PREFACE

The Integrated Sample Survey for Estimation of Production of Milk, Egg and Meat is being conducted in the State since 1977-78 by the Statistical Cell of the Directorate of Animal Husbandry as per the guidelines issued by the Indian Agricultural Statistics Research Institute, Government of India, New Delhi.

The report contains very relevant data such as estimated number of in milk/milch animals, layer birds, production of milk, egg & meat with their utilisation pattern and many more useful statistics related to the Animal Husbandry Sector. The information and data available from this survey are used as base figures for formulation of development programmes in respect of Animal Husbandry and Dairying sector in the State.

I am grateful to Shri A. P. Harilal, Joint Director (Statistics) under whose leadership the entire survey work was carried out. Thanks are due to Shri T. Suresh Babu, Smt. N. Vilasini and Shri P. R. Muraleendran, Research Officers (Statistics) who prepared this report and to the other staff of Statistics wing who have done the tabulation and consolidation. The earnest service rendered by the field staff and other departmental officers are acknowledged. My sincere thanks to the farmers who co-operated with the survey by providing correct information to the enumerators.

I do hope that this report will be useful to Research Scholars, Planners, Administrators and all those concerned with formulating future policy decisions with regard to Animal Husbandry Sector of the State.

(Sd.)

Thiruvananthapuram,
17-7-2009.

Dr. R. Vijayakumar,
Director of Animal Husbandry.

CHAPTER-I

Introduction

KERALA is one among the smaller states of India covering a geographical area of 38,863 square kilometers only. It is located between 8° 18' and 12° 48' North Latitude and 74° 52' and 77° 22' East Longitude. The state may be divided in to three geographical regions – Highlands, Lowlands and Midlands. The Highland slope down from the Western Ghats and constitute a natural boundary in the east. Major plantations like Tea, Coffee, Rubber, Cardamom and other spices are grown here. The Lowlands in the coastal area is made up of the river deltas, backwaters and the Arabian Sea shore. The state has a coastal line of length 580 kilometers. Mainly Coconut and Paddy are grown here. The Midlands is made up of undulating hills and villages. It lies between the Highlands and Lowlands. Cashew, Coconut, Tapioca, Banana, Ginger, Pepper and vegetables of different varieties are grown in this area.

The State is divided in to 14 districts. There are 63 Taluks, 152 Block Panchayats, 999 Grama Panchayats, 53 Municipalities and 5 Municipal Corporations in Kerala.

The various types of soil seen in the state are :

- (1) The hilly and forest soil in the eastern parts of the state.
- (2) The Sandy soil of the Midland.
- (3) The laterite soil in the Midlands.
- (4) The Black soil seen in Palakkad districts.
- (5) The Peat or Kari soil of Alappuzha districts.
- (6) The Alluvial soil seen some parts of Kottayam, Idukki, Ernakulam and Thrissur districts.
- (7) The Red soil found in the extreme tip of Thiruvananthapuram Taluk.

Climate and Rainfall

The major sources of rainfall in the State are South West Monsoon (June to September) and the North-East Monsoon (October to September). The normal rainfall in the State is 3097mm. Even though Kerala is very close to the equator, the climate remains more or less moderate, as the seashore is not far away in most parts of the State.

Population and Sex ratio

According to the 2001 census, the human population in Kerala was 3,18,41,374 of which the female population was 1,63,72,760. The sex ratio indicates 1058 females for 1000 males Kerala had a literacy of 90.92% (excluding children below 6 years) as per the 2001 census.

Some important district wise statistics are given in the following tables

CHAPTER-II

Animal Husbandry Sector

The Animal Husbandry Sector plays an important role in strengthening the economy of the State, especially rural economy. It provides Self-employment opportunities to unemployed and underemployed rural poor. The majority of the Livestock population in the State is concentrated in rural areas. The progress in livestock will directly reflect a more balanced development in rural economy and upliftment of weaker sections of the society. A large manpower is also involved in livestock rearing and related activities.

Objectives of Animal Husbandry Department

The main objectives of the sector is to strengthening the livestock population of the State in terms of both quantity and quality and convert the State into a disease controlled zone by controlling/eradicating animal diseases. Prevention of disease includes control of contagious diseases by systematic vaccination. For that, the department introduces so many schemes such as Rinderpest Eradication Programme, Disease Free Zone Schemes, animal Disease Control Programme etc.

To achieve the aim of increasing milk and meat production, cattle development programmes have been imparted in the State. Among them the most important is crossbreeding activities. Besides, this the department have goat rearing programmes, buffalo rearing programmes, pig and rabbit breeding programmes, poultry development programmes etc. Impart training to farmer on scientific management of production units to enhance production. Training given to women to prepare themselves to take up domestic units of livestock and poultry of manageable size to supplement family income. Provide technical knowledge and relevant information on various schemes implemented in the Animal Husbandry sector with a view to uplift the weaker section of the society. Help the unemployed youth to gain self-employment. Various training offered by the department are dairy farming, goat farming, duck farming, pig farming, broiler production, layer management, backyard poultry production, quail farming, chick sexing etc.

The department is also conducting Integrated Sample Survey for estimation of production of major livestock products viz., milk, egg and meat annually and Quinquennial Livestock Census.

According to 2003 Livestock Census, the Cattle population in the State was 2122 thousands out of which 1735 thousands were Crossbred. The population of Buffaloes and Goats were 65 thousands and 1213 thousands respectively. The Poultry Population in the State is 12216 thousands.

CHAPTER - III

ANALYSIS OF INTEGRATED SAMPLE SURVEY RESULTS FOR THE YEAR

The Government implements various development programmes in the Livestock Sector through the Department of Animal Husbandry envisaging both qualitative and quantitative improvement in the sector. The success and impact of such programmes could be assessed to a great extent by conducting Sample Surveys. The Integrated Sample Survey for estimation of major livestock products viz. milk, egg and meat is being conducted in the state regularly since 1977-78.

Coverage and Period of Survey

The Survey is conducted in all the district of the state on a seasonal basis. A year is divided into 3 seasons as per the specification below:

Summer Season:	1 st March to 30 th June
Rainy Season:	1 st July to 31 st October
Winter Season:	1 st November to 28 th / 29 th February

METHODOLOGY

A Stratified multistage random Sampling design is adopted for the sample survey. The primary stage unit of sampling is the Panchayat ward. The secondary stage unit is the households in the selected ward. The animal / bird in the selected households forms the ultimate unit of sampling. The districts form the strata.

A large sample, which comes to 15% of the total number of rural / urban wards in the state is selected at random for complete enumeration. These 15% sample wards are allocated to different districts in proportion to the population as per the latest live stock census. One third of this will be covered in each season. From these wards selected for complete enumeration, 25% wards are again selected for detailed study. Based on the primary data collected from the wards, districtwise estimates are prepared for each season. By pooling district wise estimates, the state level estimates for each season is obtained. The annual estimates are reached at by pooling the three Seasonal estimates.

From the households possessing in milk bovine / goats and laying birds, the households for detailed study are selected in the following pattern:

Milk	(a) Bovine	: 2 clusters of 2 households for the first round; 4 clusters of 2 households for the 2 nd , 3 rd and 4 th rounds.
	(b) Goat	: One cluster of 5 households for each of the 4 rounds.
Egg		: 2 clusters of 5 households for the first round and 4 clusters of 5 households each for the 2 nd , 3rd and 4 th rounds.
Meat		: 2 registered slaughterhouses in each round in each ward.

Thus 28 households having in milk bovines and 20 households having in milk goats are selected for collecting the milk-yield data in a season. 70 households having poultry layers are selected for collecting egg - yield data. The milk yield in both morning and evening of the milking animals and eggs laid by all the poultry layers during the 24 hours prior to the enumerators visiting there are collected. The number of birds slaughtered in the households and the quantity of meat produced are also collected. The meat production from the broiler farms is also being accounted for the estimates of annual meat production in the state.

Machinery in the Survey

The sample survey is conducted under the administrative control of the Director of Animal Husbandry. The Joint Director (Statistics), attached to the Directorate of Animal Husbandry is in overall charge of the survey. The details of staff position under the scheme is given below :

<i>Sl.No.</i>	<i>Designation</i>	<i>Scale of Pay</i>	<i>Number</i>
A. At Headquarters			
1.	Joint Director	16650 - 23200	1
2.	Research Officer	11070 - 18450	2
3.	U.D. Compiler	6680 - 10790	6
4.	L.D. Compiler	5250 - 7990	3
5.	L.D. Clerk	5250 - 7990	1
6.	Confidential Assistant	7990 - 12930	1
7.	Typist	5250 - 7990	1
8.	Peon	4630 - 7000	2
B. At Field Level			
1.	Field Supervisor/Officer (Selection Grade Livestock Inspector)	10790 - 18000	3
2.	Enumerators (Live Stock Inspector Grade -II)	5930 - 9590	26

The complete enumeration in the selected wards is being done utilizing the part time service of Live Stock Inspectors of the Department of Animal Husbandry. Since they perform this work in addition to their normal duties, they are paid honorarium for the enumeration work. The enumerators who are posted exclusively for the purpose carry out the detailed study. Further one data entry operator each has been posted at the district headquarters.

The three Field Officers/Supervisors are posted with Headquarters at Thiruvananthapuram, Ernakulam and Kozhikode. The Field Officer at Thiruvananthapuram supervises the fieldwork in the four district viz. Thiruvananthapuram, Kollam, Pathanamthitta and Kottayam. The Field Officer attached to the District Animal Husbandry Office, Ernakulam oversees the fieldwork in the four districts viz. Ernakulam, Thrissur, Alappuzha and Idukki. The fieldwork in the remaining six Northern districts is supervised by the field officer wise headquarters at Kozhikode.

The Joint Director (Statistics) and Research Officers conduct statewide Field Inspections to ensure the quality of field data. Besides, the District Animal Husbandry Officers, Deputy Directors and Veterinary Surgeons also do conduct random check of the fieldwork.

Schedules Prescribed for the Survey

The various types of schedules used for the survey are listed below:

1. Village Schedule 1 : General Information relating to the selected Panchayath / Municipality.
2. Village Schedule 2 : Ward wise details of houses and households in the Panchayath / Municipality.

3. Village Schedule 2(A) : Listing of Livestock and Poultry In the households in the selected wards.
4. Schedule LPS 1.1 : Selection of clusters of households for detailed study
5. Schedule LPS 1.2(A) : Yield of milk in sample households and attendant practices
6. Schedule LPS 1.2(B) : Feed consumption by animal on the day of visit
7. Schedule LPS 1.2(C) : Milk yield on the day of visit from each animal
8. Schedule LPS 1.2(D) : Production and disposal of milk and milk products on the day of visit.
9. Schedule LPS 1.2(E) : Utilisation of dung / dropping collected within the premises on the day of visit.
10. Schedule LPS 1.3 : Production purchase, disposal of egg and feed supply and disposal of poultry.
11. Schedule LPS 1.4 : Egg Production and attendant practices in the commercial Poultry farms.
12. Schedule LPS 1.4(A) : Broiler production and attendant practice in the commercial poultry farms.
13. Schedule LPS 2.1(A) : Information on yield of meat from slaughter houses / butcher on the day of visit
14. Schedule LPS 2.1(B) : Details of animals slaughtered on the day of visit.

Types of data collected in the Survey

The detailed information regarding Milk, Egg and Meat Production was collected from the selected households of selected wards.

The information collected in respect of milk production as follows :

1. Milk yield of selected animals on the day of visit both morning and evening.
2. Feed consumption of animals on the day of visit.
3. Particulars of animals such as number of lactations completed etc.
4. Productions and utilization of milk products on the previous day of visit.
5. Collection and utilization of dung in the premise.

The information collected regarding Poultry as follows:

1. Production, purchase and utilization of eggs during the previous day of visit.
2. Feed supply and disposal of birds.
3. Particulars of desi / improved birds.

The information collected regarding Meat as follows:

1. Animals of different species slaughtered in selected slaughterhouses.
2. Details of animals slaughtered.
3. Average quantity of meat obtained per animal of different species.
4. Number of animals slaughtered in the premises of households and sold for slaughter during the last calendar month of the visit.

Overall 2007-08	7069	10237	1013	1393	8082	11630	123	178	4624	7334
2006-07	6950	9707	1024	1409	7974	11116	131	182	3902	5985
% Variation	1.70	5.45	-1.07	-1.13	1.35	4.62	-6.10	-2.10	18.50	22.50

The estimated population of crossbreed in milk cows in the State under report was 7.06 lakhs and that of indigenous cows was 1.01 lakhs. It shows an increase of 1.70 and a decrease of 1.07 percentage respectively. During the year under report, the crossbreed milch and indigenous milch animals were 10.23 lakhs and 1.39 lakhs respectively. From the table it can also be seen that the estimated number of in milk and milch animals in the state during the year was 8.08 and 11.63 lakhs respectively. In the case of buffalo population there is a decrease of 6.10 and 2.10 percentages. Where as in the case of goat there is an increase of 18.5 and 22.5 percentages compared to 2006-07.

**AVERAGE MILK YIELD PER DAY PER ANIMAL IN MILK IN KERALA
DURING THE YEAR 2007-08**

(in Kgs)

Season	Cows		Buffaloes		Goats	
	Crossbreed	Indigenous				
Summer	7.788	2.600		6.006		0.552
Rainy	7.925	2.683		6.141		0.587
Winter	7.831	2.670		6.093		0.581
Overall 2007-08	7.848	2.651		6.080		0.573
2006-07	7.508	2.627		6.240		0.606
% Variation	4.52	0.91		-2.56		-5.44

From the table it can be seen that the average yield per day of crossbreed cow in milk was 7.848 Kgs. And that of Indigenous cow was 2.651 Kgs. In the case of buffalo and goat the yield rate was 6.080 Kgs. and 0.573 Kgs respectively. It seen that there is slight increase of all categories of animals.

TOTAL MILK PRODUCTION IN KERALA DURING THE YEAR 2007-08

Season	Cows			Buffaloes	Goat	G.Total
	Crossbreed	Indigenous	Total			
Summer	655.553	31.575	687.128	9.360	29.241	725.729

Estimated Milk Production for the last 18 years

Egg Production**NUMBER OF WARDS AND HOUSEHOLD OBSERVED FOR EGG PRODUCTION IN KERALA DURING THE YEAR 2007-08**

Season	No. of wards covered	No. of households covered	Number of layers observed	
			Desi	Improved
Summer	140	6030	10988	9694
Rainy	139	5786	11729	9725
Winter	140	5385	10700	8113
Total	419	17201	33417	27532

During the period under report 17201 household were observed from 419 wards and 61849 layers were observed.

ESTIMATED NUMBER OF LAYERS IN KERALA DURING THE YEAR 2007-08

(In '00's)

Season	Fowl			Duck		
	Desi	Improved	Total	Desi	Improved	Total
Summer	49940	23032	72972	4263	1691	5954
Rainy	50983	24557	75540	3998	1719	5717
Winter	50269	25883	76152	4013	1737	5750
Total 2007-08	50410	24491	74888	4091	1716	5807
Total 2006-07	49319	20165	69484	4528	1425	5953
% Variation	2.21	2.15	7.77	-10	20.42	-2.45

The population of layers was estimated both for Desi and improved. During the year under report number of fowl was 74.88 lakhs and duck was 5.80 lakhs.

SEASONWISE AVERAGE EGG YIELD PER LAYER DURING THE YEAR 2007-08

Season	Fowl		Duck	
	Desi	Improved	Desi	Improved
Summer	48	73	52	60
Rainy	50	72	52	64
Winter	51	72	48	62
Total 2007-08	149	217	152	186
Total 2006-07	134	220	155	181
% Variation	11.19	-1.36	-1.9	2.76

During the year under report average yield per desi and improved fowl was 149 and 217 and that of duck was 152 and 186. The yield rate of fowl desi and duck improved are decreased.

TOTAL EGG PRODUCTION IN KERALA DURING THE YEAR 2007-08

(lakh Nos.)

Season	Fowl			Duck			Total
	Desi	Improved	Total	Desi	Improved	Total	
Summer	2426.620	1648.735	4075.355	213.379	97.826	311.205	4386.560
Rainy	2600.511	1816.831	4417.342	206.878	110.947	317.825	4735.167
Winter	2499.551	1858.663	4358.214	201.579	110.288	311.867	4670.081
Total 2007-08	7526.682	5324.229	12850.911	621.836	319.061	940.897	13791.808
Total 2006-07	6596.113	4433.699	11029.812	699.856	257.24	957.096	11986.908
% Variation	14.10	20.08	16.51	-11.14	24.03	-1.69	15.05

From the table it is clear that the total egg production in the State during the year was 13791.808 lakhs. It shows an increase of 15.05%.

Estimated Egg Production for the last 18 years

MEAT PRODUCTION

The number of animals slaughtered and the meat production given in this report are based on the data collected from the registered and unregistered slaughter houses functioning in the state. The slaughtering of animals in households is not common in Kerala. The precise statistics of animals slaughtered and hence that of the meat production in the unauthorized sector is not accurate. However, it is estimated that a considerable amount of the meat production in the State is from unauthorized sector.

ESTIMATED NUMBER OF ANIMALS SLAUGHTERED AND MEAT PRODUCTION IN THE STATE DURING THE YEAR 2007-08

<i>Species</i>	<i>No. of animals slaughtered</i>	<i>Total Meat production (MT)</i>
Cattle	536257	28026
Buffalo	447098	23575
Goat & Sheep	578557	5119
Pigs	79509	3473
Total for 2007-08	1641421	60193
Total 2006-07	1683909	60114
% of variation	-2.5	+0.13
Poultry	10197000	17390

From the table it can be seen that the meat production in the State during the year is 60193 MT. which shows an increase of 0.13% from the previous year. But the number of animals slaughtered was decreased from the previous year. This is because of a decrease in the number of young animals. The poultry meat production in the State during the year was 17390 MT.

MEAT PRODUCTION FOR THE LAST 18 YEARS

CHAPTER- IV**UTILISATION OF MILK & EGG**

Not only the data on production of milk and egg in the selected households but the particulars of the utilisation also were collected during the survey. A brief abstract of the utilisation practice is given below :

Table 4.1 : Utilization of Milk

Items	Season			Total
	Summer	Rainy	Winter	
Milk produced in the selected households (Kg.)	25588	23736	22905	72229
Quantity Sold (Kg.)	20487	18871	15631	54989
Average rate of Selling (Rs./Kg.)	15	15.75	15.45	15.4
Converted into Milk Products (Kg.)	786	1064	861	2711
Consumed at home (Kg.)	4315	3801	6413	14529

Table 4.2 : Utilisation of Eggs

Items	Season			Total	
	Summer	Rainy	Winter		
Egg produced in the selected house holds (Nos.)	14385	13947	11909	40241	
Purchased (Nos.)	758	492	553	1803	
Average rate of purchase (Rs./dozen)	Brown White	35.3 19.62	36.53 25.04	37.02 25.75	36.28 23.47
Sold Nos.		3000	3146	2030	8176
Average rate of Selling (Rs./dozen)	Brown White	32.84 15	33.75 18	33.66 22.20	33.42 18.40
Consumed at home (Nos.)		11090	10534	9415	31039
Kept for hatching (Nos.)		377	510	491	378
Damaged		37	53	51	141

FEEDING PRACTICES :**Table 4.3 : Breedwise Consumption of Feeds**

<i>Sl. No.</i>	<i>Breed</i>	<i>Green Fodder (Kg./Animal)</i>	<i>Dry fodder (Kg./Animal)</i>	<i>Concentrate (Kg./Animal)</i>
1	Cattle : Indigenous			
	Inmilk	5.600	3.050	1.750
	Dry	3.950	2.100	1.150
	Young	2.400	1.050	0.375
2	Cattle : Crossbreed			
	Inmilk	8.650	4.100	3.200
	Dry	5.200	3.050	1.800
	Young	2.800	1.700	0.700
3	Buffalo :			
	Inmilk	8.650	4.200	3.350
	Dry	5.000	3.250	2.100
	Young	2.650	1.350	0.800
4	Goat :			
	Inmilk			
	Young	1.750	...	0.440
		0.700	...	0.300

Table 4.4 : Production of Dung and its Utilisation**Table 4.4 : Production of Dung and its Utilisation**

SI.No	Items / Particulars	Summer	Rainy	Winter	Overall
1	Total No. of animals observed	3802	4027	3918	11747
2	Total Dung Collected (Kg)	36200	36833	38500	111533
3	Average quantity of dung/animal/day (Kg)	9.391	9.146	9.826	9.454
4	Dung utilised for dung cake (%)	0.21	0.20	0.10	0.17
5	Dung utilised for Mannure (%)	76.03	75.06	72.64	74.58
6	Dung utilised for other purpose (%)	23.76	24.74	27.26	25.25

APPENDIX**Table A. 1 : Per capita per day availability of milk**

Year	Cow milk (gm)	Buffalo milk (gm)	Goat milk (gm)	Total milk (gm)	Human Population (lakh)*
2006-07	163	2	7	172	336
2007-08	171	2	7	180	340

Table A. 2 : Per capita availability of egg per annum

Year	Human Population (lakh)*	Total Egg production (Millions)	Per capita availability per year
2006-07	336	1199	36
2007-08	340	1379	40

*Projected Figure

Table A. 3 : Per capita consumption of egg per year

Year	Human Population (lakh)	Total Egg Production (Millions)	Import (Millions)	Export (Millions)	Total availability (Millions)	Per capita Consumption per year (Nos.)
2006-07	336	1199	1044	Nil	2243	61
2007-08	340	1379	1009	9	2379	70

Table A. 4 : Per capita per day availability of meat

Year	Human Population (lakh)*	Production of meat (in Million Tonnes)			Per capita availability per day (gm)
		Animal (Authorised Sector)	Poultry	Total	
2006-07	336	59997	16184	76181	17.62
2007-08	340	60193	17390	77583	18.75

*Projected figure

*The per capita availability has been worked out on the presumption that total meat production in the state is thrice the production in the authorised sector.

Table A. 5 : Percentage of animals in milk according to order of lactation

Year	Breed	1 st	2 nd	3 rd	4 th & above	Total
2007-08	Cow ND	14.95	36.30	34.56	14.19	100.00
	Cow CB	9.66	30.65	32.85	26.84	100.00
	Buffalo	4.55	37.88	36.36	21.3	100.00

Table A. 6 : Percentage of Animals according to stages of lactation

Year	Breed	Less than 3 months	3 to 5 months	6 to 9 months	10 months & above	Total
2007-08	Cow ND	32.62	38.25	22.33	6.80	100.00
	Cow CB	26.90	43.08	24.12	5.91	100.00
	Buffalo	18.18	33.33	34.85	13.64	100.00
