PREFACE

The National Sample Survey Organisation(NSSO), Government of India is regularly conducting various nationwide socio-economic surveys. The Government of Kerala is participating in these surveys on a matching sample basis. The subjects for the fifty-ninth round survey were consumer expenditure, Land and livestock holdings, Debt and Investment and situation assessment survey of farmers. The fifty-ninth round survey period was of one year duration started on 1st January 2003 and ended on 31st December 2003.

This report was prepared by Sri. G. Chandrasekhara Pillai, Research Officer and Sri. Suresh Kumar N, Assistant Director under the supervision of Sri. S. Rajendran, Additional Director of Directorate of Economics and Statistics. The data collection was done by the Investigators of the department under the supervision of Deputy Directors, Research Officers and Statistical Inspectors in the districts. The scrutiny work has been done in the NSS section of the Directorate. The data entry work was carried out in the computer section of D.E & S and the tabulation work of the survey has been done by Sri. K V Abhilash, Compiler attached to Computer section under the supervision of Sri. K. Vimalan, Deputy Director.

I hope this report would be useful to Government department , planners, researchers and other data users.

Director

CHAPTER 1

INTRODUCTION

The National Sample Survey Organization (NSSO) has been conducting nation wide sample surveys on various socio-economic aspects. These surveys are conducted in the form of rounds extending normally over a period of one year though in certain cases the survey period was six months. A large number of technical terms covering a variety of subject areas were used for the conduct of these surveys. The definitions of these terms and the descriptions of the underlying concepts were scattered in different manuals of the instructions for the survey's. A proper documentation of such terms was a long felt need. With this objective in mind, the "Glossary of Technical Terms used in National Sample Surveys" was brought out in 1981. The National Sample Survey(NSS), which came into existence in the year 1950, has a multi-subject integrated sample survey programme launched for collection of data on various aspects of the national economy required by different agencies of the Government, both Central and States. Although at the beginning, the NSS started with the objective of collecting data for compilation of national accounts and its area of operation was kept restricted only to rural areas of the country during the first two rounds, it gradually expanded the geographical coverage and the scope of its enquiries to cover, by and large, all the important socio-economic aspects influencing the life of the population in rural as well as in urban areas. The NSS now operates over the whole of rural and urban areas of India excepting only a few inaccessible and difficult pockets. The fifty-ninth round covered the whole of Indian Union except Leh and Kargil districts of Jammu and Kashmir, interior villages of Nagaland situated beyond five kilometers of the bus route and villages in Andaman and Nicobar Islands which remain inaccessible through out the year.

Government of Kerala is also participating in every round of NSS on matching sample basis. This report is based on the state samples of Kerala on 59th round of NSS conducted by the Department of Economics and Statistics.

The fifty-ninth round of NSS is earmarked for collection of data on Household consumer expenditure, Land and livestock holdings, Debt and Investment and situation assessment survey of farmers.

Geographical Coverage

State samples of NSS fifty-ninth round covered the entire areas of Kerala state represented by 452 samples, which includes 300 rural and 152 urban samples.

Period of Survey

The fifty-ninth round survey period was of one year duration started on 1st January 2003 and ended on 31st December 2003. The data collected relates to the agricultural year July 2002 to June 2003. Hence the calendar year 2003 has been considered to be the most suitable period for this enquiry. Each sample FSU will be visited twice during this round. Since the workload of the first visit will be more, the first visit will continue till the end of August 2003. Thus, period of first visit will be January to August 2003 and that of the second visit will be September to December 2003. Each visit of this round are divided in to two sub-rounds. The first sub-round will consist of the first half of the survey period of each visit while sub-round two will consist of the remaining period. The information on holdings operated during the Khariff season of Agricultural year 2002-03 was collected in the first visit, while that on holdings operated during Rabi season was collected in the second visit.

Schedules of enquiry

Schedules canvassed in the fifty-ninth round are as follows

Schedule	Titles
0.0	Listing of households
18.1	Land and Livestock holdings
18.2	Debt and Investment
1.0	Household Consumer Expenditure

Schedules 18.1 and 18.2 were canvassed in independent sets of sample households. Each sample household were visited twice as Visit I and Visit 2 and the same schedules were canvassed in the same set of sample households during the first and second visits. From each FSU/ UFS block eight (8) households were selected for 18.1 schedules and fourteen(14) for 18.2 schedules. Four households were selected for schedule 1.0 in which two were canvassed in the first visit and the remaining two in the second visit.

Sample Design

A stratified multi-stage Sampling design was adopted for the survey. The first stage units were Panchayath wards in rural areas and the Urban Frame Survey(UFS) blocks for urban areas. The Ultimate Stage Units(USU's) were

households in both sectors. Hamlet-group/sub-block will constitute the intermediate stage if these are formed in the selected area.

Sampling Frame for First Stage Units

For rural areas, list of panchayath wards as per Population 1991 and urban areas the latest UFS frame were used as sampling frame. For stratification of towns by size class, provisional population of towns as per Census 2001 were used.

Stratification in Rural Areas

Each district of a State was normally treated as a separate stratum. However, if the census rural population of the district was greater than or equal to 2 million as per population census 1991 or 2.5 million as per population census 2001, the district was split into two or more strata by grouping contiguous taluks.

Stratification in Urban Areas

In the Urban sector strata were formed with each N.S.S. region on the basis of the size class of the town as per population census 2001. The stratum numbers and their composition (with in each region) are given below.

- Stratum 1 : All towns with population less than 50,000.
Stratum 2 : All towns with population 50,000 or more but less than 2,00,000.
Stratum 3 : All towns with population 2,00,000 or more but less than 10,00,000.
Stratum 4,5,6 : All towns with population 10,00,000 or more.

Selection of hamlet-groups/sub-blocks/household

Large FSU's/UFS's having approximate present population 1200 or more were divided into suitable number of hamlet-groups/sub-blocks as shown below.

Approximate present population of sample village/block	Number of hamlet groups/sub-blocks formed
Less than 1200	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
... and so on	...

Hamlet-groups/sub-blocks were formed by more or less equalizing population. Two hamlet-groups/sub-blocks were selected from a large village or block by SRSWOR. Listing and selection of household was done independently in the two selected hamlet-group/sub-blocks so formed.

CHAPTER 2

CONCEPTS AND DEFINITIONS

Concepts and definitions of the terms followed in the fifty-ninth round NSS survey are briefly explained below.

House

Every structure, tent, shelter etc is a house irrespective of its use. It may be used for residential or non-residential purpose or both or even may be vacant.

Household

A group of persons normally living together and taking food from a common kitchen will constitute a household. The member of the household may or may not be related by blood to one another.

Household Size

The number of normally resident members of a household is its size. It will include temporary stay-aways but exclude temporary visitors and guests. The determination of the actual composition of a household will be left to the judgment of the head of the household.

Household consumer expenditure

The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. Household consumer expenditure is the total of monetary expenditure in the total of various groups of items, namely (i) food, pan(betel leaves), tobacco, intoxicants and fuel & light (ii) clothing and footwear and (iii) miscellaneous goods and services and durable articles.

Value of consumption

Consumption out of purchase is evaluated at the purchase price. Consumption out of home produce is evaluated at ex farm or ex factory rate. Value of consumption out of gifts, loans, free goods and services is imputed at the rate of average local retail prices prevailing during the reference period.

Monthly per capita consumer expenditure (MPCE)

For a household, this is its total consumer expenditure divided by its size and expressed on a per month basis. A person's MPCE is calculated from the expenditure of the household to which he or she belongs.

Reference Period

The reference periods used for collection of consumption data for different groups of items are given below:

Last 30 days for items, Food, Pan, Tobacco and intoxicants, Fuel & light, Miscellaneous goods and services including non-institutional medical, rents and taxes.

Last 365 days for, Education, Medical (institutional), Clothing, Bedding, Footwear and Durable goods.

Pan

This includes Pan leaf, Pan finished, Supari, lime, Katha, and Other ingredients of pan.

Beverages

The items of type Tea, Coffee, Ice, Fruit juice, Cold beverages, biscuits, Salted refreshment, Cooked meals, Cake, Pickles, Jam, Other processed food etc.

Tobacco

This includes Bidi, Cigarettes, Snuff, Other tobacco products etc.

Intoxicants

This includes Ganja, Toddy, Country liquor, Beer, foreign liquor or refined liquor, and Other intoxicants.

Milk products

This includes Ghee, Butter, Curd, Ice-cream etc. Milk-based sweetmeats(Pera, Rosogolla etc) come under items 'prepared sweets'. However these are prepared from milk, sugar etc within the household and consumed, then the composition of ingredients is accounted separately instead of entire consumption being accounted under milk products.

Clothing and footwear

This category includes bed sheets, bedcovers, pillows, curtain, mattresses, blankets, rugs, mats and matting, cotton yarn, wool, and knitting wool. It, however excludes tailoring charges, which come under 'miscellaneous goods and services'.

Miscellaneous goods and services

This is a residual group containing items other than food, pan, tobacco, intoxicants, fuel and light, clothing footwear, rent, tax and durable goods.

Durable goods

Items included here are distinguished from miscellaneous goods by having a longer expected lifetime of use (roughly one year or more). Expenditure incurred on repairs, and purchase and construction of durables used for domestic purpose is included in 'expenditure on durable goods'.

Farmer

For the purpose of this survey, a farmer is defined as a person who operates some land and is engaged in agricultural activities during the 365 days. By agricultural activities, it is meant the cultivation of field crops and horticultural crops, growing of trees or plantations, animal husbandry, poultry, fishery, piggery, bee-keeping, vermi culture, sericulture.

Farmer Household

A household having at least one farmer as its member was regarded as a farmer household in the context of the present survey.

Land possessed

Land possessed is given by land owned(including land under owner possession)+land leased in+land leased out + land held by the household but neither owned nor leased in.

Ownership of land

A plot of land is considered to be owned by the household if the right of permanent heritable possession, with or without the right to transfer the title, is vested in a member or members of the household. Land held in owner -like possession under long term lease or assignment is also considered as a land owned.

Lease of Land

Land given to others on rent or free by owner of the land without surrendering the right of permanent heritable title is defined as land leased-out. It is defined as land leased-in if it is taken by a household on rent or free without any right of permanent or heritable possession..

Otherwise possessed land

This is understood to mean all public/institutional land possessed by the household without title of ownership or occupancy right. The possession is without consent of the owner. Private land possessed by the household without title of ownership and occupancy right will not be included in this category. All private land encroached upon by the household will be treated as leased-in land.

Farm Business

Farm business comprises household economic activities like cultivation, growing of tree/plants (such as rubber, cashew, coconut, pepper, coffee, tea, etc.) as plantation or orchards, and processing of produce on the farm, e.g. paddy hulling. Farm business also include activities ancillary to Agriculture, like livestock raising, poultry, fishing, dairy farm activities, bee keeping and other allied activities coming under Tabulation Category A and B of the National Industrial Classification, 1998.

Non-farm business

Non-farm business is defined as all household economic activities other than those covered in the farm business. This will cover manufacturing, trade, hotel & restaurants, construction, mining & quarrying, repairing and other services. However, all non-farm business enterprises, which are registered under section 2m(i) or 2m(ii) and section 85 of the Factories Act, 1966 will also be kept outside the coverage of this survey. Bidi and cigar manufacturing establishments registered under the Bidi and Cigar Workers (Condition of Employment) Act, 1966 will also be kept outside the coverage of this survey.

Capital expenditure in farm business

The expenditure incurred in farm business on account of purchase, own construction, major repairs, bunding and other improvement including reclamation land, alterations and improvement of buildings and other constructions constituted the capital expenditure in farm business.

Current expenditure in farm business

This comprised the current expenditure in the farm business for purchases of seeds, manure, fodder, payment of wages, rent, land revenue etc and that for normal repairs and maintenance of buildings, constructions, machinery and equipment including transport equipment, furniture & fixtures and household durables meant for the farm business.

Capital expenditure in non-farm business

It consisted of the expenditure in non-farm business incurred on account of purchase, own construction, additions, alterations, major repairs and improvements of building, other constructions and machinery and equipments including transport equipments, furniture and fixtures etc. It also included bunding and other land improvement, including reclamation of land, pertaining to non-farm business.

Current expenditure in non-farm business

This was made up of the current expenditure in non-farm business for raw materials, fuel and lubricants, payment of rent, salaries and wages, hire charge of machinery and equipment etc and normal repairs and maintenance of buildings, construction, machinery and equipment including transport equipments, furniture and fixtures and household durables meant for the non-farm business.

Household expenditure

The expenditure incurred on account of purchase of residential plot, purchase, construction, addition/alteration of building for residential purposes, purchase of durable household assets. Cloths etc and expenditure for medical treatment, education, marriages, ceremonies etc constituted the household expenditure.

Cultivation

This means activities relating to production of crops and all related ancillary activities. However, growing of tree/plants/crops (such as rubber, cashew, coconut, pepper, coffee, tea, etc.) as plantation or orchards is not considered under 'cultivation'. It comes under 'other agricultural activity'.

Household Assets:

Household assets represented all that were owned by the household and had money value. This included physical assets like land, buildings, livestock, agricultural machinery and implements, non-farm business equipment, all transport equipment, durable household goods and financial assets like due receivable on loans advanced in cash and in kind, shares in companies and cooperative societies, bank, etc, national saving certificates and the like, deposit in companies, banks, post offices and with individuals.

Household durable assets

Articles which are used for domestic purposes and have a longer expected life, say, one year or more and which cannot be purchased at a nominal price were defined as household durables.

Liabilities

1. Cash loans

All loans taken in cash were considered as cash loans, irrespective of whether those loans were repaid or proposed to be repaid in cash or kind.

2. Kind loans

All loans taken in kind (except the cases of hire-purchase) irrespective of whether those were already repaid or yet to be repaid in cash or kind were considered as kind loans payable.

3. Other liabilities

As distinguished from cash loans, 'other liabilities' comprised all kinds of loans payable by the household and also liabilities arising out of goods and services taken from doctors, lawyers, etc. Similarly, outstanding taxes, rent payable to Government, other public bodies, landlords etc were included under other liabilities.

4. Current Liabilities

All kind loans and other liabilities of a household, as defined taken together constituted its current liabilities. It may be noted that nature of current liabilities may either cash or kind. Liabilities arising out of goods taken from traders or services taken from doctors, lawyers, etc was considered as cash part of the current liabilities.

Credit agency

The agency from which a loan was taken treated as the credit agency. The credit agencies were whether institutional agencies or non-institutional agencies.

Scheme of lending

The different programmes or schemes under which loans was given by the various institutional agencies for development of particular community, are industry, etc are the schemes of lending.

Nature of interest

A Loan of a household may either bear some interest or it may be interest free.

Rate of interest

Rate of interest per 100 rupee per annum actually charged by the lender was considered.

Purpose of loan

The reason for which the household contracted a loan is considered as the purpose of loan. Even if the loan amount was utilised for a purpose other than that for which it was borrowed only, the original purpose of borrowing was considered. If more than one purpose was involved, the purpose for which maximum amount of loan was originally intended is to be considered. The various purpose of borrowing used for the survey were:

- a. Capital expenditure in farm business
- b. Current expenditure in farm business

- c. Capital expenditure in non-farm business
- d. Current expenditure in non-farm business
- e. Household expenditure
- f. Expenditure on irrigation
- g. Repayment of debt
- h. Financial investment expenditure
- i. Others

Household expenditure

The expenditure incurred on account of purchase of residential plot, purchase, construction, addition/alteration of building fr residential purposes, purchase of durable household assets. Cloths etc and expenditure for medical treatment, education, marriages, ceremonies etc constituted the household expenditure.

CHAPTER 3

MAJOR FINDINGS OF THE SURVEY

(I) CONSUMER EXPENDITURE (Schedule 1.0)

In every round of National Sample Survey household expenditure is collected and from that an important indicator of human living standard called MPCE is estimated. Household consumer expenditure is measured as the expenditure incurred by a household on domestic account. The imputed values of goods and services, which are not purchased, but procured otherwise for consumption, is also accounted here. For the 59th round of NSS conducted during 1st January 2003 to 31st December 2003 data on quantity and value of goods and services consumed by the sample household for a period of 30 days and for some non-food items data for the last 365 days preceding the date of visit of field workers to that household were collected. The main focus was on levels and pattern on Monthly Per capita Consumer Expenditure(MPCE) at households in Kerala on quantity and value of goods and services consumed by the sample household for a period of 30 days and for some by a household on domestic account. The survey on household consumer expenditure is decided to generate first and foremost, a very important indicator of human living standard called MPCE. Household consumer expenditure is measured as expenditure incurred by a household on domestic account. It also includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. Consumption of an item can be measured in terms of quantity or in terms of value. During the survey, data on value and quantity of goods and services consumed by the sample household for a period of 30 days and for some non-food items data for the last 365 days proceeding the date of visit of field workers to that household were collected. The main focus was on levels and pattern on Monthly Per capita consumer .Expenditure (MPCE) at household in Kerala. Besides, certain selected demographic and social features of population were also included. In this chapter some key results on these aspects were presented.

Table No.3.1 is furnished with the demographic particulars of Rural – Urban wise classification of Kerala state and India obtained in 59th round of N.S.S. It is seen that the sex ratio (number of female to 1000 number of male) remains greater than 1000 in Rural and Urban areas of Kerala while that in all India level it is less than 1000. With regard to Kerala the sex ratio of rural area is lower than that on

urban area. Similarly the percentage rate of child population(24.77%), both in Rural(25.30%) and Urban(23.02%) areas of Kerala is lower than that of all India (Combined as 34.42%, Rural 36.11%, Urban29.39%). This table also exhibit the phenomenon of sex ratio among children for rural as well as urban areas of Kerala and all India remains below 1000.

Table No.3.1

Estimated number of population for different social groups for Kerala and India are furnished in table No.3.2. Rural-Urban classification is already done here. The percentage wise classification of the same is exhibited in table No. 3.2.1. It is seen that the percentage of SC/ST population is lower in Kerala than that of All India. In the case of percentage on OBC population urban areas shows higher percentage than that of rural areas of Kerala while the trend of all India is in reverse order. The distribution of different Social group for India and Kerala are exhibited as Pie chart in Chart No.3.2.1.1 and Chart No.3.2.1.2 respectively.

Table 3.3 is furnished with average monthly expenditure per persons of Kerala state and for all India for 32 groups of different items of consumption. Rural, Urban wise classification is also done here.

It is seen that in rural area of Kerala the average monthly per capita expenditure is Rs.1276.82 and Rs.1579.65 for Urban area. The expenditure corresponding to all India is only Rs.554.13 and Rs.1021.88 respectively. The expenditure on the items of Pan, Tobacco, Intoxicants, Medical (institutional) and Medical (Non-institutional) in Rural as well as in Urban areas of Kerala are much higher than that to all India average.

	Total Consumer Expenditure..	100	100	100	100

Persons in rural area spent 36.35% of their expenditure for food items and 63.65% for non-food items. While that for persons in Urban area are 31.60% and 68.40% respectively. The percentage rate of consumer expenditure for food item of Rural and Urban areas of Kerala state is lower than that of All India averages. This exhibits the urbanized living character of people in Kerala state.

District wise classification of MPCE on Food, Non-food and Combined for Rural and Urban is shown in Table No. 3.3.2. The highest rate of MPCE for rural area is recorded in Thrissur district (Rs.1781.75) and lowest in Idukky district (Rs.898.32). The highest rate recorded in Thrissur is due to its highest rate of expenditure on non-food items(Rs.1320.79). The range of food items of rural area varies from Rs.319.29 in Idukky district to Rs.600.99 in Thiruvananthapuram district. But the range of expenditure on non-food items of rural area varies from Rs.555.94 in Kannur district to Rs.1320.79 in Thrissur district.

State	464.16	812.66	1276.82	499.13	1080.52	1579.65

The highest rate of MPCE for urban area is recorded in Thiruvananthapuram district as Rs. 2421.55 and lowest in Kannur district as Rs. 1138.09 (Due to the lack of urban sample representation in Idukky and Wayanad districts, urban areas of these districts were excluded.). The highest rate recorded in Thiruvananthapuram is due to its highest rate of expenditure on non-food items(Rs. 1807.54). The range of food items of urban area varies from Rs.411.89 in Kozhikkodu district to Rs.726.38 in Kottayam district. But the range of expenditure on non-food items of urban area varies from Rs.666.30 in Kannur district to Rs. 1807.54 in Thiruvananthapuram district. The graph exhibiting these matters are shown as Chart No.3.3.2.1 and Chart No.3.3.2.2.

It shows that the main source of energy for cooking remains firewood in rural areas of Kerala(66.04%), as well as of India (74.92%). LPG comes next to firewood in rural area of Kerala(32.67%). While in Urban areas of Kerala as well as in India the main source of energy for cooking is LPG (53.95% and 55.41% respectively) and firewood (42.47% and 19.98% respectively) gets second place. The consumption of other source of energy for cooking is only nominal for Kerala but the consumption of dung cake in Rural sector and that of Kerosene in urban sector for India is significant.

Table No.3.5
Distribution of household by Primary Source of Energy for lighting
(Nos. in '00)

Category	Kerala			India		
	Rural	Urban	Combined	Rural	Urban	Combined

Distribution of households by primary source of energy for lighting is shown in Table No.3.5. Table No 3.5.1 is furnished with the percentage distribution of the same.

Table No 3.5.1

Percentage Distribution of household by Primary Source of Energy for lighting

Category	Kerala			India		
	Rural	Urban	Combined	Rural	Urban	Combined
Kerosene	17.69	9.21	15.72	46.65	8.35	36.19
Other Oil	0.00	0.00	0.00	0.45	0.19	0.38
Gas	0.05	0.00	0.04	0.01	0.16	0.05
Candle	0.15	0.22	0.17	0.03	0.06	0.04
Electricity	81.67	90.57	83.73	51.55	90.78	62.26
Others (Including Not reported)	0.25	0.00	0.19	0.28	0.17	0.25
No Lighting arrangement	0.20	0.00	0.15	1.03	0.29	0.83
All	100	100	100	100	100	100

It is seen that in Kerala 81.67 % of households in rural area and 90.57 % of households in urban area are using electricity as the primary source of energy for lighting. For all India level the corresponding percentages are only 51.55 and 90.78 respectively. In general 83.73% households of Kerala and 62.26% households of India are using Electricity as primary source of energy for lighting. In Kerala 17.69 % of rural household and 9.21 % of urban households are consuming kerosene as primary source of energy for lighting. Thus the primary sources of energy for lighting are electricity and kerosene in Kerala and the use of other sources is only very nominal.

(Persons)

(II) FINDINGS ON HOUSEHOLD DEBT AND INDEBTEDNESS (18.2 SCHEDULE)

As a part of 59 th round of N.S.S. it was carried out the Debt and Investment Survey during January to December 2003. Information on assets and liabilities as on 30.6.2002, amount of capital expenditure incurred by the household during the agriculture year 2002-03, cash borrowings and repayments made by the households etc. were collected through the Debt and Investment Schedule (Schedule 18.2).

This schedule was canvassed from the selected households of the sample (selected panchayath wards) and the field workers visited two times to each sample households during the period of survey with a gap ranging from 4 to 8 months. During the first visit to a sample household, the investigator collected information on demographic particulars of household members as on the date of survey, and stock of household assets and situation of indebtedness as on 30.6.2002. The data were used to get the estimates of assets owned and indebtedness of the households as on 30.6.2002. Data on the amount of borrowings and repayments made during the first half of the agriculture year 2002-03 (during 1.7.2002 to 31.12.2002) were also collected during the first visit.

During the second visit to the sample households, data were collected to assess the borrowing and repayments made, loans written off, data on capital expenditure and sale and loss of assets during the second half of the agriculture year 2002-03 (during 1.1.2003 to 30.6.2003).

Some results estimated through this schedule (18.2 schedule) is expressed below and the other available information collected are appended as B.

Table No. I A is furnished with the estimated number of households obtained in the 18.2 schedule of the 59th round NSS in different Asset Holding Classes. It is observed that about 19.32 % of the households have assets of rupees 8,00,000 or more in rural areas and that for urban area 24.06 % of them have assets of rupees 8,00,000 or more. Chart 1-A exhibits the multiple bar diagram corresponding to the percentage of households by household asset holding classes in rural and urban areas. The percentage of households in the lowest asset holding class of below rupees 15,000 and the highest asset holding class of rupees above 8,00,000 are

more both in urban areas. This shows the variation in asset holding is higher in urban area than that of rural area.

Table I A

CHART 1-A
PERCENTAGE OF HOUSEHOLDS BY HOUSEHOLD ASSET HOLDING CLASS

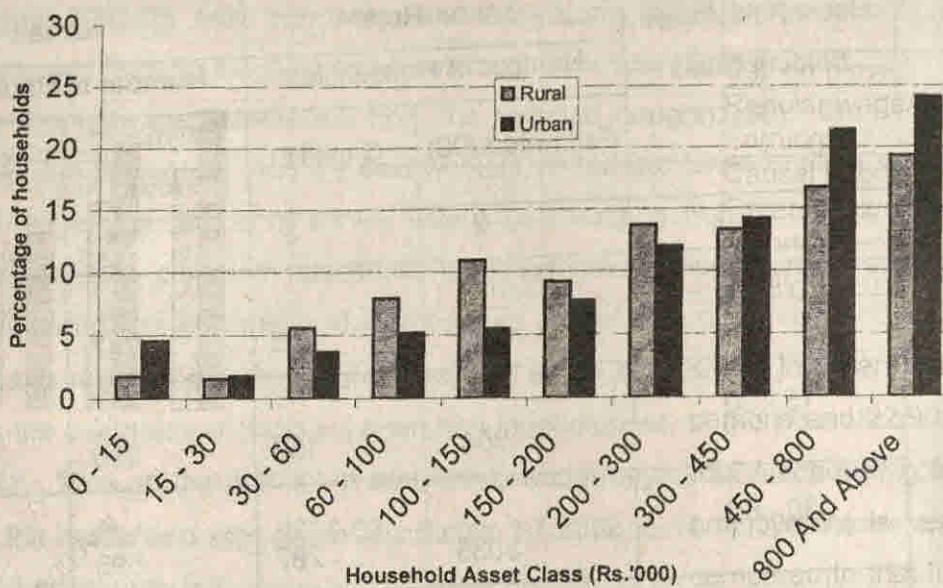

Table No. I B is furnished with the estimated number of households obtained in the 18.2 schedule of the 59th round NSS in each Social group. The all-India estimates are taken from the corresponding NSSO report No.503 (59/18.2/4). From the table it is seen that Scheduled Tribe, Scheduled Caste households are comparatively less in Kerala than that of all-India and the case of other backward class is in vice versa.

Table No. II is furnished with the number of households obtained in the sample, the estimated number of households obtained by that sample, Households Reporting cash loans in each household asset holding class. It is seen that the percentage of households reporting cash loans shows similar trends both in rural and urban areas.

In rural areas 33.27 % of households and in urban areas 30.16 % of households are reported to have cash loans. The highest percentage in reported households having cash loan in household asset holding classes both in rural and urban area is between Rs. 2,00,000 to 3,00,000 (37.99 % in rural and 38.32 % in Urban). The next rank goes to the class of Rs. 8,00,000 and above (36.38 % in rural and 37.04 % in urban).

Table II
Estimated Number of households, estimated number of households reporting cash loan as on 30.06.2002 by household asset holding class

The average amount of cash loan outstanding as on 30.6.2002 per households is Rs. 54,147 in rural area and Rs. 71,341 in urban area.

Table No. IV_A and IV_B are furnished with average value of assets and cash loan per households for different household type of Kerala and all-India. It is observed that among the rural households in Kerala Cultivators has the highest amount of average household cash loan (Rs. 58,410) than that of other categories.

From all-India estimates the average amount of cash loan per cultivator family is observed to be Rs.9261, while that for Kerala cultivator family is Rs. 58410 in rural areas. (All-India figures are taken from the NSS 59 th round Report No. 501(59/18.2/2) of National Sample Survey Organisation, Govt. of India). In the same

report of NSS 59th round conducted by NSSO, it has been reported that among the cultivator families in the rural sector of different states, cultivators in the rural sector of Kerala has the highest amount of cash loan outstanding on an average.

(III) FINDINGS ON OPERATIONAL LAND HOLDINGS AND LIVE STOCK (18.1 SCHEDULE)

Land and Livestock holding data were also been canvassed during the field work(January to December 2003) of 59 th round of N.S.S. through the schedule numbered 18.1. Information on livestock and poultry held by the household sector of economy, distribution of land owned by households and that of agriculturally operated land etc. were collected through this schedule. Two visits were also been conducted during the survey in which the information on holdings operated during the Kharif season of the agricultural year 2002-03 was collected in the first visit (from January to August 2003) and on holding operated during the Rabi season in the second visit (from September to December 2003). In addition, some general information on operational holdings with the agricultural year 2002-03 as the reference period was also collected in the second visit.

The results presented in the report are mostly in the form of rates and ratios and tables are appended as Appendix - C.

Table No.5.1 exhibits the distribution of households and average holding of area owned per household by different social group in rural and urban sector of Kerala. It is observed that Scheduled Tribe households have highest area holding in average for rural sector (0.37 ha), while that of urban sector they have the lowest area holding in average (0.02 ha).

Table No.5.1

Distribution of Households and Average Holding of Area Owned per household by Social Group

Social Group	Rural		Urban	
	No. of Households(00)	Average Area (0.00 ha) Owned Per Hhs	No. of Households(00)	Average Area (0.00 ha) Owned Per Hhs

Appendix – B

Table Name	Content of Table	Page Number
Table B - 1 R	Estimated Number of households and total value of assets as on 30.06.2002,estimated number of households reporting cash loan and amount of cash loan as on 30.06.2002 by household asset holding class - Rural	77
Table B - 1 U	Estimated Number of households and total value of assets as on 30.06.2002,estimated number of households reporting cash loan and amount of cash loan as on 30.06.2002 by household asset holding class - Urban	77
Table B - 2 R	Average Value of Assets Per Household and Cash Loan per Household as on 30.06.02 by Household Type - Rural	78
Table B - 2 U	Average Value of Assets Per Household and Cash Loan per Household as on 30.06.02 by Household Type - Urban	78
Table B - 3 R	Average Value of Assets Per Household and Cash Loan Per Household as on 30.06.02 by Household Asset Holding Class-Rural	79
Table B - 3 U	Average Value of Assets Per Household and Cash Loan Per Household as on 30.06.02 by Household Asset Holding Class – Urban	79
Table B - 4 R	Per 1000 distribution of Households By Household Asset Holding class according to Household Type - Rural	80
Table B - 4 U	Per 1000 distribution of Households By Household Asset Holding Class according to status of employment - Urban	81
Table B - 5 R	Per 1000 distribution of Assets By Household Asset Holding Class according to Household Type - Rural	82
Table B - 5 U	Per 1000 distribution of Assets By Household Asset Holding Class according to status of employment - Urban	83
Table B - 6 R	Per 1000 distribution of Hhs and Average Value (Rs.) of Assets per Household by Monthly per Capita Consumer Expenditure (MPCE) for each of the major household type - Rural	84
Table B - 6 U	Per 1000 distribution of Hhs and Average Value (Rs.) of Assets per Household by Monthly per Capita Consumer Expenditure (MPCE) for each of the major household type - Urban	84
Table B - 7 R	Per 1000 distribution of Hhs and Average Value (Rs.) of Assets per Household by broad size classes of land owned as on 30.06.02 for each of the major household type - Rural	85
Table B - 8 R	Number of Households Reporting specified items of assets and cash loan outstanding as on 30.6.02 per thousand households by household asset holding class - Rural	86
Table B - 8 U	Number of Households Reporting specified items of assets and cash loan outstanding as on 30.6.02 per thousand households by household asset holding class - Urban	87
Table B - 9 R	Average value of different items of assets as on 30.6.02 and average value of cash loans outstanding as on 30.6.02 per household by household assets holding class - Rural	88
Table B - 9 U	Average value of different items of assets as on 30.6.02 and average value of cash loans outstanding as on 30.6.02 per household by household assets holding class - Urban	89

Table Name	Content of Table	Page Number
Table B - 10 R	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households (P) and per 1000 distribution of amount of cash loans (S) by nature and rate of interest for each major household type - Rural	90
Table B - 10 U	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households (P) and per 1000 distribution of amount of cash loans (S) by nature and rate of interest for each major household type - Urban	91
Table B - 11 R	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households over rate of interest for each of the household asset holding class - Rural	92
Table B - 11 U	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households over rate of interest for each of the household asset holding class - Urban	93
Table B - 12 R	Per 1000 distribution of amount of cash loans outstanding as on 30.6.2002 over rate of interest for each of the household asset holding class - Rural	94
Table B - 12 U	Per 1000 distribution of amount of cash loans outstanding as on 30.6.2002 over rate of interest for each of the household asset holding class - Urban	95
Table B - 13 R	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households (P) and per 1000 distribution of amount of cash loans outstanding (S) over credit agency for each major household type - Rural	96
Table B - 13 U	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households (P) and per 1000 distribution of amount of cash loans outstanding (S) over credit agency for each major household type - Urban	97
Table B - 14 R	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households over credit agency for each household assets - Rural	98
Table B - 14 U	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households over credit agency for each household assets - Urban	99
Table B - 15 R	Per 1000 distribution of amount of cash loans outstanding as on 30.6.2002 over credit agency for each household assets holding classes- Rural	100
Table B - 15 U	Per 1000 distribution of amount of cash loans outstanding as on 30.6.2002 over credit agency for each household assets holding classes- Urban	101
Table B - 16 R	Number of households reporting cash loans outstanding as on 30.6.2002 to institutional agencies per 1000 households over scheme of lending for each -Rural	102
Table B - 16 U	Number of households reporting cash loans outstanding as on 30.6.2002 to institutional agencies per 1000 households over scheme of lending for each -Urban	103
Table B - 17 R	Per 1000 distribution of amount of cash loans outstanding as on 30.6.2002 to institutional agencies over scheme of lending for each - Rural	104
Table B - 17 U	Per 1000 distribution of amount of cash loans outstanding as on 30.6.2002 to institutional agencies over scheme of lending for each - Urban	105
Table B - 18 R	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households over purpose of loan for each household assets holding - Rural	106

Table Name	Content of Table	Page Number
Table B - 18 U	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households over purpose of loan for each household assets holding - Urban	107
Table B - 19 R	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households (P) and per 1000 distribution of amount of cash loans outstanding (S) over security of loan for each major - Rural	108
Table B - 19 U	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households (P) and per 1000 distribution of amount of cash loans outstanding (S) over security of loan for each major household type - Urban	109
Table B - 20 R	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households over duration of loan for each household -Rural	110
Table B - 20 U	Number of households reporting cash loans outstanding as on 30.6.2002 per 1000 households over duration of loan for each household -Urban	111
Table B - 21 R	Average Value of Assets Per Household and Cash Loan Per Household as on 30.06.02 by Household social group - Rural	112
Table B - 21 U	Average Value of Assets Per Household and Cash Loan Per Household as on 30.06.02 by Household social group - Urban	112
Table B - 22 R	Per thousand distribution of household by household type for each social group - Rural	113
Table B - 22 U	Per thousand distribution of household by household type for each social group - Urban	113
Table B - 23 R	Per thousand distribution of household by household asset holding class for each social group-Rural	114
Table B - 23 U	Per thousand distribution of household by household asset holding class for each social group-Urban	114
