(SASORREE)**

Department of Economics & Statistics
Government of Kerala
May, 2003

Preface

According to the quinquennial Survey of National Sample Survey organization on Employment and unemployment (55th round, 1999-2000) the rate of growth of employment, on current Daily Status (CDS) basis, declined from 2.7 percent per annum in 1993-1994 to 1.07 percent per annum in 1994-2000. The decline in the rate of growth of employment during 1990s was associated with a comparatively higher growth rate in GDP, indicating a decline in the labour intensity of production.

As on 31/03/1958 there were only 69915 registrants in the live register of employment exchanges in Kerala. After seven years ie as on 31/03/65 this number had increased to 142220 and on 31/03/1970 to 236541. At the close of 1980 (31/03/1980) the number had further increased to 1285615, and as on 31/03/1990 3103722 and the millennium ended with the number of jobs aspirants registered with employment exchanges as 3784268 (31/03/2000). A further increase has also be noticed on 31/03/2002 as the number of registrants increased to 4133380. This situation is really alarming as far as Kerala is concerned. The live register data from the Employment Exchanges are usually accepted as an indicator of the level of unemployment. A pilot study conducted during 1987 revealed that all those registered with Employment Exchanges are not actually unemployed or available for employment. On the above background Govt. had accorded sanction for the conduct of a sample survey on the Activity Status of Registrants in Live Register of Employment Exchanges vide G.O (Rt) No. 90/2000/Plg dated 26/2/2000.

This report was prepared by Sri.K.Vimalan, Assistant Director in the Publication Division of this Directorate. Even though the preparation of this report is not a part of his work, Sri.Vimalan readily accepted my request and took up the challenge. I would like to place my record of appreciation for the hard work put in by him, without his unstinted work this report would not have been completed. The assistance provided by Shri.M.A.Nandasoonu of computer Division is also gratefully acknowledged. Shri.P.Kochunarayana Pillai, Joint Director guided the work. The valuable services rendered by him is also appreciable. I am also thankful to the staff of computer division for their valuable co-operation.

Suggestions for improvement are welcome.

Report on Activity Status of Registrants in the Live Register of Employment Exchanges (SASORREE)

1. Introduction

1.1 One of the acute problems faced by developing countries is the increase in unemployment. Being a developing economy this is a chronic problem in India. But it is a very serious economic problem in Kerala in view of the high density of population, higher literacy and comparatively low progress in employment generation. Though the State progressed very much since formation, the employment opportunities never caught up with the high rise of the unemployed labour force.

1.2 A paradox of Kerala's unemployment problem is that the State is facing a shortage of Agricultural labourers and of construction workers in the unorganised sector, while the number of job seekers in the live register of employment exchanges keeps increasing. A peculiar feature of job seekers is that they register their name in employment exchanges mainly for white collar jobs while they may be engaged in some useful avocation for their livelihood especially in unorganised sector or might even have migrated either to other states or to gulf countries. The general public considers only "the white colors job" (Government job) as the criteria for employment. It is observed that there is a significantly decreasing tendency in number of live registrant in the employment exchanges after the removal of lapsed registration of the registrants. There are 77 employment exchanges in Kerala, the total number of live registrants being 38.44 lakhs in 2001.

1.3 According to the 2001 census, the population in Kerala is 3.18 crores. It is 3.1 % of the population of India. The number of people seeking job through employment exchanges in Kerala is 12.07 % while it is 4.14 % in India. Even though the growth of population is decreasing, the rate of unemployment in Kerala is increasing year by year.

2. Object of the Survey

- 2.1. To obtain a general idea of the present activity status of the registrant in the live register of employment exchanges.
- 2.2. To find out the unemployed force available for employment.
- 2.3. To study the family status of registrants
- 2.4. To study the income/expenditure pattern of the registrants.

3. Reference Period

3.1 The survey covered those registrants who are in the live register of Employment Exchanges as on 31/03/99.

4. Period of Survey

4.1 The field survey was completed in 75 days during Aug-Oct. 2000.

5. Methodology

5.1 There are about 38 lakhs of live registrants in the State. in the 77 Employment Exchanges as on 31/03/99 viz Divisional Employment Exchanges, Rural Employment Exchanges, Employment Exchanges (P&E), Special Employment Exchanges for physically handicapped, District Employment Exchanges and Town Employment Exchanges in the Taluks.

5.2 A Sample covering 5% of the total of 38 lakhs registrants had been selected from the Employment Exchanges through circular systematic random sampling method. In the case of Special Employment Exchanges for physically handicapped, having only 6300 registrant in total are not considered for detailed survey. The registered registrants are selected according to National Classification of Occupation Code (NCO Code) for detailed survey. While selecting the sample, the representation of all level of education viz below SSLC, SSLC, Degree, Post Graduation, Professional and Technical qualification etc are considered.

5.3 The survey was conducted under the supervision of senior officers at field level. The data were collected by utilising the service of investigators of this department. The Statistical Inspector/Senior UD compiler was directly in charge of field level operations.

5.4 The canvassed schedules were scrutinised, coded, validated and digitized at district level with the support of computer unit in the district offices. The data processing for table generation was done in the computer division of the directorate.

6. Analysis

6.1 Distribution of registrants according to Population (2001 Census)

No	District	Population	Registrants	Percentage
1	Kasargode	1203342	88704	7.37
2	Kannur	2412365	245818	10.19
3	Wynad	786627	77123	9.80
4	Kozhikkode	2878498	358247	12.45
5	Malappuram	3629640	228827	6.30
6	Palakkad	2617072	262132	10.02
7	Thrissur	2975440	319960	10.75
8	Ernakulam	3098378	399671	12.90
9	Idukki	1128605	119541	10.59
10	Kottayam	1952901	272504	13.95
11	Alappuzha	2105349	349048	16.58
12	Pathanamthitta	1231577	146227	11.87
13	Kollam	2584118	473286	18.32
14	Thiruvananthapuram	3234707	503019	15.55
	State	31838619	3844107	12.07

The highest density of registrants is recorded (18.32%) in Kollam district as against 12.07% of the State. The lowest is in Malappuram district (6.3%). The second and third density of registrants in the State is in Alappuzha and Thiruvananthapuram districts respectively.

6.2 Distribution of registrants according to Sex

Sl. No	District	No. registrants			Percentage		
		Male	Female	Total	Male	Female	Total
1	Kasargode	48798	39906	88704	55.00	45.00	100
2	Kannur	109633	136184	245817	44.60	55.40	100

Conclusion

Now a days employment providers are not taking services of the employment exchanges for getting candidates especially for permanent employment, which is done through specialized recruiting agencies, there by limiting the role of exchanges for providing purely temporary job mainly in Government sector. A majority of candidates are seen registering immediately after pass of SSLC when they acquire the minimum age even though they were still continuing studies. This mainly for getting seniority of registration. Even after getting employment the exchanges were not informed by the registrants, so their names are unnecessarily retained. The percentages of technically qualified registrants are very less as compared with general education. Hence technically qualified persons getting more jobs opportunities.

The survey is conducted on a sample basis by house-to-house enumeration. There is reluctance in the part of informants in disclosing full information/ truth due to ignorance in some cases.
