# 61st Round

(July 2004 - June 2005)

Employment & Unemployment Survey

Department of Economics & Statistics

Government of Kerala

# Preface

*The National Sample Survey Office (NSSO) under the Ministry of Statistics and Programme Implementation, Government of India has been carrying out nationwide socio-economic surveys covering various subjects on regular basis. Keeping in view the necessity of reliable and up to date data regarding employment and unemployment situation in the country NSSO has been conducting quinquennial survey on on employement and unemployement in India since 1972-73. The seventh survey was conducted in the 61st round during the period July 2004-June 2005. Data are collected by the household interview method from a randomly selected sample of households spread over all States and Union Territories of India.*

*Kerala has been participating in the National Sample Surveys from the very beginning with matching samples by collecting data adopting the same sampling design, schedules and instructions for the field staff. The successful development of a society can be measured by assessing the levels of income of the people and corresponding expenditure by them for meeting their various needs. Since reliable data on levels of income of the people are generally not available through any data sources of the statistical system, a comprehensive survey of 'household consumer expenditure' is a valuable tool for studies of well-being of the society. This report is based on the 'State Sample' data on 'employement and unemployement collected by the Department of Economics and Statistics as part of the 61st round (July 2004-June 2005) National Sample Survey.*

*This report contains three chapters and three Appendices. Chapter one is the Introduction of the survey and Chapter two describes in detail the concepts and definitions. The main findings of the survey are presented in chapters three. The findings of surveys on the extent and nature of unemployment is of immense use to policy makers and planners to identify the sectors and sub sectors which call for interventions to improve the employment situation in the country.*

*A comparison is also made in some cases at the all-India level by utilizing selected information from NSSO report No. 516(61/10/1). The detailed tables on which this report is brought out are presented in Appendix A. Appendix B gives the details of the sample design and estimation procedure. Appendix C is the Schedule used for the canvassing of the field survey.*

*The technical assistance provided by NSSO, Government of India and the cooperation extended by the sample households is acknowledged. The work done by the Supervisors and field staff who worked tirelessly to make the survey a success, the report writers and all other staff in the District Office, Malapppuram and Directorate who have contributed in diverse ways to the success of the survey and the subsequent production of the report are duly acknowledged.*

*I hope that this report will be useful to the planners, policy makers, academicians and researchers. Suggestions for improvement of the content of the report will be highly appreciated; comments and suggestions are most welcome.*

# Highlights

- The survey has been conducted in 14 Districts spread across the State.
- A multi stage stratified systematic sampling technique has been adopted for the survey.
- From the 14 Districts surveyed, 364 Panchayat wards and 196 Urban samples were selected for the survey.
- Under the survey, 5460 household schedules had canvassed of which 3600 were rural and 1960 were urban household schedules. A total of 24676 persons have been interviewed to gather information.
- Various Employment-Unemployment estimates in the survey were derived on the basis of usual principal status approach only.
- The survey results were shown in proportions (per thousand persons) for the States surveyed. At the Overall level of the States
- Surveyed, absolute estimates were also derived in addition to the proportion estimates.
- All districts surveyed were estimated to have 75.01 Lakhs households, of which 56.36 lakhs were rural and 18.65 lakhs were urban.
- The household size was estimated at 4.39 at overall level, while it was 4.38 in the rural sector and 4.33 in the urban sector.
- Population was estimated about 327 lakh of which 210 lakh population in the working class age of 15-59 years.
- In the rural sector at overall level, population was estimated to be 247 lakh, which was 75 per cent of the total estimated population in the States surveyed.
- The sex ratio (no. of females per 1000 males) was estimated at 1076 for the rural and urban sectors combined, with 1080 in the rural whereas and 1062 in the urban whereas.
- The literacy rate for the population of age group 7 years & above was estimated to be 94 per cent at the overall level, with 93 per cent in rural areas and 95 per cent in urban areas.

- In case of male and female population of age group 7 years & above, the literacy rate was estimated to be 95.0 per cent and 94 per cent respectively at the overall level.
- The worker population ratio was estimated at 315 persons per 1000 population at the overall level. In the working age population (i.e. 15-59 years of age), the worker population ratio was 417.
- In the rural areas, the worker population ratio was estimated at 319 persons per 1000 population.
- The worker population ratio in case of female members was 131 females employed per 1000 female persons at the overall level.
- The sex ratio of the employed persons reveals that, 256 females were employed per 1000 employed males at the overall level. In the rural and urban areas, the sex ratio of the employed persons was estimated at 270 and 207 respectively.
- The labour force participation rate was estimated to be 315 persons out of 1000 persons in the labour force at the overall level. In the rural and urban sectors, it was 319 and 300 respectively.
- The sex ratio of the labour force shows that there were 347 females per 1000 males in the labour force at overall level. In the rural and urban sector, the sex ratio in the labour force was 358 and 309 respectively.
- The unemployment rate was estimated at 47 persons out of 1000 persons in the labour force, which implies that 13 per cent of the labour force was unemployed at the overall level as per the usual principal status.
- In the rural sector, the unemployment rate was estimated at 45 persons out of 1000 persons in the labour force. Similarly in the urban areas, the unemployment rate was 55 persons out of 1000 persons in the labour force.
- Among females, the unemployment rate was 282 out of 1000 females in the labour force at the overall level, whereas for male members the same was 62 per thousand males.
- The proportion unemployed was the number of unemployed persons per thousand populations. At the overall level, the proportion unemployed was estimated at 58 persons per 1000 population. While for male members, it was 34 and for females, it was 24 per 1000.

- In the working age population the proportion unemployed was 47 persons per 1000 persons.
- In rural areas, the proportion unemployed was estimated at 44 persons per 1000 population in these areas. Similarly, in urban areas, the proportion unemployed was 54 persons per 1000 population in these areas.

# Chapter One
# Introduction

**2.1.** The NSSO was set up in 1950, with the idea of having a permanent survey organisation to collect data on various subjects of the economy through nationwide sample surveys in order to assist in socio-economic planning and policy-making. The NSS is a continuing survey in the sense that it is carried out in the form of successive "rounds", each round usually of a year's duration covering several topics of current interest in a specific survey period. The surveys are conducted through household interviews, using a random sample of households covering practically the entire geographical area of the country.

**2.2.** Survey on the situation of employment and unemployment in Kerala was carried out as a part of the 61st round of the National Sample Survey Office (NSSO) during the period July 2004 - June 2005. In this survey, a state-wide enquiry was conducted to provide estimates on various characteristics pertaining to employment and unemployment in the state and some characteristics associated with them at the state levels. Information on various facets of employment and unemployment in Kerala was collected through a schedule of enquiry (Schedule 10). Based on the data collected during the entire period of survey, estimates pertaining to employment-unemployment in Kerala along with various characteristics associated with them have been presented in this report.

## Past Quinquennial Surveys:

**2.3.** To assess the volume and structure of employment and unemployment, starting with the 9th round (May - September, 1955), NSSO conducted a number of surveys on employment and unemployment. To give a firm conceptual framework for conducting such surveys, the Planning Commission, in the year 1970, set up an "Expert Committee on Unemployment Estimates", (popularly known as the Dantwala Committee), which reviewed these surveys and the indicators generated from such surveys. Based on concepts and definitions recommended by this committee, the first quinquennial survey on employment and unemployment was conducted in the 27$^{th}$ round of NSS (September 1972 – October 1973). After the 27th round, five comprehensive quinquennial surveys on employment and unemployment situation in India have been carried out by the NSSO prior to the present quinquennial survey. These were carried out during the 32nd round (July 1977 – June 1978), 38th round (January 1983 – December 1983), 43rd round (July 1987 – June 1988), 50th round (July 1993 – June 1994), and 55$^{th}$ round (July 1999 – June 2000), in which concepts, definitions and procedures were based primarily on the recommendations of the Dantwala Committee. The results of these surveys have been brought out in the form of NSS reports.

**2.4.** Other surveys on employment-unemployment: Apart from the quinquennial surveys on employment and unemployment, NSSO has been regularly collecting information on certain key items on employment and unemployment from a limited set of households in each round since its 45th round (July 1989 – June 1990), known as annual series, through the schedule on Household

Consumer Expenditure (Schedule 1.0). In the annual series, only some key particulars on the usual and current weekly status of the individuals were collected, and the current weekly status of a person was determined through a direct query .In the 60th round (January – June 2004), there was a change in the procedure of collecting information on employment and unemployment. During the formulation of NSS 60th round survey, the Planning Commission pressed their need for collection of data on the current daily status of employment and unemployment annually as well. The collection of data in the current daily status necessitated the separation of two enquiries on Household Consumer Expenditure and Employment-Unemployment, and as a result, a separate schedule on employment and unemployment (Schedule 10) was canvassed in the 60th round, in which concepts, definitions and procedures were similar to the quinquennial rounds. The results of such surveys have been published in the form of NSS reports.

**2.5.** The present survey: The seventh quinquennial survey on employment and unemployment was conducted by NSSO in its 61st round (July 2004 – June 2005). In this survey, apart from the information usually collected in the quinquennial rounds, information on some new items has been collected. This has been done following the suggestions made by the Working Group set up to finalise the survey methodology and schedules of enquiry of the 61st round. Some of the more important among them, which have enlarged the scope of the survey are stated below:

**a)** Certain information on informal employment has been collected from all usual status workers with respect to their principal work activity and/or their subsidiary activity, engaged in non-agricultural sector as well as in the agricultural sector excluding only growing of crops, market gardening, horticulture and growing of crops combined with farming of animals. Indeed, according to NIC-98, information on informal employment has been collected from usual status workers engaged in industry groups 012, 014, 015 and divisions 10 to 99.

**b)** In the employment and unemployment surveys, data on wages have so far been collected for the employees according to the current daily status. In the 61st round survey, attempt has been made to assess the quality of self-employment in terms of the earnings through certain probing questions. From the self-employed persons according to the usual status, information on two items viz. 'whether earning from self-employment was remunerative' and 'what amount per month was considered remunerative' was collected in terms of codes.

**c)** Information on vocational training receiving/received by the persons of age 15 to 29 years has been collected. Further, among those who have received or are receiving 'formal vocational training', information on the 'source from where degree /diploma/ certificate received/ to be received', 'duration of training' and 'field of training' has been collected.

**d)** Information on 'voluntary participation without remuneration in production of goods and services' has been collected for those members of the household who were not workers, considering both principal and subsidiary status, as per existing production boundary followed by NSSO.

**e)** Instead of collecting information on skill, information on 'seeking or available or suitable for the type of occupation' has been collected for the persons of age below 75 years who are not employed in the usual principal status.

**f)** Information on 'period of seeking/availability for work during the last 365 days' has been collected for all the persons of age 5 years and above. In the earlier quinquennial rounds, this information was collected only for those who were unemployed in the usual principal status. It may be noted that in case more than one subsidiary economic activity was pursued during the reference period, the details of maximum two usual subsidiary economic activities were recorded in the 55th round survey depending upon the relatively longer time criteria. In this round, only one usual subsidiary economic activity pursued for relatively more time was recorded and a person was considered to have performed subsidiary economic activity if the activity was performed at least for 30 days in the reference year.

**2.6.** As in the past, in the present survey too, NSSO collected data on some characteristics, based on which, estimates of employment and unemployment, measured in terms of 3 basic approaches viz. usual status, current weekly status and current daily status can be obtained. The reference period for these approaches differs - it being 365 days preceding the date of survey for 'usual status', 7 days preceding the date of survey for 'current weekly status' and each day of the 7 days preceding the date of survey for 'current daily status'.

**2.7.** Data were collected on the activity status of all persons, i.e. for workers, for those seeking or available for work and also for those remaining out of labour force. A worker could be self-employed or enjoy regular salary/wages or be employed on casual wage basis. Data on this aspect, along with the industry of work of the worker and his/her occupation, were collected during this survey. In order to reveal the multi-dimensional features of the employment-unemployment situation in India, information on several correlates pertaining to it were also gathered. In addition, probing questions were put to the workers in order to understand the extent of underutilization of their labour time and to acquire more specific information in this regard. An effort was also made to collect information on the qualitative aspects of employment like changes in activity status, occupation /industry, availability of trade unions/associations, nature of employment (permanent/temporary), etc. Data were also collected from the usual status workers, engaged in industry groups 012, 014, 015 and divisions 10 to 99 of NIC-98 (see Annexure-I given after Chapter Eight but before Appendix A for brief description of industry groups and divisions), with respect to some particulars of the enterprise in which they were engaged viz. location of work place, type of enterprises, number of workers in the enterprise etc. and some particulars on the condition of employment like type of job contract, eligibility for paid leave, availability of social security benefits etc.. Data were also collected to get some idea about earning from self-employment. Information on vocational training receiving/received by the persons of age 15 to 29 years was also collected in the 61st round survey.

## The survey outline

**2.8.** Geographical coverage: The survey covered the whole of the Kerala state with 364 Rural and 196 urban samples. The survey period of the 61st round was from July 2004 to June 2005. The survey period of one year was divided into four sub-rounds with three months duration for each sub-round. An equal number of sample panchayat wards /blocks (FSU) were allotted for survey to each of these four sub-rounds with a view to ensuring uniform spread of sample FSU over the entire survey period. Each FSU was surveyed during the sub-round to which it was allotted.

**2.9.** Sub-round: The fieldwork of the 61st round of NSSO started from 1st July, 2004 and continued till 30th June, 2005. As usual, the survey period of this round was divided into four sub-rounds, each with duration of three months, the 1st sub-round period ranging from July to September 2004, the 2nd sub-round period from October to December 2004 and so on. An equal number of sample villages/blocks (FSUs) were allotted for survey in each of these four sub-rounds. The survey used the interview method of data collection from a sample of randomly selected households.

**2.10.** Table 1.10 gives the numbers of panchayat wards and urban blocks allotted for survey and the numbers of rural and urban sample households in which the Employment and Unemployment , "Schedule 10", was canvassed.

**Table 1.10 : Number of panchayat wards /blocks Surveyed for Schedule 10**

# Chapter Two
# Concepts and Definitions

**2.1.** **Household:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb "normally" means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-always (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer's/ host's household. "Living together" was given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person's family members was taken to include the person also. Each inmate of a hotel, mess, boarding- lodging house, hostel, etc., was considered to be a single- member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

**2.2.** **Land owned by the household as on date of survey:** A piece of land was considered as 'owned by the household' if permanent heritable possession with or without the right to transfer the title was vested in a member or members of the household. Land held in owner like possession say, under perpetual lease, hereditary tenure, long-term lease for 30 years or more, etc., was also considered as land owned.

**2.3.** **Land possessed by the household as on date of survey**: The area of land possessed included land 'owned', 'leased in' and 'land neither owned nor leased in' (i.e. encroached) by he household but excluded land 'leased out'. For a piece of land under the possession of the household, if the household did not have the title of ownership and also did not have lease agreement for the **use** of land transacted, either verbally or in writing, such land was considered as 'neither owned nor leased in'. In collecting information regarding land possessed, the actual position as obtained on the date of survey was considered. The 'area of land possessed' did not include the area of land owned, leased- in, etc. by the servants/paying guests who were considered as normal members of the household.

**2.4.** **Land cultivated (including orchard and plantation) during July 2003-June 2004:** Land cultivated (including orchard and plantation) during the agricultural year 2003-2004, i.e., July 2003 to June 2004 was recorded considering cultivation of land from the land 'owned', 'land leased- in' or from 'land neither owned nor leased- in'. Area with field crops and area under orchards and plantations was

counted only once in the same year/ season. It may be noted that information on land owned, possessed or cultivated as described above was collected in hectares up to 3 places of decimals.

**2.5. General educational level:** A person was considered as literate if he/she could both read and write a simple message with understanding in at least one language. For all the individuals who were found to be literate, the general level of education was collected in terms of highest level of education successfully completed. Highest level of education successfully completed by each member of the household was decided by considering his/ her all general/ technical/ vocational educational level and was recorded in terms of 12 categories viz. (i) not literate, (ii) literate without formal schooling: (a) Education Guarantee Scheme (EGS)/Non-formal Education Courses (NFEC)/ Adult Literacy Centers (AEC), (b) Total Literacy Campaign (TLC), (c) others; (iii) literate but below primary, (iv) middle, (v)secondary, (vi) higher secondary, (vii) diploma/certificate course, (viii) graduate, and (ix) postgraduate and above. The criterion for deciding primary, middle, secondary, etc. levels were the same that has been followed in the concerned states/union territories. The category 'diploma or certificate course' meant diploma or certificate courses in general education, technical education or vocational education, which is below graduation level. Diploma or certificate courses in general education, technical education or vocational education, which is equivalent to graduation level, was considered under the category 'graduate'. Similarly, diploma or certificate courses in general education, technical education or vocational education, which is equivalent to post-graduation level and above were considered under the category 'post-graduate and above'.

**2.6. Technical educational level:** The highest level of technical education successfully completed by each member of the household was recorded in terms of 12 categories viz. (i) no technical education, (ii) technical degree in agriculture / engineering / technology / medicine etc. (iii) diploma or certificate below graduate level in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects, and (iv) diploma or certificate equivalent to graduate and above level in: (a) agriculture, (b)engineering /technology, (c) medicine, (d) crafts, (e) other subjects. Technical diploma or certificate in 'other subjects' included diploma or certificate in management, applied arts, etc.

**2.7. Status of current attendance in educational institution:** Particulars of current attendance in educational institution were recoded for persons of age below 30 years. It was first ascertained whether the person was currently attending any educational institutions (government or private) or not. For persons who were not currently attending any educational institutions, reason for not attending viz. (i) school too far, (ii) to supplement household income, (iii) education not considered necessary, (iv) to attend domestic chores, and (v)others, was recorded. For those who were currently attending any educational institution, the course of study pursued by them was recorded in terms of 20 categories viz. (i)EGS/NFEC/AEC, (ii) TLC, (iii) pre-primary (nursery/Kinder garden, etc.), (iv) primary (class I to IV/V), (v) middle, (vi) secondary and higher secondary, (vii) graduate and above in: (a)agriculture, (b) engineering/technology, (c) medicine, (d) other subjects, (viii) diploma or certificate (below graduate level) in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects, (ix) diploma or certificate (graduate and above level) in: (a) agriculture, (b) engineering/technology, (c)

medicine, (d) crafts, (e) other subject. Persons who were registered for any regular correspondence courses or distance e education courses for a stipulated period at the end of which, were allowed to appear in the examination for the course, was also considered as 'currently attending'. Persons who were awaiting results were also considered as 'currently attending'.

**2.8. Type of institution:** The type of institution referred to the type of management by which the institution was run. For those who were currently attending any educational institution, the type of institution was recorded in terms of 5 categories viz. (i) Government, (ii) Local body, (iii) Private aided, (iv) Private unaided, and (v) not known. All schools/ institutions run by the State, Central Government, Public Sector Undertakings or Autonomous Organisations, which are completely financed by the Government were treated as government institutions. Schools/ institutions where there was some intervention of government in the management and were mainly financed by the government, were also treated as government institutions. All institutions run by municipal corporations, municipal committees, notified area committees, zilla parishads, panchayat samitis, cantonment boards, etc. were treated as local body institutions. Institutions that were run by an individual or a private organisation and receive maintenance grant partly or fully from the Government or local body were considered as private aided institution. Institutions that were managed by an individual or a private organisation and not receiving maintenance grant either from a Government or a local body was considered as private unaided institution.

**2.9. Vocational training**: The main objective of vocational education and training is to prepare persons, especially the youth, for the world of work and make them employable for a broad range of occupations in various industries and other economic sectors. A vocational training was broadly defined as a training, which prepared an individual for a specific vocation or occupation. It aims at imparting training to persons in very specific fields through providing significant 'hands on' experience in acquiring necessary skill in the specific vocation or trade, which make them employable or create for them opportunities of self-employment.

**2.9.1. Formal vocational training**: The vocational training that took place in education and training institutions which followed a structured training programme and led to certificates, diplomas or degrees, recognised by State/Central Government, Public Sector and other reputed concerns was considered as formal vocational training. By structured training programme, it was meant that (i) the training programme had a definite title with prescribed syllabus and curriculum and a specified duration of the training, and (ii) the training had some entry level eligibility in terms of education and age.

**2.9.2. Non-formal vocational training:** The expertise in a vocation or trade is sometimes acquired by the succeeding generations from the other members of the households, generally the ancestors, through gradual exposures to such works. The expertise gained through significant 'hands-on' experience enables the individual to take up activities in self employment capacity or makes him employable. Acquiring such marketable expertise by one, which enabled him/her to carry out the trade or occupation n of their ancestors over generations, was

considered as receiving 'non-formal' vocational training through 'hereditary' sources. 'Non-formal' vocational training received by a person to pursue a vocation different from the trade or occupation of their ancestors, was considered as 'non- formal' vocational training through 'other' sources. The 'other' sources also included the cases where the expertise to carry out the trade or occupation of their ancestors was acquired from sources other than the household members.

**2.10. Non-Profit institutions (NPI)**: NPIs are legal or social entities which are created for the purpose of producing goods and services that are usually distributed through non-market channels and the legal status of such entities did not permit them to be a source of income, profit or other financial gain for the units that established, controlled or financed them. In practice, their productive activities are bound to generate either surpluses or deficits but the institutional units which control or manage them are not entitled to a share in any profit/income.

**2.11. Philanthropic institution:** These are the non-profit institutions consisting of charities, relief or aid agencies that are created for philanthropic purposes. Such institutions generally provide goods or services to households/institutions in need, including households affected by natural disasters or war. The resources of such institutions are provided mainly by donations in cash or in kind from the general public, corporations or governments.

**2.12. Public works:** Public works was defined as those activities which were sponsored by Government or Local bodies and which covered local area development works like construction of roads, dams, bunds, digging of ponds etc. as relief measures, or as an outcome of the employment generation schemes under the poverty alleviation programmes.

**2.13. Economic activity**: The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey of NSS 61st round. Such activities included production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets.

**2.13.1.** The full spectrum of economic activities as defined in the UN system of National Accounts (1993) was not covered in the definition adopted for the NSS 61st round survey of Employment and Unemployment. Production of any good for own consumption is considered as economic activity by UN System of National Accounts but production of only primary goods for own consumption was considered as economic activity by NSSO. While the former considers activities like own account processing of primary products as economic activities, in the NSS surveys, processing of primary products for own consumption was not considered as economic activity.

**2.13.2.** The term 'economic activity' as defined in the employment and unemployment survey of NSS 61st round, therefore, included:

(i) All the market activities performed for pay or profit which result in production of goods and services for exchange.

(ii) Of the non- market activities,

(a) all the activities relating to the primary sector (i.e. industry Divisions 01 to 14 of NIC-98) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own Consumption and (b) the activities relating to the own-account production of fixed assets. Own account production of fixed assets includes construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor. As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities. Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not.

**2.13.3.** **Activity status**: It is the activity situation in which a person was found during a reference period with regard to the person's participation in economic and no n-economic activities. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

(i) Working or being engaged in economic activity (work) as defined above,

(ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if the 'work' is available and

(iii) being not engaged in any economic activity (work) and also not available for 'work'. Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and ‘unemployment’, respectively.

**2.14.** Identification of each individual into a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained for a person. In such an eventuality, the identification uniquely under any one of the three broad activity statuses was done by adopting either the major time or priority criterion .The former was used for classification of persons according to the 'usual activity status' approach and the latter for classification of persons according to the ‘current activity status’ approach. Each of the three broad activity statuses was further subdivided into several detailed activity categories. If a person categorised as engaged in economic activity by adopting one of the two criteria mentioned above was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status code related to that activity in which relatively more time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activity.

**2.14.1.** The detailed activity statuses under each of the three broad activity statuses (viz. employed, unemployed and not in labour force) and the corresponding codes used in the survey are given below:

| Code/ Description | Working (or employed) |
|---|---|
| **self-employed** | |
| 11 | worked (self-employed) in household enterprises as own-account worker |
| 12 | worked (self-employed) in household enterprises as an employer |
| 21 | worked (self-employed) in household enterprises as helper |
| **Regular salaried/ wag employee** | |
| 31 | worked as regular salaried/wage employee |
| **Casual labour** | |
| 41 | worked as casual wage labour in public works |
| 51 | worked as casual wage labour in other types of works |
| 61 | did not work owing to sickness though there was work in household enterprise |
| 62 | did not work owing to other reasons though there was work in household enterprise |
| 71 | did not work owing to sickness but had regular salaried/ wage employment |
| 72 | did not work owing to other reason but had regular salaried/ wage employment |
| **Not working but seeking/available for work (or unemployed)** | |
| 81 | sought work or did not seek but was available for work (for usual status approach) sought work (for current weekly status approach) |
| 82 | did not seek but was available for work (for current weekly status approach) |
| **Neither working nor available for work (or not in labour force)** | |
| 91 | attended educational institutions |
| 92 | attended to domestic duties only |
| 93 | attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing , tailoring etc for household use |
| 94 | Renters, pensioners, remittance recipients, etc. |
| 95 | not able to work owing to disability |
| 97 | Others (including beggars, prostitutes, etc.) |
| 98 | did not work owing to sickness (for casual workers only) |
| 99 | children of age 0-4 years<br>It may be noted that codes 61, 62, 71, 72, 82 and 98 were applicable for current weekly status and current daily status approaches only. |

**2.15. Workers (or employed)**: Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or nonfarm activities were also considered as workers. Relevant activity status codes within 11 to 72 were assigned for workers. Workers were

further categorized as self-employed (relevant activity status codes: 11, 12, 21, 61, 62), regular salaried/wage employee (relevant activity status codes: 31, 71, 72), and casual wage labour (relevant activity status codes: 41 and 51).

**2.16. Seeking or available for work (or unemployed)**: Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, interne diaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those who were 'seeking or available for work' (or unemployed). Activity status codes 81 or 82 were assigned for unemployed.

**2.17. Labour force**: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constitute**d** the labour force. Persons with activity status codes 11 – 82 constituted the labour force.

**2.18. Not in labour force** : Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, remitters, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'.

**2.19. Self-employed**: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in household enterprises. The essential feature of the self employed is that they have autonomy (i.e., how, where and when to produce) and economic independence (i.e., market, scale of operation and money) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the sales of output produced by self-employed persons.

**2.19.1.** Categories of self-employed persons: Self-employed persons were categorised as follows:

(i) **own-account workers**: those self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;

(ii) **Employers**: those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and

(iii) **Helpers in household enterprise:** those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household

enterprise on their own but assisted the related person living in the same household in running the household enterprise.

**2.20. Regular salaried/wage employee**: These were persons who worked in others' farm or non-farm enterprises (household and non- household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

**2.21. Casual wage labour**: A person who was casually engaged in others' farm or non-farm enterprises (household and non- household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labour.

**2.22. Different approaches followed to determine activity status**: The persons surveyed were **classified** into various activity categories on the basis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. The procedure adopted to arrive at these three measures is given below.

**2.22.1. Usual principal activity status**: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively longer time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the usual principal activity status of the person. To decide the usual principal activity of a person, first a two stage dichotomous classification was followed for determining the broad usual principal activity status of the person viz. (i) employed, (ii) unemployed, and (iii) not in labour force. Persons were first categorised as those in the labour force and those not in the labour force depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (not in the labour force). For persons belonging to the labour force, the broad activity status of either 'working' (employed) or 'not working but seeking and/or available for work' (unemployed) was ascertained based on the same criterion viz. relatively longer time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively longer time spent on such activities. In terms of activity status codes 11-51 were applicable for persons classified as workers and codes 91-97 for those who were not in the labour force. In the usual status approach, a single code 81 was assigned for persons seeking or available for work (unemployed persons) while two separate codes 81(sought work) and 82 (did not seek but was

available for work) were assigned for unemployed persons according to current weekly status and current daily status approach.

**2.22.2. Usual subsidiary economic activity status**: A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11-51 only were applicable for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

(i) a person may be engaged in a relatively longer period during the 365 days in economic (non-economic activity) and for a relatively minor period, which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively minor period, was considered as his/her subsidiary economic activity.

(ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively shorter time in a subsidiary capacity. The economic activity, which was pursued for a relatively shorter time, was considered as his/her subsidiary economic activity.

**2.22.3. Usual activity status considering principal and subsidiary status taken together**: The usual status, determined on the basis**:** of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

**2.22.4. Current weekly activity status**: The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided on the basis of a certain priority cum major time criterion.

**2.22.4.1.** According to the priority criterion, the status of 'working' gets priority over the status of 'not working but seeking or available for work' that, in turn, gets priority over the status of 'neither working nor available for work'. A person was considered working (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the 7 days preceding the date of survey. A person was considered 'seeking or available for work (or unemployed)' if, during the reference week, no economic activity was pursued by the person but he/she made efforts to get work or had been available for work any time during the reference

week though not actively seeking work in the belief that no work was available. A person who had neither worked nor was available for work any time during the reference week was considered as engaged in non-economic activities (or not in labour force).

**2.22.4.2.** After deciding the broad current weekly activity status of a person on the basis of 'priority' criterion, the detailed current activity status was then decided on the basis of 'major time' criterion if that person pursued multiple economic activities. The current weekly activity status of a person could be any one of the detailed activity status and could have any of the valid codes within 11 to 98. Of these codes, 11 to 72 pertained to workers, 81 to 82 for unemployed and 91 to 98 for persons not in the labour force.

**2.22.5. Current daily activity status.** The National Sample Survey Office (NSSO) e activity pattern of the population, particularly in the informal sector, is such that during a week, and sometimes, even during a day, a person could pursue more than one activity. Moreover, many people could even undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status for a person was determined on the basis of his/her activity status on each day of the reference week using a priority-cum-major time criterion (day to day labour time disposition). Time disposition was recorded for every member of the sample households. This involved recording of different activities pursued by the members along with the time intensity in quantitative terms for each day of the reference week. The different activities were identified and recorded in terms of 'activity status' and 'industry' codes for persons in urban areas and 'activity status', 'industry' and 'operation' codes for persons in rural areas. The description (and codes used) of current daily activity statuses is the same as those of current weekly activity status. The terms ‘industry’ and ‘operation’ are explained later. The following points were considered for assigning the time intensity and determining the current daily status of a person:

i) Each day of the reference week was looked upon as comprising either two ‘half days’ or a ‘full day’ for assigning the activity status. For recording time disposition for activities pursued by a person in a day, an intensity of 1.0 was given against an activity that was done for ‘full day’ and an intensity of 0.5 against the activity which was done for ‘half day’.

ii) A person was considered ‘working’ (employed) for the full day if he/she had worked for 4 hours or more during the day.

iii) If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she was assigned two out of the various economic activities on which he/she devoted relatively longer time on the reference day. In such cases, an intensity of 0.5 was given for each of these two economic activities.

iv) If the person had worked for 1 hour or more but less than 4 hours, he/she was considered ‘working’ (employed) for half-day and ‘seeking or available for work’ (unemployed) or ‘neither seeking nor available for work’ (not in labour force) for the other half of the day depending on whether he was seeking/available for work or not.

v) If a person was not engaged in any 'work' even for 1 hour on a day but was seeking/available for work for 4 hours or more, he was considered 'unemployed' for the entire day. But if he was 'seeking/available for work' for more than 1 hour and less than 4 hours only, he was considered 'unemployed' for half day and 'not in labour force' for the other half of the day.

vi) A person who neither had any 'work' to do nor was available for 'work' even for half a day was considered 'not in labour force' for the entire day and was assigned one or two of the detailed non-economic activity statuses depending upon the activities pursued during the reference day.

**2.22.6.** In the quinquennial surveys, the current weekly status of a person is derived from the intensities assigned for the daily activities performed by a person during the 7 days of the reference week.

**2.23.** **Industry and occupation of the work activity**: For the employed persons, to record the industry of work, 5-digit classification of NIC-1998 was used and to record the type of occupation, 3-digit classification of NCO-1968 was used. In case two or more industry occupation combinations corresponding to the status code were reported by a person, the industry-occupation was taken as the one in which relatively more time was spent during the reference period by the person. To identify certain category of workers under Division 95 (Private households with employed persons) of NIC 1998, six additional codes were used in the survey viz., housemaid /servant (95001), cook (95002), gardener (95003), gatekeeper/ chowkidar/watchman (95004), governess/baby-sitter (95005) and 'others' (95009). This apart, separate industry codes were used for recording the activities of letting of building for residential purposes (70104) and letting of building for non-residential purposes (70105).

**2.24.** **Operation**: This was the type of work performed by a person during a reference period. It could be manual or non-manual and could pertain to activities in agricultural or nonagricultural sector. Operation was combined with activity status and industry corresponding to the work performed. Information regarding the type of operation was collected only for rural areas and related to current status only. The different types of operations came under four categories. Ploughing , sowing, transplanting, weeding, harvesting and other cultivation activities fell under the category manual work in cultivation. Against the category manual work in other agricultural activities were the following types: forestry, plantation, animal husbandry, fisheries and other agricultural activities. Manual work in non-agricultural activities constituted the third category. The last category viz. non-manual work comprised two broad types – (i) in 'cultivation' and (ii) in 'other than cultivation'. It may be noted that for 'regular salaried/wage employees' on leave or on holiday, the 'operation' related to their respective function in the work or job from which he/she was temporarily off. Similarly, for persons categorised as 'self-employed' but not working on a particular day in spite of having work on that day, the operation related to the work that he/she would have done if he/she had not enjoyed leisure on that day.

**2.25.** **Cultivation**: All activities relating to production of crops and related ancillary activities were considered as cultivation. Growing of trees, plants or crops as plantation or orchards (such as rubber,

cashew, coconut, pepper, coffee, tea etc.) were not considered as cultivation activities for the purpose of this survey. In general, the activities covered under NIC 1998 sub-classes 01111, 01112, 01113, 01115, 01119, 01121, 01122 and 01135 (excepting plantation of pepper and cardamom) were considered as cultivation.

**2.26.** **Manual work**: A job essentially involving physical labour was considered as manual work. However, jobs essentially involving physical labour but also requiring a certain level of general, professional, scientific or technical education were not termed as 'manual work'. On the other hand, jobs not involving much of physical labour and at the same time not requiring such educational (general, scientific, technical or otherwise) background were treated as 'manual work'. Thus, engineers, doctors, dentists, midwives, etc., were not considered manual workers even though their jobs involved some amount of physical labour. But, peons, chowkidars, watchman, etc. were considered manual workers even though their work might not involve much physical labour. Manual work was defined as work pursued in one or more of the following occupational groups of the National

**2.27.** **Classification of Occupations (NCO 1968):**

| | |
|---|---|
| Division 5 (Service workers) | |
| Group 52 | Cooks, waiters, bartenders and related workers (domestic and institutional). |
| Group 53 | Maid and other housekeeping service workers (not elsewhere classified). |
| Group 54 | Building caretakers, sweepers, cleaners and related workers. |
| Group 55 | Launders, dry cleaners and pressers. |
| Group 56 | Hair dressers, barbers, beauticians and related workers. |
| Family 570 | Fire fighters |
| Family 574 | Watchmen, gate-keepers |
| Family 579 | Protective service workers not elsewhere classified. |
| Division 6 (Farmers, Fishermen, Hunters, Loggers and related workers) | |
| Group 63 | Agricultural labourers |
| Group 64 | Plantation labourers and related workers |
| Group 65 | Other farm workers |
| Group 66 | Forestry workers |
| Group 67 | Hunters and related workers |
| Group 68 | Fishermen and related workers. |
| Division 7-8-9 | Production and related workers, transport equipment operators and labourers : All groups excluding group 85 (electrical fitters and related workers) and group |
| 86 (broadcasting station and sound equipment operators and cinema projectionists). | |

**2.28.** **Rural labour:** Manual labour working in agricultural and /or non-agricultural occupations in return for wages paid either in cash or in kind (excluding exchange labour) and living in rural areas, was taken as rural labour.

**2.29.** **Agricultural labour**: A person was considered as engaged as agricultural labour, if he/she followed one or more of the following agricultural occupations in the capacity of a wage paid manual labour, whether paid in cash or kind or both:

(i) Farming,

(ii) Dairy farming,

(iii) Production of any horticultural commodity,

(iv) Raising of livestock, bees or poultry,

(v) Any practice performed on a farm as incidental to or in conjunction with farm operations (including forestry and timbering) and the preparation for market and delivery to storage or to market or to carriage for transportation to market of farm produce. Working in fisheries was excluded from agricultural labour. Further, 'carriage for transportation' referred only to the first stage of the transport from farm to the first place of disposal.

**2.30.** **Wage paid-manual labour**: A person who did manual work in return for wages in cash or kind or partly in cash and partly in kind (excluding exchange labour) was considered as a wage paid manual labour. Salaries were also counted as wages. A person who was self employed in manual work was not treated as a wage paid manual labour.

**2.31.** **Nominal work**: When a person worked for a total duration of 1 to 2 hours in a day, it was considered as a day with nominal work for the person. In the day-to-day labour time disposition of the reference week, such a day's work was considered as 'half-day' work. therefore, for a person, number of days with nominal work is a sub-set of the number of days worked with 0.5 intensity.

**2.32.** **Wage and salary earnings**: Information on wage and salary earnings was collected separately for each of the wage/salaried work recorded for a person in a day. Here, earnings refer to the wage/salary income (and not total earnings taking into consideration of all other activities done) received/receivable for the wage /salaried work done during the reference week by a wage/salaried employee and casual labourer. The wage/ salary received or receivable may be in cash or kind or partly in cash and partly in kind. While recording the earnings following conventions were followed.

i) The wages in kind were evaluated at the current retail price.

ii) Bonus and perquisites such as free accommodation, reimbursement of expenditure for medical treatment, free telephones, etc. evaluated at the cost of the employer or at retail prices and duly apportioned for the reference week were also included in earnings.

iii) Amount r receivable as 'over-time' for the additional work done beyond normal working time was excluded. It may be noted that in the survey, at most two activities could be recorded for a person in a day. Therefore, it is possible that a person might have carried out two or more wage/salaried activities in a day, but only one activity or two activities at the most, depending upon the time spent on those activities, was recorded. In that case, the wage/salary income only from that activity(s) was collected and recorded separately, and not the total income of the person from all the activities done for the entire day.

**2.33. Earning from self-employment:** To have some idea about earnings from self employment, perception of the self-employed persons (self-employed either in the usual principal status or usual subsidiary status) regarding their current earnings from self employment was recorded. Earning of the self- employed person was judged considering all his/ her farm and non-farm businesses together in which he/ she was engaged in self employment capacity during the last 365 days either in principal status or subsidiary status or in both the statuses. Information was collected on whether their current earnings from self employment were regarded as remunerative or not. The current earnings from self employment was regarded as remunerative if total earnings from self-employment was able to meet the desired level of income of the individual under the existing situation in respect of type of activity, scale of operation of the business(s), market condition, location of the business, etc. If the actual earnings from the self-employment activities fell short of the desired level, the employment was not regarded as remunerative. From all the self-employed members of the household, desired level of earnings in a month from all self-employment activities was also recorded in terms codes.

**2.34. Present spell of unemployment:** The present spell of unemployment meant the continuous period for which a person remained unemployed starting from the day the person became unemployed to the survey date. For the new entrants into the labour force, the present spell meant the entire length of unemployment till the date of survey, starting from the day such person joined in the labour force. For those who had any previous employment, the present spell meant the period starting from the day they were seeking or available for work after loosing their last employment to the survey date.

**2.35. Approximate** number of months without work: The months without work were not necessarily continuous. The 'approximate number of months without work' included those months in which a person was either unemployed or was not in the labour force. For deciding the number of months without work, each of the 12 months was considered separately and if, in a month the period without work was reported to be 15 days or more, it was considered as a month without work.

**2.36. Existence of union/association in the activity:** Union/association was meant to any registered/recognized body whose membership is open to a section of those engaged in a specific activity or trade and whose main objective is to look into the interests of its members. Thus, besides the usual trade unions, union/association covered the association of owners, self-employed persons, etc.

**2.37. Informal Employment**: According to the 17th International Conference of Labour Statisticians (ICLS) framework, informal employment is identified by jobs classified by status of employment of various categories of workers engaged in different types of production units consisting of (a) formal sector enterprises, (b) informal sector enterprises, and (c) households which produce goods for their own final use and/or those employing domestic workers. The status of employment of the workers performing the jobs may be (a) own account workers, (b) employers, (c) contributing family workers, (d) employees, or (e) member of informal producers' co-operatives. The employment in the above categories may be formal or informal depending upon the type of enterprises in which

the workers are engaged or the nature of work they perform. Accordingly, the informal employment comprises jobs held by:

Own-account workers and employers who have their own informal sector enterprises; · contributing family workers, irrespective of whether they work in formal or informal sector enterprises;· Employees who have informal jobs, whether employed by formal sector enterprises, informal sector enterprises, or as paid domestic workers by households;· Members of informal producers' cooperatives; and Persons engaged in the own-account production of goods exclusively for own final use by their household, such as subsistence farming or do- it-yourself construction of own dwellings. In the 61st round survey, certain information for usual status workers engaged in industry groups 012, 014, 015 and divisions 02 to 99, has been collected to identify informal employment. The relevant information which are useful in this respect are status in employment, type of enterprise, type of job contract, availability of social security benefits, nature of job, existence of union/ association, etc.

**Procedure for determining household type**: On the basis of the sources of the household's income during the last 365 days preceding the date of survey, the household types were assigned. For this purpose, only the household's income from economic activities was considered. The income of servants and paying guests was not taken as the income of the household.

For the **rural** areas, household types were as follows:

Self-employed in non-agriculture; agricultural labour; other labour, Self-employed in agriculture; others.

For **urban** areas, the household types were as follows:

Self-employed; regular wage/salary earning; casual labour ; others.

**2.38. Procedure for determining household industry and occupation**: To determine the household principal industry and occupation, the general procedure followed was to list all the occupations pertaining to economic activities pursued by the members of the household excluding those employed by the household and paying guests (who in view of their staying and taking food in the household were considered as its normal members) during the one year period preceding the date of survey, no matter whether such occupations were pursued by the members in their principal or subsidiary (on the basis of earnings) capacity. Out of the occupations listed that one that fetched the maximum earnings to the household during the last 365 days preceding the date of survey was considered as the principal household occupation. If one or more members of the household pursued the household occupation in different industries, the particular industry out of all the different industries corresponding to the principal occupation, which fetched the maximum earnings, was considered as the principal industry of the household.

**2.39. Procedure for collecting monthly per capita consumer expenditure (MPCE):** For collection of data on total expenditure of the household from employment and unemployment schedule (Schedule 10), a worksheet was used in the Schedule 10 of the 61st round. The approximate value of consumer expenditure obtained through the worksheet has been used for studying employment and unemployment characteristics by different levels of living of the household members. The worksheet contained 36 different components of household consumer expenditure. Depending upon the type of item, either of the two reference periods viz,. 30 days and 365 days, was

used to record consumption of different groups of items. The items of consumption were classified into four groups and three different approaches viz (a) consumption approach, (b) expenditure approach and (c) first-use approach, were followed for defining consumption of items. The different groups were (i) food (other than 'cooked meals'), pan, tobacco & intoxicants and fuel & light, (ii) cooked meals, miscellaneous goods and services including education, medical, rent, taxes and cess, (iii) clothing and footwear and (iv) durable goods. The procedure followed for defining consumption of the four groups were (i) consumption approach (ii) expenditure approach, (iii) first-use approach and (iv) expenditure approach, respectively. The definition of household consumer expenditure and the procedure for evaluating that was the same for both Schedule 10

**Rural and Urban range is as follows**

| SL. NO. | RURAL (IN RS) | URBAN (IN RS) |
|---|---|---|
| 1 | 0 – 235 | 0 – 335 |
| 2 | 235 – 270 | 335 – 395 |
| 3 | 270 – 320 | 395 – 485 |
| 4 | 320 – 365 | 485 – 580 |
| 5 | 365 – 410 | 580 – 675 |
| 6 | 410 – 455 | 675 – 790 |
| 7 | 455 – 510 | 790 – 930 |
| 8 | 510 – 580 | 930 – 1100 |
| 9 | 580 – 690 | 1100 – 1380 |
| 10 | 690 – 890 | 1380 – 1880 |
| 11 | 890 – 1155 | 1880 – 2540 |
| 12 | 1155 & more | 2540 & more |

**2.40. Procedure followed for collecting employment and unemployment particulars in different NSS rounds**: In the annual rounds, only activity status and industry of work according to usual principal status, subsidiary status and current weekly status approach are collected through a few columns of the demographic block of the Consumer Expenditure Schedule (Schedule 1.0). Particulars of employment and unemployment according to the usual principal status and usual subsidiary status were collected in the annual rounds by following a similar approach as in the quinquennial rounds. In the quinquennial rounds, particulars of current daily status of the household members are collected and current weekly status is derived from them, whereas in the annual rounds, current weekly status has been obtained through a direct query. In the 60th round, a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment was colleted in the same manner as that of the quinquennial.

# Chapter Three

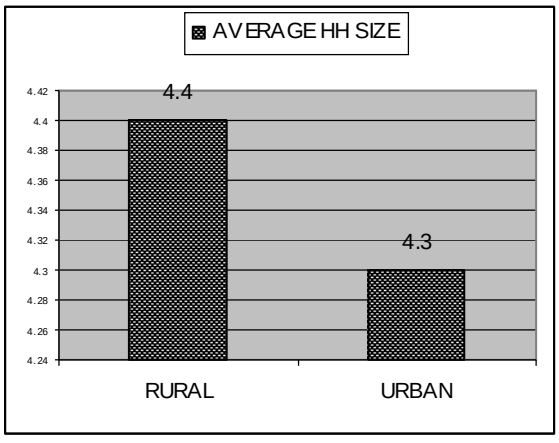
# SUMMARY FINDINGS

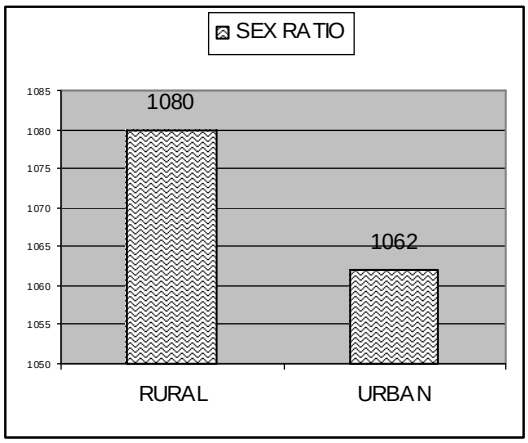
This report is based on the seventh quinquennial survey on employment and unemployment conducted in the 61st round of NSS during July, 2004 to June, 2005. The survey was spread over 364 Rural samples and 196 urban blocks covering 5560 households (3600 in rural areas and 1960 in urban areas) and enumerating 25,594 persons (15,990 in rural areas and 9,604 in urban areas). Employment and unemployment were measured with three different approaches, viz. usual status with a reference period of one year, current weekly status with one week reference period and current daily status based on the daily activity pursued during each day of the reference week. Unless otherwise stated, 'all' usual status workers will mean all workers taking into consideration the usual principal and subsidiary status taken together. Some of the key findings are stated below.

**3.1. A Household and Population:** According to the survey estimates, about 75 % of the households belonged to rural India and accounted for nearly 73.5 % of total population. About 5.6 % of households in the rural and about 4.8 percent urban areas we re headed by females. Compared to all households, they had, on an average, a relatively smaller household size and a much higher sex-ratio against national figure of 11 percent both in rural and urban

**3.2. Average Household Size: As** per the concepts of this survey, a group of person normally living together and taking food from a common kitchen constitute a household. The estimated average household size of rural and urban sectors of Kerala and all-India is given in Chart 3.2. The chart shows that, during the survey period, the average household size of Kerala was 4.4 and sex ratio of was 1080 for rural and the corresponding figure for urban was 1062 and 4.3 respectively.

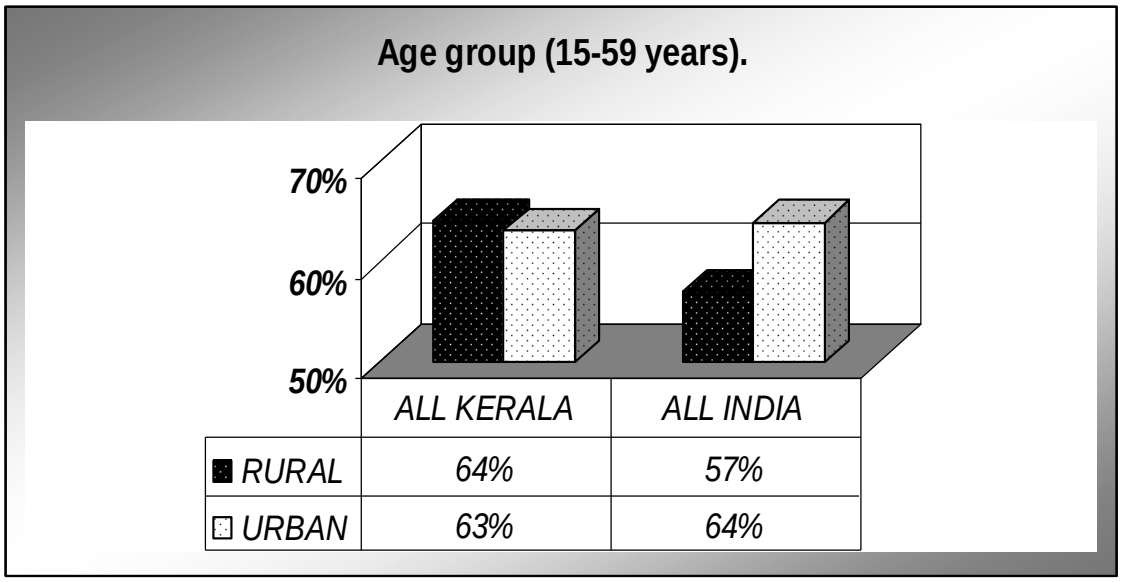
Chart 3.2. Average Household Size





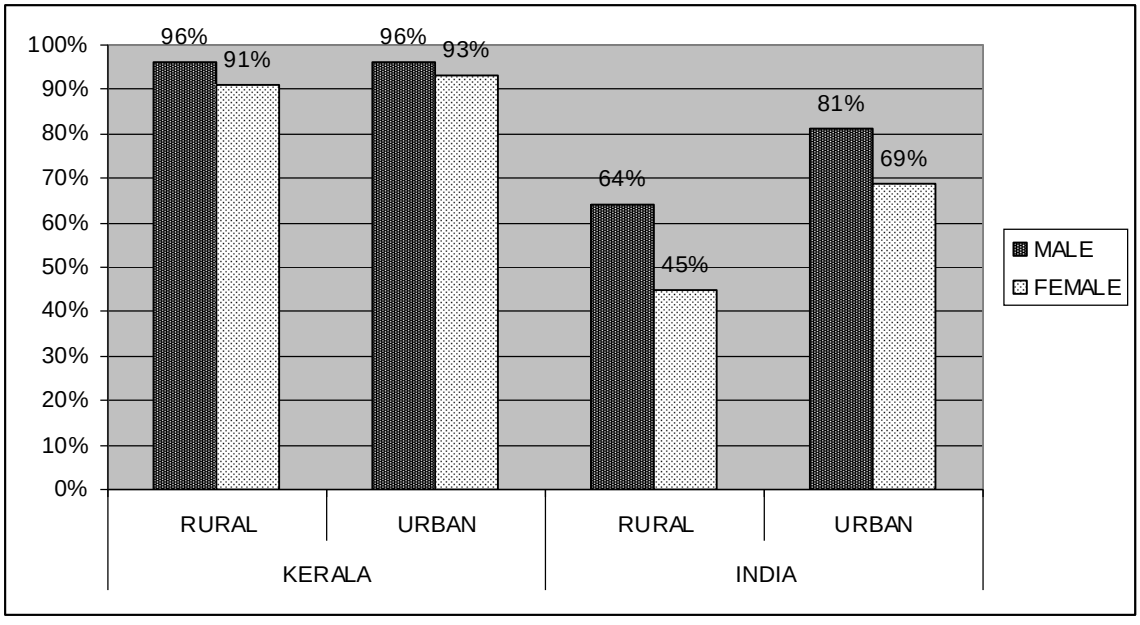
**3.3. Population in the age group (15-59):** People in the age group of 15-59 years who are economically active. About 57 % of the rural and 64 % of the urban population belonged to the age group (15-59 years).

Chart 3.3: Population in the age group (15-59)



**3.4. Literacy rate:** In the rural areas, during 2004-05, about 96 % of males and 92 % of the females were literate against the national figure of 64 % and 45 percent . The corresponding proportions, in the urban areas, were 96 % and 92 % against the Ali India figure of 81 % and 69 percent. Kerala had no difference in urban and rural.

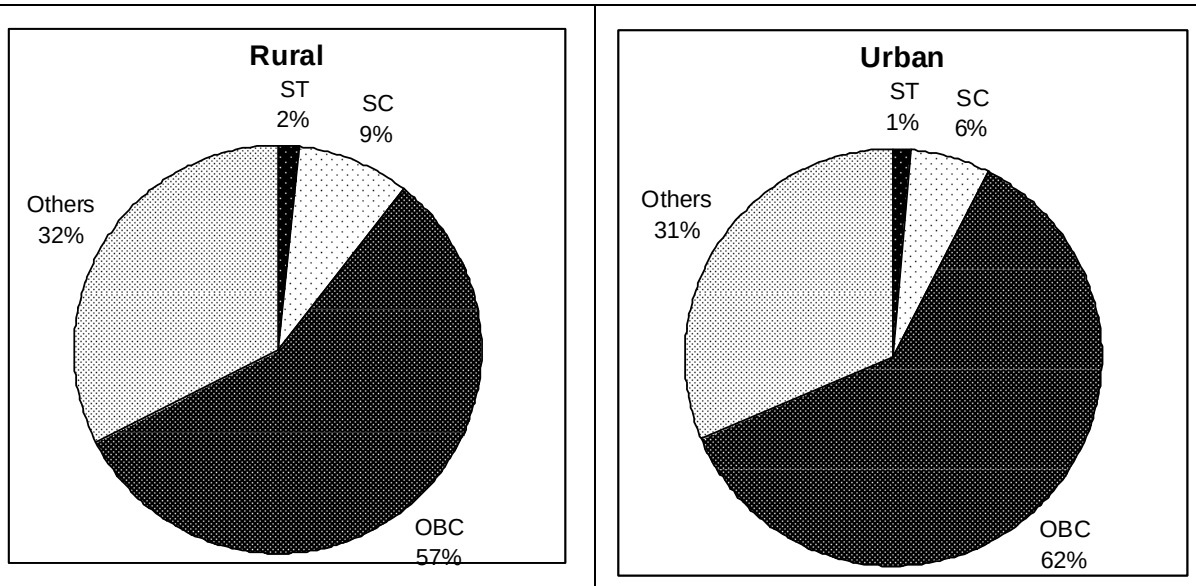
Chart 3.4 Literacy rate



**3.5. Social wise Estimated Population:** Chart 3.7 shows that about 2 per cent of the households in the state belonged to the category scheduled tribe (ST), about 8 per cent belonged to scheduled caste (SC) and about 58 per cent belonged to the other backward class (OBC). The proportions of households belonging to the categories ST, SC and OBC were about 2 per cent, 9 per cent and 57

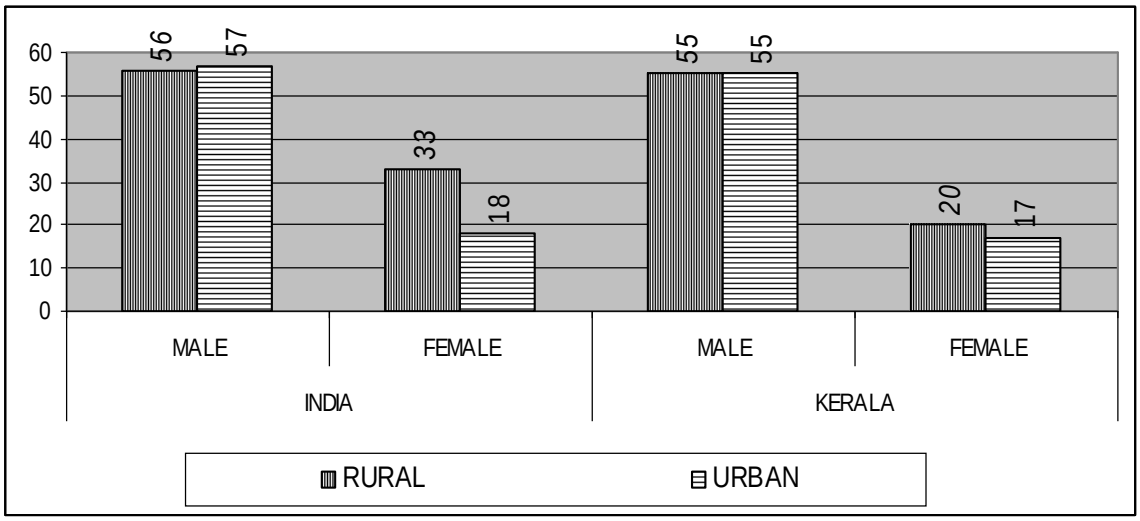
per cent, respectively in the rural areas and about 1 per cent, 6 per cent and 62 per cent, respectively in the urban areas.

Chart 3.5 – Social Status



**3.6. Labour Force:** According to the usual status (ps+ss), about 55 % of rural males and 20 % of rural females belonged to the labour force against All India figure of about 56 % of rural males and 33 %. The corresponding proportions in the urban areas were 55 % and 17 %, respectively against All India figure of about 57 % of rural males and 18 % respectively.

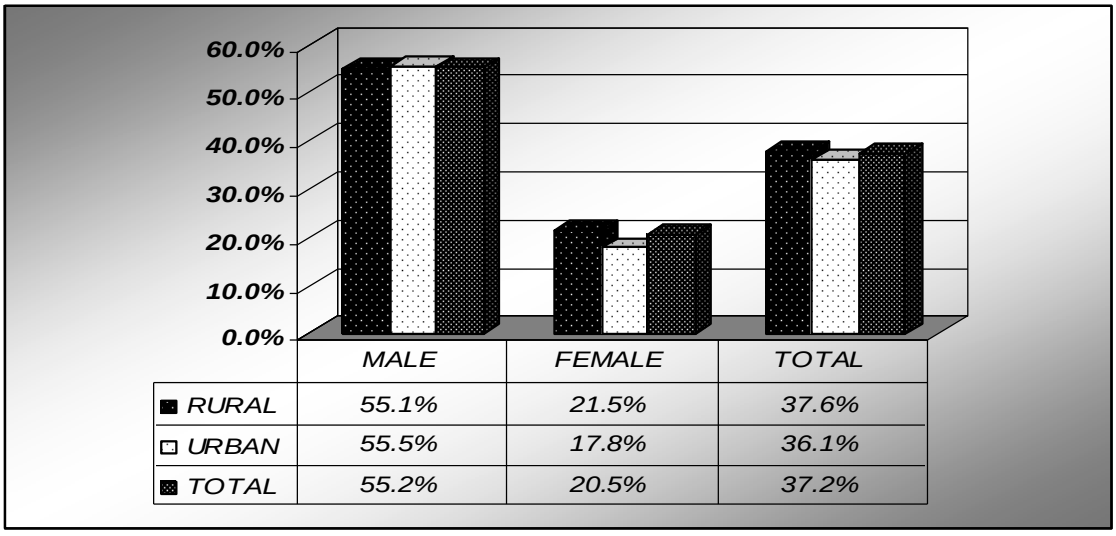
**Chart: 3.6 Labour Force in Kerala and India**



$$\text{Work Participation rate} = \frac{\text{WPR=Number of employed persons x 1000}}{\text{Total population}}$$

At overall level, the worker population ratio was estimated to be 372 persons which implies that at overall level of the States covered, 37.2 per cent of the population was employed. Further while analyzing sex wise worker population ratio, it is observed that per thousand population, 552 males and 205 females are estimated to be employed at overall level. Chart 3.6 gives the gender differential in the worker population ratio of Kerala (WPR) was distinct. About 55 % for males and 21.5 % for females in the rural areas, and 55.5 % for males and 17.8 % for females in the urban areas were employed against the all India (WPR) 55 % for males and 33 % for females in the rural areas, and 55 per cent for males and 17 % for females in the urban areas.

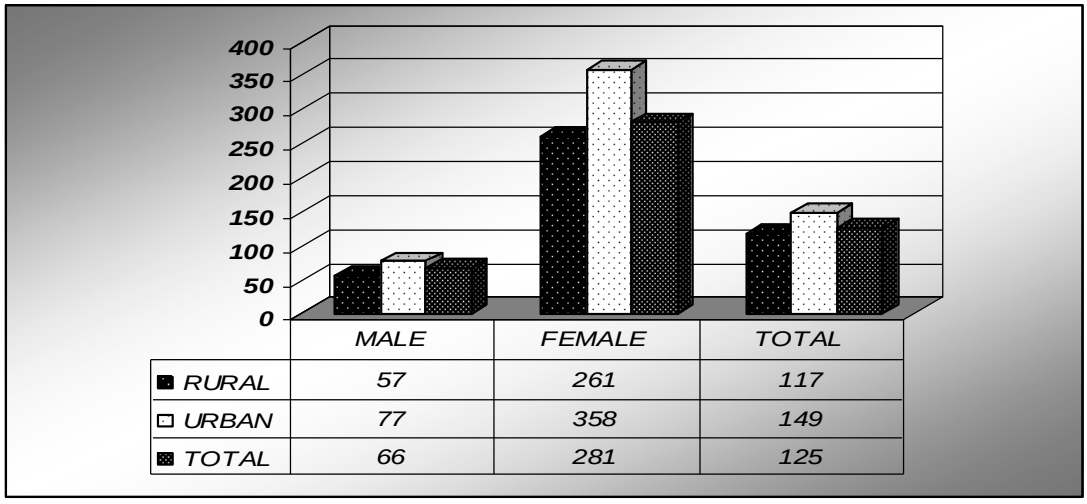
**CHART 3.6 Work participation rate**



| | MALE | FEMALE | TOTAL |
|---|---|---|---|
| RURAL | 55.1% | 21.5% | 37.6% |
| URBAN | 55.5% | 17.8% | 36.1% |
| TOTAL | 55.2% | 20.5% | 37.2% |

**3.7. Unemployment** Rate**:** Unemployment rate (UR) is defined as the number of persons unemployed per 1000 persons in the labour force (employed & unemployed). The unemployment rate (number of person unemployed per 1000 persons in the labour force), according to usual status (ps+ss), was 117 in the rural areas and 149 in the urban areas. The unemployment rates for females 261were found to be higher than that for males 66, and highest among urban females 358.

CHART 3.7.1 **Unemployment rate**



| | MALE | FEMALE | TOTAL |
|---|---|---|---|
| RURAL | 57 | 261 | 117 |
| URBAN | 77 | 358 | 149 |
| TOTAL | 66 | 281 | 125 |

Generally in the rural areas, unemployment rate increases as education level increases..The unemployment rate (139) was much higher among the youth (15-29) as compared to that in the overall population. Chart 3.7.2 shows that the unemployment was maximum among Post graduates level

Chart 3.7.2 **Education wise Unemployment rate**

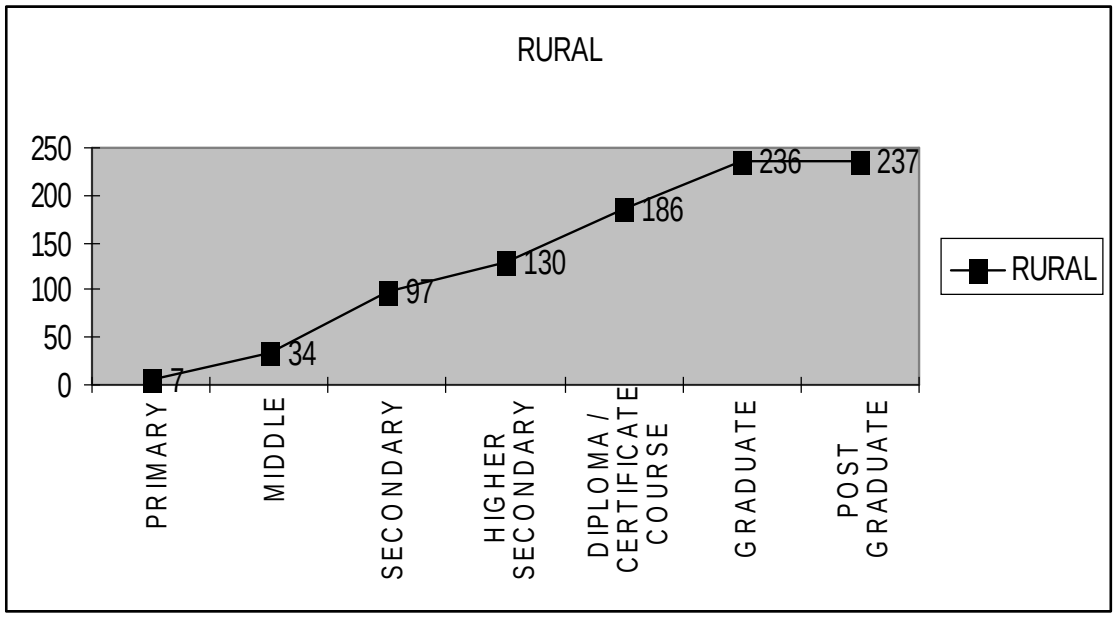


Chart 3.7.3 gives that in urban the unemployment was maximum among graduates and least among lower level education.

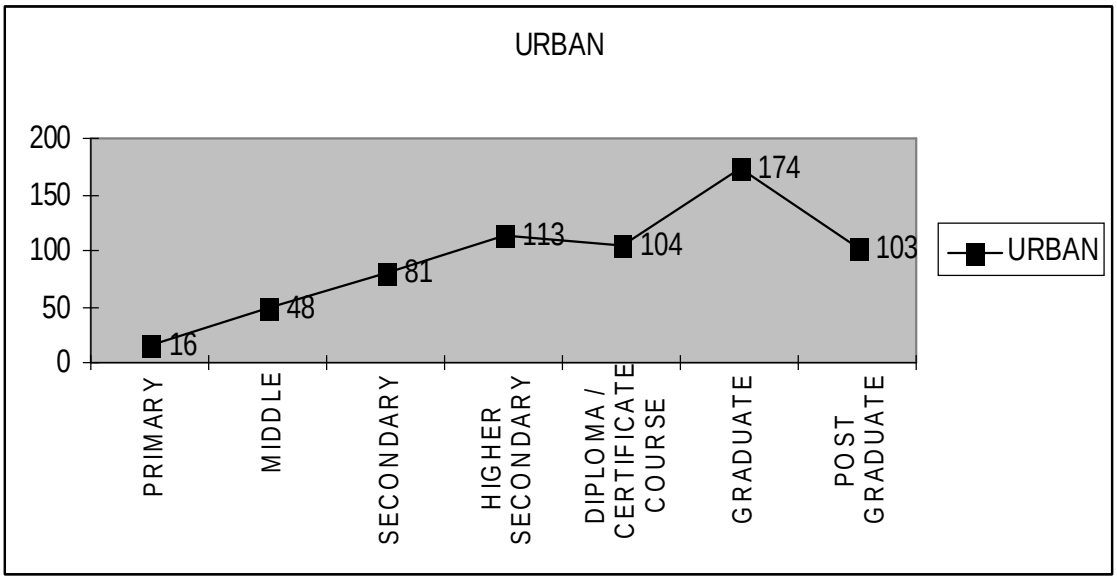
Chart 3.7.3 **Education wise Unemployment rate**

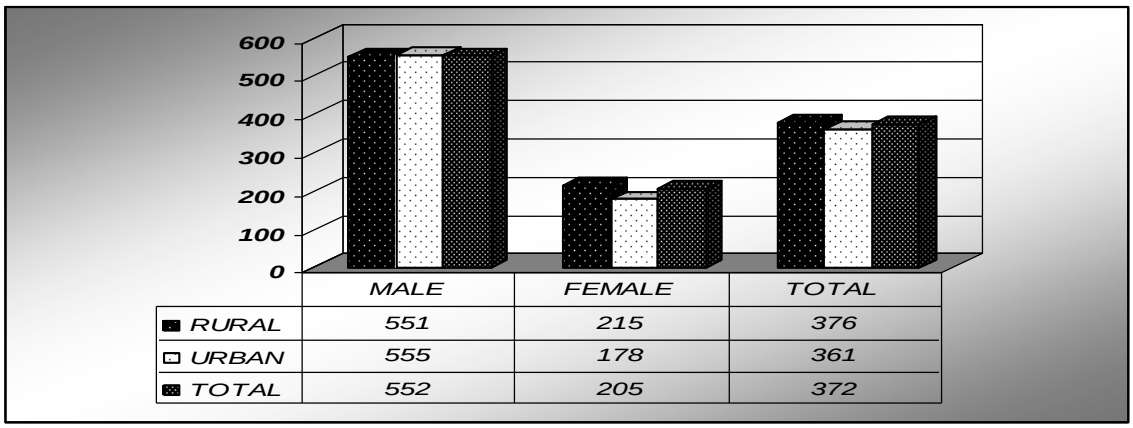


**3.8. Labour force participation rate:** Labour force participation rate (LFPR) is defined as the number of persons in the labour force per 1000 persons.

$$\text{LFPR} = \frac{\text{(no. of employed + no. of unemployed persons) x 1000}}{\text{Total population}}$$

At overall level, the LFPR has been worked out to be 372 thereby implying that 372 persons are either employed or available for work per 1000 population. At overall level, the LFPR of males and females was estimated to be at 552 and 205 persons respectively.

3.8 **Labour force participation rate**



| | MALE | FEMALE | TOTAL |
|---|---|---|---|
| RURAL | 551 | 215 | 376 |
| URBAN | 555 | 178 | 361 |
| TOTAL | 552 | 205 | 372 |

# Sample Design and Estimation Procedure

# Appendix - B

## Sample Design and Estimation Procedure

### 1 Introduction

1.1 The 61st round (July 2004-June 2005) of NSS was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond 5 kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year. All the sample first stage units of the district Poonch and Rajouri of Jammu & Kashmir, all rural samples of the district Doda of Jammu & Kashmir, and all rural samples of the district Nicobar of Andaman and Nicobar Islands became casualty and therefore, the district Poonch and Rajouri of Jammu & Kashmir, rural areas of district Doda of Jammu & Kashmir and rural areas of the district Nicobar of Andaman and Nicobar Islands are outside the survey coverage. The survey period was divided into four sub-rounds of three months duration each and an equal number of sample villages/blocks (FSUs), as far as possible, were allotted for survey in each of these four sub-rounds.

### 2 Sample Design

2.1 A stratified multi-stage sampling design for rural as well as urban areas was adopted for selection of the sample units for the 61st round survey. The first stage units (FSUs) were the census 2001 villages (panchayat wards for Kerala) for rural areas and the NSSO Urban Frame Survey (UFS) blocks for urban areas. The ultimate stage units (USUs) were the households for both rural and urban areas. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs.

2.2 *Selection of the first-stage units*: The various steps involved before making the selection of the FSUs are discussed at length in the following few paragraphs before taking up the issue of selection of USUs within a FSU.

2.2.1 *Sampling frame for the first stage units (FSU's)*: For rural areas, the list of 2001 census villages constituted the sampling frame for selection of sample FSUs for most of the states. For the rural areas of Kerala, however, the list of panchayat wards was used as the sampling frame for selection of panchayat wards. For the urban areas, the latest lists of UFS blocks constituted the sampling frame for selection of sample FSUs.

2.2.2 *Stratification of the first stage units*: Within each district of a State/UT, two separate basic strata were formed as follows:

1. rural stratum comprising of all rural areas of the district
2. urban stratum comprising of all the urban areas of the district.

*D*

However, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum. As per census 2001, there were 27 towns with population 10 lakhs or more at all-India level.

2.2.3 *Sub-stratification of the first stage units in rural areas*: Within a district, if 'r' number of FSUs were allocated for a rural stratum, a total number of 'r/2' sub-strata were formed within that rural stratum. The villages within the stratum were first arranged in ascending order of population as per the frame and then 'r/2' number of sub-strata was formed in such a way that each sub-stratum comprised a group of villages of the arranged frame having more or less equal population.

2.2.4 *Sub-stratification of the first stage units in urban* areas: Within a district, if 'u' number of FSUs were allocated for a urban stratum, a total number of 'u/2' sub-strata were formed within that urban stratum. The towns within the stratum, except those with population 10 lakhs or more, were first arranged in ascending order of population as per the frame and then UFS blocks of each town were arranged by IV unit no. × block no. in ascending order of the number. From this arranged frame of UFS blocks of all the towns within the stratum, 'u/2' number of sub-strata was formed in such a way that each sub-stratum had more or less equal number of UFS blocks. For towns with population 10 lakhs or more, the urban blocks were first arranged by IV unit no. × block no. in ascending order of the number and then 'u/2' number of sub-strata was formed in such a way that each sub-stratum had more or less equal number of UFS blocks.

2.2.5 *Allocation of FSU's among Strata*: At the all-India level, a total number of 12784 FSU's (8124 villages and 4660 urban blocks) was allocated for survey and this was allocated to the different States and UTs in proportion to population as per census 2001 subject to the availability of investigators, ensuring more or less uniform work-load. The State/UT level sample size was then allocated between rural and urban sectors in proportion to population as per *census 2001* with 1.5 weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu etc. should not exceed the rural sample size. A minimum of 8 FSUs has been allocated to each state/UT separately for rural and urban areas. Within each of the rural and urban sectors of a State/UT, the respective sample size was allocated to the different strata in proportion to the stratum population as per census 2001. Allocations at stratum level, both for rural and urban stratum, were adjusted to a multiple of 4 with a minimum sample size of 4.

2.2.6 *Selection of first-stage units*: From each sub-stratum of the rural stratum of a district, two FSUs were selected with probability proportional to size with replacement (PPSWR), size being the population as per Population Census 2001. From each sub-stratum of the urban stratum of a district, two FSUs were selected with simple random sampling without replacement (SRSWOR). Within each sub-stratum, samples were drawn in the form of two independent sub-samples in both the rural and urban sectors.

2.3 *Selection of Ultimate Stage Units within a FSU*: The remaining paragraphs of this sub-section outlines the various steps leading to the actual selection of USUs within a FSU.

*D*

2.3.1 *Selection of hamlet-groups/sub-blocks:* Large villages/blocks having approximate present population of 1200 or more were divided into a suitable number of hamlet-groups in the rural areas and sub-blocks in the urban areas as given below:

| approximate present population of the sample village/block | number of hamlet-groups / sub-blocks formed |
|---|---|
| less than 1200 | 1 @ |
| 1200 to 1799 | 3 |
| 1800 to 2399 | 4 |
| 2400 to 2999 | 5 |
| 3000 to 3599 | 6 |
| ……..and so on | |

@ number of hamlet-groups / sub-blocks formed = '1' indicates that the whole FSU was considered for listing.

For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur, Doda districts of Jammu and Kashmir and Idukki district of Kerala, the large villages were divided into a suitable number of hamlet-groups as follows:

| approximate present population of the sample village | number of hamlet-groups formed |
|---|---|
| less than 600 | 1 @ |
| 600 to 899 | 3 |
| 900 to 1199 | 4 |
| 1200 to 1499 | 5 |
| ……..and so on | |

@ number of hamlet-groups formed = '1' indicates that the whole FSU was considered for listing.

Hamlet-groups/sub-blocks were formed by more or less equalising populations. Two hamlet-groups/sub-blocks are selected from a large village/UFS block by SRSWOR. Listing and selection of the households were done independently in the two selected hamlet-groups/sub-blocks.

2.3.2 *Sampling frame of households*: All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Stratification of rural households:* For the employment and un-employment survey of the 61st round, all households listed in the selected village/block/ hamlet-groups/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in the rural areas were:

SSS 1: relatively affluent households

SSS 2: from the remaining households, households having principal earning from non- agricultural activity

SSS 3: other households

A household was classified as 'affluent' if the household (i) owned any of the items like motor car/ jeep/tractor/truck/bus/van/colour TV/DVD/VCP/telephone/fridge/ washing machine, etc. or (ii) one of the household member was a professional such as doctor, advocate etc. or (iii) the household owned 7 hectares or more cultivable land/3.5 hectares or more irrigated land or (iv) owned at least 10 heads cattle or buffaloes.

2.3.4 *Stratification of urban households:* The three second-stage-strata (SSS) formed in the urban areas were:

SSS 1: households with MPCE > A

SSS 2: households with MPCE such that B = MPCE = A

SSS 3: households with MPCE < B

The two cut-off points 'A' and 'B' were determined at NSS Region level in such a way that top 10% of households had MPCE more than 'A' and bottom 30% had MPCE less than 'B'.

2.3.5 *Selection of households:* For the employment and un-employment survey, a total of 10 households were selected from each sample village/block. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 4 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 2 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 61st round along with the number of village/blocks actually surveyed and number of persons enumerated in respect of employment and unemployment survey are given for different states and union territories in Table 1 at the end of Appendix-B.

*D*

## 3 Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs is briefly indicated below:

### 3.1 **Notations:**

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU [village (panchayat ward) / block]

d = subscript for a hamlet-group/sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb ( j = 1, 2 or 3)

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/sb's formed in the sample village (panchayat ward) / block

D* = 1 if D = 1

= D / 2 for FSUs with D > 1

N = total number of FSUs in any urban sub-stratum

Z = total size of a rural sub-stratum (= sum of sizes for all the FSUs of a rural sub-stratum)

z = size of sample village used for selection.

n = number of sample village / block surveyed including zero cases but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of a village/block/hamlet-group /sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of a village/block/hamlet-group/sub-block of sample FSU

x, y = observed value of characteristics $x$, $y$ under estimation

$\hat{X}$ , $\hat{Y}$ = estimate of population total X, Y for the characteristics $x$, $y$

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum;

For ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

---

*t*

3.2 *Estimation of aggregates for a particular sub-sample (m) and stratum (s)*:

3.2.1 *Estimate for a sub-stratum in rural areas*:

Estimate for j-th second stage stratum,

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} D_i^* \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate for sub-stratum (t),

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.2 *Estimate for a sub-stratum in urban areas*:

Estimate for j-th second stage stratum,

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i^* \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate for sub-stratum (t),

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.3 *Estimate for a stratum of a sub-sample (m)*:

Estimate for stratum s,

$$\hat{Y}s = \sum_t \hat{Y}st$$

3.3 *Overall Estimate for Aggregates*: Overall estimate for aggregates for a stratum ( $\hat{Y}_s$ ) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^{2} \hat{Y}_{sm}$$

*D*

3.4 *Overall Estimate of Aggregates at State/UT/all-India level:*

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level was obtained by summing the stratum estimates $\hat{Y}_s$ over all strata belonging to the State/ UT/ all-India.

3.5 *Estimates of Ratios*: Let $\hat{Y}$ and $\hat{X}$ be the overall estimate of the aggregates Y and X for two characteristics *y* and *x* respectively at the State/ UT/ all-India level.

Then the combined ratio estimate $(\hat{R})$ of the ratio $(R = \frac{Y}{X})$ is obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

3.6 *Estimates of Error*: The estimated variances of the above estimates is as follows:

*3.6.1 For aggregate $\hat{Y}$ :*

$$\hat{Var}(\hat{Y}) = \sum_s \hat{Var}(\hat{Y}_s)$$

where $\hat{Var}(\hat{Y}_s)$ are as given below.

3.6.1.1. For strata with PPSWR selection at first stage:

$$\hat{Var}_{ppswr}(\hat{Y}_s) = \left[ \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left( \frac{Z_{st}\hat{Y}_{sti}}{z_{sti}} - \hat{Y}_{st} \right)^2 \right],$$

where $$\hat{Y}_{sti} = \sum_j Y_{stij},$$

$$\hat{Y}_{stij} = D^*_{sti} \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

3.6.1.2 For strata with SRSWOR selection at first stage:

$$\hat{Var}_{srswor}\left(\hat{Y}_s\right) = \sum_t \frac{1}{4}\left(\hat{Y}_{st1} - \hat{Y}_{st2}\right)^2 \quad ,$$

---

*e*

where $\hat{Y}_{st1}$ and $\hat{Y}_{st2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

*3.6.2 For ratio* $\hat{R}$*:*

$$\hat{MSE}(\hat{R}) = \frac{1}{(\hat{X})^2}\left[\sum_s \hat{MS}_s(\hat{R}) + \sum_{s'} \hat{MS}_{s'}(\hat{R})\right]$$

where (i) s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage,

(ii) $$\hat{MS}_s(\hat{R}) = \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left[\frac{Z_{st}}{z_{sti}}(\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st})\right]^2$$

where

$$\hat{Y}_{sti} = \sum_j \hat{Y}_{stij} \quad , \qquad \hat{X}_{sti} = \sum_j \hat{X}_{stij} \quad ,$$

$$\hat{Y}_{stij} = D^*_{sti}\left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{si1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{si2j}} y_{i2jk}\right],$$

$$\hat{X}_{stij} = D^*_{sti}\left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{si1j}} x_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{si2j}} x_{i2jk}\right]$$

(iii) $$\hat{MS}_{s'}(\hat{R}) = \sum_t \frac{1}{4}\left[\left(\hat{Y}_{s't1} - \hat{Y}_{s't2}\right)^2 + \hat{R}^2\left(\hat{X}_{s't1} - \hat{X}_{s't2}\right)^2 - 2\hat{R}\left(\hat{Y}_{s't1} - \hat{Y}_{s't2}\right)\left(\hat{X}_{s't1} - \hat{X}_{s't2}\right)\right]$$

where $\hat{Y}_{s't1}$ and $\hat{Y}_{s't2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's'' and sub-stratum 't'.

3.7 *Estimates of RSE*:

$$\hat{RSE}\left(\hat{Y}\right) = \frac{\sqrt{\hat{Var}\left(\hat{Y}\right)}}{\hat{Y}} \times 100$$

$$\hat{RSE}\left(\hat{R}\right) = \frac{\sqrt{\hat{MSE}\left(\hat{R}\right)}}{\hat{R}} \times 100$$

**GOVERNMENT OF INDIA**

**NATIONAL SAMPLE SURVEY ORGANISATION**

**SOCIO-ECONOMIC SURVEY**

**SIXTY-FIRST ROUND: JULY 2004 – JUNE 2005**

**SCHEDULE 10: EMPLOYMENT AND UNEMPLOYMENT**

| CENTRAL | | * |
|---|---|---|
| STATE | | |

| **[0] descriptive identification of sample household** | |
|---|---|
| 1. state/u.t.: | 5. hamlet name: |
| 2. district: | 6. ward /inv. unit /block: |
| 3. tehsil/town:* | 7. name of head of household: |
| 4. village name: | 8. name of informant: |

**[1] identification of sample household**

| item no. | item | code | item no. | item | code |
|---|---|---|---|---|---|
| 1. | srl. no. of sample village/block | | 11. | sub-sample | |
| 2. | round number | 6 1 | 12. | FOD sub-region | |
| 3. | schedule number | 1 0 0 | 13. | sample hg/sb number (1/2) | |
| 4. | sample (*central-1, state-2*) | | 14. | second-stage stratum number | |
| 5. | sector (*rural-1, urban-2*) | | 15. | sample household number | |
| 6. | state-region | | 16. | srl. no. of informant (as in col. 1, block 4 ) | |
| 7. | district | | 17. | response code | |
| 8. | stratum | | 18. | survey code | |
| 9. | sub-stratum | | 19. | reason for substitution of original household (code) | |
| 10. | sub-round | | | | |

**Codes for Block 1**

*item 17*: ***response code***:
informant: *co-operative and capable -1, co-operative but not capable -2, busy -3, reluctant -4, others -9.*
*item 18*: ***survey code***: household surveyed: *original -1, substitute -2, casualty -3.*

*item 19*: ***reason for substitution of original household***:
*informant busy -1, members away from home -2, informant non-cooperative -3, others -9.*

* tick mark (√ ) may be put in the appropriate place.

**[2] particulars of field operation**

| srl. no. | Item | | investigator | assistant superintendent | superintendent |
|---|---|---|---|---|---|
| (1) | (2) | | (3) | (4) | (5) |
| 1. | i) name (block letters) | | | | |
| | ii) code | | | | |
| 2. | date(s) of : | | DD MM YY | DD MM YY | DD MM YY |
| | (i) survey/ inspection | | | | |
| | (ii) receipt | | | | |
| | (iii) scrutiny | | | | |
| | (iv) despatch | | | | |
| 3. | number of additional sheets attached | | | | |
| 4. | total time taken to canvass (in minutes) | Schedule 10 | | | |
| 5. | | block 9 of Schedule 10 | | | |
| 6. | signature | | | | |

**[10] remarks by investigator**

**[11] comments by supervisory officer(s)**

**[3] household characteristics**

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| 1. | household size | | | 6. | social group (code) | | |
| 2. | principal industry (NIC-1998) | description: | | 7. | land owned as on the date of survey (0.000 hectares) | | |
| | | code (5-digit) | | 8. | land possessed as on the date of survey (0.000 hectares) | | |
| 3. | principal occupation (NCO-1968) | description: | | 9. | land cultivated (including orchard and plantation) during July 2003 – June 2004 (0.000 hectares) | | |
| | | code (3-digit) | | 10. | **number of members who got work for at least 60 days in 'public works' during last 365 days** | male | |
| 4. | household type (code) | | | 11. | | female | |
| 5. | religion (code) | | | 12. | monthly household consumer expenditure (Rs) (to be copied from item 40 of block 9) | | |

***Note**: 1 acre = 0.4047 hectare, 1 hectare=10, 000 sq. metre*

**Codes for Block 3**

*item 4*: ***household type***:

***for rural areas***: *self-employed in non-agriculture -1, agricultural labour -2, other labour -3, self-employed in agriculture -4, others -9.*

***for urban areas***: *self-employed -1, regular wage/salary earning -2, casual labour -3, others -9.*

*item 5*: ***religion***: *Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9.*
