**REPORT ON
MEDICAL CERTIFICATION OF
CAUSE OF DEATH
2002**

**Directorate of Economics and Statistics
Thiruvananthapuram, Kerala
2008**

PREFACE

The scheme of Medical Certification of Cause of Death (MCCD) was introduced in the State as part of All India programme for improvement of Vital Statistics. The importance of Statistics on cause of death is well recognized and these data are in demand by health planners, administrators and medical professionals.

To obtain valuable data on the cause of death, the scheme was introduced in four Corporations viz. Thiruvananthapuram, Kollam, Kochi and Kozhikode and Alappuzha Municipality. Due to some technical reasons the data pertaining to Thiruvananthapuram Corporation has not been included in the report.

This Report was prepared by the Vital Statistics Unit of Directorate of Economics and Statistics under the effective supervision of the Additional Director Sri. D. Rajan. Smt. S. Leelamony, Deputy Director, Smt. K. Shailamma, Assistant Director and Sri M. N. Raju, Research Assistant have provided valuable contribution in the preparation of this report.

M. R. BALAKRISHNAN

Director.

Thiruvananthapuram.

REPORT ON MEDICAL CERTIFICATION OF CAUSE OF DEATH 2002

Introduction

Mortality Statistics form an integral part of the Vital Statistical System. They are one of the basic components of population growth. The data on mortality is indispensable for demographic studies, formulating public health programmes, policy framing for insurance companies, etc. Further the cause specific mortality rates are key indicators of the health trends in the population and are provided on specific basis by the system of Medical Certification of Cause of Death.

The Registration of Birth and Death Act, 1969 contains the following sections:

Section 10 (2)

In any area the state Government having regard to the facilities available there in this behalf may require that a certificate as to the cause of death shall be obtained by Registrar from such persons and in such form as may be prescribed.

Section 10 (3)

Where the state Government has required under sub section (2) that a certificate as to cause of death shall be obtained in the event of the death of any person who during his last illness was attended by a medical practitioner. The Medical practitioner shall after the death of that person for the work will issue without charging any fee to the person required under this act to give information concerning the death, a certificate in the prescribed form stating to the best of his knowledge and belief the cause of death and the certificate shall be received and delivered by such person to the Registrar at the time of giving information concerning the death as required by this Act.

The reporting form for the registration of death has also an item for cause of death. However, this information in majority of cases is not authenticated by a medical practitioner. Owing to the difficulty in obtaining cause of death as medically certified, the Registrar General of India formulated the scheme Medical Certification of cause of death, which has been introduced in phases. For the time being it has been introduced in hospitals in urban areas which have been selected by the Chief Registrar of Birth and Death of the state.

Objectives

The main objectives of the scheme are the following:

- (1) to obtain reliable information on the underlying causes of death;
- (2) to pin point the leading cause of death for males and females;
- (3) to identify individual causes of death particularly among infants, mothers and the aged;

- (4) to study the mortality pattern of certain important diseases like tuberculosis, cancer, etc.;
- (5) to enable public health and medical authorities to undertake specific investigations and studies into the mortality pattern of disease for the evaluation and planning of health activities.

Methodology

The scheme envisages the collection of accurate data relating to all death in Medical Institutions in the Corporation area having facilities for inpatient treatment. The attending physician is required to furnish the data on cause of death in the prescribed form. The forms used for this purpose is Form 4 (institutional death) and Form 4A (non institutional death). The forms contain the details of the diseases such as name, normal residence, sex, age date of birth, marital status religion, occupation, immediate cause of death and whether the death associated with pregnancy and child birth. The data are scrutinized and cause of death are identified and coded by the Deputy Health Officers appointed for the purpose. Information of morbidity is not collected under the scheme of medical certification of cause of death.

Cause of Death

A cause of death is the disease abnormality, injury or poisoning that contributed directly or indirectly to death. A death often results from the combined effect of two or more conditions. These conditions may be unrelated, arising independently of each other, or they may be casually related to each other, that is, one condition may lead to a third condition and so on. The disease or injury which initiated the sequences of events will get selected for the purpose of tabulation.

Coding of M. C. C. D

Data on medically certified cause of death are tabulated according to International Classification of Diseases (ICD-10).

International Classification of Diseases (ICD-10).

It is a systematic recording based on, International standard diagnostic classification. Practical instructions and rules are adopted for reporting. Alphanumeric codes are used here.

ICD-10 Characteristics

Three-character code, further subdivided into ten character sub-categories, with the fourth character after a decimal. Coding for practical, epidemiological purpose rather than pure theritocal.

The following are the various chapters in this coding:

| | | |
|---------------|---|---------|
| Chapter I | Certain infectious and parasitic diseases code | A00-B99 |
| Chapter II | Neoplasm | C00-D48 |
| Chapter III | Diseases of blood and blood forming organs and certain disorders involving the immune mechanism | D50-D89 |
| Chapter IV | Endocrine, Nutritional and metabolic diseases | E00-E90 |
| Chapter V | Mental & behavioral disorder due to psycho active substance | F00-F99 |
| Chapter VI | Disease of nervous system | G00-G99 |
| Chapter VII | Disease of the eye and Adnexa | H00-H59 |
| Chapter VIII | Disease of the ear and mastoid process | H60-H95 |
| Chapter IX | Disease of the circulatory system | I00-I99 |
| Chapter X | Diseases of respiratory system | J00-J99 |
| Chapter XI | Diseases of the digestive system | K00-K93 |
| Chapter XII | Diseases of the skin and subcutanious tissue | L00-L99 |
| Chapter XIII | Diseases of musculoskeletal system and connective tissue | M00-M99 |
| Chapter XIV | Diseases of the genito urinary system | N00-N99 |
| Chapter XV | Pregnancy, Childbirth and Puerperium | O00-O99 |
| Chapter XVI | Certain conditions originating in the perinatal period | P00-P96 |
| Chapter XVII | Congenital malformation & deformities Chromosomal abnormalities | Q00-Q99 |
| Chapter XVIII | Symptoms, signs and abnormal clinical laboratory findings not elsewhere classified | R00-R99 |
| Chapter XIX | Injury, Poisoning and certain other consequences of external cause. | S00-T98 |
| Chapter XX | External cause of morbidity and mortality | V01-Y98 |

Uses of Causes of death data

It is an important tool of obtaining authentic and scientific information regarding causes of mortality. MCCD data are of very much importance in the following situations.

- to study and explain level, trends and differentials in age-specific mortality
- to guide priorities for resource allocation and socio-medical research
- to monitor public health programmes
- to provide clues for epidemiological research.

Limitations

Scientific data is not fully obtained due to reasons such as under reporting of vital events, inadequacy of medically certified deaths, larger portions of the death attributed to servility ill defined and unknown causes of death, etc. Since these schemes covers only institutional death, which constitute only a portion of the total deaths, indication on causes of death from this system is not comprehensive.

Analysis of the data

This report contains statistics on death by causes, which occurred in the selected centers viz., Kollam, Kochi and Kozhikkode Corporations and Alappuzha Municipality during the year 2002. In this report medically certified deaths have been tabulated in conformity with the ICD-10. This report provides statistics on cause of death by cross classifying these by age and sex also.

As per 2001 census the population of Alappuzha Municipality, having an area of 46.77 sq.km., was 177160 density of population works out as 3788/sq.km. During the year under report the number of Medically Certified Deaths verified and analysed were 1653.

The population of Kollam Corporation was 365880 as per latest population census with an area of 57.28 sq.km. and having density of population 6388/sq. km. During the year 2002 the number of Medically Certified Deaths verified and analysed were 1990.

As per 2001 census the population of Kochi Corporation was 597566 with an area of 94.88 sq.km. having a density of population 6298/sq. km. During the year under report the number of Medically Certified Deaths verified and analysed were 4692.

The population of Kozhikkode Corporation was 437095 as per 2001 census with an area of 84.28 sq.km. and the density of population 5186/sq. km. During the year under report the number of Medically Certified Deaths verified and analysed were 6864.

Sex-wise Distribution of Deaths

During the year under report 1653 deaths were reported and verified in Alappuzha Municipality, out of which 964 (58.32%) were male and 689 (47.19%) were female deaths. For the previous year it was 2094, with 1314 (62.75%) male deaths and 780 (37.25%) female deaths.

In Kollam Corporation total deaths reported under the scheme was 1990, out of which 1247 (62.66%) were male deaths and 743 (37.34%) female deaths.

4692 deaths were verified in Kochi corporation. Out of this 2968 (63.26%) were male and 1724 (36.74%) were female deaths.

Total deaths reported under this scheme from Kozhikkode Corporation was 6864 out of which 4377 (63.77%) were male deaths and 2487 (36.23%) female deaths.

Major diseases

(1) Disease of the circulatory system code IX (I 00-I 99)

During year 2002, disease of the circulatory system has been reported as first major cause of death in all the centers. It includes causes like Heart attack, congestive and other heart disease. The percentage of deaths reported under this disease in Kollam, Kochi and Kozhikkode Corporations and Alappuzha Municipality were 44.98, 37.26, 28.47 and 25.47 respectively.

(2) Injury, Poisoning and certain other consequences of external cause Code XIX (S 00-T 98)

It include death due to burns and food poisoning, road and railway accidents, suicide, homicide and other violence, etc. The percentage of death reported under this category in Kollam, Kochi and Kozhikkode Corporations and Alappuzha Municipality were 9.00, 27.3, 52.41 and 11.29 respectively.

(3) Neoplasm Code II (C 00-D 48)

Neoplasm has been reported as the 3rd major cause of death in respect of Kochi and Kozhikkode Corporations. In Alappuzha Municipality and Kollam Corporation it stood in the 4th position. This major group comprises of cancer. 1922 deaths were reported from the four centers. The percentage of death in this category in Kollam, Kochi and Kozhikkode Corporations and Alappuzha Municipality were 8.79, 38.92, 43.29 and 9.00 respectively.

(4) Diseases of the digestive system code XI (K 00-K 92)

This major cause of death came in the 7th place in Kollam, Kochi and Kozhikkode Corporations and 8th place in Alappuzha Municipality. This major cause group comprises of peptic or gastric ulcer. During the year under report a total of 793 death were reported from the centers. 8.95, 29.13, 50.44 and 11.48 respectively were the

percentage of death reported under this category in Kollam, Kochi and Kozhikkode Corporations and Alappuzha Municipality .

(5) Certain infectious and parasitic diseases code I (A 00-B 99)

This major group comprises of cholera, Typhoid, Para typhoid, Dysentery, Diarrhea and Gastro-enteritis, TB of lungs, Leprosy, Tetanus, Neo-naturm and other Tetanus, Whooping Cough, Poliomyelitis and Rabies. 1327 deaths were reported from the four centers. This major cause of death stood in the 8th places in respect of Kollam Corporation, 5th place in Kozhikkode Corporation and 3rd place both in Kochi Corporation and Alappuzha Municipality. Percentage of deaths reported in this category in Kollam, Kochi and Kozhikkode Corporations and Alappuzha Municipality were 4.75, 32.78, 47.1 and 15.37 respectively.

(6) Diseases of respiratory system Code X (J 00-J 98)

Diseases of the respiratory system comprises of Influenza and pneumonia, bronchitis, broncholitis, Asthma, etc. Total death reported in this category was 1935 and it stood in the 2nd place. This category of diseases came in the 2nd place in respect of Kollam, Kozhikkode Corporations and Alappuzha Municipality. It came in the 4th place in Kochi Corporation. Percentage of death reported in this category in the corporations of Kollam, Kochi and Kozhikkode and Alappuzha Municipality were 16.38, 21.34, 48.89 and 13.39 respectively.

(7) Endocrine, Nutritional and Metabolic diseases Code IV (E 00-E 89)

This category of cause of death comprises of disorders of thyroid gland, Diabetes mellitus, disorders of glucose regulation and pancreatic internal secretion, disorders of other endocrine glands; Malnutrition, etc. During the year under report a total of 1050 death were reported from the centers .This major cause of death came in 3rd place in Kollam Corporation and 5th place in Kochi Corporation. In Alappuzha Municipality it came in 6th position and Kozhikkode Corporation in the 8th position. The percentage of death reported in this category in Kollam, Kochi and Kozhikkode Corporations and Alappuzha Municipality were 25.24, 34.00, 29.33 and 11.43 respectively.

(8) Certain Conditions originating in the perinatal period—Code XVI (P 00 – P 96)

This major cause of death comprises of Fetus and newborn affected by maternal factors and by complications of pregnancy labour and delivery, Disorders related to length of gestation and fetal growth, Birth Trauma, Haemorrahagic and hematological disorders of fetus and newborn, etc. 1102 deaths were reported under this category. This category of cause of death came in the 8th place in respect of Kochi Corporations, 5th place both in Kollam Corporation and Alappuzha Municipality and 4th place in Kozhikkode Corporation. The percentage of deaths reported in this category in the Corporations of Kollam, Kochi and Kozhikkode and Alappuzha Municipality were 7.62, 16.88, 60.53 and 14.97 respectively.

(9) Disease of the nervous system VI Code (G 00-G 98)

This major cause group consist of Epilepsy, Parkinson's disease, Alzhuymers disease, Migraine. A total deaths of 475 were reported due to this reason and the percentage under this category was 3.13.

(10) Diseases of the genito urinary system Code XIV (N 00-N 99)

Diseases of the genito urinary system stood in the 9th position. This group consist of glomerular diseases, diseases of the urinary system and diseases of male and female genital organs. The percentage of death reported under the category was 3.61.

Death According to Age group

Alappuzha Municipality

The percentage of death for the age group below 1 year was 12.34 against 8.21 for the previous year 2001. In the age group 1-14, percentage of death was 2.30. The percentage of death among the age group 15-44 was 17.54 where as that for the age group 45 and above was 67.45.

The main cause of death among below 1 year age group was certain conditions originating in the perinatal period. About 84.31% of death falls under this category. The major killer diseases in the age group 1-14 was diseases due to respiratory system. In the age group 15 to 44 years, the major killer disease was injury, poisoning and certain other consequences of external cause. The main cause of death among the age group 45 and above due to disease of circulatory system.

Kollam Corporation

The percentage of infant death was 5.78. In the age group 1-14 percentage of death was 0.40, which is observed as the least. The percentage of death among the age group 15-44 and 45 and above were 8.14 and 85.68 respectively.

The main cause of death among below 1 year age group was certain conditions originating in the perinatal period. 73.04% death falls under this category. Diseases due to respiratory system was the main reason for deaths in the age group 1-14 and it is reported only for females. The major killer diseases in the age group 15-44 and 45 and above was disease of the circulatory system.

Kochi Corporation

6.95% and 1.51% of deaths were reported from the age group below 1 year and 1-14 respectively. The percentage of death in the age group 15-44 was 15.43 and 45 and above it was 76.11

The major killer diseases in the age group below 1 year was certain conditions originating in the perinatal period. 57.06% deaths were occurred due to this reason. Then comes the disease of the nervous system and certain infectious and parasitic

diseases. Disease of the circulatory system was the main reason for death in the age group 1-14, 15—44 and 45 and above. The percentage of death due to this disease in the above age group was 29.58, 31.22 and 41 respectively.

Kozhikkode Corporation

For the age group below 1 year the percentage of death was 13.80. In the age group 1-14 it was 3.74. The percentage of death in the age group of 15-44 and 45 and above was 15.69 and 66.77 respectively.

The main cause of death among the age group below 1 year was certain conditions originating in the perinatal period. 70.12% death falls under this category. In the age group 1 – 14 diseases due to respiratory system was the main reason for death then came disease of nervous system. The data reveals that injury, poisoning and certain other consequences of external cause was the main reason for death in the age group 15-44. Majority of the deaths in the age group 45 and above were occurred due to diseases of circulatory system.

Conclusion

The disease of the circulatory system, the major group of cause of death emerged as the first in all the centres viz., Alappuzha Municipality and Kozhikkode, Kollam and Kochi Corporations with 8.39%, 38.94%, 17.84% and 34.84% respectively. Diseases of respiratory system came in the second position. Deaths due to pregnancy, childbirth and puerperium, congenital malformation and deformities, chromosomal abnormalities and diseases of musculoskeletal system and connective tissue were reported only from Kochi Corporation. No deaths were reported due to Mental & behavioral disorder due to psycho active substance, Disease of the eye and Adnexa, Disease of the ear & mastoid and Diseases of the skin and subcutanious tissue from the centers. Another reason for death reported from all the centres was Neoplasm.

Among the four centres, Kollam Corporation has the lowest percentage of death in the age group below 1 year, 1—14 and 15—44 and the highest percentage in the age group 45 and above. Highest percentage of Infant death is reported from Kozhikkode Corporation.

At present the scheme is implemented only in the selected five centres of the state. In order to obtain a clear picture about the causes of deaths , the coverage of scheme will be extended to all urban and rural areas.
