exhibited comparatively stable prices where reported, with Palakkad recording ₹5,718.52 per quintal, Kottayam ₹4,396.25, Pathanamthitta ₹7,068.75, and Kollam ₹4,833.33. Overall, the state average price of Guava stood at ₹5,654.25 per quintal, reflecting moderate price levels with significant inter-market.

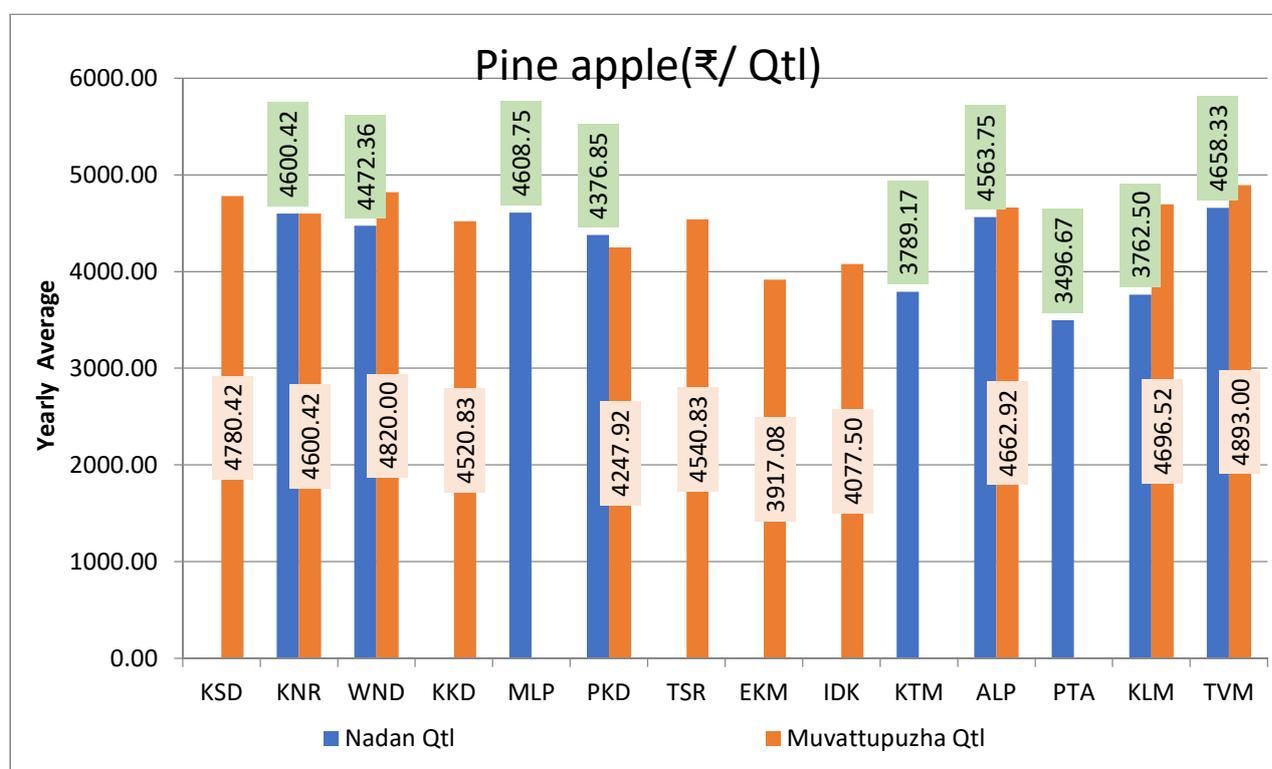

Table142- illustrates the dataset pertaining to the REPORT OF Wholesale Prices of Fruits

Pineapple (₹/ Qtl)

The wholesale prices of pineapple showed moderate variation across markets, reflecting differences in supply and regional demand. The Nadan variety was traded at prices generally ranging from around ₹3,500 to ₹4,600 per quintal, with lower rates observed in Alappuzha, Pathanamthitta, and Kollam, while relatively higher prices were recorded in Kasaragod and Malappuram. The Muvattupuzha variety commanded slightly higher prices in several centres, with values mostly between ₹4,000 and ₹4,900 per quintal. Higher price levels for this variety were seen in Thiruvananthapuram, Wayanad, and Kasaragod, indicating stronger market preference or better quality arrivals. Overall, pineapple prices remained fairly stable, with the Muvattupuzha variety consistently fetching a premium over the Nadan variety in most markets.

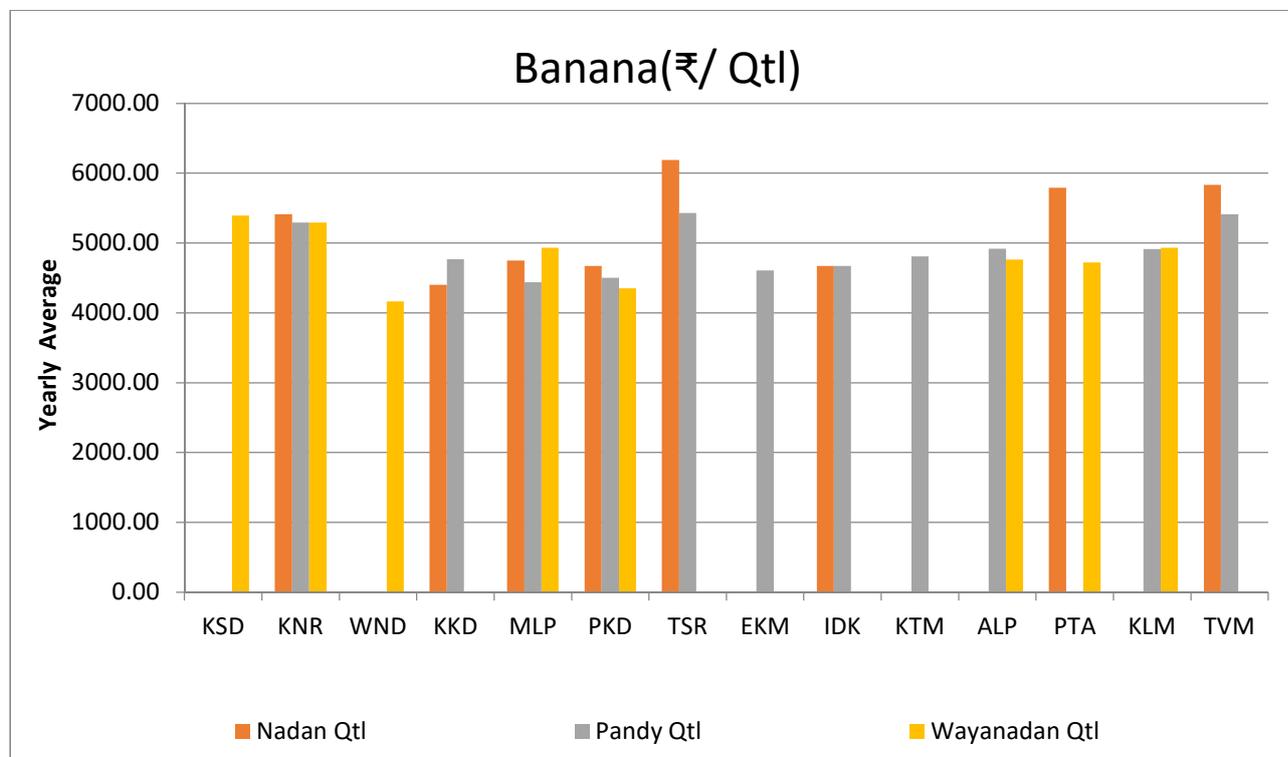

Table142- illustrates the dataset pertaining to the REPORT OF Wholesale Prices of Fruits

BANANA (₹/ Qtl)

In Kerala, the wholesale prices of bananas show considerable variation across different varieties and districts. The Nadan banana is priced highest in Thiruvananthapuram at ₹5,832.50 per quintal, while the lowest reported price is ₹4,400 in Kozhikode. Other districts such as Kollam, Palakkad, and Thrissur report prices ranging between ₹4,672.78 and ₹6,189.58 per quintal. The Pandy variety shows a relatively stable price pattern, with the highest price in Thiruvananthapuram at ₹5,413.75 per quintal and the lowest in Malappuram at ₹4,438.00 per quintal. Districts like Palakkad, Thrissur, and Kottayam report prices around ₹4,500 to ₹5,432.08 per quintal. The Wayanadan variety is primarily available in Wayanad, Kasaragod, Palakkad, and Pathanamthitta, with prices ranging from ₹4,161.67 in Wayanad to ₹5,392.50 in Kasaragod per quintal. Overall, the average wholesale price of bananas across Kerala is approximately ₹4,905.72 per quintal, indicating moderate variation depending on the variety and district.

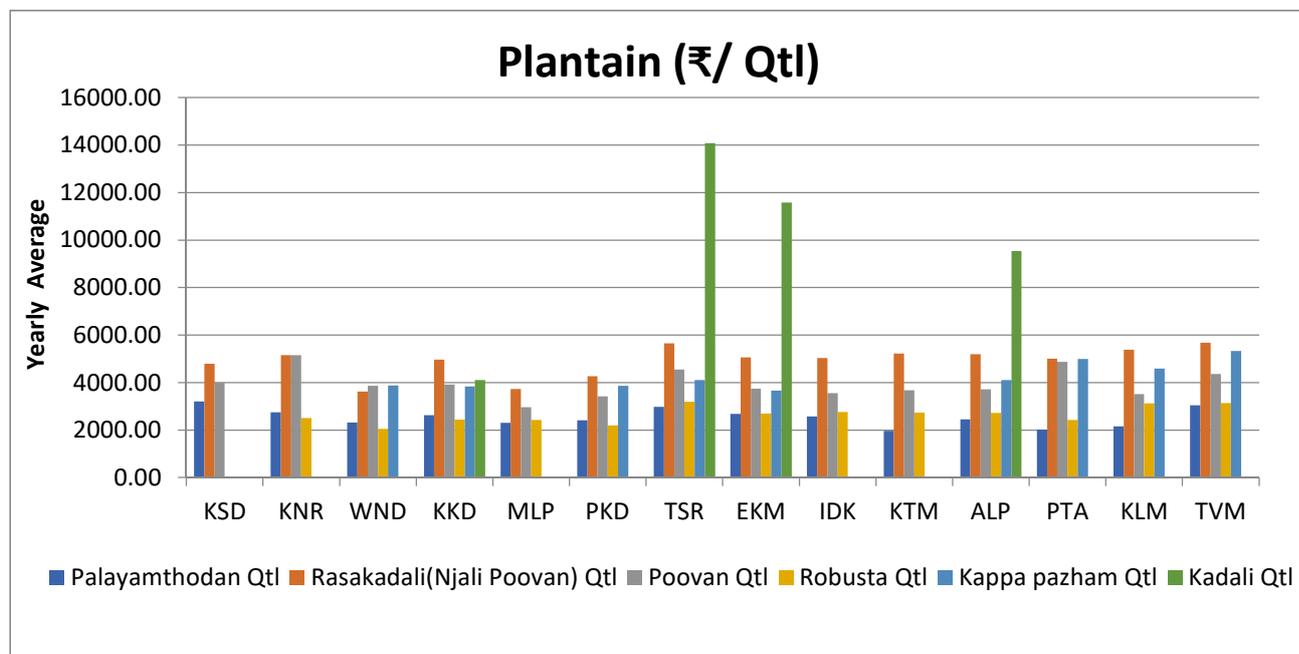

Table142- illustrates the dataset pertaining to the REPORT OF Wholesale Prices of Fruits

Plantain (₹/ Qtl)

The wholesale prices of plantains in Kerala exhibit significant variation across varieties and districts. The Palayamthodan variety ranges from ₹1,970.83 per quintal in Kottayam to ₹3,208.33 in Kasaragod, with an average state-level price of ₹2,563.66 per quintal. The Rasakadali (Njali Poovan) variety is comparatively higher, reaching ₹5,679.17 per quintal in Thiruvananthapuram and ₹3,626.25 in Wayanad, with a state average of ₹4,912.50. The Poovan variety shows moderate pricing, ranging from ₹2,963.33 in Malappuram to ₹5,159.58 in Kollam and Kannur, with an average of ₹3,971.16 per quintal. The Robusta variety is priced lower in general, from ₹2,045.42 in Wayanad to ₹3,187.50 in Thrissur, averaging ₹2,648.37 per quintal across the state. Specialty varieties such as **Kappa Pazham** and **Kadali** are considerably higher, with Kadali reaching extreme prices in Thrissur (₹14,087.50) and Ernakulam (₹11,575.00), resulting in a state average of ₹10,534.38 per quintal. Overall, plantain prices vary widely depending on the variety and district, reflecting both local demand and the uniqueness of certain types.

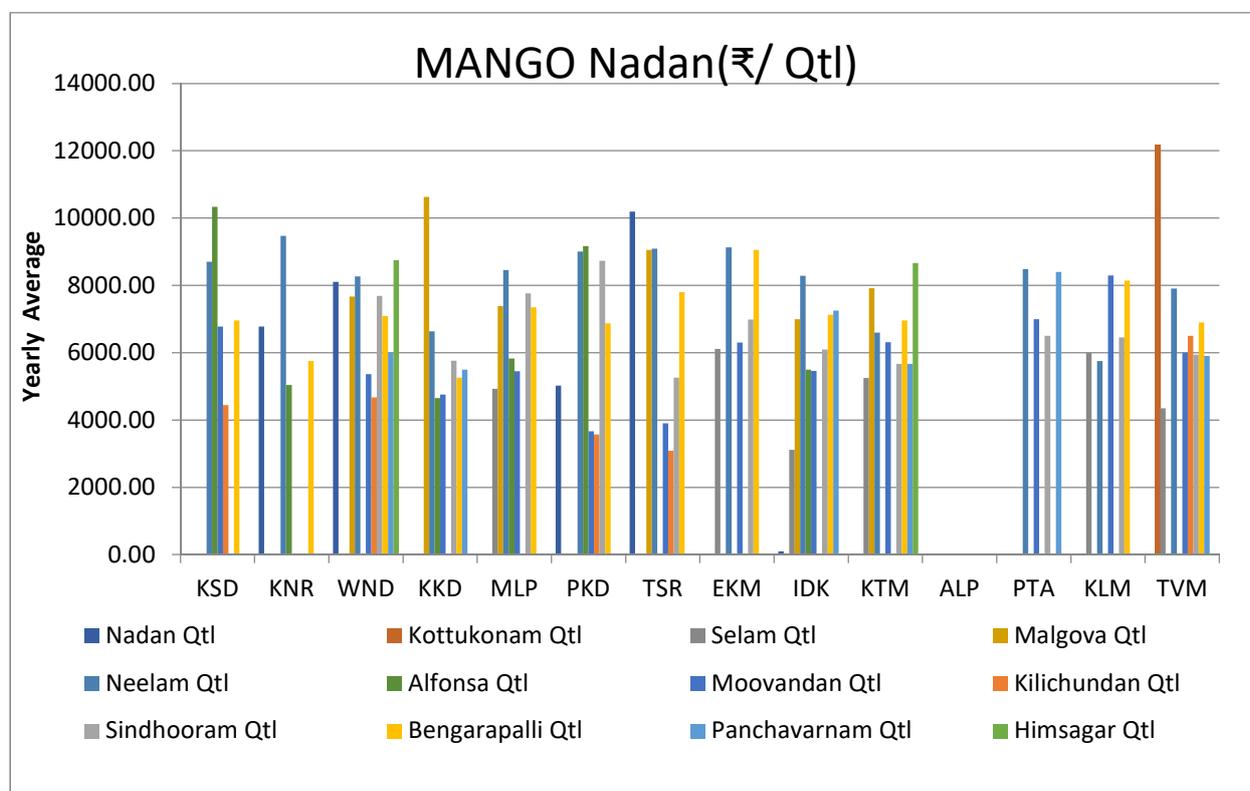

Table142- illustrates the dataset pertaining to the REPORT OF Wholesale Prices of Fruits

MANGO Nadan(₹/ Qtl)

The wholesale prices of mangoes in Kerala show significant variation depending on the variety and district. The Nadan variety is priced highest in Thrissur at ₹10,191.67 per quintal, while the lowest price of ₹100 is reported in Idukki, with a state average of ₹6,262.50. The Kottukonam variety is available only in Thiruvananthapuram at ₹12,175 per quintal. The Selam variety ranges from ₹3,112.50 in Idukki to ₹6,110.67 in Ernakulam, averaging ₹5,607.08 statewide. Malgova is one of the more expensive varieties, with prices between ₹7,388.89 in Malappuram and ₹10,625 in Kozhikode, averaging ₹9,179.17. The Neelam variety shows moderate prices across most districts, ranging from ₹5,754 in Kottayam to ₹9,467.86 in Kannur, with a state average of ₹8,507.69. Other varieties such as Alfonsa, Moovandan, Kilichundan, Sindhooram, Bengarapalli, Panchavarnam, and Himsagar show wide price ranges, reflecting local availability and demand, with state averages varying from ₹4,125.87 (Kilichundan) to ₹8,110.62 (Sindhooram). Overall, mango prices across Kerala exhibit wide variation, influenced by variety, seasonality, and district-level demand.

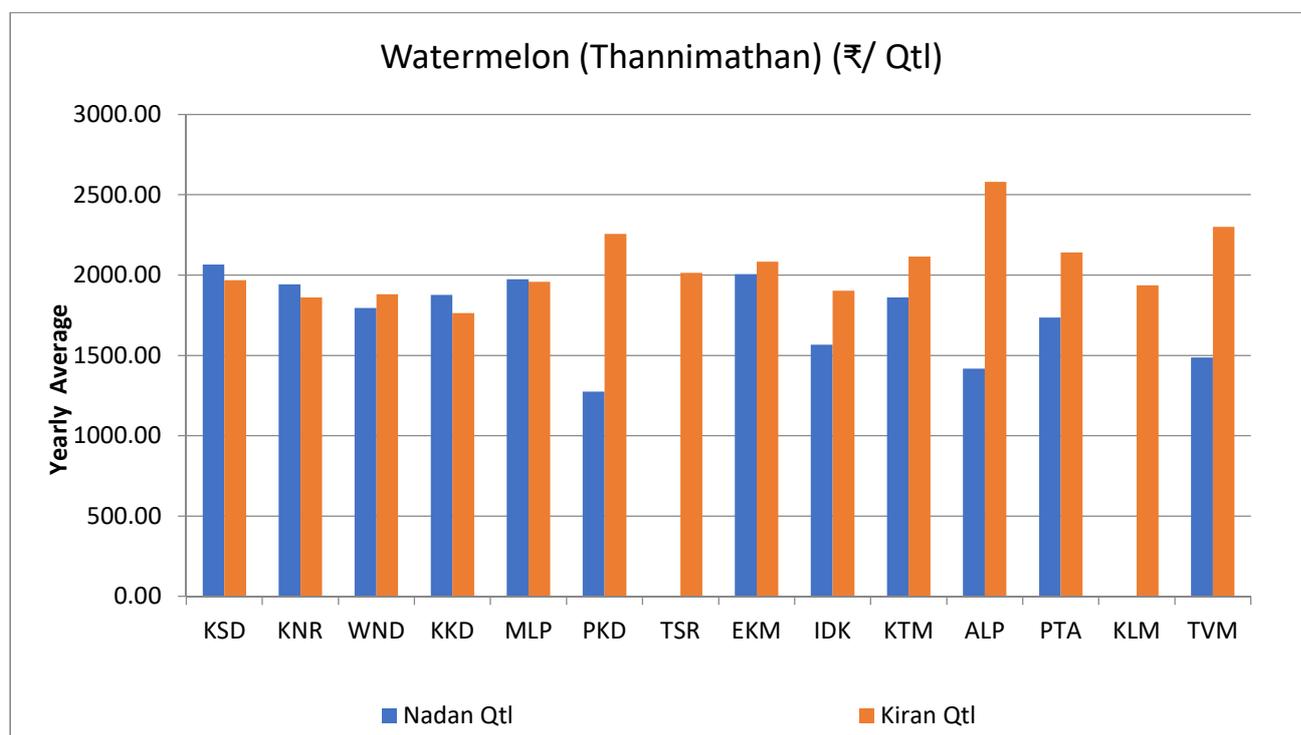

Table142- illustrates the dataset pertaining to the REPORT OF Wholesale Prices of Fruits

Watermelon (Thannimathan) (₹/ Qtl)

The wholesale prices of watermelon (Thannimathan) in Kerala show moderate variation across districts and varieties. For the Nadan variety, prices range from a low of ₹1,275.00 per quintal in Palakkad to a high of ₹2,065.83 in Kasaragod, with a state average price of ₹1,931.27 per quintal. Most districts report prices between ₹1,700 and ₹2,000 per quintal, indicating relatively stable market conditions. In comparison, the **Kiran variety** records generally higher prices, ranging from ₹1,763.54 per quintal in Kozhikode to ₹2,580.00 in Alappuzha, with a state average of ₹2,054.18 per quintal. Districts such as Thiruvananthapuram, Palakkad, and Thrissur report prices above ₹2,100 per quintal for the Kiran variety. Overall, the Kiran variety commands a premium over the Nadan variety across most markets, reflecting stronger demand and better market preference.

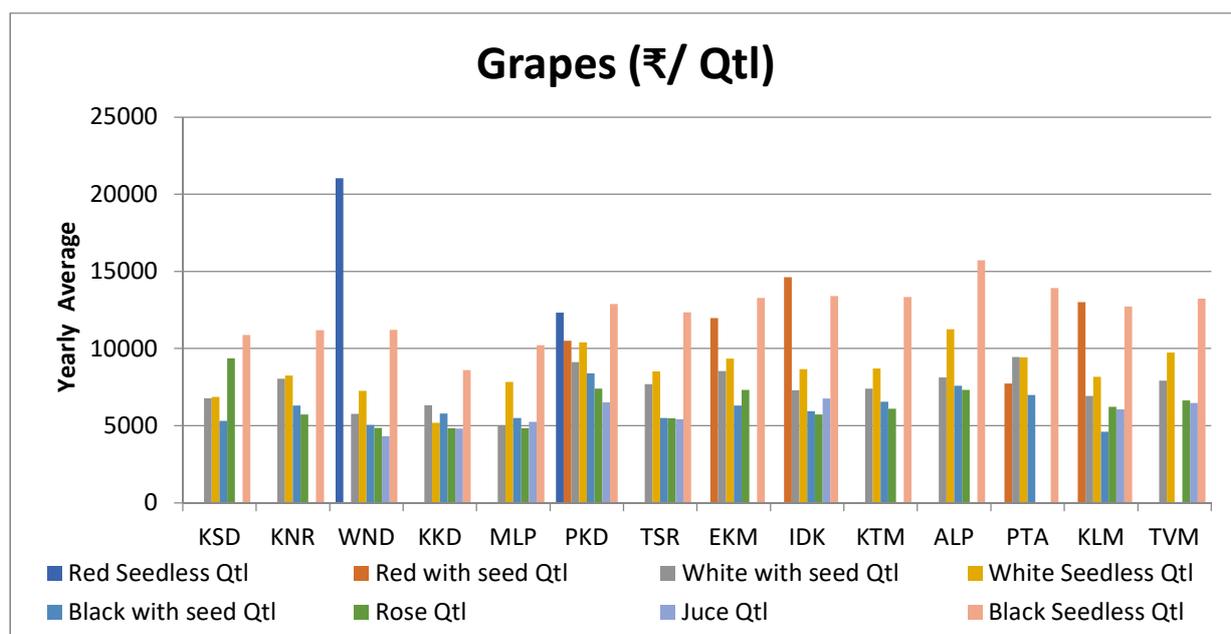

Table142- illustrates the dataset pertaining to the REPORT OF Wholesale Prices of Fruits

Grapes (₹/ Qtl)

The wholesale prices of grapes in Kerala show wide variation across varieties and markets. Red Seedless grapes record very high prices where available, reaching ₹21,032.50 per quintal in Wayanad and averaging ₹18,029.92 at the state level. Red grapes with seed show moderate to high prices, ranging from ₹7,724.17 in Pathanamthitta to ₹14,620.83 in Idukki, with a state average of ₹9,904.25 per quintal. White grapes with seed are relatively stable, with prices ranging from ₹4,985.00 in Malappuram to ₹9,457.92 in Pathanamthitta and a state average of ₹7,724.44. The White Seedless variety commands higher prices, averaging ₹8,689.75 per quintal, with the highest price of ₹11,257.14 reported in Alappuzha. Black grapes with seed are priced lower in comparison, ranging from ₹4,596.39 in Kottayam to ₹8,388.89 in Palakkad, with a state average of ₹6,263.55. Rose grapes show moderate prices, averaging ₹6,037.38 per quintal, while Juice grapes average ₹5,571.35 per quintal. The highest-priced category overall is Black Seedless grapes, with prices ranging from ₹8,591.67 in Kozhikode to ₹15,725.00 in Alappuzha and a high state average of ₹13,085.82 per quintal. Overall, grape prices vary significantly by variety, reflecting differences in quality, market demand, and availability across the state.

Table 142- illustrates the dataset pertaining to the REPORT OF Wholesale Prices of Fruits

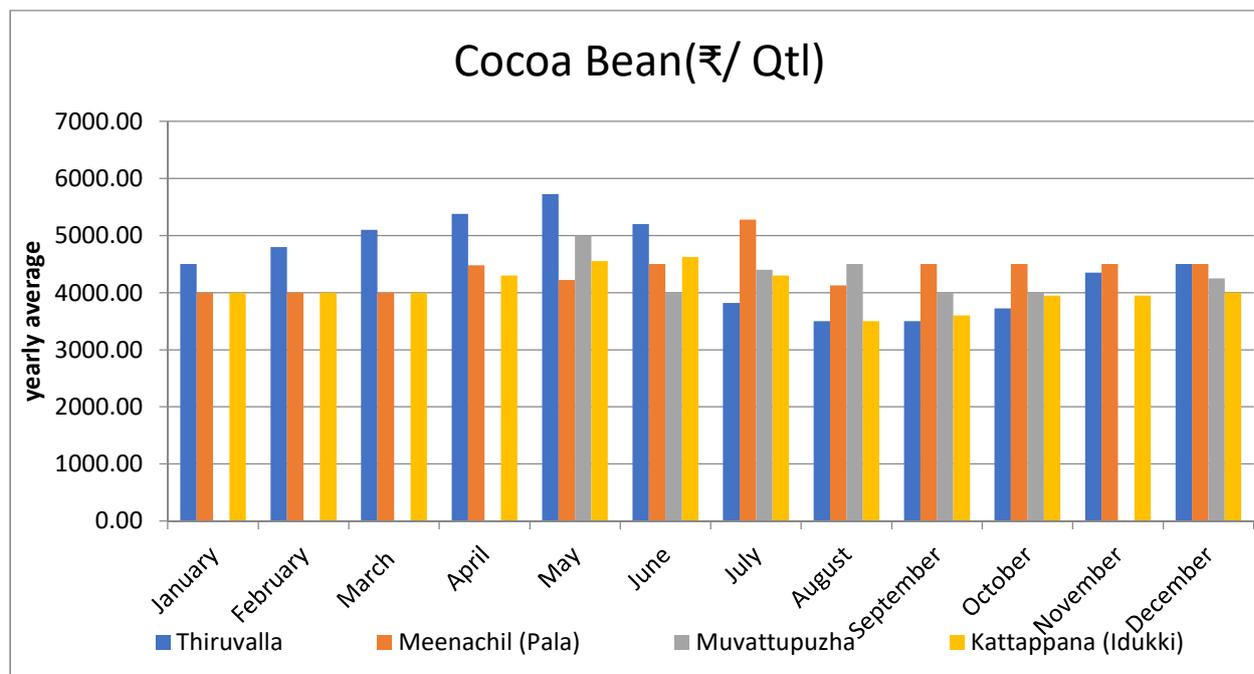

The weekly Wholesale price of Cocoa

Cocoa Bean(₹/ Qtl)

Thiruvalla starts at 4500 in Jan, rise each month until May (5725), then drop sharply in June (5200) and even more in July (3820) and August (3500). They stay low in September, and then rise again towards December. So there's a peak in May and a trough in August-September. Volatility here is high. Meenachil (Pala) is different. Prices are stable at 4000 until April when they jump to 4480. Then May drops to 4225, June up to 4500, July peaks at 5280, then back to 4125 in August. After that, it's stable at 4500. Their peak is July, trough in January-March. Moderate volatility compared to Thiruvalla. Muvattupuzha has missing data for the first four months. Starts in May at 5000, drops to 4000 in June, then rises each month until August (4500), then back to 4000 in September-October, missing November, and December at 4250. Limited data but shows some fluctuation, peak in August. Kattappana (Idukki) starts at 4000, stays there until April (4300), peaks in June (4625), then drops in July (4300), August (3500), recovers slightly in September-December. Trough in August, peak in June. Moderate volatility. Comparing regions: Thiruvalla has the highest peak (5725) and the biggest drop. Meenachil peaks later in July. Muvattupuzha has gaps but shows mid-year activity. Kattappana's peak in June, similar to Thiruvalla's May peak. Thiruvalla and Kattappana peak mid-year, then drop. Meenachil peaks in July. Thiruvalla's sharp drop might be due to oversupply or reduced demand post-May.

Table 143- illustrates the dataset pertaining to the REPORT OF Wholesale price of Cocoa

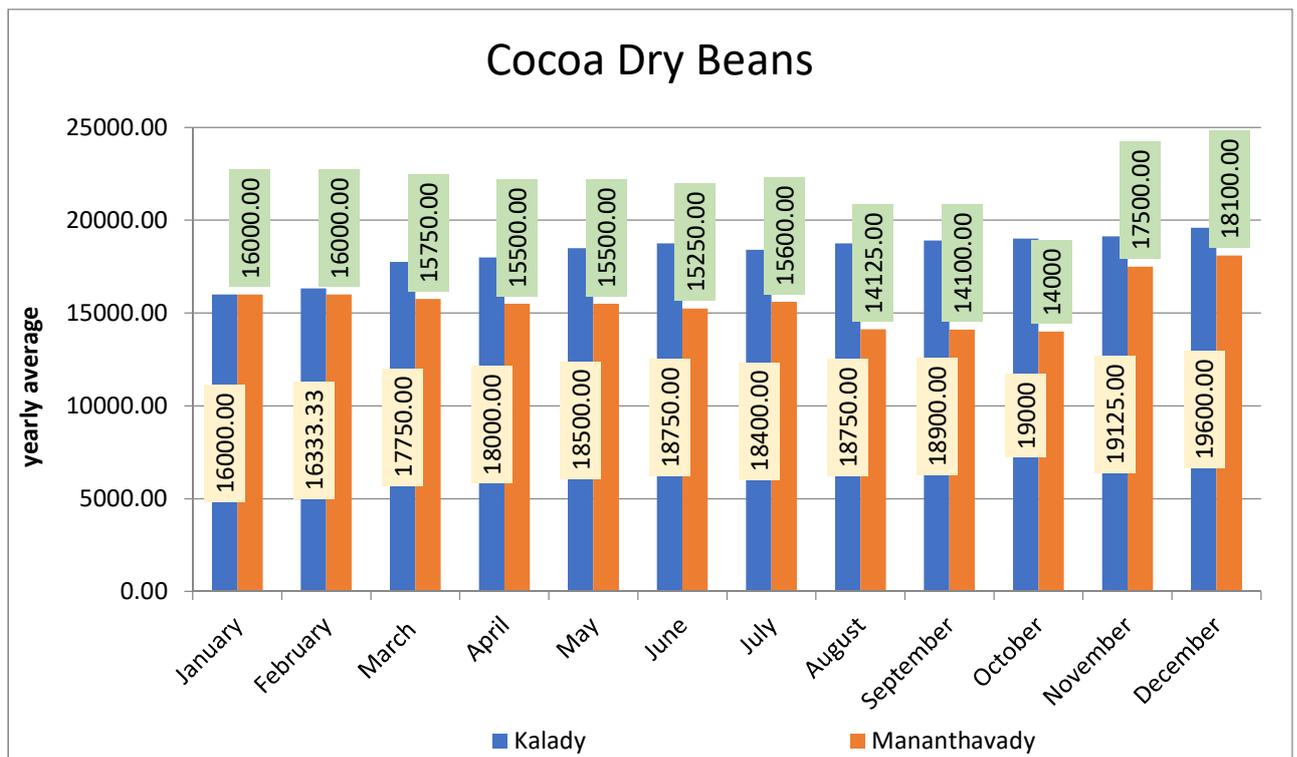

Cocoa Dry Beans (₹/ Qtl)

Kalady: Prices increase steadily by ₹250–₹500 monthly from January to June. A slight dip occurs in July (₹18,400) before resuming growth, reaching the highest price in December. Annual Growth: Prices rise by 22.5% (₹16,000 → ₹19,600).

Mananthavady: Prices decline from January (₹16,000) to October (₹14,000), with a steep drop in August (₹14,125). A dramatic rebound in November (₹17,500) and December (₹18,100) reverses the downtrend. Prices swing by 29.3% between the October trough and December peak.

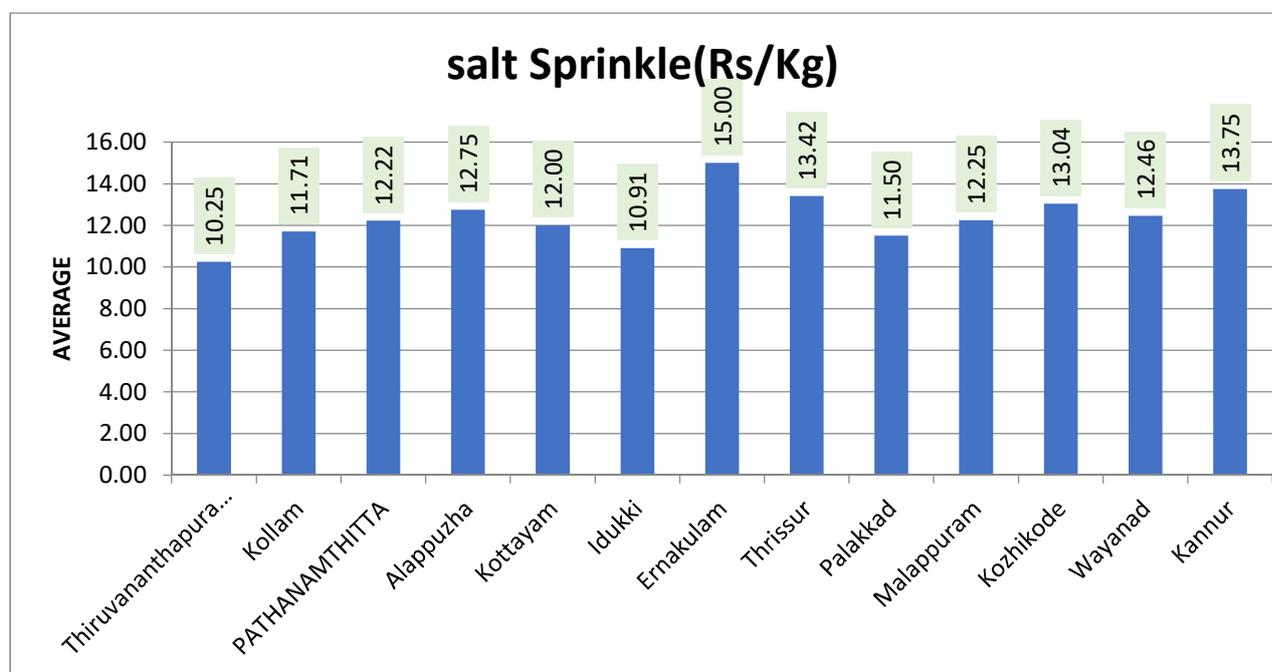

Table 143- illustrates the dataset pertaining to the Report Of Wholesale Prices of Fruits

Wholesale price of salt Sprinkle

The wholesale price of Sprinkle brand salt in Kerala shows moderate variation across districts and months. In Thiruvananthapuram, prices remained stable at ₹9.00 per kg from January to May, increased to ₹12.00 in June, and then stabilized around ₹11.00 for the rest of the year, resulting in an annual average of ₹10.25 per kg. Kollam recorded slightly higher prices, with monthly rates ranging between ₹10.00 and ₹13.00 and an average of ₹11.71 per kg. In Pathanamthitta, prices increased from ₹10.00–₹12.00 in the first half of the year to ₹14.00 during June–August, yielding an average of ₹12.22 per kg. Alappuzha and Kottayam showed relatively steady trends, averaging ₹12.75 and ₹12.00 per kg respectively. Ernakulam recorded the highest average price at ₹15.00 per kg, with rates peaking at ₹16.00 during June, July, and December. Districts such as Thrissur, Malappuram, Kozhikode, Wayanad, and Kannur reported average prices ranging from ₹12.25 to ₹13.75 per kg. Overall, the wholesale price of salt across the state remained largely stable throughout the year, with minor seasonal increases observed during the mid-year months.

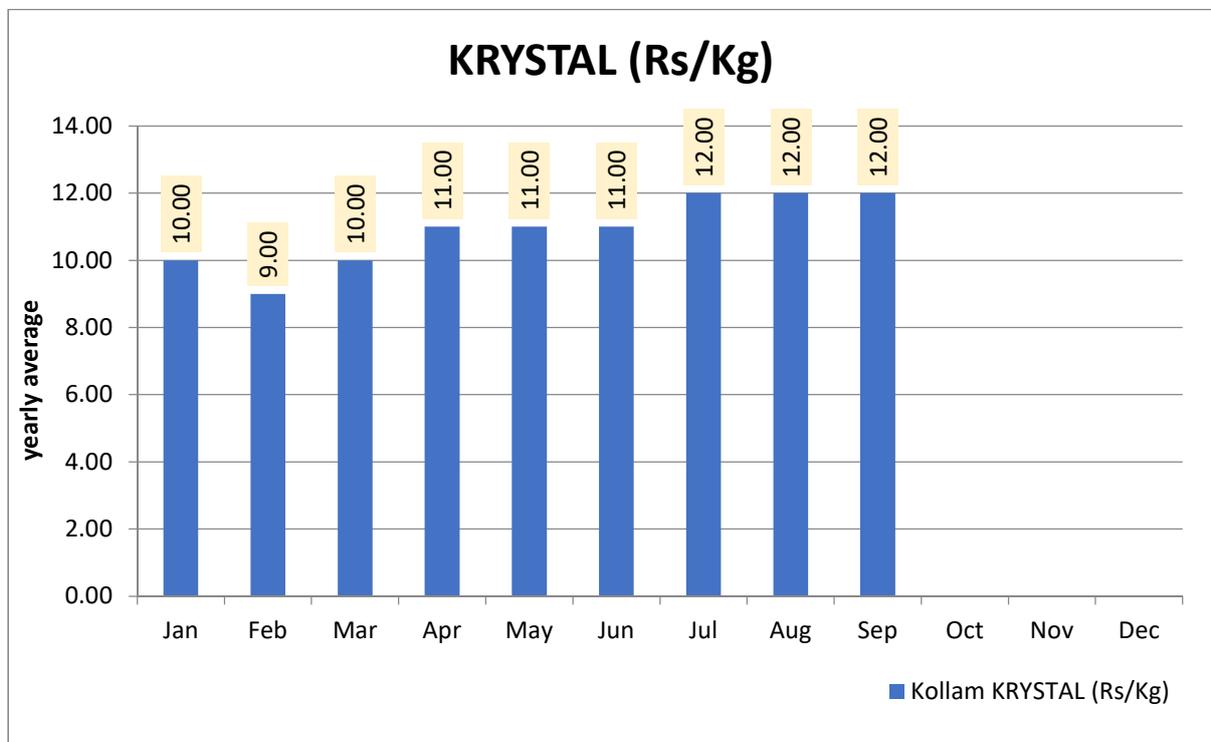

Table 144- illustrates the dataset pertaining to the Report Of SALT

KRYSTAL (Rs/Kg)

The KRYSTAL product in Kollam shows a fluctuating price trend from January to September. Prices start at Rs 10.00 in January, drop slightly to Rs 9.00 in February, and return to Rs 10.00 in March. From April onward, prices increase to Rs 11.00 and remain steady through June. In July, the price rises again to Rs12.00 and stays consistent through August and September.

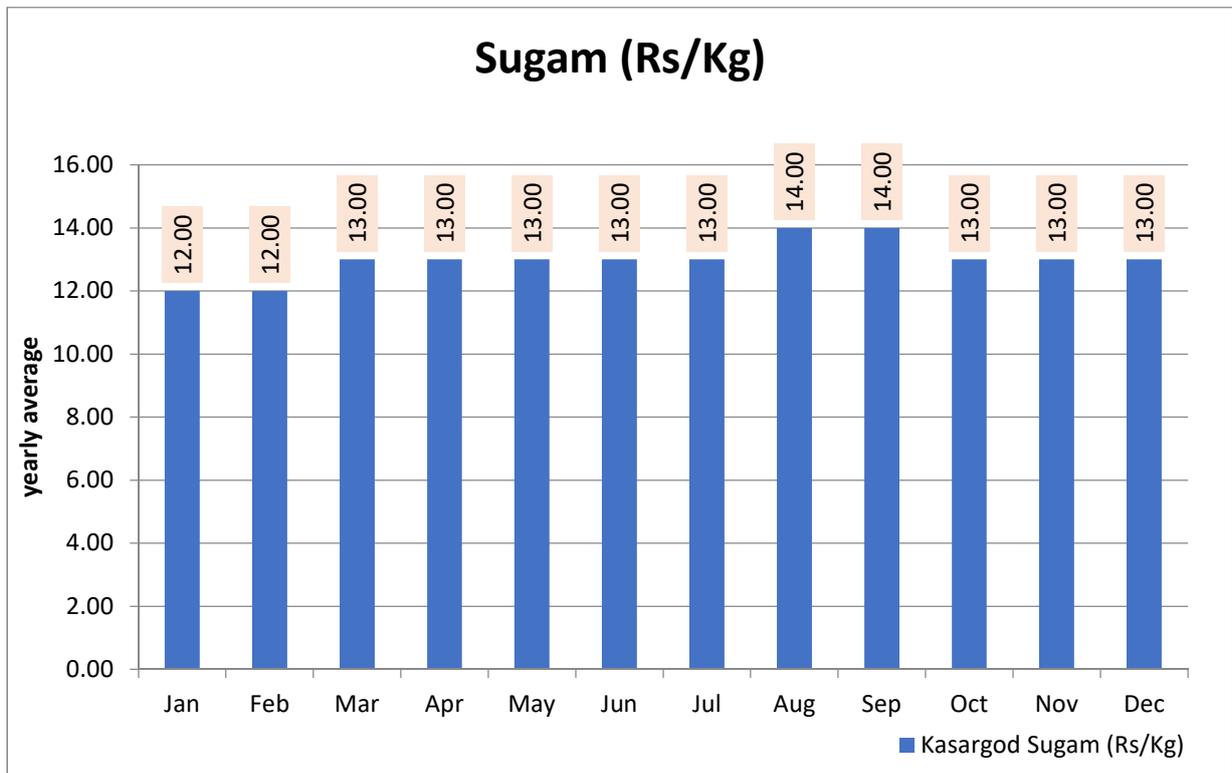

Table144- illustrates the dataset pertaining to the Report Of salt

Sugam (Rs/Kg)

The price of Sugam in Kasaragod remains stable at Rs 12.00 during January and February, and then increases to Rs 13.00 in March. This rate continues consistently through June. In July, the price stays at Rs 13.00, then rises to Rs 14.00 in August and September, indicating a peak. However, from October to December, the price drops back to Rs 13.00, suggesting a return to earlier levels. The average price for the year stands at Rs 13.00, showing minor fluctuations.

Table 144- illustrates the dataset pertaining to the REPORT OF Salt

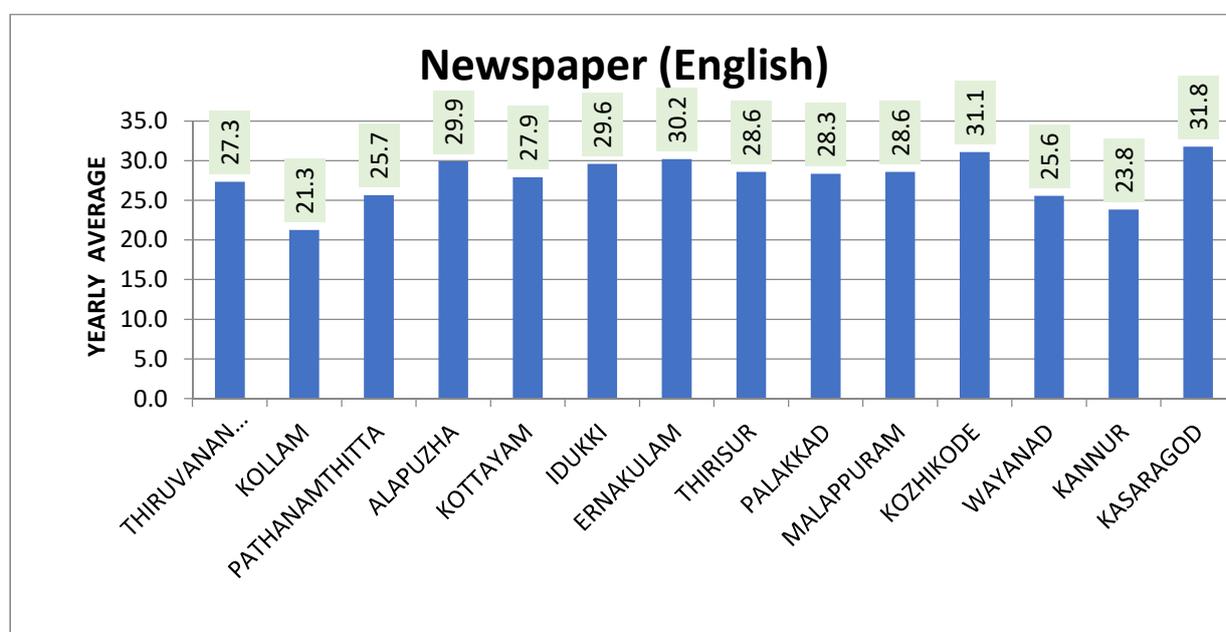

DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER

English newspapers

The prices of English newspapers show noticeable variation across districts in Kerala. The highest price is reported in Kasaragod at ₹31.8, followed closely by Kozhikode at ₹31.1 and Ernakulam at ₹30.2. Districts such as Alappuzha (₹29.9), Idukki (₹29.6), Thrissur (₹28.6), Malappuram (₹28.6), and Palakkad (₹28.3) record moderately high prices. In Thiruvananthapuram and Kottayam, newspaper prices are ₹27.3 and ₹27.9 respectively, while Pathanamthitta and Wayanad report slightly lower prices of ₹25.7 and ₹25.6. The lowest prices are observed in Kollam (₹21.3) and Kannur (₹23.8). Overall, English newspaper prices across the state range from ₹21.3 to ₹31.8, reflecting district-wise differences in distribution costs and market conditions.

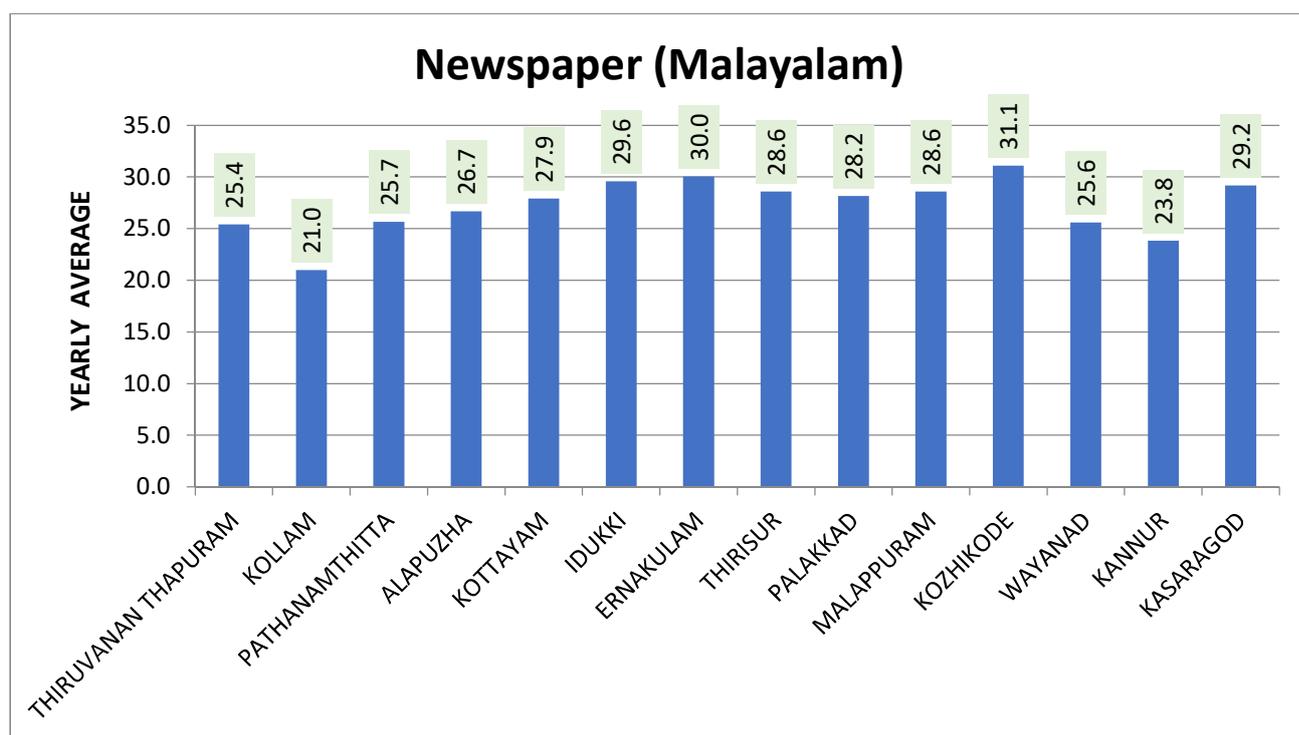

Table145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

Malayalam newspapers

The prices of Malayalam newspapers vary across districts in Kerala. The highest price is observed in Kozhikode at ₹31.1, followed by Ernakulam at ₹30.0 and Idukki at ₹29.6. Districts such as Kottayam (₹27.9), Thrissur (₹28.6), Malappuram (₹28.6), and Palakkad (₹28.2) report moderately high prices. In Alappuzha, the price stands at ₹26.7, while Thiruvananthapuram and Pathanamthitta record similar prices of ₹25.4 and ₹25.7 respectively. Lower prices are seen in Wayanad (₹25.6), Kannur (₹23.8), and Kollam (₹21.0). Overall, Malayalam newspaper prices across the state range from ₹21.0 to ₹31.1, reflecting district-wise differences in circulation costs and local market conditions.

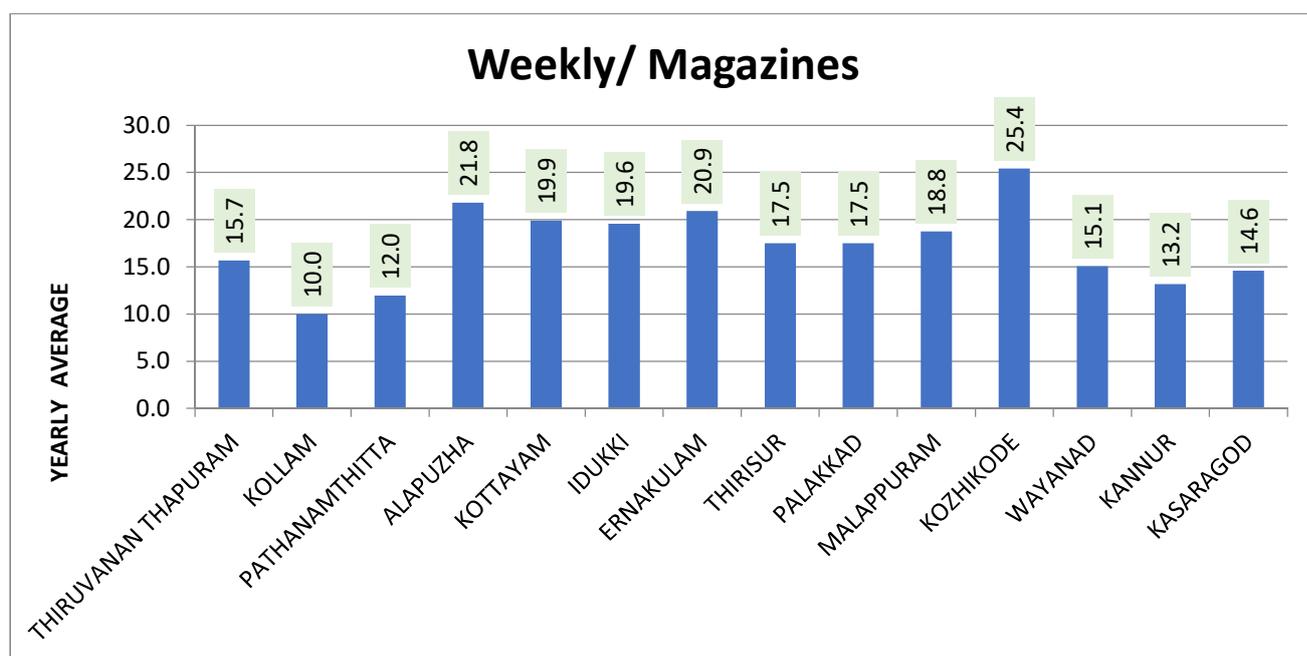

Table145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

Weekly magazines

The prices of weekly magazines show notable variation across districts in Kerala. The highest price is recorded in Kozhikode at ₹25.4, followed by Alappuzha at ₹21.8 and Ernakulam at ₹20.9. Districts such as Kottayam (₹19.9), Idukki (₹19.6), Malappuram (₹18.8), Thrissur (₹17.5), and Palakkad (₹17.5) report moderately high prices. In Thiruvananthapuram, the price stands at ₹15.7, while Wayanad (₹15.1) and Kasaragod (₹14.6) show slightly lower rates. The lowest prices are observed in Kannur (₹13.2), Pathanamthitta (₹12.0), and Kollam (₹10.0). Overall, weekly and magazine prices across the state range from ₹10.0 to ₹25.4, reflecting differences in distribution costs and local market demand.

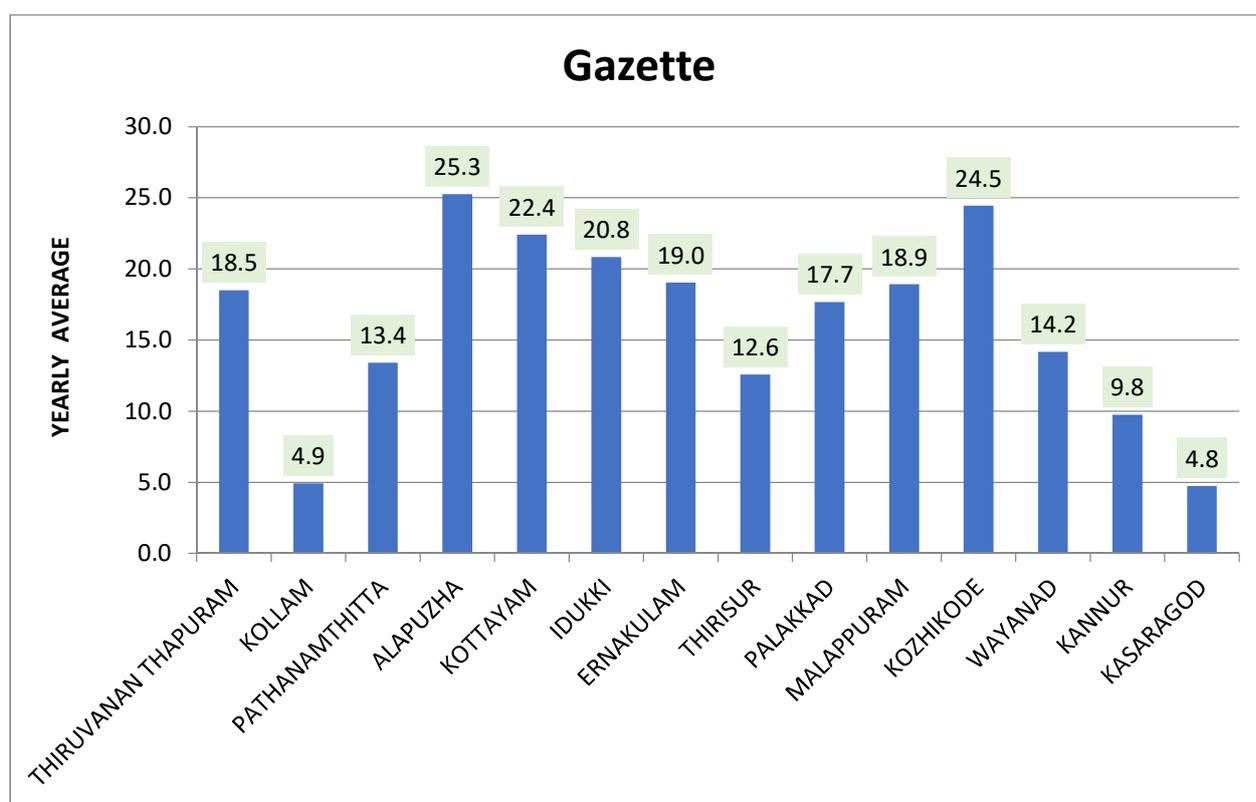

Table145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

Gazette

The prices of the Gazette vary widely across districts in Kerala. The highest price is reported in Alappuzha at ₹25.3, followed by Kozhikode at ₹24.5 and Kottayam at ₹22.4. Districts such as Idukki (₹20.8), Malappuram (₹18.9), Ernakulam (₹19.0), and Thiruvananthapuram (₹18.5) record moderately high prices. In contrast, lower prices are observed in Wayanad (₹14.2), Pathanamthitta (₹13.4), and Thrissur (₹12.6). The lowest prices are seen in Kannur (₹9.8), Kollam (₹4.9), and Kasaragod (₹4.8). Overall, Gazette prices across the state range from ₹4.8 to ₹25.3, indicating significant district-wise variation influenced by distribution and administrative factors.

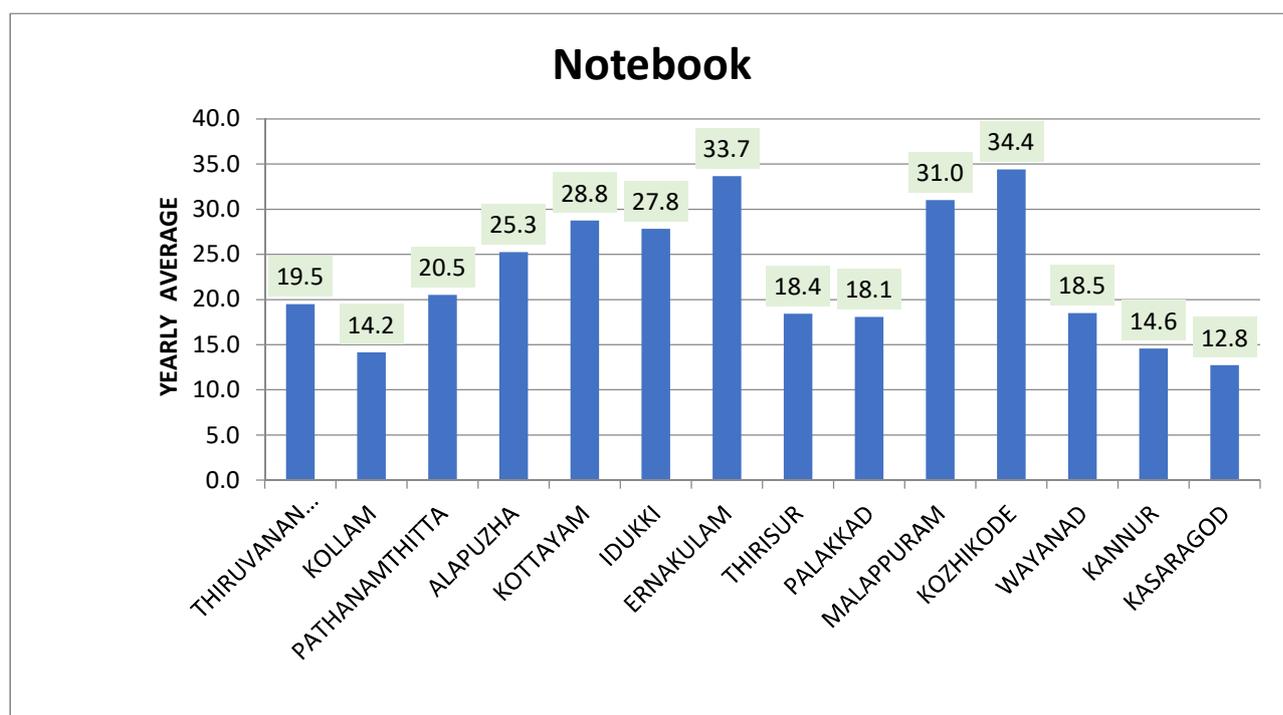

Table145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

NOTEBOOK

The prices of notebooks show considerable variation across districts in Kerala. The highest prices are reported in Kozhikode at ₹34.4, followed closely by Ernakulam at ₹33.7 and Malappuram at ₹31.0. Districts such as Kottayam (₹28.8) and Idukki (₹27.8) also record relatively high prices. In Alappuzha, notebooks are priced at ₹25.3, while Pathanamthitta reports ₹20.5. Moderate prices are observed in Thiruvananthapuram (₹19.5), Wayanad (₹18.5), Thrissur (₹18.4), and Palakkad (₹18.1). The lowest prices are seen in Kasaragod (₹12.8), Kollam (₹14.2), and Kannur (₹14.6). Overall, notebook prices across the state range from ₹12.8 to ₹34.4, reflecting district-wise differences in market demand and distribution costs.

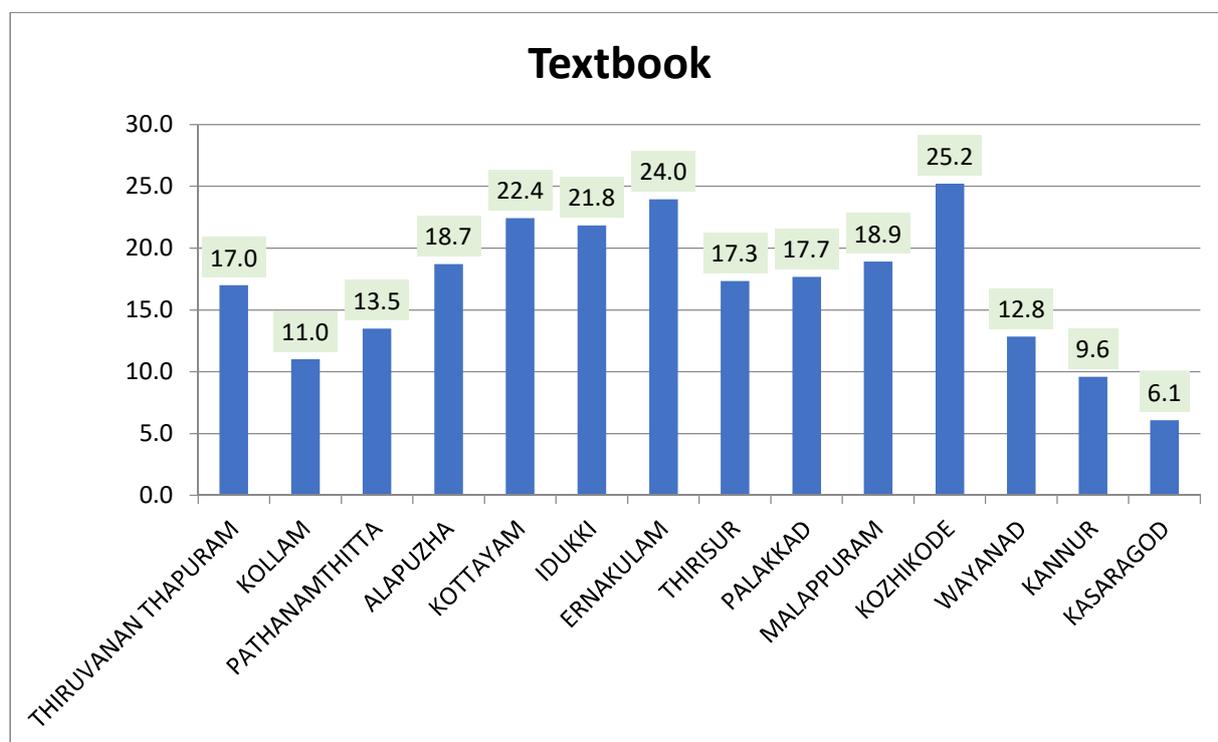

Table 145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

TEXTBOOKS

The prices of textbooks vary widely across districts in Kerala. The highest price is recorded in Kozhikode at ₹25.2, followed by Ernakulam at ₹24.0 and Kottayam at ₹22.4. Districts such as Idukki (₹21.8) and Malappuram (₹18.9) also show relatively higher prices. In Alappuzha, textbooks are priced at ₹18.7, while Palakkad (₹17.7), Thrissur (₹17.3), and Thiruvananthapuram (₹17.0) report moderate rates. Lower prices are observed in Pathanamthitta (₹13.5) and Wayanad (₹12.8). The lowest textbook prices are seen in Kollam (₹11.0), Kannur (₹9.6), and Kasaragod (₹6.1). Overall, textbook prices across the state range from ₹6.1 to ₹25.2, reflecting district-wise differences in distribution costs and market conditions.

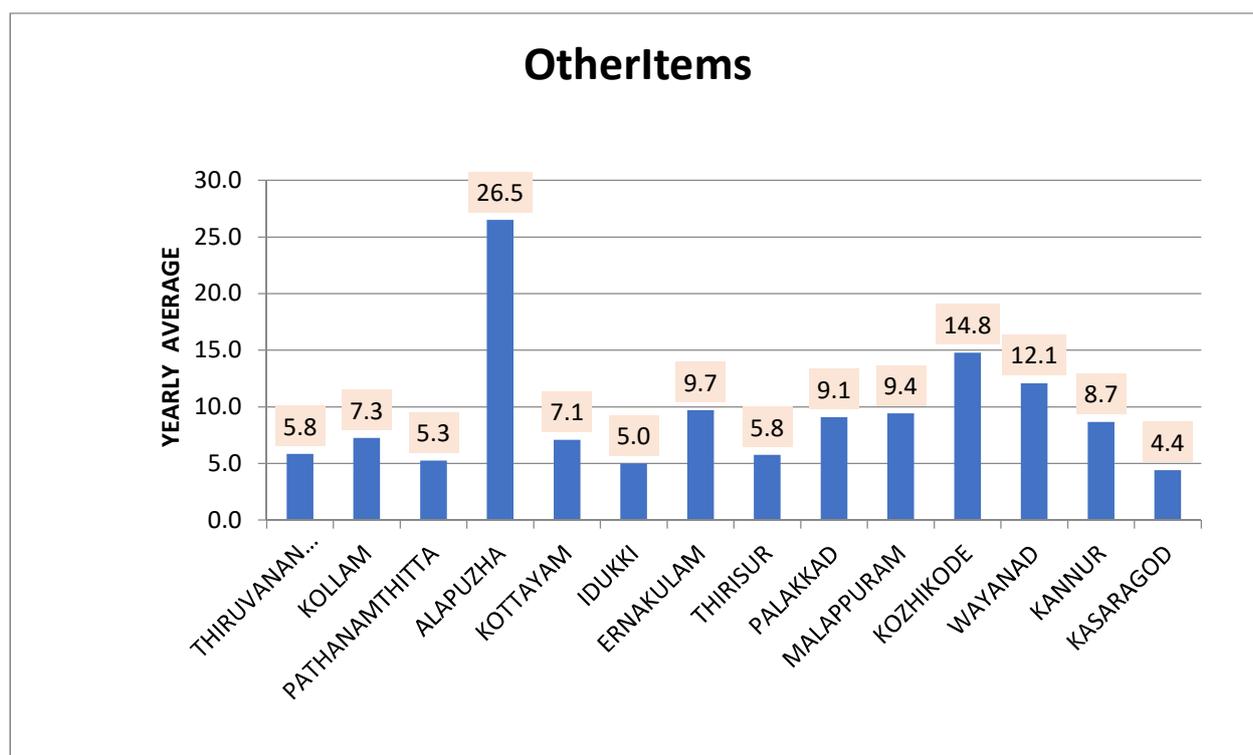

Table145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

OtherItems

Among the districts, Alapuzha recorded a significantly higher value for Other Items at 26.5, indicating comparatively greater price levels or expenditure in this category. This was followed by Kozhikode (14.8) and Wayanad (12.1), which also showed relatively higher values. Ernakulam (9.7), Malappuram (9.4), Palakkad (9.1) and Kannur (8.7) remained in the mid-range. Lower values were observed in Kollam (7.3), Kottayam (7.1), Thiruvananthapuram (5.8), Thrissur (5.8), Pathanamthitta (5.3) and Idukki (5.0). The lowest value was reported in Kasaragod (4.4). Overall, the data indicate notable inter-district variation, with Alapuzha standing out markedly compared to other districts.

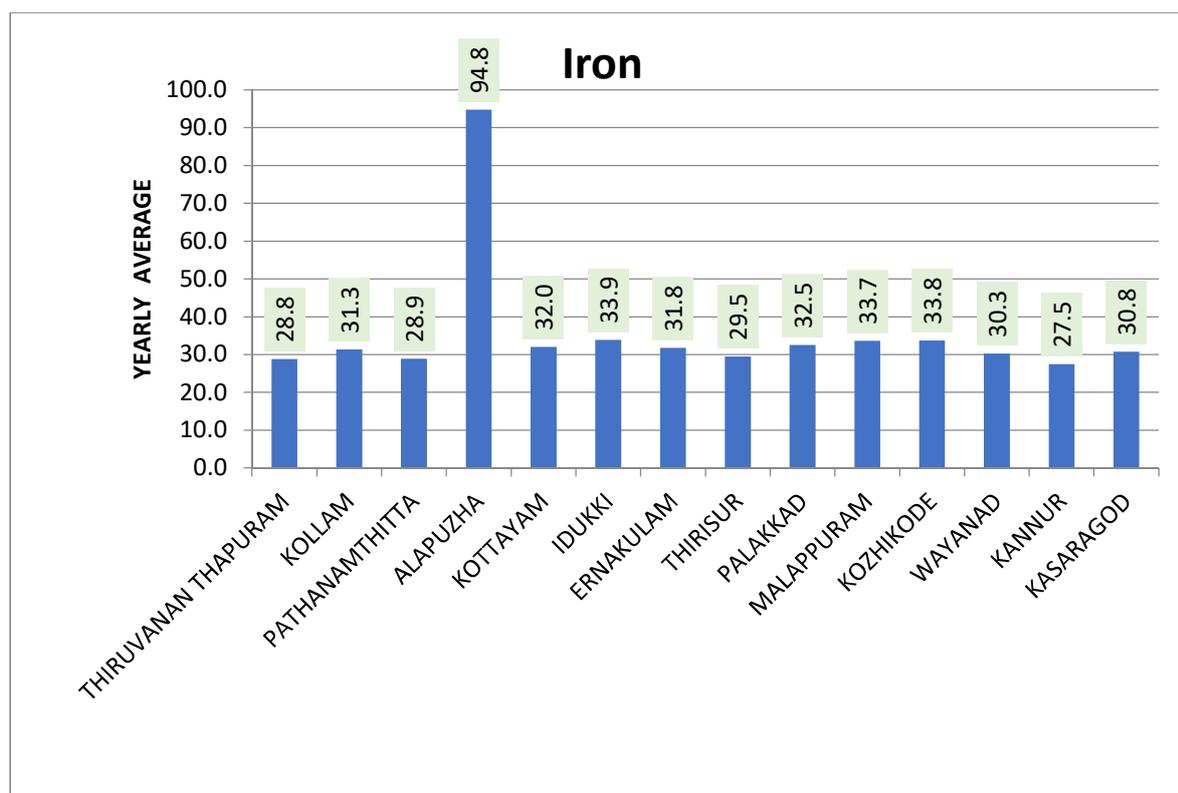

Table145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

Iron

The district-wise analysis of Iron shows substantial variation across Kerala. Alapuzha recorded an exceptionally high value of 94.8, which stands out markedly compared to all other districts. Moderate values were observed in Idukki (33.9), Kozhikode (33.8), Malappuram (33.7), Palakkad (32.5), Kottayam (32.0), Ernakulam (31.8) and Kollam (31.3). Districts such as Kasaragod (30.8), Wayanad (30.3) and Thrissur (29.5) recorded relatively lower mid-range values. The lowest values were reported in Pathanamthitta (28.9), Thiruvananthapuram (28.8) and Kannur (27.5). Overall, the data indicate significant inter-district disparity, with Alapuzha emerging as a clear outlier in iron-related values.

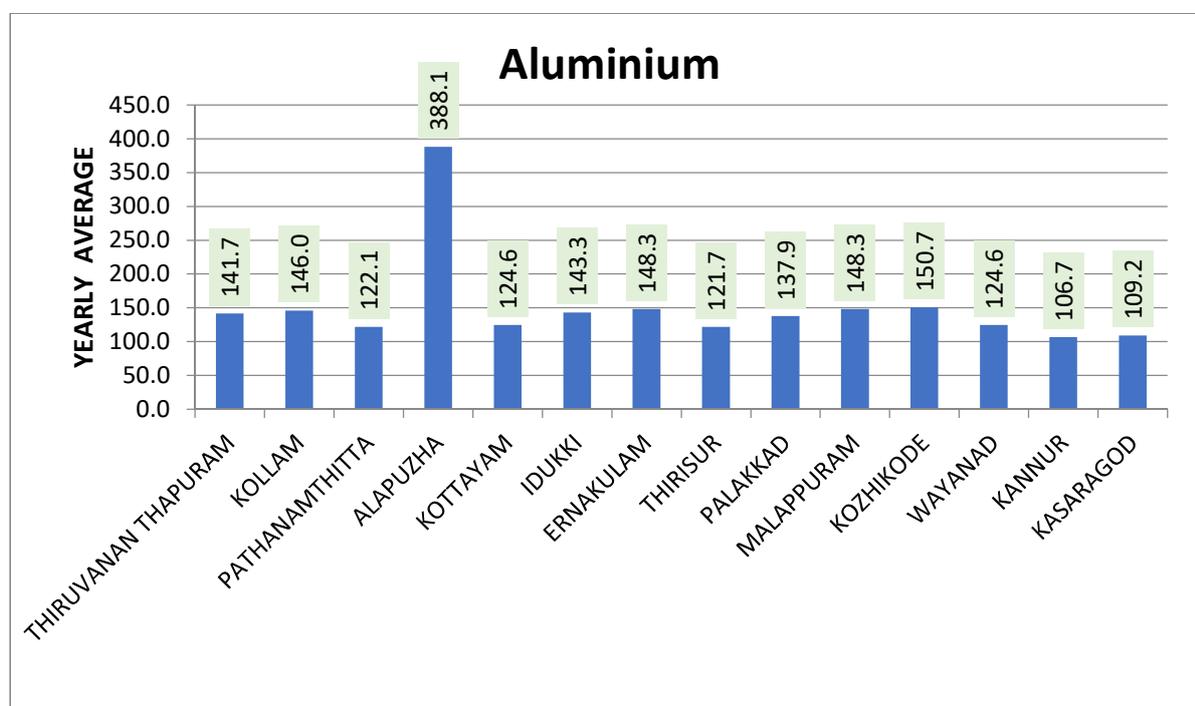

Table 145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

Aluminium

The district-wise analysis of Aluminium reveals wide variations across Kerala. Alapuzha recorded an exceptionally high value of 388.1, making it a clear outlier compared to all other districts. Higher mid-range values were observed in Kozhikode (150.7), Ernakulam (148.3) and Malappuram (148.3), followed by Kollam (146.0) and Idukki (143.3). Thiruvananthapuram (141.7) and Palakkad (137.9) remained close to the state mid-level range. Relatively lower values were reported in Kottayam (124.6), Wayanad (124.6), Pathanamthitta (122.1) and Thrissur (121.7). The lowest values were observed in Kasaragod (109.2) and Kannur (106.7). Overall, the data indicate significant inter-district disparity, with Alapuzha showing a markedly higher aluminium value than the rest of the state.

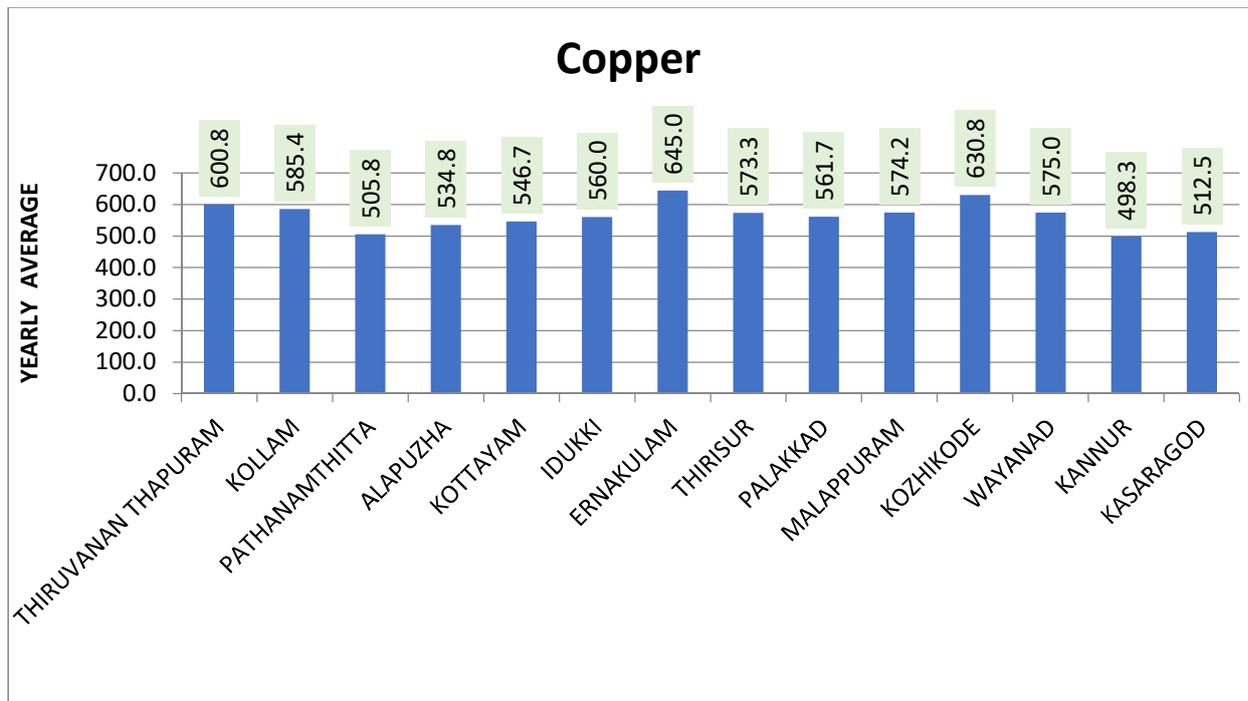

Table145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

Copper

The district-wise retail price analysis of copper shows notable variation across Kerala. Ernakulam recorded the highest price at ₹645.0, followed by Kozhikode (₹630.8) and Thiruvananthapuram (₹600.8), indicating relatively stronger market demand or higher distribution costs in these districts. Prices remained at moderate levels in Malappuram (₹574.2), Thrissur (₹573.3), Wayanad (₹575.0), Palakkad (₹561.7), Idukki (₹560.0), Kottayam (₹546.7) and Alappuzha (₹534.8). Comparatively lower prices were observed in Kasaragod (₹512.5), Pathanamthitta (₹505.8) and Kannur (₹498.3), suggesting relatively stable supply conditions or lower market pressure in these regions. Overall, the price trend indicates moderate inter-district variation, with higher prices concentrated in major commercial and urban centers.

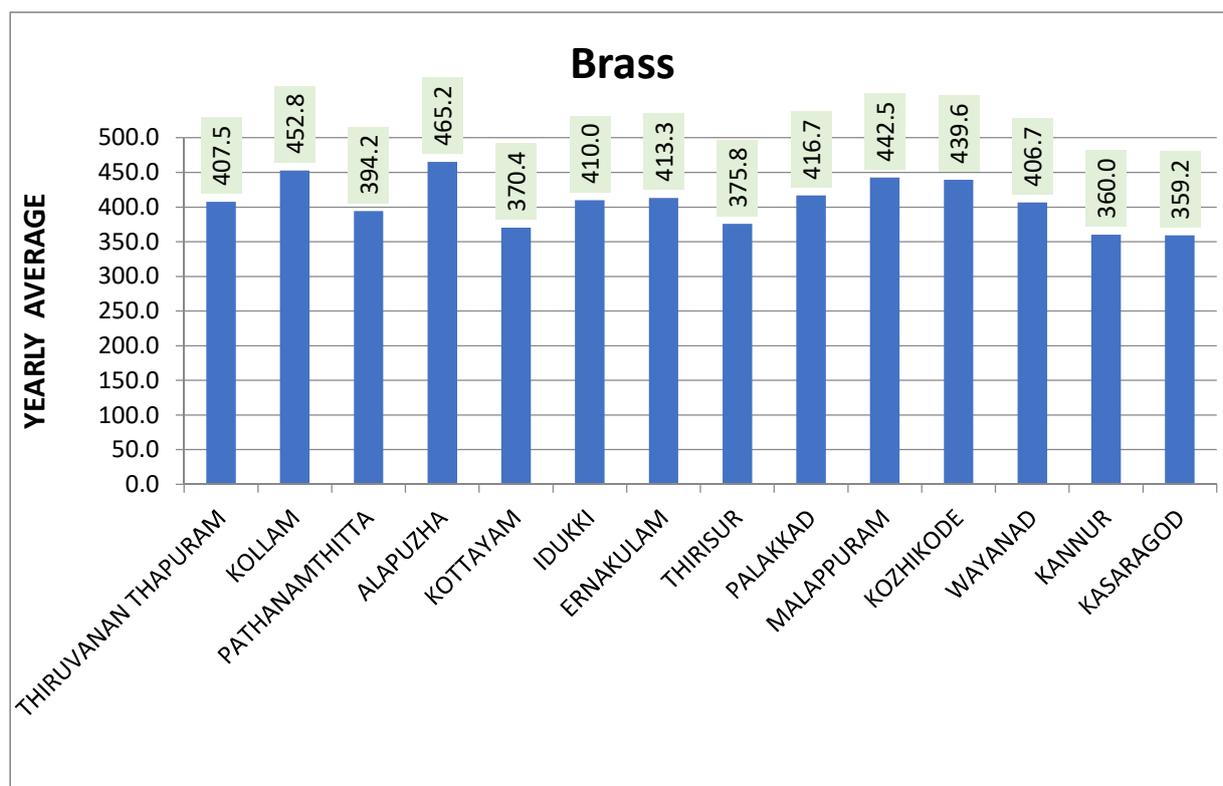

Table 145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

BRASS

The district-wise retail price analysis of brass in Kerala reveals moderate variation across districts. Alappuzha recorded the highest price at ₹465.2, followed by Kollam (₹452.8) and Malappuram (₹442.5). Prices remained at moderate levels in Kozhikode (₹439.6), Palakkad (₹416.7), Ernakulam (₹413.3), Idukki (₹410.0), Wayanad (₹406.7) and Thiruvananthapuram (₹407.5). Relatively lower prices were observed in Pathanamthitta (₹394.2), Thrissur (₹375.8), Kottayam (₹370.4), Kannur (₹360.0) and Kasaragod (₹359.2). Overall, the price trend shows a moderate inter-district variation, with higher prices concentrated in select coastal and trading districts.

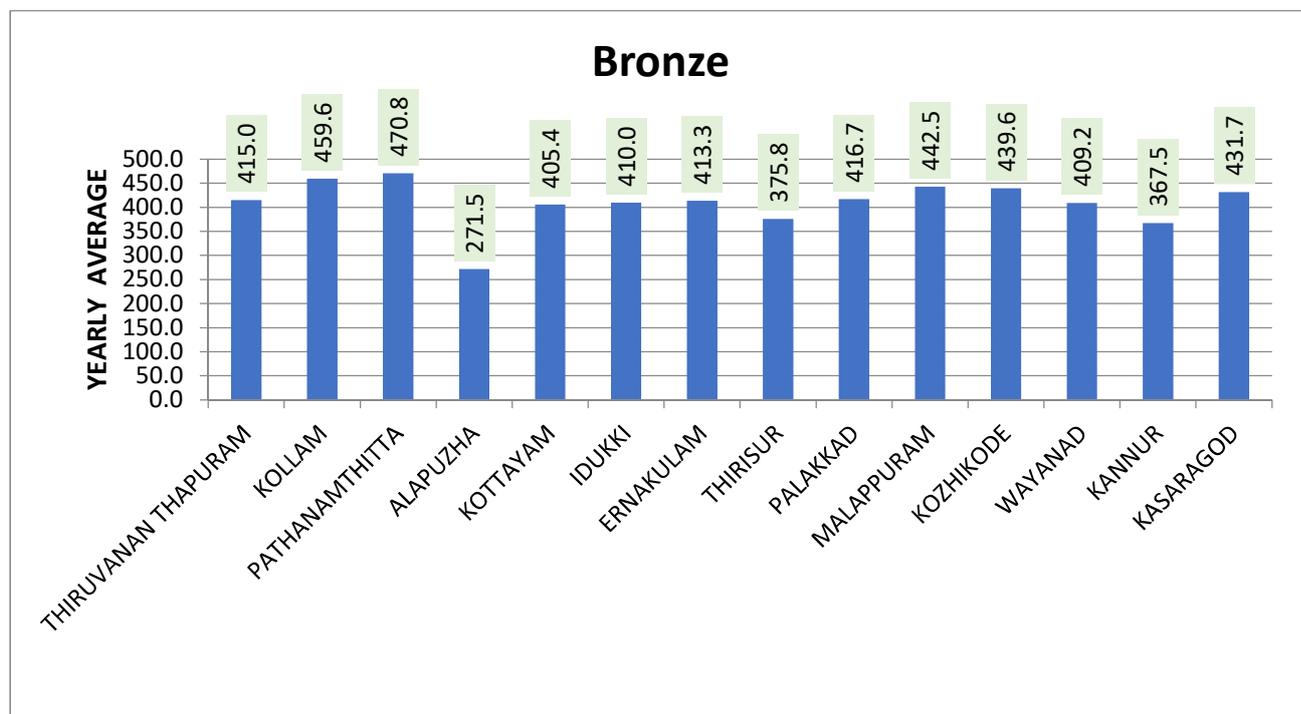

Table 145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

BRONZE

The district-wise retail price analysis of bronze in Kerala indicates noticeable variation across districts. Pathanamthitta recorded the highest price at ₹470.8, followed by Kollam (₹459.6) and Malappuram (₹442.5). Prices were at moderate levels in Kozhikode (₹439.6), Kasaragod (₹431.7), Palakkad (₹416.7), Thiruvananthapuram (₹415.0), Ernakulam (₹413.3), Wayanad (₹409.2), Idukki (₹410.0) and Kottayam (₹405.4). Comparatively lower prices were observed in Thrissur (₹375.8) and Kannur (₹367.5), while Alappuzha recorded a significantly lower price at ₹271.5. Overall, the price pattern shows considerable inter-district disparity, with higher prices prevailing in select districts and relatively lower prices in others.

Table 145- illustrates the dataset pertaining to the DISTRICT WISE YEARLY AVERAGE PRICE OF WASTE PAPER.

STEEL

The district-wise retail price analysis of steel in Kerala shows considerable variation across districts. Alappuzha recorded the highest price at ₹59.6, followed by Palakkad (₹55.4), Kollam (₹53.7) and Ernakulam (₹53.5), indicating relatively higher market demand or distribution costs in these districts. Prices remained at moderate levels in Malappuram (₹53.0), Kozhikode (₹52.7) and Thiruvananthapuram (₹49.6). Comparatively lower prices were observed in Idukki (₹45.8), Thrissur (₹45.5) and Kottayam (₹42.1). The lowest prices were recorded in Wayanad (₹39.9), Kasaragod (₹39.2), Kannur (₹36.3) and Pathanamthitta (₹33.4), suggesting relatively better supply conditions or lower local demand. Overall, the price trend reflects notable inter-district variation, with higher prices concentrated in certain districts and lower prices prevailing in others.
