## Preface

Housing statistics is an indicator for measuring the Nation's economic and social well being. It helps planners and housing financial institutions to formulate suitable lending policies. The National Building Organization has been collecting housing statistics for private sector housing from urban area and bringing out publications since 1974-75. We have been participating in this venture from the same year onwards by collecting and forwarding the same. Though all the municipalities and corporations are covered by this scheme poor response from the authorities reduce the accuracy of the estimate.

The National Statistical Commission suggested for extending the scheme of collection of Housing statistics from Local self Governments. Government also directed to collect the same. Based on the same the required data was collected by the staff of Wayanad district in record time and the data was tabulated by the Housing cell of the Directorate. This report contains the information regarding details of Buildings, their ownership, type of roof etc. completed during the years for 2001-02, 2002-03 and 2003-04.

This report is prepared by the Housing section of the department under the supervision of Sri.Raveendran . Paleri, Assistant Director and Sri.N.Vinayan, Research Officer under the guidance from both the Additional Director Sri.P.Kochu Narayana Pillai and Joint Director Sri .P.Surendran .Pillai.

I place on record the appreciation to all the staff of Wayanad district as well as the staff in the Head quarters who are associated with this maiden venture. I hope this will be of great use to researchers and other data users. Suggestions to improve this is welcomed.

Thiruvananthapuram ,

## Introduction

The housing sector is a crucial component of the overall economy of a country. Reliable housing statistics are a pre-requisite for formulation of realistic housing policies. But we were collecting housing statistics only from urban area in the past as per the request of National Building Organization.

National statistical commission in its recommendation regarding collection of housing statistics has requested to collect and compile housing statistics from all Local self Governments. Government also have directed to collect the same. Hence this department has taken steps to collect the available information from all Panchayats in the state as first phase. Information regarding number of houses newly constructed, ownership, type of roof, use of building etc are collected for the years of 2001-02, 2002-03 and 2003-04 from Wayanad district.

### Summary of Findings

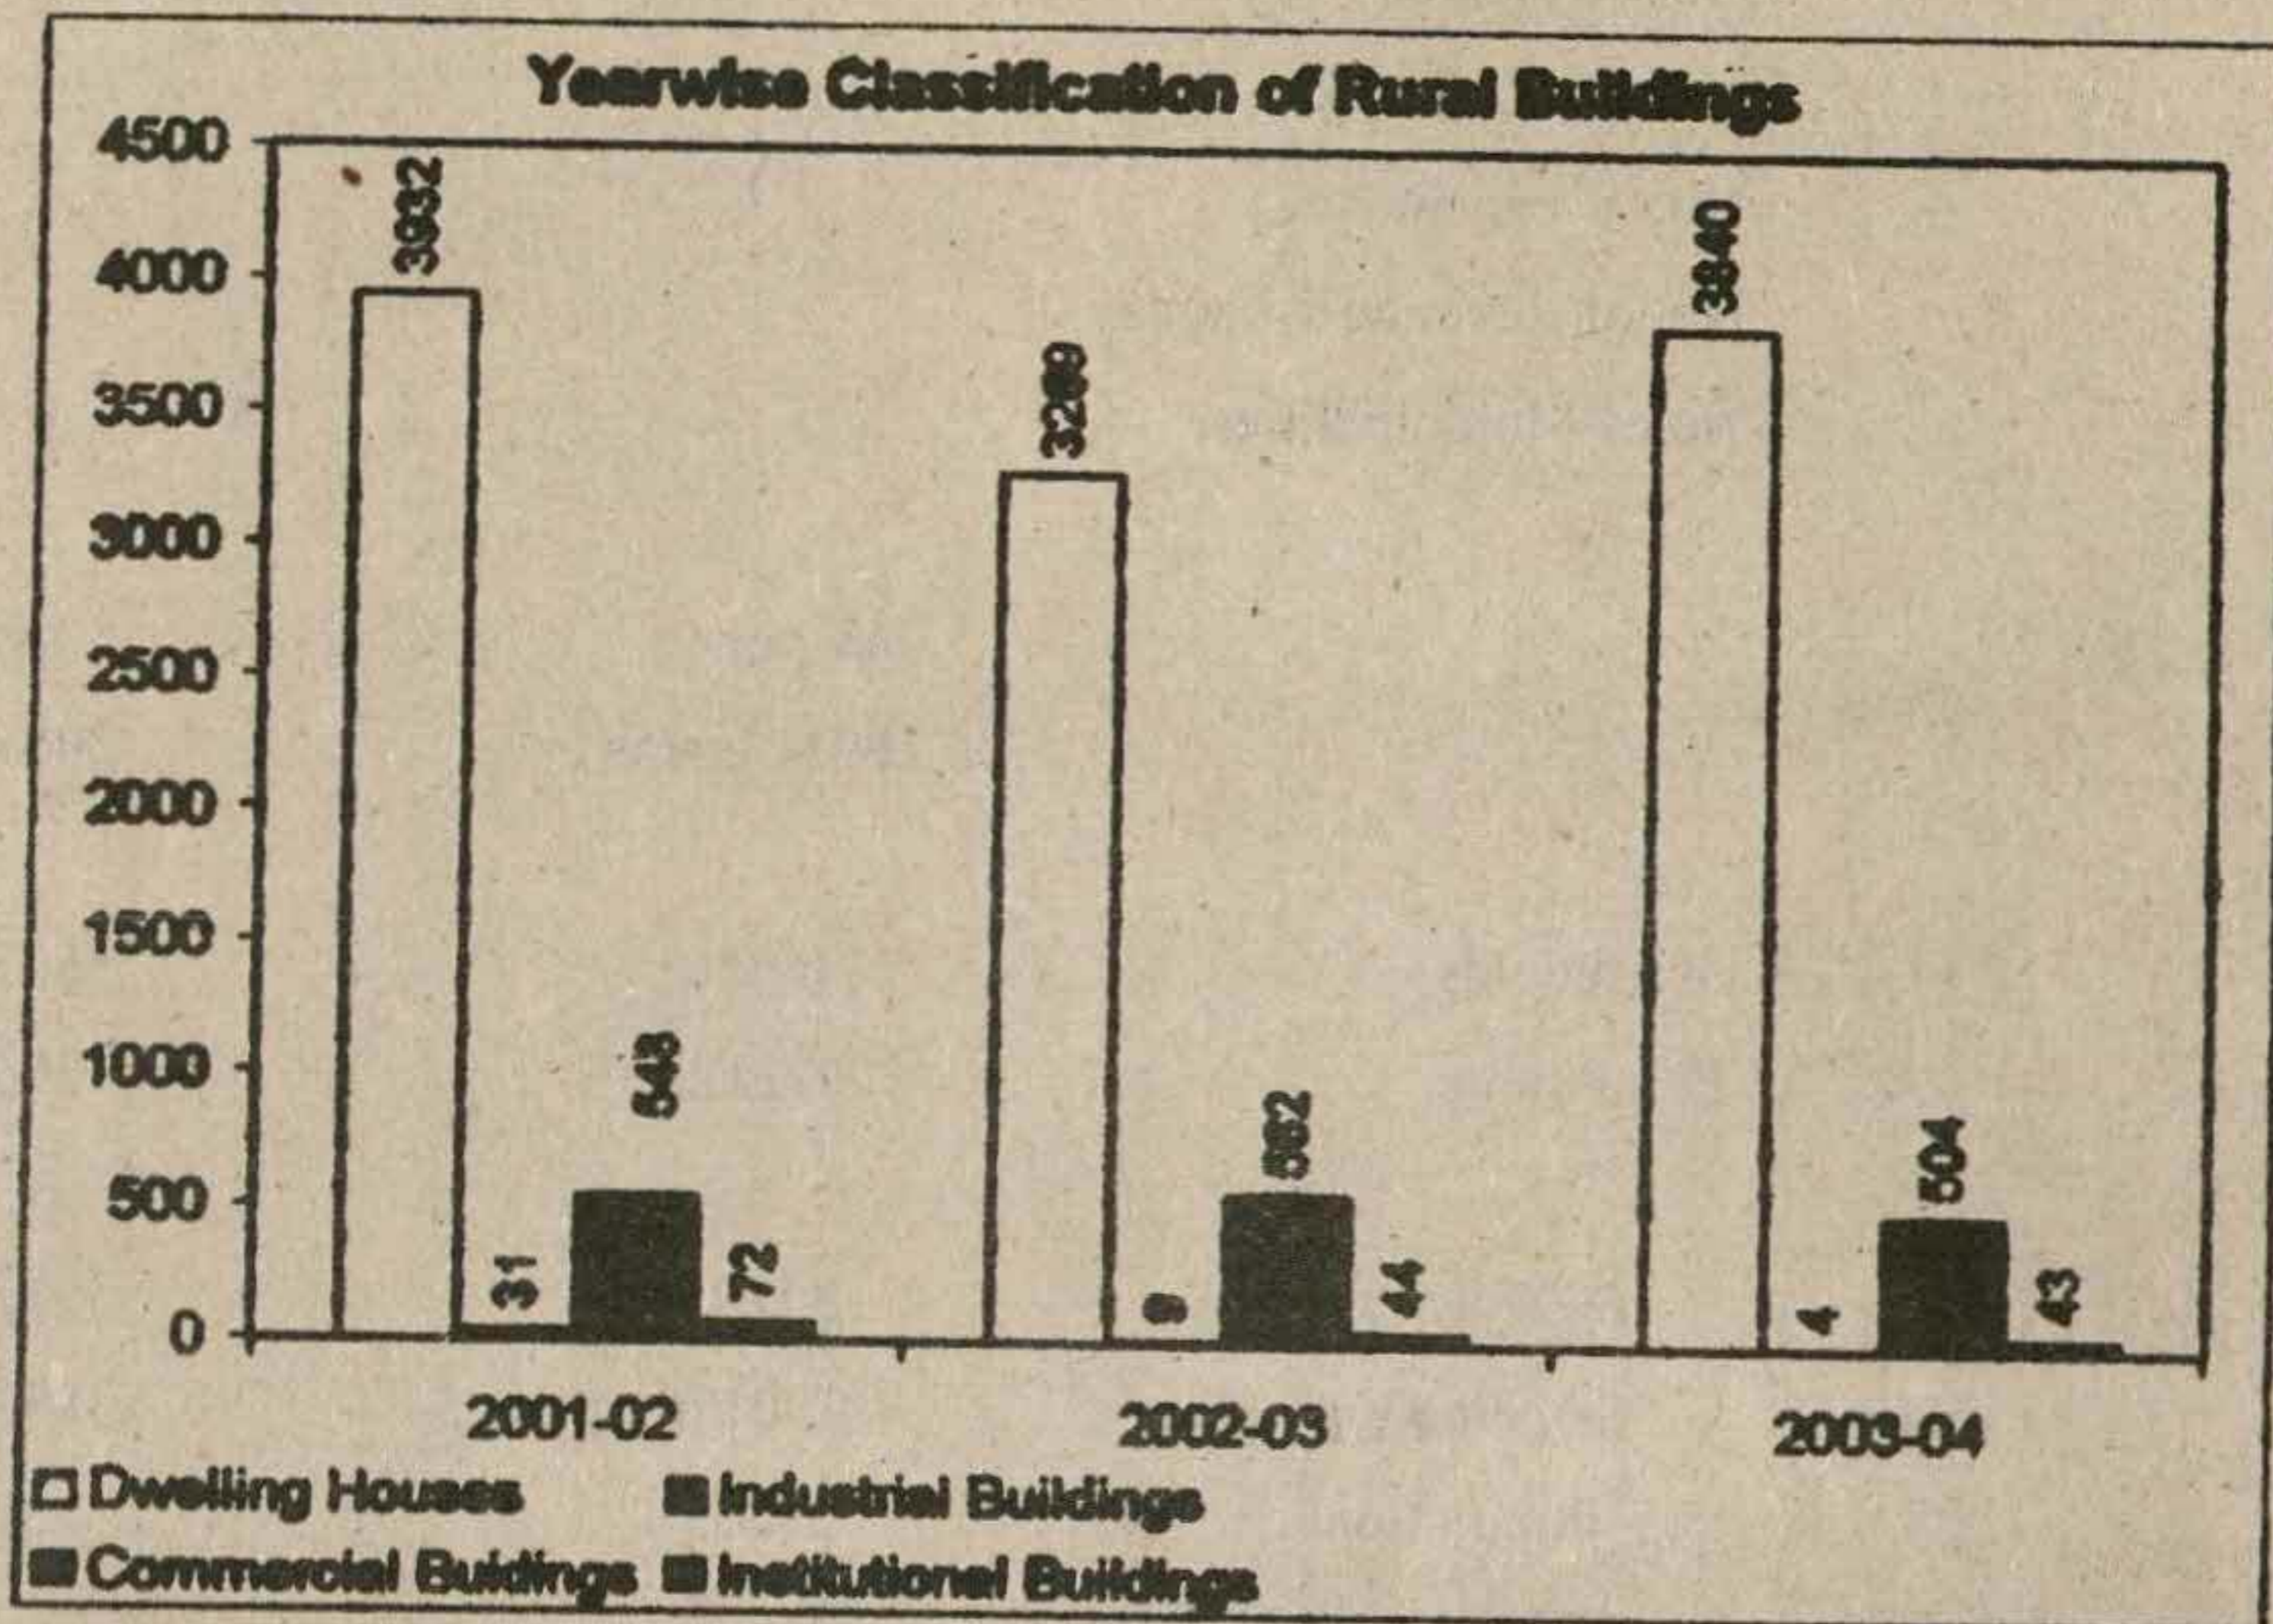

In Wayanad district the total number of Buildings newly constructed in the years 2001-02, 2002-03 and 2003-04 were respectively 5044, 4319, 4765. The percentage of Dwelling Houses for those years were 78.76 and 81 respectively.

### Rural Housing Abstract

Year	Dwelling Houses		Non-Residential Buildings		
	Number	Average Plinth Area(sq.m)	Industrial Building	Commercial Building	Institutional Building
2001-02	3932	71.85	31	543	72
2002-03	3269	82.02	9	562	44
2003-04	3840	83.83	4	504	43

On examining the Average Plinth Area it shows an increasing trend for different years. This is because of the tendency of the people to build new buildings having more space to provide electronic and electrical equipments.

**Yearwise Classification of Rural Buildings**
