REPORT ON MARKET ARRIVALS FOR THE YEAR 2012

The collection of Prices is one of the major items of work undertaken by the Department of Economics and Statistics. The importance and utility of the information pertaining to the Price movements affect all sectors of the economy. Both the scope and coverage of this Price Collection have undergone many changes and it is the responsibility of the department to produce qualitative data on prices.

A Scheme for the improvement of market intelligence was implemented in the second five year plan and continued for obtaining necessary market intelligence from all over the state. These data are rapidly processed, analysed and presented in an appropriate manner so as to enable the Government to keep a watch over the changing price situation and to assist the producers in securing fair Prices. These data are also used for planning purposes and taking policy decision.

The market arrivals include arrivals from villagers and also from other markets. Market arrivals from villages include the quantities brought by the farmers as well as the quantities brought by Village merchants or commission agents etc. The arrivals from other markets include the quantities arrived in a wholesale market from any other wholesale market. From the market arrivals, outgoing quantities are the quantities which go outside the wholesale market either for sale in the retail market for local sale or for despatch to outside market.

The present report contains market arrivals in different centres of the state for the year 2012.
